Due to lmtd coverage VOR courses, use of temp MEAs and routing as follows: V16 GHM VOR to BNA LFR via BHM 066° MEA 3000'; V16 BNA LFR direct Smithville VHF Int. via CSV 284° MEA 3500'; V16 Smithville Int. to CSV VOR via CSV 284° MEA 5000'. V-140 DYR VOR to McEwen Int. via DYR 083° MEA 5000'; V140 McEwen Int. to BNA VOR via BNA 266° MEA 3500'. Min hold alt at McEwen 3500'; V140 BNA VOR to Hartsville Int. via BNA 056° MEA 3500'; V140 Hartsville Int. to Highway Int. via BNA 056° MEA 7000'; V7 BNA LFR to Lewisburg Int. MEA 3000'. (2-28)

NASHVILLE-BERRY FLD-TOWER: Effect. Oct 1, apch ctl will utilize radar procedures to effect ctl and separation of arriving tfc destined for Berry Fld. Normal inbound clearance limits for acft prior to radar ctl will be as follows: BWG VOR, GHM VOR, Murfreesboro Int., McEwen Int, Springfield Int., Greenbrier Int., SMV H fac, Smithville Int, Hartsville Int., Watervalley Int, Springhill Int, and BNA LFR. (8-31) FLD: Taxiway between ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy-use as a taxiway. (12-28)

TRI-CITY ARPT-TOWER: ILS glide slope usable for apchs to MM only. (7-29)

UNION CITY-TOM STEWART ARPT: Two antenna poles under const 1500' E of N/S rnwy, 60' AGL, 400'AMSL. Will be marked and lighted. (9-25)

TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

ABILENE-HUGHES ARPT: Closed to all transient tfc. (9-26)

ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 statute miles out. (8-27) FLD: Neon apch lgt system removed due const. (6-24)

AUSTIN-BERGSTROM AFB-RADAR APPROACH CONTROL: Effect. Nov 22, apch control will implement radar arrival control procedures. Radar separation standard will be applied as specified in the MANOP radar procedures for arpt tfc ctl twrs. Arriving acft will be normally be cleared to the following fixes: Round Rock, Butler, Bergstrom, Manchaca, Oak Hill, Lake Travis, Austin VOR, Austin H fac, Bergstrom H fac and Austin ILS LOM. (9-26)

AUSTIN-MUELLER ARPT-TOWER: April 15, ILS MM shut down- relctn. During this period, ILS landing minimum rnwy 30 left raised to 300-1. (4-11) FLD: Acft lndg and taking off are cautioned to avoid Bergstrom AFB tfc pat.- exten jet opern all alt. Neon apch lgt sys inop. Unlgtd obstruction on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green range lgts on rnwy 30 designate touchdown point ngts. (10-4) Const in progress 1100' SE of advertised touchdown point on rnwy 30L. (5-7)

✱BEAUMONT-JEFFERSON CO. ARPT-TOWER: ILS glide angle 2.65°. (9-19) FLD: Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13) Const with men & equip in clear zone NW of arpt and apch end rnwy 11. (9-13)

BIG SPRING-SPECIAL NOTICE: Acft operg in vicinity of Big Spring range and Webb AFB in VFR wea exercise extreme caution due to intensive jet tfc. Alt below 5,000' saturated on Arwy Green 5 and V-16. (4-22)

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

**BOWIE MUN ARPT: New Field. Type: P. Lat 33-34, long. 97-50. Lctn: 1 mi NE. Elev: 800'. No. of rnwys: 3. Lngst rnwy & facs: 25-S3. Fuel: 80. Remarks: P-line E. Hill W. Use strips. Cattle, const on field. N rough. (6-14)

BROWNSVILLE-RADIO: About Nov 1, VOR will be shut down until approx Feb 1 - conversion to VORTAC. (9-23)

CLARENDON-RADIO: About October 24, LF range will be permanently decommissioned.

COLLEGE STATION-RADIO: DME coverage 60°-90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

**DALLARDSVILLE-BIG SANDY ARPT: No facilities. Emerg use only. Land at own risk.

DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21) About Oct 24, Waxahachie and Duncanville FMs will be perm decmsnd. (9-21)

DALLAS-ADDISON ARPT: New arpt reported. 32-58N, 96-49W; elev 644'; rnwys 2, longest 4500' asphalt surface; Fuel F4; Facs S-5; Lighting BL4; Attended 24 hours. (9-8)

TEXAS: DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000' MSL or below make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flight plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other avail freq and ctc Love Twr. Formation tk-offs not permitted. Caution-acft often hidden from ctl twr view by bldg 250' NNE of twr when at altitudes of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lighted. Ctc control twr for detailed taxi-instructions. (11-14)

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat on entry and one cross wind leg to 90° after-take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000' MSL or 1000' above terrain; lgt acft no higher than 4500' MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-offs prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip. avail.

EL PASO-BIGGS AFB-RADAR APPROACH CONTROL: About Nov 1, RAPCON will be cmsnd. Trans & rcvg: 118.1, 118.7, 119.1, 121.5, 126.18, 134.1, 136.8, 137.88, 138.42, 142.02, 236.6, 243.0, 270.6, 289.4, 335.8, 363.8 mc. Trans only: 114.5; rcvg only: 122.7, 3023.5 kc. IFF operg but not cmsnd. (9-26)

FORT STOCKTON-RADIO: About Nov. 1, VOR will be shut down until approx Feb. 1, conversion to VORTAC. (9-23)

FORT WORTH-RADIO: About Nov. 1, VOR will be shut down until approx. Feb. 1 - conversion to VORTAC. (9-23)

FORT WORTH-CARTER FLD-TOWER: About Oct. 30, trans & rcvr 120.7 mc will be changed to 118.9 mc. Freq 123.9 mc will be cmsnd. (9-30) FLD: Until about Oct 13, paving equip. operg in rnwy extension area SE of rnwy 13-31. Equip. is 19' high, flagged days & lgtd ngts. Rnwy will be clsd to NW lndgs periodically when equip. is adj to rnwy end.

FORT WORTH-MEACHAM FLD-TOWER: June 3, ILS lclzr and glide slope shut down until approx. Oct. 4. Effect. Oct. 6, twr hrs of opern: 0700-2300. (9-26)

FT WORTH-SAGINAW ARPT: First 300' rnwy 36 not usable acct p-line not yet removed.

GREENVILLE-MAJORS ARPT: All rnwys clsd xcpt 17R-35L due men & equip. working during daylgt hrs. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Ngt lndgs not advisable. (8-13)

HARLINGEN-HARVEY RICHARDS ARPT: 994'(1049'MSL) lgtd twr being erected 5 n mi SW(225°T) at lat 26-08-56, long. 97-49-18. (7-20)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained durg normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120° thru 140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized utilizing GLS 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney, Cypress and Fairbanks Ints, remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling minimums. Ceiling less than 500 and visibility of less than one mile not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial. (2-26)

HOUSTON-CLOVER ARPT: Caution on lndgs and takeoffs. 80'(AGL) oil derricks erected on arpt and adj to boundaries. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

HOUSTON INTNL ARPT: Tetrahedron replaced by lgtd wind sock lctd at former tetrahedron lctn. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26: opened for tk-offs to E only; no lndgs. (3-11) Old apch lgt system changed to new centerline system, configuration A, to ILS rnwy. Flight checked and opern normal. (9-12)

JEFFERSON-CYPRESS RIVER ARPT: Rough - use extreme caution. (4-25)

TEXAS: KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx. 1.7 n mi ESE below 3000'-photo flash explosions daily 0700-1700 . (11-3)

KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)

LAREDO-SPECIAL NOTICE: Acft operg around Laredo LFR and/or VOR or Laredo AFB. should exercise extreme caution due to intensive jet tfc. Recommended arrivals and departures to Laredo Mun Arpt are NW or SE along Rio Grande for at least 15 mi prior to arriving over arpt or prior to departing on course. (8-3)

LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4) Due non-visibility twr unable to ctl tfc on taxiway from N hangar to rnwy 13. (9-13)

LUBBOCK ARPT-TOWER: May 4, ILS glide slope shut down until approx. Nov. 1. (8-1) August 29, MM and LMM shut down until approx. Nov. 1. (8-29) FLD: N 1000' rnwy 17-35 clsd to all acft until about Oct. 15, for major const and extension of rnwy. Rnwy 17 threshold lgts moved 1000' S. Men and hvy equip. working during daylgt hrs in apch zone rnwy 17 and parallel to the rnwy on W side from rnwy 12 N. Rnwy 17-35 clsd to Convair and larger acft during const period xcpt during IFR wea conditions or with N or S winds of 20 knots or more. (9-26)

LUFKIN-RADIO: DME coverage: 017°, 2400' 34 n mi; 032°, 2400' 35 n mi; 090°, 2000', 20 n mi; 170°, 1600' 40 n mi; 190°, 1600' 40 n mi; 310°, 2500' 25 n mi. (5-8)

LUFKIN-ANGELINA CO. ARPT: Sod strip clsd. Use hard surface rnwy only. (8-22)

MARFA-RADIO: Auto rebroadcast feature cmsnd. Rcvg 122.1, 126.7, 135.9, 255.4 mc.

MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld will be opened as acft will be given priority. (4-17)

**McALLEN-MILLER INTNL ARPT: 165'(300'MSL) lgtd drilling derrick erected 7.9 n mi W (282°T) at lat 26-12-20, long. 98-22-30. (8-22) Rnwy 18 clsd for take-offs and lndgs.

MIDLAND-RADIO: About Oct. 14, VOR will be shut down until approx. Oct. 28 - modern.

MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)

MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300'MSL. (6-15)

**NACOGDOCHES-DEL RENTZEL ARPT: 148'(498'MSL) lgtd drilling derrick erected 2.5 n mi S(200°T) at lat 31-32-00, long. 94-43-00. (9-11)

**ODESSA-ECTOR COUNTY ARPT: 500'(3444'MSL) lgtd twr erected 5.5 n mi SSW(220°T) at lat 31-50-50, long. 102-27-15. (9-19) Rnwy 7-25 closed. (5-16)

**PECOS ARPT: 78'(2695'MSL) twr erected 1.9 n mi SSE(174°T) at lat 31-22-00, long. 103-31-00 removed. (9-16)

PORTLAND-HUNT ARPT: 172'MSL lgtd drilling derrick being erected 5 n mi ESE(113°T) at lat 27-51-46, long. 97-15-41. (9-18)

ROCKPORT-ARANSAS CO. ARPT: Caution-oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)

SALT FLAT-RADIO: VOR radials 25° clockwise 045° unusable beyond 35 n mi. DME unusable 025° to 045° beyond 35 n mi at MEA 10,800'.

**SAN ANGELO-MATHIS FLD: 130' drilling derrick erected 2.5 n mi E has been removed.

SAN ANTONIO-RADIO: About Nov. 1, VOR will be shut down until approx. Feb. 1 - conversion to VORTAC. (9-23)

SAN MARCOS ARPT: NE/SW strip rough - caution. (8-6)

TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hours on Green Arwy #5 approx. 13.4 n mi WSE of Texarkana LF rng.

TILDEN-TRUE RANCH ARPT: New arpt reported: 28-18N, 98-36W; lctd 11-1/2 mi SSW; 1 strip (NW/SE) sod, 4000'; elev 320' MSL. (7-10)

UVALDE-LEONA RANCH STRIP: New lndg area reported: lctd 35 n mi NW; lat 29-30, long. 100-22; elev 1720'; 1 strip- 2800' long. (1-28)

WACO-RADIO: DME coverage 190°-290°, 35 n mi at 2300'; 290°-190°, 43 n mi at 2300'. Coverage over Restricted Areas 219 and 443 not certified.

WACO ARPT: Caution - men & equip. on fld 0800-1700C every Friday. (7-31)

WEATHERFORD-GAARE ARPT: Closed until further notice. (7-9)

WINK-RADIO: About Oct. 28, VOR will be shut down for modernization. (8-23)

UTAH: BLANDING ARPT: Closed until about September 19 due construction. (7-19)

BONNEVILLE-RADIO: DME coverage 295°-350°, 35 n mi at 12,000'.

BRYCE CANYON-RADIO: VOR has light roughness below 13,000'. Aug 21, VOR shut down until approx Oct. 11, - modification. Durg this period the following arwys will be affected: V8 MMM-HVE MEA 16,000'. V8S MMM-HVE unusable. Bryce Canyon compulsory reporting point temp redesignated as MMM 043 mag radial; HVE 225 mag radial; MLF 124 mag radial. (9-17)

DELTA-RADIO: VOR coverage 40°-80°& 100°-135°, 35 n mi at 11,000'. DME coverage 40°-90°, 26 n mi at 13,000'.

UTAH: LUCIN-RADIO: VOR usable dist at min IFR terrain clearance alt 280° to 300°, 35 n mi; 350°-30° and 180°-220°, 25 n mi. (11-26)

MILFORD-RADIO: VOR coverage 20°-140°, 22 n mi; 235°-330°, 35 n mi at MEA. (1-2) About Oct 7, VOR will be shut down until approx Jan 15, 1958 - conversion to VORTAC. Durg this period the following arwys will be affected: V21 between MMM-DTA, V21W between MMM and DTA will be unusable. (9-26)

**MILFORD ARPT, 45, LAX-SLC: Fld unsuitable for acft over 12,500 lbs. (3-13)

OGDEN-RADIO: VOR coverage 5°-120°, 30 n mi at 11,000'. DME coverage 360°-150°, 17 n mi at 12,000'.

PRICE-CARBON CO. ARPT: NE/SW rnwy clsd - const. (11-1)

SALT LAKE CITY-RADIO: VOR course scalloping prevalent between 290°-350°. Coverage this area 17 n mi at 6500' MSL; 30 n mi at 11,000' MSL. Coverage 10°-135°, 22 n mi at min terrain clearance alt. DME coverage 20°-140°, 17 n mi at 13,000' MSL; 180°-235°, 35 n mi at 12,000' MSL; 340°-20°, 26 n mi at 12,000' MSL. (8-10)

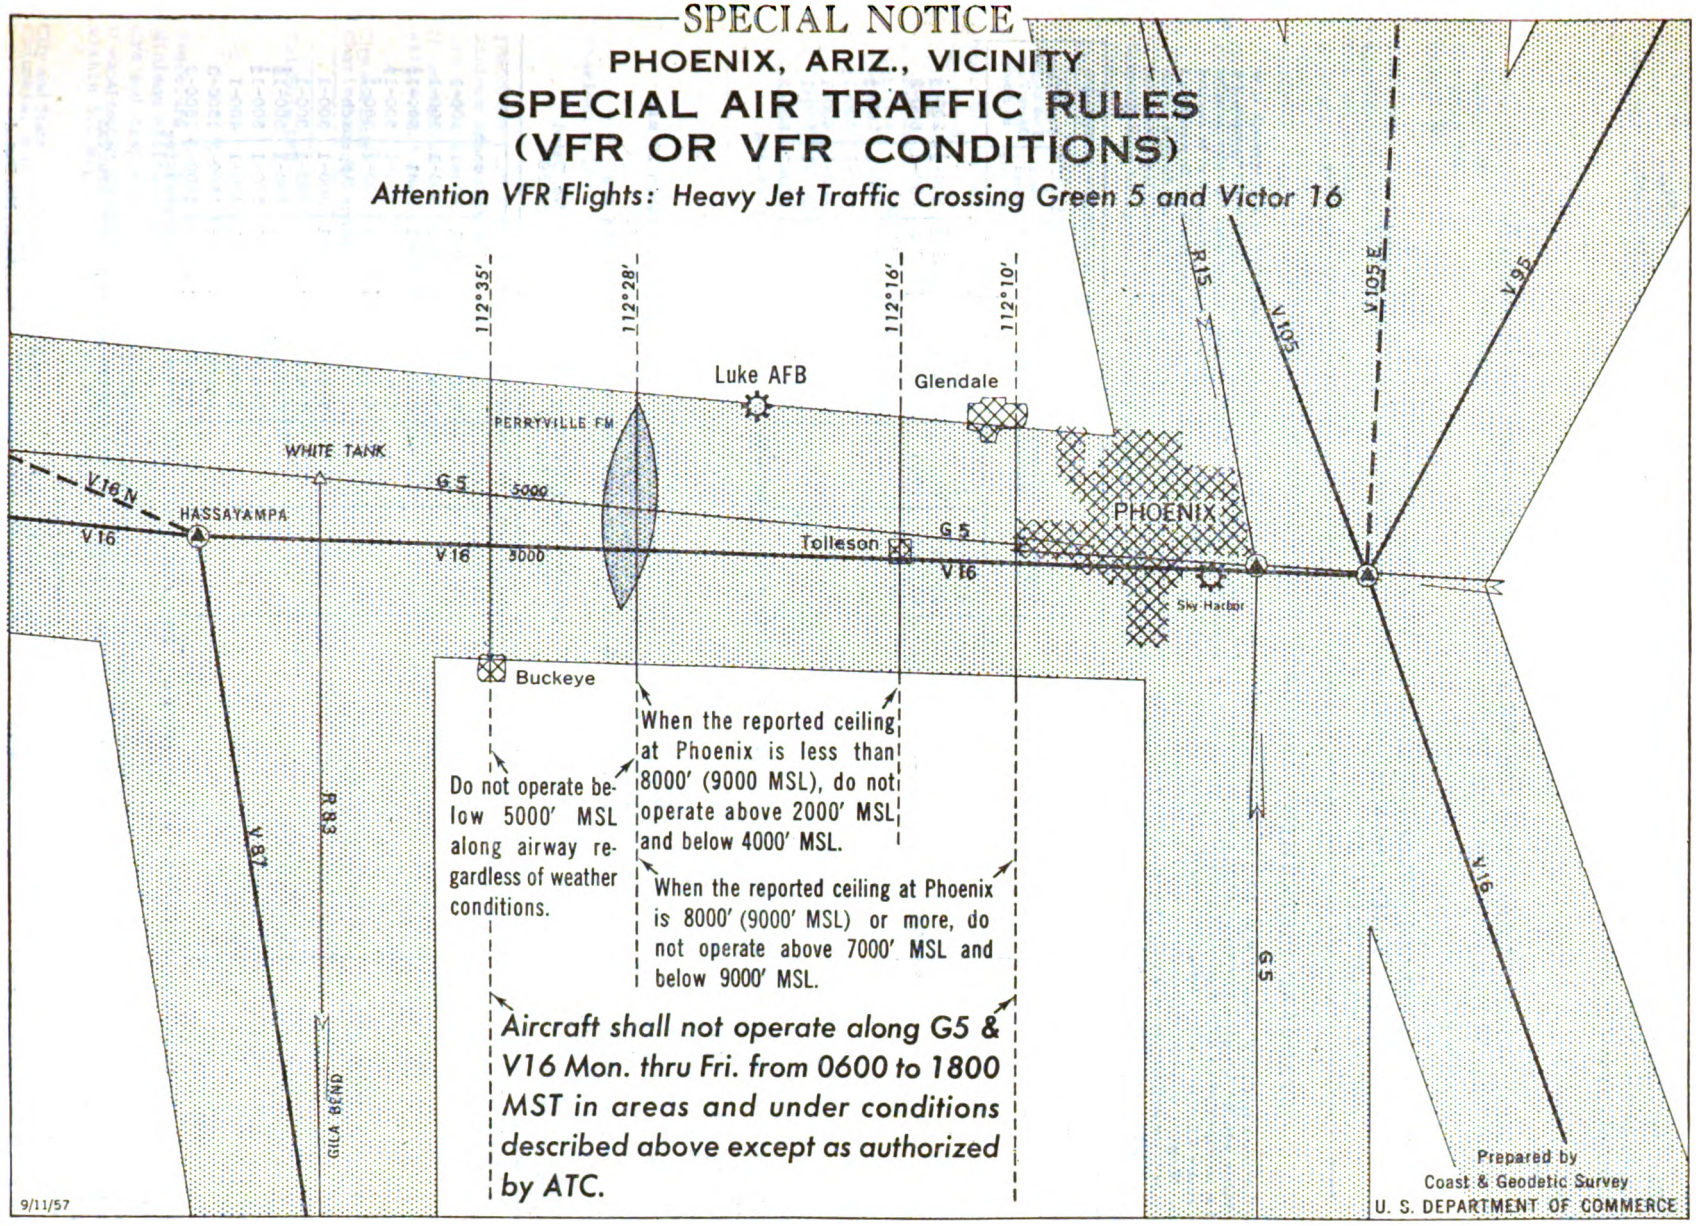
PUERTO RICO: SAN JUAN-RADIO: Sept 28, LFR shut down, use as homing fac only until approx Oct 19. (9-30)

SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip on hangar ramp. (4-12)

SAN JUAN-PUERTO RICO INTNL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7) Lgtd temp steel twr, 110'MSL, lctd approx 3500' off N bndry rnwy 7-25. (5-20)



(1 October 1957)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

FORT WORTH, TEXAS-AMON CARTER FLD:-Procedure Number ILS-13, Amdt. 6, Effect. 26 Sept. 57: Correct superseded date to read "10 Oct. 56" in lieu of "10 Oct. 57".

HOUSTON, TEXAS-INTERNATIONAL ARPT, VOR Procedure Number 1, Amdt. 3, Effect. 26 Oct. 57: Correct superseded date to read "20 April 56" (Commissioning date), in lieu of "22 Oct. 55".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
* = Automatic voice identification
■ Information deleted.

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR .... Air Route Surveillance Radar
B ..... Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C ..... Control Tower, CAA
CI ..... Control Tower, (City, County, Private, etc.)
CM..... Control Tower, (Military, listing only civil frequencies available)
D ..... Distantly controlled
DME..... Distance Measuring Equipment
FM..... VHF fan marker (100 watts)
GCA.... Ground Controlled approach system
H..... Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH..... Non-directional radio beacon (homing), power 2000 watts or more
ILS.... Instrument Landing System (voice on localizer channel)
J..... L/MF (200-415 kc) voice facility on other than range frequency
LFM.... VHF fan marker, low powered (5 watts)
LMM.... Compass locator station when installed at middle marker site
LOM.... Compass locator when installed at outer marker site
LVOR... Low power VOR (with standby equipment)
MH..... Non-directional radio beacon (homing) power less than 50 watts
ML..... Range (loop radiators), power less than 50 watts
MM..... VHF middle marker
MRA.... Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL.... Range (loop radiators), power 50 or more, but less than 150 watts
OM..... VHF outer marker
P..... Point-to-Point radio
RA..... Range (adcock, vertical radiators), power 150 watts or more
RAPCON . Radar Approach Control
RL..... Range (loop radiators), power 150 watts or more
S..... Simultaneous range, homing signals and voice.
T..... Teletype
TVOR.... Low power VOR (no standby equipment) located on airport
TX..... Principal teletype
V..... Additional VHF voice feature on other than range frequency
VAR.... Visual-aural VHF range
VOR.... VHF omni-directional range (omni-range)
W..... Without voice facilities on range frequency
Z..... VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 35 cents.

RADAR AVAILABLE: How and Where

(15 October 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach (Military Equivalent of Combined ASR and PAR Equipment) ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control (RAPCON), page 4. For ATCRBS see note page 4.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: See Page 4.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded. Other transmitting frequencies listed are guarded plus 3023.5kc:122.5 mc, unless 122.7 mc is shown under Remarks. Transmit and guard 121.5 mc all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous weather by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
"STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____), IFR (or) VFR FLIGHT PLAN, OVER"
The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.
(a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.
(b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE"

2. The radar director will answer the "STARGAZER" call:
"(aircraft identification) THIS IS (name of radar site), (instructions)"
The instructions will normally consist of one of the following:
(a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)
(b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).
(c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).
(d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).
(e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE -SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
(a) radio contact with the director is lost.
(b) notified by the radar director that radar contact has been lost.
(c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

RADAR BEACONS - (continued from page 3)

ATCRBS - Air traffic control radar beacon transponders (ATC transponders) are being installed in some civil aircraft to participate in the forth-coming in-service evaluation of this beacon system. Since the ATC transponder can be used with Mode 3 of the IFF Mark X system, the following will govern the operation of the ATC transponder in order to reduce interference and clutter on IFF Mark X radar displays.

1. Within the environment test area designated within a 200-mile radius of the following locations, the ATC transponder will be operated in accordance with the request of air traffic control. Ground equipment installations will start approximately October 1, 1957, at the following locations: New York center; Idlewild, La Guardia and Newark towers. Installation at the Washington center and tower, the Chicago center and O'Hare tower and the Norfolk center will follow as soon as equipment becomes available. Notification of the start of the actual evaluation will be made at a later date.

2. Air traffic control transponders will be adjusted to Code 00 and turned on only in aircraft operating on an IFR flight plan unless otherwise requested by any ground station.

3. When filing a domestic IFR flight plan for an aircraft equipped with a functioning ATC transponder, this shall be made known by adding the word "transponder" immediately following the aircraft identification. Example: "Braniff six transponder".

4. Aircraft using the "Stargazer" service offered by the Air Defense Command will advise the radar operator of the status of the ATC transponder and will operate it in accordance with the operator's request regardless of the type of flight being conducted.

5. Aircraft operating from the domestic area will comply with (3) above. Aircraft entering the domestic control area will only advise oceanic air traffic control of the status of the Air Traffic Control transponder when making the first radio report to the United States oceanic air traffic control center.

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FLIGHT PLANS: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing flight plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e. g. Long Beach omnirange (Voice) .-.. --- -... .-. (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control tower. Where there is no control tower, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective November 21, 1957, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Blue civil arwy No. 16 (Waverly, Va. to Tappahannock, Va.) is amended to read: "From the Waverly, Va. rdo rng stn to the Tappahannock, Va. rdo rng stn." (Note: deleted portion Blue 16 between Boykins intsxn and the Waverly rdo rng stn)

(2) Blue civil arwy No. 28 (Columbia, S. C. to Bulls Gap, Tenn.) caption changed and is amended to read: "From the Columbia, S. C. rdo rng stn via the intsxn of the W crs of the Columbia, S. C. rdo rng and the SE crs of the Spartanburg, S. C. rdo rng; Spartanburg, S. C. rdo rng stn to the intsxn of the NW crs of the Spartanburg, S. C. rdo rng and the NE crs of the Knoxville, Tenn. rdo rng." (Note: Deleted portion Blue 28 between Charleston, S. C. and Columbia, S. C.)

(3) Blue civil arwy No. 58 (Hyannis, Mass. to Squantum, Mass.) caption changed and is amended to read: "From the Hyannis, Mass. nondirectional rdo bcn via the intsxn of a line brng 346°T from the Hyannis, Mass, nondirectional rdo bcn and the SE crs of the Squantum, Mass, rdo rng to the Squantum, Mass. rdo rng stn." (Note: Deleted portion Blue 58 between Nantucket, Mass, and Hyannis, Mass.)

(4) VOR civil arwy No. 2 (Seattle, Wash. to Boston, Mass) is amended by changing the portion which reads: "Miles City, Mont. omni stn;" to read: "Miles City, Mont. omni stn, including a N alternate;" (Note: Added V2N between Miles City VOR and Billings VOR.)

(5) VOR civil arwy No. 12 (Santa Barbara, Calif. to Philadelphia, Pa.) is amended by changing the portion which reads: "Albuquerque, N. Mex, omni stn, including a S alternate from the Zuni, N. Mex, omni stn to the Albuquerque, N. Mex, omni stn via the intsxn of the Zuni omnirange 105°T and the Albuquerque omnirange 254°T radials; Otto, N. Mex. omni stn including a S alternate; Anton Chico, N. Mex. omni stn; to read: "Albuquerque, N. Mex. omni stn, including a S alternate from the Zuni omni stn to the Albuquerque omni stn via the intsxn of the Zuni omnirange 111°T and the Albuquerque omnirange 254°T radials; Otto, N. Mex. omni stn, including a S alternate from the Albuquerque omni stn to the Anton Chico omni stn via the intsxn of the Albuquerque omnirange 103°T and the Anton Chico 249°T radials;" and by changing the portion which reads: "Wheeling, W. Va. omni stn, including a S alternate via the point of intsxn of the Wheeling omnirange 252°T radial with the Appleton omnirange direct to the Morgantown, W. Va. omni stn;" to read: "Wheeling, W. Va. omni stn;" (Note: Redesignated V12S between Zuni VOR and Albuquerque. Added V12S between Albuquerque VOR and Anton Chico VOR. Revoked V12S between Albuquerque VOR and Otto VOR. Revoked V12S between Appleton VOR and Wheeling VOR.)

(6) VOR civil arwy No. 15 (Galveston, Tex. to Minot, N. Dak.) is amended by changing the portion which reads: "Ardmore, Okla. omni stn, including a W alternate from the Dallas, Tex omni stn to the Ardmore, Okla. omni stn via the intsxn of the Dallas omni 324°T and the Ardmore omnirange 176°T radials; Tulsa, Okla. omni stn, including an E alternate and also a W alternate via the point of intsxn of the Oklahoma City, Okla. omnirange 107°T and the Tulsa, omnirange 228°T radials; to the Chanute, Kans. omni stn" to read: "Ardmore, Okla, omni stn, including a W alternate from the Dallas, Tex. omni stn to the Ardmore omni stn via the intsxn of the Dallas omnirange 324°T and the Ardmore omnirange 176°T radials; Okmulgee, Okla. omni stn, including an E alternate and also a W alternate via the point of intsxn of Oklahoma City, Okla, omnirange 107°T and the Tulsa, Okla. omnirange 228°T radials; point of intsxn of the Tulsa, Okla. omnirange 088°T and the Neosho omnirange 223°T radials; to the Neosho, Mo. omni stn." (Note: Redesignate V15 between Ardmore VOR and Neosho VOR by adding Okmulgee VOR. Redesignated V15E and V15W to be from Ardmore VOR to Okmulgee VOR. Former portion of V15 between Tulsa VOR and Chanute VOR redesignated as a part of V131.)

(7) VOR civil arwy No. 19 (El Paso, Tex. to Great Falls, Mont.) is amended by changing the portion which reads: "Billings, Mont. omni stn;" to read: "Billings, Mont. omni stn, including an E alternate;" (Note: Added V19E between Sheridan VOR and Billings VOR.)

(8) VOR civil arwy No. 21 (Long Beach, Calif, to United States-Canadian Border) is amended by changing the portion which reads: "Milford, Utah, omni stn; Delta, Utah, omni stn; Utah Lake, Utah, omni stn;" to read: "Milford, Utah, omni stn, including a W alternate; Delta, Utah, omni stn, including a W alternate; Utah Lake, Utah, omni stn, including a W alternate via the intsxn of the Delta omnirange 004°T and the Utah Lake omnirange 219°T radials;" and by changing the portion which reads: "Cut Bank, Mont. omni stn to the United States-Canadian Border via the Cut Bank omnirange 347°T radial." to read: "Cut Bank, Mont., omni stn, including an E alternate; to the United States-Canadian Border via the Cut Bank omnirange 347°T radial." (Note: Added V21E between Great Falls VOR and Cut Bank VOR. Added V21W between Mormon Mesa VOR and Milford VOR, between Milford VOR and Delta VOR and between Delta VOR and Utah Lake VOR.)

(9) VOR civil arwy No. 23 (San Diego, Calif., to Billingham, Wash.) is amended by changing the portion which reads: "Eugene, Oreg. omni stn; Portland, Oreg. omni stn, including a W alternate via the intsxn of the Eugene omnirange 341°T and the Newburg omnirange 204°T radials, the Newburg, Oreg. omni stn, and the intsxn of the Newburg omnirange 020°T and the Portland omnirange 247°T radials;" to read: "Eugene, Oreg. omni stn, including an E alternate and also a W alternate via the intsxn of the Eugene omnirange 341°T and the Newburg omnirange 204°T radials, the Newburg, Oreg. omni stn, and the intsxn of the Newburg omnirange 020°T and the Portland omnirange 247°T radials;" (Note: Added V23E between Medford VOR and Eugene VOR and also between Eugene VOR and Portland VOR.)

(10) VOR civil arwy No. 26 (Cherokee, Wyo. to Cleveland, Ohio) is amended by changing the portion which reads: "Philip, S. Dak. omni stn, including a N alternate;" to read: "Philip S. Dak. omni stn, including a N alternate via the intsxn of the Rapid City omnirange 049°T and the Philip omnirange 282°T radials;" (Note: Redesignated V26N between Rapid City VOR and Philip VOR.)

(11) VOR civil arwy No. 38 (Iowa City, Iowa to Elkins, W. Va.) is amended by changing the portion which reads: "Appleton, Ohio, omni stn; Parkersburg, W. Va. omni stn; to the Elkins, W. Va. omni stn." to read: "Appleton, Ohio, omni stn; Zanesville, Ohio, omni stn; Parkersburg, W. Va. omni stn; to the Elkins, W. Va. omni stn." (Note: Added Zanesville VOR to V38 between Appleton VOR and Parkersburg VOR.)

(12) VOR civil arwy No. 45 (New Bern, N. C. to Saginaw, Mich.) is amended to read: "From the New Bern, N. C. omni stn via the point of intsxn of the New Bern omnirange 297°T and the Wilmington, N. C. omnirange 005°T radials; Raleigh, N. C. omni stn; Greensboro, N. C. omnirange stn, including an E alternate via the intsxn of the Raleigh omnirange 309°T and the Greensboro omnirange 051°T radials and a W alternate via the intsxn of the Raleigh omnirange 249°T and the Greensboro omnirange 122°T radials; Pulaski, Va. omni stn; to the Charleston, W. Va. omni stn. From the Lexington, Ky. omni stn via the York, Ky. omni stn; Appleton, Ohio, omni stn; to the Waterville, Ohio, omni stn. From the point of intsxn of the Litchfield, Mich. omnirange 081°T and the Lansing omnirange 159°T radials; Lansing, Mich. omni stn; to the Saginaw, Mich. omni stn. The airspace above 5500 ft above MSL of that portion of this airway which lies beneath, and conflicts with, the Cherry Point Restricted Area (R-125) is excluded daily from sunset-sunrise. The portions of this arwy which overlap the Wilmington Restricted Area (R-109) are excluded." (Note: Added new portion to V45 from New Bern VOR to Charleston VOR which was formerly V128. Redesignated V45 to Lansing VOR from centerline of V90. Added new portion to V45 from Lansing VOR to Saginaw VOR.)

(13) VOR civil arwy No. 63 (Waco, Tex. to Milwaukee, Wis.) is amended by changing the first portion to read: "From the Waco, Tex. omni stn via the point of intsxn of the Waco omnirange 036°T and the Dallas, Tex. omnirange 133°T radials; to the Sulphur Springs, Tex. omni stn." (Note: Redesignated V63 between Waco VOR and Sulphur Springs VOR.)

(14) VOR civil arwy No. 67 (Cedar Rapids, Iowa to Rochester, Minn.) is amended to read: "From the Cedar Rapids, Iowa, omni stn via the Waterloo, Iowa, omni stn; Mason City, Iowa omni stn; to the Rochester, Minn omni stn, including a W alternate." (Note: Added new portion to V67 from Cedar Rapids VOR to Waterloo VOR.)

(15) VOR civil arwy No. 74 (Hugo, Colo. to Little Rock, Ark.) is amended by changing the portion which reads: "Fort Smith, Ark. omni stn, including a N alternate from the Tulsa omni stn to the Fort Smith omni stn via the point of intsxn of the Tulsa omnirange 088°T and the Neosho, Mo. omnirange 223°T radials;" to read: "Fort Smith, Ark. omni stn, including a N alternate from the Tulsa omni stn to the Fort Smith omni stn via the point of intsxn of the Tulsa omnirange 088°T and the Neosho, Mo. omnirange 223°T radials and also a S alternate from the Tulsa omni stn to the Fort Smith omni stn via the Okmulgee, Okla. omni stn;" (Note: Added V74S from Tulsa VOR to Ft Smith VOR via Okmulgee VOR.)

(16) VOR civil arwy No. 94 (San Simon, Ariz. to Longview, Tex.) is amended by changing the caption and by changing the portion which reads: "From the Newman, Tex. omni stn via the intsxn of the Newman omnirange 091°T and the Salt Flat omnirange 312°T radials;" to read: "From the San Simon, Ariz. omni stn via the point of intsxn of the San Simon omnirange 089°T and the El Paso, Tex. omnirange 293°T radials; point of intsxn of the El Paso omnirange 293°T and the Newman omnirange 272°T radials; Newman, Tex. omni stn; intsxn of the Newman omnirange 091°T and the Salt Flat omnirange 312°T radials;" and by changing the last sentence to read: "The portions of this arwy which overlap the White Sands Restricted Area (R-209) and the McGregor Restricted Area (R-211) are excluded." (Note: Added new portion to V94 from San Simon VOR to Newman VOR.)

(17) VOR civil arwy No. 107 (Los Angeles, Calif. to Red Bluff, Calif.) is amended by changing the portion which reads: "From the Long Beach, Calif. omni stn via the intsxn of the Long Beach omnirange 287°T and the Fillmore omnirange 163°T radials; Fillmore, Calif. omnirange stn;" to read: "From the point of intsxn of the Long Beach, Calif. omnirange 287°T and the Los Angeles, Calif. omnirange 149°T radials via the point of intsxn of the Long Beach omnirange 287°T and the Fillmore omnirange 163°T radials; Fillmore, Calif. omni stn;" (Note: Redesignated V107 to start from Hermosa Int rather than Long Beach VOR.)

(18) VOR civil arwy No. 112 (Portland, Oreg. to Pendleton, Oreg.) is amended to read: "From the Portland, Oreg. omni stn via the The Dalles, Oreg. omni stn, including a N alternate; intsxn of the The Dalles omnirange 096°T and the Pendleton omnirange 254°T radials; to the Pendleton, Oreg. omni stn." (Note: Terminated V112 at Pendleton VOR. Former portion of V112 Pendleton VOR to Spokane VOR redesignated as part of V281. Added V112N between Portland VOR and The Dalles VOR.)

(19) VOR civil arwy No. 114 (Amarillo, Tex. to New Orleans, La.) is amended by changing the portion which reads: "intsxn of the Dallas omnirange 135°T and the Gregg County omnirange 273°T radials;" to read: "intsxn of the Dallas omnirange 133°T and the Gregg County omnirange 273°T radials;" (Note: Redesignated V114 between Dallas VOR and Gregg County VOR.)

(20) VOR civil arwy No. 120 (Ephrata, Wash. to Miles City, Mont) is amended to read: "From the Ephrata, Wash. omni stn via the intsxn of the Ephrata omnirange 096°T and the Mullan Pass omnirange 260°T radials: Mullan Pass, Mont. omni stn; Great Falls, Mont, omni stn; Lewistown, Mont, omni stn; to the Miles City, Mon. omni stn." (Note: Added new portion to V120 from Ephrata VOR to Mullan Pass VOR.)

(21) VOR civil arwy No. 128 (Chicago, Ill. to Charleston, W. Va.) is amended to read: "From the point of intsxn of the Joliet, Ill. omnirange 056°T and the Peotone omnirange 003° T radials via the Peotone, Ill. omni stn; Lafayette, Ind. omni stn; intsxn of the Lafayette omnirange 122°T and the Cincinnati omnirange 318°T radials; Cincinnati, Ohio, omni stn; York, Ky. omni stn, including a S alternate via the intsxn of the Cincinnati omnirange 120°T with the York omnirange direct radial to the Nobb, Ind. omni stn; to the Charleston, W. Va. omni stn." (Note: Revoked V128 from Charleston VOR to New Bern VOR and redesignated this portion as part of V45)

(22) VOR civil arwy No. 131 (Tulsa, Okla. to Topeka, Kans.) is amended to read: "From the Tulsa, Okla. omni stn to the Chanute, Kans. omni stn. From the Emporia, Kans. omni stn via the intsxn of the Emporia omnirange 050°T and the Topeka omnirange 174°T radials; to the Topeka, Kans. omni stn." (Note: Added new portion to V131 from Tulsa VOR to Chanute VOR. This portion was formerly a part of V15.)

(23) VOR civil arwy No. 133 (Parkersburg, W. Va. to Traverse City, Mich.) is amended to read: "That airspace over United States territory from the point of intsxn of the Parkersburg omnirange 172°T with the Charleston, W. Va. omnirange direct radial to the Morgantown W. Va. omni stn via the Parkersburg, W. Va. omni stn; Zanesville, Ohio, omni stn; Tiverton Ohio, omni stn; Mansfield, Ohio, omni stn; intsxn of the Mansfield omnirange 345°T and the Salem omnirange 140°T radials; Salem, Mich. omni stn; Flint, Mich. Bishop Arpt ILS outer mrkr; Saginaw, Mich. omni stn; to the Traverse City, Mich. omni stn. The portion of this airway which overlaps the Lacarne Restricted Area (R-149) is excluded."
(Note: Redesignated V133 between Parkersburg VOR and Mansfield VOR to include Zanesville VOR. Added new portion to V133 from Flint ILS/OM to Traverse City VOR.)

(24) VOR civil arwy No. 144 (Chicago, Ill. to Washington, D.C.) is amended by changing the portion which reads: "Appleton, Ohio, omni stn; Morgantown, W. Va. omni stn; to read: "Appleton, Ohio, omni stn; Zanesville, Ohio, omni stn; Morgantown, W. Va. omni stn;" (Note: Added Zanesville VOR to V144 between Appleton VOR and Morgantown VOR.)

(25) VOR civil arwy No. 157 (Miami, Fla. to Richmond, Va.) is amended by changing the portion which reads: "From the Miami, Fla. omni stn via the LaBelle, Fla. omni stn; Lakeland, Fla. omni stn; to the Gainesville, Fla. omni stn." to read: "From the Miami, Fla. omni stn via the LaBelle, Fla. omni stn; Lakeland, Fla. omni stn; to the Gainesville, Fla. omni stn. From the Allendale, S.C. omni stn via the intsxn of the Allendale omnirange 060°T and the Florence omnirange 216°T radials; to the Florence, S.C. omni stn." (Note: Added new portion to V157 from Allendale VOR to Florence VOR.)

(26) VOR civil arwy No. 161 (Fort Worth, Tex. to Alexandria, Minn.) is amended by changing the portion which reads: "Ardmore, Okla, omni stn; Tulsa, Okla;omni stn;" to read: "Ardmore, Okla. omni stn; Okmulgee, Okla. omni stn; Tulsa, Okla. omni stn;" (Note: Added Okmulgee VOR to V161 between Ardmore VOR and Tulsa VOR.)

(27) VOR civil arwy No. 182 (Portland, Oreg. to Chadron, Nebr.) is amended to read: "From the Portland, Oreg. omni stn via the The Dalles, Oreg. omni stn, including a N alternate; to the Baker, Oreg. omni stn. From the Douglas, Wyo. omni stn to the Chadron, Nebr omni stn." (Note: Added new portion to V182 from Douglas VOR to Chadron, VOR. Added V182N between Portland VOR and The Dalles VOR.)

(28) VOR civil arwy No. 187 (Grand Junction, Colo. to Rock Springs, Wyo.) is added to read: "From the Grand Junction, Colo. omni stn to the Rock Springs, Wyo. omni stn." (Note: New airway)

(29) VOR civil arwy No. 193 (Keeler, Mich. to Saulte Ste. Marie, Mich.) is amended to read: "From the Keeler, Mich. omni stn via the Pullman, Mich. omni stn; Grand Rapids, Mich, Kent County Arpt, ILS outer mrkr; White Cloud, Mich. omni stn; Traverse City, Mich. omni stn; Pellston, Mich. non-directional rdo bcn; to the Saulte Ste. Marie, Mich. omnirange stn." (Note: Added new portion to V193 from Traverse City VOR to Saulte Ste. Marie VOR. Added Traverse City VOR and Saulte Ste. Marie VOR.)

(30) VOR civil arwy No. 210 (Los Angeles, Calif. to Wheeling, W. Va.) is amended by changing the portion which reads: "Daggett, Calif. omni stn; Valle, Ariz. omni stn;" to read: "Daggett, Calif. omni stn; Goffs, Calif. omni stn; Valle, Ariz. omni stn;" (Note: Added Goffs VOR to V210 between Daggett VOR and Valle VOR.)

(31) VOR civil arwy No. 213 (Rocky Mount, N.C. to Tappahannock, Va.) is amended to read: "From the Rocky Mount, N.C. omni stn via the Hopewell, Va. omni stn; to the point of intsxn of the Hopewell omnirange 019°T radial with the Brooke, Va. omnirange direct radial to the Cape Charles, Va. omni stn." (Note: Added new portion to V213 from Rocky Mount VOR to Tappahannock Int via Hopewell VOR. Revoked former V213 Rocky Mount VOR to Boykins Int.)

(32) VOR civil arwy No. 214 (Columbus, Ohio to Wheeling, V. Va.) is added to read: "From the Columbus, Ohio Port Columbus Arpt ILS lclsr via the Zanesville, Ohio, omni stn; point of intsxn of the Parkersburg, V. Va. omnirange 006°T and the Wheeling omnirange 252°T radials to the Wheeling, W. Va. omni stn." (Note: New airway)

(33) VOR civil arwy No. 216 (Janesville, Wis. to Saginaw, Mich.) is amended to read: "From the Janesville, Wis. omni stn via the Muskegon, Mich. omni stn; to the Saginaw, Mich omni stn." (Note: Replaced Saginaw "H" with Saginaw VOR.)

(34) VOR civil arwy No. 274 (Grand Rapids, Mich. to Saginaw, Mich.) is added to read: "From the Grand Rapids, Mich. Kent County Arpt ILS outer mrkr to the Saginaw, Mich. omni stn." (Note: New airway)

(35) VOR civil arwy No. 280 (El Paso, Tex. to Roswell, N. Mex.) is amended by adding a new last sentence to read: "The portion of this arwy which overlaps the McGregor Restricted Area (R-211) is excluded."

(36) VOR civil arwy No. 281 (Redmond, Oreg. to Spokane, Wash.) is added to read: "From the Redmond, Oreg. omni stn via the Pendleton, Oreg. omni stn; to the Spokane, Wash. omni stn." (Note: New airway. Portion Pendleton VOR to Spokane VOR was formerly V112.)

(37) VOR civil arwy No. 283 (Redmond, Oreg. to Portland, Oreg.) is added to read: "From the Redmond, Oreg. omni stn via the intsxn of the Redmond omnirange 288°T and the Portland omnirange 166°T radials; to the Portland, Oreg. omni stn." (Note: New airway)

(38) VOR civil arwy No. 285 (Myton, Utah, to Rawlins, Wyo.) is added to read: "From the Myton, Utah, omni stn to the Rawlins-Cherokee, Wyo. omni stn." (Note: New airway)

(39) VOR civil arwy No. 286 (unassigned)

(40) VOR civil arwy No. 287 (North Bend, Oreg. to Newberg, Oreg.) is added to read: "From the North Bend, Oreg. omni stn to the Newberg, Oreg. omni stn." (Note: New airway)

(41) VOR civil arwy No. 1506 (San Francisco, Calif. to Washington, D.C.) is amended by changing the portion which reads: "Appleton, Ohio, omni stn; Morgantown, W.Va. omni stn;" to read: "Appleton, Ohio, omni stn; Zanesville, Ohio, omni stn; Morgantown, W. Va. omni stn." (Note: Added Zanesville VOR to V1506)

(42) VOR civil arwy No. 1512 (Los Angeles, Calif. to New York, N.Y.) is amended by changing the portion which reads: "Dagget, Calif. omni stn; Valle, Ariz. omni stn;" to read: "Dagget, Calif. omni stn; Goffs, Calif. omni stn; Valle, Ariz. omni stn;" and by changing the portion which reads: "to the Johnstown, Pa., omni stn. From the Selinsgrove, Pa. omni stn via the point of intsxn of the Selinsgrove omnirange 104°T and the Allentown, Pa. omnirange 211°T radials;" to read: "Johnstown, Pa., omni stn; point of intsxn of the Tower City, Pa. omnirange 279°T radials with the Philipsburg, Pa. omnirange direct radial to the Harrisburg, Pa. omni stn; Selinsgrove, Pa. omni stn; point of intsxn of the Selinsgrove omnirange 104°T and the Allentown, Pa. omnirange 211°T radials;" (Note: Added Goffs VOR to V1512. Added new portion to V1512 from Johnstown VOR to Selinsgrove VOR via Reedsville Int.)

CONTROL AREAS:

(1) Blue civil arwy No. 28 (Columbia S.C. to Bulls Gap, Tenn.) is amended to read: "All of Blue civil arwy No. 28."

(2) Blue civil arwy No. 58 (Hyannis, Mass. to Squantum, Mass.) is amended to read: "All of Blue civil arwy No. 58."

(3) VOR civil arwy No. 21 (Long Beach, Calif. to United States-Canadian Border) is amended to read: "All of VOR civil arwy No. 21 including E alternates and a W alternate."

(4) VOR civil arwy No. 45 (New Bern, N.C. to Saginaw, Mich.) is amended to read: "All of VOR civil arwy No. 45."

(5) VOR civil arwy No. 67 (Cedar Rapids, Iowa to Rochester, Minn.) is amended to read: "All of VOR civil arwy No. 67, including a W alternate."

(6) VOR civil arwy No. 74 (Hugo, Colo. to Little Rock, Ark.) is amended to read: "All of VOR civil arwy No. 74 including a N and a S alternate."

(7) VOR civil arwy No. 94 (San Simon, Ariz. to Longview, Tex.) is amended to read: "All of VOR civil arwy No. 94."

(8) VOR civil arwy No. 112 (Portland, Oreg. to Pendleton, Oreg.) is amended to read: "All of VOR civil arwy No. 112 including a N alternate."

(9) VOR civil arwy No. 120 (Ephrata, Wash. to Miles City, Mont.) is amended to read: "All of VOR civil arwy No. 120."

(10) VOR civil arwy No. 128 (Chicago, Ill. to Charleston, W. Va.) is amended to read: "All of VOR civil arwy No. 128 including a S alternate."

(11) VOR civil arwy No. 131 (Tulsa, Okla. to Topeka, Kans,) is amended to read: "All of VOR civil arwy No. 131."

(12) VOR civil arwy No. 133 (Parkersburg, W. Va. to Traverse City, Mich.) is amended to read: "All of VOR civil arwy No. 133."

(13) VOR civil arwy No. 182 (Portland, Oreg. to Baker, Oreg.) is amended to read: "All of VOR civil arwy No. 182 including a N alternate."

(14) VOR civil arwy No. 187 (Grand Junction, Colo. to Rock Springs, Wyo.) is added to read: "All of VOR civil arwy No. 187."

(15) VOR civil arwy No. 193 (Keeler, Mich. to Sault Ste Marie, Mich.) is amended to read: "All of VOR civil arwy No. 193."

(16) VOR civil arwy No. 214 (Columbus, Ohio to Wheeling, W. Va.) is added to read: All of VOR civil arwy No. 214."

(17) VOR civil arwy No. 274 (Grand Rapids, Mich. to Saginaw, Mich.) is added to read: "All of VOR civil arwy No. 274."

(18) VOR civil arwy No. 281 (Redmond, Oreg. to Spokane, Wash.) is added to read: "All of VOR civil arwy No. 281."

(19) VOR civil arwy No. 283 (Redmond, Oreg. to Portland Oreg.) is added to read: "All of VOR civil arwy No. 283."

(20) VOR civil arwy No. 285 (Myton, Utah, to Rawlins, Wyo.) is added to read: "All of

VOR civil arwy No. 285."

(21) VOR civil arwy No. 286 (unassigned)

(22) VOR civil arwy No. 287 (North Bend, Oreg. to Newberg, Oreg.) is added to read: "All of VOR civil arwy No. 287."

CONTROL AREA EXTENSIONS:

(1) (Whidbey Island, Wash.) is amended to read: "All of the airspace bounded on the E by Green civil arwy No. 10, on the S by Red civil arwy No. 79, on the W by Amber civil arwy No. 1 and on the N by a line drawn from a point at lat 48-42-48, long. 123-11-57 thru a point at lat. 48-50-27, long. 122-44-33, excluding the airspace below 20,000'MSL which overlaps restricted areas R-231, R-232, R-233, R-234 and R-235."

(2) (Fort Rucker, Ala.) is amended to read: "Within a 35 mi radius of a point at lat 31-14-55, long. 85-46-20, Fort Rucker, Ala. excluding the portion which overlaps restricted area R-156 and excluding the portion above 19,000'MSL between sunset-sunrise which lies beneath and which conflicts with restricted area R-336." (Note: Above coordinates of site of Ft. Rucker, Ozark AAF rdo rng stn, now under const.)

(3) (Nantucket, Mass.) is amended by changing the words: "Nantucket, Mass. nondirectional rdo bcn" to read: "Nantucket, Mass. Consolan stn (monitor site at lat 41-15-35, long. 70-09-19)" wherever they appear.

(4) (White Plains, N.Y.) is amended by changing the name "New Hackensack, N.Y. rdo rng." to read: "Poughkeepsie, N.Y. rdo rng."

(5) (Nantucket, Mass.) is amended by changing the words: "Nantucket, Mass. nondirectional rdo bcn" to read: "Nantucket, Mass. Consolan stn (monitor site at lat 41-15-35, long. 70-09-19)" wherever they appear.

(6) (Nantucket, Mass.) is amended by changing the words: "Nantucket, Mass. nondirectional rdo bcn" to read: "Nantucket, Mass. Consolan stn (monitor site at lat 41-15-35, long. 70-09-19)" wherever they appear.

(7) (New York, N.Y.) is amended by changing the words: "Nantucket, Mass. nondirectional rdo bcn" to read: "Nantucket, Mass. Consolan stn (monitor site at lat 41-15-35, long. 70-09-19)" wherever they appear.

(8) (Idlewild, N.Y.) is amended by changing the words: "Nantucket, Mass. nondirectional rdo bcn" to read: "Nantucket, Mass. Consolan stn (monitor site at lat 41-15-35, long. 70-09-19)".

(9) (El Paso, Tex.) is amended by changing the words which read: "extending from the rdo rng stn to a point 10 mi N of the Newman nondirectional rdo bcn." to read: "extending from the rdo rng stn to a point 11 mi N of the Newman, Tex. omni stn." (due to decmsng and relctn of Newman H facility)

(10) (Columbia, S.C.) is amended by changing the words which read: "Blue civil arwy No. 28," to read: "VOR civil arwy No. 53" wherever they appear.

(11) (Nantucket, Mass.) is amended to read: "That airspace with 5 mi either side of a direct line extending from the Nantucket Consolan stn (monitor site at lat 41-15-35, long. 70-09-19)".

(12) (Manchester, N.H.) is amended by deleting the following phrase: "excluding the portion which overlaps Restricted Area (R-48)." (Note: R-48 rescinded)

(13) (Portsmouth, N.H.) is amended to read: "The airspace within a 10 mi radius of Pease AFB, Portsmouth, N.H." (Note: Name change from Portsmouth AFB to Pease AFB)

(14) (Santa Ana, Calif.) is revoked. (Note: This area covered by Los Angeles Control Area Extension 601.1372.)

CONTROL ZONES:

(1) (Concord, N.H.) is amended to read: "Within a 5 mi radius of Concord Municipal Arpt within 2 mi either side of the SE crs of the Concord rdo rng extending from the rdo rng stn to a point 10 mi SE, and within 2 mi either side of the 284°T radial of the Concrod omnirange extending from the omni stn to a point 10 mi W."

(2) (Columbus, Ohio) is amended by adding the following portion to present control zone: "and within 2 mi either side of the extended centerline of Lockbourne AFB rnwy 23 extending to a point 6-1/2 mi NE of the end of the rnwy."

(3) (Detroit, Mich.) is amended by deleting the portion which reads: "and within 2 mi either side of a 134°T track extending from the Willow Run Arpt to a point 12 mi SE of the Wayne Major outer mrkr, excluding the portion which overlaps the Grosse Ile, Mich, ctl zone,"

(4) (Jacksonville, Fla.) is amended by adding the following portion to present control zone: "and within 2 mi either side of a line bearing 51°T extending from the Mayport NAAS nondirectional rdo bcn to a point 10 mi NE."

(5) (Oakland, Calif.) is amended by changing the name "Oakland Municipal Arpt" to read: "Metropolitan Oakland Intnl Arpt,"

(6) (Saginaw, Mich.) is amended by adding the following portion to present control zone: "and within 2 mi either side of the 35°, 107°, 147°, 235°, 257° and 310°T radials of the Saginaw omnirange extending from the omni stn to points 12 mi NE, E, SE, SW, W and NW of the omni stn." (Note: slight change to recommendation in ASP Mtg 477 due to VOR site change to 44-31-54, 84-04-38, and because of criteria for instrument apchs into the arpt)

(7) (Traverse City, Mich.) is amended to read: "Within a 5 mi radius of Traverse City Municipal Arpt, within 2 mi either side of the SE crs of the Traverse City rdo rng extending from the rdo rng stn to a point 12 mi SE, and within 2 mi either side of the 348°/168°T radials of the Traverse City omnirange extending from the arpt to a point 12 mi S of the omni stn."

(8) (Sault Ste. Marie, Mich.) is amended to read: "That airspace over United States territory within a 5 mi radius of the Sault Ste. Marie Arpt, within 2 mi either side of the SE crs of the rdo rng extending to a point 12 mi SE of the rdo rng stn, and within 2 mi either side of the 146°/326°T radials of the omnirange extending to a point 12 mi SE of the omni stn."

(9) (Islip, N.Y.) is amended to read: "Within a 5 mi radius of MacArthur Arpt and within 2 mi either side of the Islip ILS lclzr front crs extending from the lclzr to its intsxn with the SE crs of the Mitchel AFB rdo rng."

(10) (Portsmouth, N.H.) is amended by changing the name "Portsmouth AFB" to read: "Pease AFB, Portsmouth, N.H."

(11) (Fort Rucker, Ala.) is amended by changing the words which read: "and within 2 mi either side of the SW crs of the Ozark AAF rdo rng extending from the airfield to a point 10 mi SW of the rdo rng stn," to read: "and within 2 mi either side of the extended centerline of Ozark AAF rnwy 6-24 extending to a point 15 mi SW of the end of the rnwy," (Note: correction due to actual site of Ozark AAF rdo rng now being constructed at lat 31-14-55, long. 85-46-20)

(12) (Atlanta, Ga.) is added to read: "Within a 3 mi radius of the Atlanta Army General Depot (lat 33-37-39, long. 84-20-04,) excluding the portion which overlaps the Atlanta Municipal Arpt control zone."

REPORTING POINTS:

(1) Blue civil arwy No. 28 (Columbia, S.C. to Bulls Gap, Tenn.) is amended by changing the caption.

(2) Blue civil arwy No. 58 (Hyannis, Mass. to Squantum, Mass.) is amended by changing the caption.

(3) Other reporting points is amended by changing the following reporting points to read:

(a) Cod Int: the intsxn of a Great Circle crs between the Nantucket, Mass. Consolan stn (monitor site) and the Azores Santa Maria nondirectional rdo bcn and the western bndry of the New York Oceanic Control Area at lat 41-29-00, long. 68-00-00.

(b) East Nantucket Int: The intsxn of a line brng 82°T from the Nantucket, Mass. Consolan stn (monitor site) and the SE crs of the Squantum, Mass. (Navy) rdo rng.

(c) Haddock Int: The intsxn of a rhumb line between the Nantucket, Mass. Consolan stn (monitor site) and the Kindley AFB Bermuda nondirectional rdo bcn and the western bndry of the New York Oceanic Control Area at lat 39-50-00, long. 69-14-30.

VOR REPORTING POINTS:

(1) VOR domestic reporting points is amended by adding the following reporting points:

(a) Saginaw, Mich. omni stn. (For acft operg at 15,200'MSL and below.)

(b) Traverse City, Mich. omni stn. (For acft operg at all alts.)

by changing the following reporting points to read:

(c) Leslie Int: The intsxn of the Salem, Mich. omnirange 272°T and the Lansing, Mich. omnirange 159°T radials. (For acft operg at all alts - min reception alt will be 3000')

(d) Roscoe Int: The intsxn of the Appleton, Ohio, omnirange 085°T radial with the Zanesville, Ohio, omnirange direct radial to the Tiverton, Ohio omni stn. (For acft operg at all alts.)

(e) Union Pass Int: The intsxn of the Goffs, Calif. omnirange 078°T and the Needles, Calif. omnirange 004°T radials. (For acft operg at all alts.)

✓CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: **Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising alt requirements outside ctl areas.**

✓LOCATION IDENTIFIERS: **The following changes affect the use of the location identifiers:**

BAB	Marysville, Calif., Beale AFB (assignment)
NAS	Pensacola, Fla., NAS (Forrest Sherman Fld) (redesignation and change from FSF 1700Z Nov 1) (cancelled)
NAX	*Barbers Point, Oahu, T.H. NAS (*Preceded by letter "K" for international usage) (changed from BBP Oct 1) (cancelled)
NBE	Dallas, Tex., Hensley Fld (change from HNY 0001Z Nov 1) (cancelled)
NJP	Johnsville, Pa., NAS (change from JSV 0001Z Nov 1) (cancelled)
NPE	Denver, Colo., NAS (Buckley Fld) (change from BUY 0001Z Nov 1) (cancelled)
NQS	Pensacola, Fla., Corry NAAS (change from NAS Aux CRX 1700Z Nov 1)(cancelled)
NSV	Fallon, Nev., NAAS (change from Aux Lndg Fld FFN 2000Z Nov 1) (cancelled)
NZY	San Diego, Calif., San Diego NAS (change from SDV 1700Z Nov 1) (cancelled)
SSH	Salina, Kans., Schilling AFB (change from SKH 0001Z Nov 1) (cancelled)
TTF	Texas Tower #4, Atlantic Ocean, radiobeacon (assignment)
BF	Battle Harbour, Newfoundland (assignment)
BJ	Bird, Man. (assignment)
BP	Cranberry Portage, Man. (assignment)
DQ	Dawson Creek, B.C. (assignment)
4BP	Bay Point, Calif., REP (change from BPT 0001Z Nov 1) (cancelled)
7SL	Slatington Int, Pa. (change from REP SLG 0001Z Nov 1) (cancelled)

ON REQUEST REPORTING POINTS: The following on request reporting points are designated, redesignated, renamed or cancelled and shall become effective November 21, 1957:

DESIGNATED:

(1) ADA INTSXN, MICH. (VHF) INTSXN - intsxn of the 241°M radial of the Saginaw, Mich. VOR and the 293°M radial of the Lansing, Mich. VOR.

(2) BARBER, N.C. (VHF) INTSXN - intsxn of the 241°M radial of the Greensboro, N.C. VOR and the 108°M radial of the Hickory, N.C. VOR.

(3) BRACKEN, TEX. (VHF) INTSXN - intsxn of the NE crs of the San Antonio, Tex. localizer and the 080°M radial of the San Antonio, Tex. VOR.

(4) BULLFROG, MICH. (VHF) INTSXN - intsxn of the 255°M radial of the Muskegon, Mich. VOR and the 335°M radial of the Pullman, Mich. VOR.

(5) CATONA, ALA. (VHF) INTSXN - intsxn of the 018°M radial of the Montgomery, Ala. VOR and the E crs of the Montgomery Ala. ILS lclzr.

(6) CELESTE, TEX. (VHF) INTSXN - intsxn of the 040°M radial of the Dallas, Tex. VOR and the 270°M radial of the Sulphur Springs, Tex. VOR.

(7) CENTRAL, ALA. (VHF) INTSXN - intsxn of the 025°M radial of the Montgomery, Ala VOR and the 271°M radial of the Columbus, Ga. VOR.

(8) DELRAY, FLA. (VHF) INTSXN - intsxn of the 022°M radial of the Miami, Fla. VOR and the 135°M radial of the West Palm Beach, Fla. VOR.

(9) DEMING, N. MEX. (VHF) INTSXN - intsxn of the 076°M radial of the San Simon, Ariz. VOR and the 339°M radial of the Columbus, N. Mex. VOR.

(10) ELM SPRINGS, S. DAK. (VHF) INTSXN - intsxn of the 035°M radial of the Rapid City, S. Dak. VOR and the 269°M radial of the Philip, S. Dak. VOR.

(11) FAIRVIEW, OHIO (VHF) INTSXN - intsxn of the 256°M radial of the Wheeling, W. Va VOR and the 009°M radial of the Parkersburg, W. Va. VOR.

(12) FORT DAVIS, ALA. (VHF) INTSXN - intsxn of the 085°M radial of the Montgomery, Ala. VOR and the 208°M radial of the La Grange, Ga. VOR.

(13) GREENVILLE, ALA. (VHF) INTSXN - intsxn of the 227°M radial of the Montgomery Ala. VOR and the 144°M radial of the Selma, Ala. VOR.

(14) HEPPNER, ORE. (VHF) INTSXN - intsxn of the 208°M radial of the Pendleton, Ore. VOR and the 087°M radial of The Dalles, Ore. VOR.

(15) HIGHLAND HOME, ALA. (VHF) INTSXN - intsxn of the 189°M radial of the Montgomery, Ala. VOR and the 056°M radial of the Evergreen, Ala. VOR and the 128°M radial of the Selma, Ala. VOR.

(16) JAXBORO, S. C. (VHF) INTSXN - intsxn of the 047°M radial of the Savannah, Ga. VOR and the 104°M radial of the Allendale, S. C. VOR.

(17) JONES, ALA. (VHF) INTSXN - intsxn of the 305°M radial of the Montgomery, Ala. VOR and the 070°M radial of the Selma, Ala. VOR.

(18) LANARK, N. MEX. (VHF) INTSXN - intsxn of the 281°M radial of the El Paso, Tex VOR and the 260°M radial of the Newman, Tex. VOR and the 066°M radial of the Columbus N. Mex. VOR.

(19) LASCASSAS, TENN. (LF) INTSXN - intsxn of the SE crs of the Nashville, Tenn. LFR and the 254°M bearing from the Smithville, Tenn. Rbn.

(20) MARLOW, GA. (VHF) INTSXN - intsxn of the 284°M radial of the Savannah, Ga. VOR and the 194°M radial of the Allendale, S.C. VOR.

(21) MINNOW, MICH. (VHF) INTSXN - intsxn of the 270°M radial of the Muskegon, Mich. VOR and the 319°M radial of the Pullman, Mich. VOR.

(22) MOSCOW, MICH. (VHF) INTSXN - intsxn of the 082°M radial of the Litchfield, Mich. VOR and the 161°M radial of the Lansing, Mich. VOR.

(23) ORLEANS, MICH. (VHF) INTSXN - intsxn of the 241°M radial of the Saginaw, Mich. VOR and the 321°M radial of the Lansing, Mich. VOR.

(24) PROCTOR, W. VA. (VHF) INTSXN - intsxn of the 063°M radial of the Parkersburg, W. Va. VOR and the 289°M radial of the Morgantown, W. Va. VOR.

(25) RIDGELAND, S. C. (VHF) INTSXN - intsxn of the 032°M radial of the Savannah, Ga. VOR and the 152°M radial of the Allendale, S.C. VOR.

(26) SEVIER, UTAH (VHF) INTSXN - intsxn of the 202°M radial of the Utah Lake, Utah VOR and the 348°M radial of the Delta, Utah VOR.

(27) SMALL, OHIO (VHF) INTSXN - intsxn of the 222°M radial of the Wheeling, W. Va. VOR and the 209°M radial of the Morgantown, W. Va. VOR.

(28) SOMERTON, PA. (VHF) INTSXN - intsxn of the 222°M radial of the Yardley, Pa. VOR and the 113°M radial of the Pottstown VOR.

(29) TAPPAHANNOCK, VA. (VHF) INTSXN - intsxn of the 025°M radial of the Hopewell, Va, VOR and the 138°M radial of the Brooke, Va. VOR.

(30) TUSKEGEE, ALA. (VHF) INTSXN - intsxn of the 068°M radial of the Montgomery, Ala. VOR and the 215°M radial of the La Grange, Ga. VOR.

(31) WHITEHOUSE, TEX. (VHF) INTSXN - intsxn of the SE crs of the Tyler, Tex. ILS lclzr and the 240°M radial of the Gregg Co. Tex. VOR.

(32) YELLOW SPRING, W. VA. (VHF) INTSXN - intsxn of the 260°M radial of the Martinsburg, W. Va. VOR and the 296°M radial of the Front Royal, Va. VOR.

REDESIGNATED:

(1) BRANDON, TEX. (VHF) INTSXN - intsxn of the 027°M radial of the Waco, Tex. VOR and the 165°M radial of the Britton, Tex. VOR.

(2) CONCHAS DAM, N. MEX. (VHF) INTSXN - intsxn of the 054°M radial of the Anton Chico, N. Mex. VOR and the 279°M radial of the Tucumcari, N. Mex. VOR.

(3) CRANDALL, TEX. (VHF) INTSXN - intsxn of the 124°M radial of the Dallas, Tex. VOR and the 065°M radial of the Britton, Tex. VOR.

(4) GULF COAST, TEX. (VHF) INTSXN - intsxn of the 064°M radial of the Eagle Lake, Tex. VOR and the 345°M radial of the Houston, Tex. VOR.

(5) KEMP, TEX. (VHF) INTSXN - intsxn of the 124°M radial of the Dallas, Tex. VOR and the 082°M radial of the Britton, Tex. VOR.

(6) KILDARE, GA. (VHF) INTSXN - intsxn of the 320°M radial of the Savannah, Ga. VOR and the 194°M radial of the Allendale, S. C. VOR.

(7) LAVA, N. MEX. (VHF) INTSXN - intsxn of the 097°M radial of the Zuni, N. Mex. VOR and the 243°M radial of the Grants, N. Mex. VOR.

(8) LOMA, COLO. (VHF) INTSXN - intsxn of the NW crs of the Grand Junction, Colo. ILS and the 341°M radial of the Grand Junction, Colo. VOR.

(9) MAZIE, OKLA. (VHF) INTSXN - intsxn of the 113°M radial of the Tulsa, Okla. VOR and the 039°M radial of the Okmulgee, Okla. VOR.

(10) NATHAN, ALA. (VHF) INTSXN - intsxn of the 026°M radial of the Tuscaloosa, Ala VOR and the 332°M radial of the Birmingham, Ala. VOR.

(11) NEW LIBERTY, KY. (VHF) INTSXN - intsxn of the 217°M radial of the Cincinnati, Ohio VOR and the 087°M radial of the Nabb, Ind. VOR.

(12) RACINE, WIS. (VHF) INTSXN - intsxn of the 133°M radial of the Milwaukee, Wis. VOR and the 013°M radial of the Northbrook, Ill. VOR.

(13) SABINE, TEX. (VHF) INTSXN - intsxn of the 225°M radial of the Sulphur Springs, Tex. VOR and the 263°M radial of the Quitman, Tex. VOR.

(14) SAN JOSE, N. MEX. (VHF) INTSXN - intsxn of the 284°M radial of the Anton Chico N. Mex. VOR and the 035°M radial of the Otto, N. Mex. VOR.

(15) TANNER, ALA. (VHF) INTSXN - intsxn of the 260°M radial of the Huntsville, Ala. VOR and the 154°M radial of the Graham, Tenn. VOR.

(16) WARSAW, KY. (VHF) INTSXN - intsxn of the 217°M radial of the Cincinnati, Ohio VOR and the 074°M radial of the Nabb, Ind. VOR.

(17) MESQUITE, TEX. (VHF) INTSXN - intsxn of the 047°M radial of the Britton, Tex. VOR and the 124°M radial of the Dallas, Tex. VOR.

RENAMED:

(1) MOUNDVILLE, ALA. (VHF) INTSXN - intsxn of the 190°M radial of the Tuscaloosa, Ala. VOR and the SW crs of the Birmingham, Ala. ILS lclzr. (Formerly Warrior Int.)

CANCELLED:

(1) ADAMS RUN, S. C. (VHF) INTSXN - intsxn of the 227°T radial of the Charleston, S. C. VOR and the 047°T radial of the Savannah, Ga. VOR and the 110°T radial of the Allendale S.C. VOR.

(2) BENWOOD, W. VA. (VHF) INTSXN - intsxn of the 222°M radial of the Wheeling, W. Va. VOR and the 307°M radial of the Morgantown, W. Va. VOR.

(3) BOOTH, ALA. (VHF) INTSXN - intsxn of the 326°T radial of the Montgomery, Ala. VOR and the 081°T radial of the Craig, Ala. VOR.

(4) BOYKINS, VA. (LF) INTSXN - intsxn of the S crs Waverly, Va. LFR and the 121°M radial of the Lawrenceville, Va. VOR.

(5) BOYKINS, VA. (VHF) INTSXN - intsxn of the 121°M radial of the Lawrenceville, Va. VOR and the 031°M radial of the Rocky Mount, N. C. VOR.

(6) BRACKEN, TEX. (LF) INTSXN - intsxn of the NE crs of the San Antonio, Tex. ILS lclzr and the NW crs of the Randolph, Tex. LFR.

(7) BULVERDE, TEX. (LF) INTSXN - intsxn of the NW crs of the Randolph, Tex. LFR and the 046°T bearing to Austin, Tex. Rbn.

(8) CALHOUN, ALA. (VHF) INTSXN - intsxn of the 227°M radial of the Montgomery, Ala VOR and the 125°M radial of the Craig, Ala. VOR.

(9) CAMBRIDGE, OHIO (VHF) INTSXN - intsxn of the 252°T radial of the Wheeling, W. Va. VOR and the 105°T radial of the Appleton, Ohio VOR.

(10) CEDAR CREEK, TEX. (VHF) INTSXN - intsxn of the 052°M radial of the San Antonio Tex. VOR and the 149°M radial of the Austin, Tex. VOR.

(11) COURTNEY, TEX. (VHF) INTSXN - intsxn of the 127°T radial of the College Station Tex. VOR and the 033°T radial of the Eagle Lake, Tex. VOR

(12) DACUS, TEX. (VHF) INTSXN - intsxn of the 330°M radial of the Houston, Tex. VOR and the 024°M radial of the Eagle Lake, Tex. VOR.

(13) DEATSVILLE, ALA. (VHF) INTSXN - intsxn of the 358°T radial of the Montgomery, Ala. VOR and the 073°T radial of the Craig, Ala. VOR.

(14) KEENAN, TEX. (VHF) INTSXN - intsxn of the 330°M radial of the Houston, Tex VOR and the 103°M radial of the College Station, Tex. VOR.

(15) MOUNDS, OKLA. (VHF) INTSXN - intsxn of the 210°T radial of the Tulsa, Okla. VOR and the 135°T radial of the Ponca City, Okla. VOR.

(16) NORVELL, MICH. (VHF) INTSXN - intsxn of the 082°M radial of the Litchfield, Mich VOR and the 150°M radial of the Lansing, Mich. VOR.

(17) OKEMAH, OKLA. (VHF) INTSXN - intsxn of the 100°T radial of the Okla City, Okla. VOR and the 029°T radial of the Ardmore, Okla. VOR.

(18) PITMAN, N.J. (LF & VHF) INTSXN - intsxn of the 129°M radial of the West Chester, Pa. VOR and the SE crs of the Philadelphia, Pa. LFR.

(15 October 1957)

(19) ST MATHEWS, S.C. (LF) INTSXN - intsxn of the SW crs of the Shaw, S. C. LFR and the SE crs of the Columbia, S.C. LFR.

(20) STARKVILLE, N.Y. (LF) INTSXN - intsxn of the SE crs of the Utica, N.Y. LFR and the W crs of the Albany, N.Y. LFR

√HOLDING PATTERNS: The following holding patterns have been designated, redesignated or cancelled and shall become effective November 21, 1957:

DESIGNATED:

(1) BRACKEN, TEX. (VHF) INTSXN - direction of holding - NE on NE crs of the San Antonio, Tex. ILS lclzr; direction of turns - right; time - 2 mins; min alt 2500'.

(2) BRANDON, TEX. (VHF) INTSXN - direction of holding - NE on 027°M radial of the Waco, Tex. VOR; direction of turns - right; time - 1 min; min alt 2400'.

(3) BULLFROG, MICH. (VHF) INTSXN - direction of holding - SW on 255°M radial of the Muskegon, Mich. VOR; direction of turns - right; time - 1 min.

(4) CATONA, ALA. (VHF) INTSXN - direction of holding - E on E crs of the Montgomery, Ala. ILS lclzr; direction of turns - right; time - 1 min; min alt 2000'.

(5) DUNCAN, TEX. (LF) INTSXN - direction of holding - SW on SW crs of the San Antonio Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt 2100'.

(6) ELM SPRINGS, S.D. (VHF) INTSXN - direction of holding - SE on 269°M radial of the Philip, S.D. VOR; direction of turns - right; time - 2 mins; min alt 4500'.

(7) JONES, ALA. (VHF) INTSXN - direction of holding - NW on 305°M radial of the Montgomery, Ala. VOR; direction of turns - right; time - 1 min; min alt 1600'.

(8) LASCASSAS, TENN. (LF) INTSXN - direction of holding - SE on SE crs Nashville, Tenn LFR; direction of turns - right; time - 1 min; min alt 3000'.

(9) MARLOW, GA. (VHF) INTSXN - direction of holding - W on 284°M radial of the Savannah, Ga. VOR; direction of turns - right; time - 1 min; min alt 2000'.

(10) MCAS EL TORO, CALIF. (Rbn) - direction of holding - W on 060°M inbnd bearing; direction of turns - right; time - 1 min.

(11) OAKVILLE, TENN. (LF) INTSXN - direction of holding - E on E crs Memphis, Tenn. ILS lclzr; direction of turns - left; time - 1 min; min alt 1500'.

(12) RIDGELAND, S.C. (VHF) INTSXN - direction of holding - NE on 032°M radial of the Savannah, Ga. VOR; direction of turns - right; time - 1 min; min alt 1400'.

(13) SAN ANTONIO, TEX. (ILS lclzr) - direction of holding - SW on SW crs; direction of turns - right; time - 2 mins; min alt 2200'.

(14) SAVANNAH, GA. (LFR) - direction of holding SE on SE crs; direction of turns - right; time - 1 min; min alt 1100'.

(15) SAVANNAH, GA. (LFR) direction of holding SW on SW crs; direction of turns - right; time - 1 min; min alt 1100'.

(16) SMALL, OHIO (VHF) INTSXN - direction of holding - SW on 222°M radial of the Wheeling, W. Va. VOR; direction of turns - right; time - 1 min.

(17) VIOLA, KANS. (RBN) - direction of holding - SW on 046°M inbnd bearing; direction of turns - right; time - 1 min.

(18) WHITE HILLS, NEV. (VHF) INTSXN - direction of holding - SE on 105°M radial of the Las Vegas, Nev. VOR; direction of turns - right; time - 2 min; min alt 9000'.

(19) WHITEHOUSE, TEX. (VHF) INTSXN - direction of holding - SE on SE crs of the Tyler Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt 2000'.

(20) WILLOW BEACH, NEV. (LF) INTSXN - direction of holding - SE on SE crs Las Vegas, Nev. LFR; direction of turns - right; time - 2 mins; min alt 9000'.

(21) WILLOW BEACH, NEV. (LF) INTSXN - direction of holding - S on N crs Needles, Calif. LFR; direction of turns - right; time - 2 mins; min alt 9000'.

(22) YELLOW SPRING, W. VA. (VHF) INTSXN - direction of holding - NW on 296°M radial of the Front Royal, Va. VOR; direction of turns - left; time - 1 min; min alt 5000'.

REDESIGNATED:

(1) BIRMINGHAM, ALA. (VOR) - direction of holding - NW on 332°M radial; direction of turns - right; time - 1 min; min alt 2000'.

(2) DUNCAN, TEX. (VHF) INTSXN - direction of holding - SW on SW crs of the San Antonio Tex. ILS lclzr; direction of turns - right; time - 1 min; min alt 2100'.

(3) OXFORD, KANS. (RBN) - direction of holding - S on 347°M inbnd bearing; direction of turns - right; time - 1 min; min alt 2500'.

CANCELLED:

(1) BULVERDE, TEX. (LF) INTSXN - direction of holding - NE on 046°T bearing to Austin Tex. Rbn; direction of turns - right; time - 2 mins; min alt 2600'.

(2) GOLD HILL, ORE. (VHF) INTSXN - direction of holding - SW on 215°M radial of the Medford, Ore. VOR; direction of turns - left; time - 2 mins; min alt 7000'.

(3) MARINE EL TORO, CALIF. (LFR) - direction of holding - W on 070°M inbound bearing; direction of turns - right; time - 1 min; min alt 7000'.

(4) MARINE EL TORO, CALIF. (LFR) - direction of holding - E on 250°M inbound bearing; direction of turns - right; time - 1 min; min alt 7000'.

(5) PITMAN, N.J. (LF & VHF) INTSXN - direction of holding - SE on SE crs of the Philadelphia, Pa. LFR; direction of turns - right; time - 1 min; min alt 1500'.

(6) SAN ANTONIO, TEX. (ILS/LOM) - direction of holding - SW on SW crs of lclzr; direction of turns - left; time - 2 mins; min alt 2200'.

(7) WETMORE, TEX. (VHF) INTSXN - direction of holding - NE on NE crs of the San Antonio, Tex. ILS lclzr; direction of turns - right; time - 2 mins; min alt 2500'

√ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

√ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

√ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

1957 FLIGHT INFORMATION MANUAL NOW AVAILABLE: Flight Information Manual, Vol. II, dated August 15, 1957, is now available from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., at 50 cents per copy.

SEATTLE-SPOKANE CONTROL AND FLIGHT ADVISORY AREA BOUNDARY CHANGES: Effective immediately, the Seattle-Spokane Control and Flight advisory area bndry is changed as follows: From the present bndry on the W edge of Victor arwy No. 112 SW along the W edge of Victor arwy No. 112 to a point at 118-36W, 46-22N, thence along the northern edge of the Pasco control area extension to its NW corner, thence to the SE corner of Prohibited Area (P-246).

OPERATING PROCEDURES FOR FLIGHT WITHIN THE CONTINENTAL CONTROL AREA: On or about December 1, 1957, all airspace at and above 24,000' MSL above the continental United States (excluding Territory of Alaska), excluding prohibited and restricted areas penetrating the 24,000' level, will be designated as control area. This airspace is to be known as the "continental control area". Certain new regulations and procedures will govern flight in this area and all pilots and other personnel concerned with opern above 24,000' should become familiar with them. Announcement of the effective date will be made by NOTAM. Following is a summary of the method by which flight operns and air tfc control are to be conducted in the continental control area.

I. VFR OPERATION:

A. Visibility and Cloud Proximity Minimums - For VFR opern within the continental control area, flgt visibility must be at least 5 mi and acft must not be flown less than 1000' vertically and 1 mi horizontally from any cloud formation.

B. Cruising Altitudes:

1. From 24,000' through 28,000' (excluding arwys). To assist pilots operg under VFR in maintaining separation, the following cruising alts should be adhered to as good operg practice from 24,000' through 28,000':

Magnetic Crs	Indicated Altitudes
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or above 29,000'. Use of the following cruising alt for VFR flgt is required by regulation everywhere at or above 29,000':

Magnetic Crs	Indicated Altitudes
0-89° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
90-179° inc.	4000' intervals beginning at 30,000' (30,000', 34,000', etc.)
180-269° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)
270-359° inc.	4000' intervals beginning at 32,000' (32,000', 36,000', etc.)

II. ON-TOP OPERATION: Flgts made under VFR conditions on top within the continental control area must observe the new visibility and cloud proximity minimums and cruising alt rules for VFR opern in the continental control area. Opern of these flgts is otherwise unchanged. (Pilots are reminded that when cleared "VFR conditions on top" by air tfc control, tfc separation is not provided by air tfc control.)

III. IFR OPERATION: All IFR operns at and above 24,000' MSL within the continental control area will receive air tfc control service.

A. At and above 27,000' MSL - To simplify high alt navigation, a limited number of VOR, TACAN, VORTAC and L/MF facilities have been designated for high alt use. These navigation aids are the only ones which may be used for IFR routing at and above 27,000' and are depicted on special high alt charts.

The high-altitude facilities have been used to delineate a system of high-altitude tracks called "Jet Routes". These routes are coded on the charts by the letter J, followed by the appriate route number, followed by the letter V, T, or L to indicate the type of navigation to be used. For example:

J22V . . . . . VOR or VORTAC Jet Route #22
J19T . . . . . TACAN Jet Route #19
J3L . . . . . L/MF Jet Route #3

Use of the designated high-altitude route structure will facilitate air tfc control, and all pilots are requested to use the designated route structure to the maximum extent possible. However, use of this route structure is not mandatory. Pilots may conduct direct flgt off the designated Jet Routes, provided the acft will be flown on a route defined by the high-altitude facilities, and provided further that the facilities selected to define the route are not more than 300 n mi apart.

Routes flown at 27,000' and above will not have a defined width as is the case on arwys at the lower levels. The track to be made good will be direct between the navigation aids or fixes defining the Jet Route, or direct between the high-altitude facilities defining the route for flgts made off the designated Jet Routes.

All high-altitude facilities and a small number of intsxns formed by these aids will be designated as compulsory reporting points. When needed for tfc control purposes, pilots may be requested to make additional position reports.

Other navigation aids (TACAN, VOR, VORTAC, AND L/MF) not designated as high-altitude facilities will be used for routing or navigating of acft to and from the high-altitude Jet Route structure which begins at the 27,000' level. This routing may be via the Victor or colored arwy systems, or direct between navigation aids.

Since most flgt activity at 27,000' and above will be by military acft, only those charts prepared by the U.S. Air Force Aeronautical Chart and Information Center will be avail on the inception date of control of all airspace at and above 24,000'. In recognition of the fact that there will be some civil need for these charts, arrangements have been made for civil distribution of the Air Force charts through the United States Coast and Geodetic Survey.

B. Below 27,000' - Although the continental control area extends from 24,000' upward, the Jet Route structure does not commence until the 27,000' level is reached. The colored and Victor arwys extend up to, but do not include the 27,000' level.

Acft operg below 27,000' within the continental control area (from 24,000' through 26,000') may operate on the colored or Victor arwys, or fly direct between any Federally operated navigation aids.

In the case of direct flgts (from 24,000' through 26,000') the aids selected to define the route must not be more than 200 n mi apart, and the track to be made good will be direct between aids. The aids selected will be compulsory reporting points, and other position reports may be requested by air tfc control when needed.

C. Cruising Altitudes - Acft operg in accordance with IFR within the continental control area must be flown at the alts assigned by air tfc control. To assist pilots in flgt planning for IFR operns, the following system of altitude selection may be used:

1. From 24,000' through 28,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or Above 29,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
180-359° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)

While controllers will normally use the above system, other altitudes may be used in certain cases. Pilots are cautioned to fly at the alt assigned by air traffic control.

IV. AIR/GROUND COMMUNICATIONS: The CAA is currently installing a VHF and UHF air/ground communications system which will provide direct pilot-controller rdo communications throughout the continental control area. This system will be only partially installed at the time control of all airspace above 24,000' is commenced; therefore, interim communications will be conducted as follows:

	Ground Facility	VHF	UHF
A.	ARTC	Discrete channel as directed	301.4 or discrete channel as directed
B.	ATCS	122.1/122.2 or VOR 126.7 135.0/135.9	255.4 or 301.4 where avail.
C.	Airline company radio stations	Company frequency	none

IFR flgts should use direct ARTC controller-pilot communications, where available.

V. SPECIAL OPERATIONS: Certain mil operns cannot be conducted in accordance with the above, for example, missions involving use of radar navigation. Such cases are to be considered exceptional in nature and will be handled by special procedures.

Flgts using celestial navigation will be required to operate VFR or "VFR conditions on top" for those portions of the flgt where celestial navigation is involved. TACAN-only equipped acft will also be required to operate VFR or "VFR conditions on top" for those portions of flgts where designated high-altitude TACAN facilities are more than 200 or 300 n mi apart, as the case may be.

Questions concerning these operns or any phase of the control of all airspace above 24,000' should be referred to the appropriate CAA air route tfc control center.

ANRA TABULATION CHANGES: Effective with this issue, pages 8 through 31 of the Air Navigation Radio Aids tabulation have been changed as follows: the emergency freq 121.5 mc has not been tabulated; military twrs guarding civil freqs (121.5 mc excepted) have been integrated into the tabulation; and transmitted freqs 122.2 mc and 126.7 mc have been added into the coded "V". These changes are reflected on the ANRA legend page (page 2) and on the note on the bottom of pages 8 through 31.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

(15 October 1957)

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957:

(1) Page 8, Loran Data - correct "Nantucket, R.I." to read "Nantucket, Mass."
(2) Page 20, Tucson, Ariz. - change CAA telephone number to MA 2-6753.
(3) Page 20, Walnut Ridge, Ark. - change CAA telephone number to TU 4-2271.
(4) Page 21, Topeka, Kansas - change WB telephone number to CE 2-8241*.
(5) Page 22, Boston, Mass. - change WB telephone number to LO 7-4032*.
(6) Page 22, Jackson, Mich. - change CAA telephone number to ST 4-9640.
(7) Page 22, Kansas City, Mo. - change CAA telephone number to GR 1-4572.
(8) Page 24, Philadelphia, Penna. - change WB telephone number to SA 6-7511*.
(9) Page 24, Wilkes-Barre, Pa. - change CAA telephone number to GL 7-6881.
(10) Page 24, Wilkes-Barre, Pa. - add WB telephone number GL 7-2711.
(11) Page 25, Gordonsville, Va. - change CAA telephone number to TE 2-2236.
(12) Page 26, Region 2 - General Safety - change Little Rock, Ark. telephone number to FR 2-5930.
(13) Page 40, under North Carolina, Wilson, radio station WGTM, change mileage and direction from city to read "8 WSW"; change coordinates to read: "35-43-04, 78-03-33"; and change height of tower to read "410 ft".
(14) Page 54, Paragraph 1 and footnote 1 under table are amended. Please turn to page 37 of this Airman's Guide for the complete text of these amendments carried under: ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES.
(15) Page 66, Paragraph 2 is amended. Please turn to page 37 of this Airman's Guide for the complete text of this amendment carried under the heading: ATC PROCEDURES - RADAR TRAFFIC CONTROL.
(16) Page 73, Under Radiated Test Signal - add: *PITTSBURGH (Greater Pittsburgh 108.6 mc).
(17) Page 74, Big Spring, Tex. - change to read: 199°; over LFR; 1000'AGL.
(18) Page 75, Dubuque, Iowa - add airborne chackpoint as follows: 356°; centerline apch end rnwy 31.
(19) Page 75, Imperial, Neb. - delete airborne checkpoint entirely.
(20) Page 75, Garden City, Kan. - delete airborne checkpoint entirely.
(21) Page 76, Milwaukee, Wis. - add airborne checkpoint as follows: 123°; over LFR.
(22) Page 77, Sidney, Neb. - add airborne checkpoint as follows: 066°; at rnwy centerline extreme W end E/W rnwy.
(23) Page 77 - Valdosta, Ga. - add airborne checkpoint as follows: 006°; over light beacon located E side of arpt.
(24) Page 80 - Lagrange, Ga. - change to read: 106° near compass rose at taxi strip intsxn approx 500' due S of admin bldg.
(25) Page 82, Valdosta, Ga. - delete ground checkpoint entirely.
(26) Page 85, under U.S. CUSTOMS AIRPORTS OF ENTRY: Under Illinois, change name "Detroit-Wayne Major" to "Detroit-Metropolitan Wayne County"; under Minnesota, change name "Duluth" to "Duluth Municipal" and add new arpt "Duluth-Sky Harbor"; under New York, change name "Ogdensburg, Ogdensburg Harbor" to "Ogdensburg" and delete "Ogdensburg Harbor Seaplane Base; under North Dakota, add new arpt "Minot International."

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Elko	Pocatello	Miami Local
Grand Canyon	Reno	San Diego Local
Grand Junction	Sacramento	San Francisco Local
Klamath Falls	Salt Lake City	WAC 404
Mt. Shasta	Los Angeles Local	RC 2217

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS: The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) Month and day item was reported.
** New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
* New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
**BESSEMER ARPT: Name changed. Formerly carried as Durham Arpt. (12-1) Caution - auto drag strip runs parallel to sod lndg strip with separation of 50'. Auto racing is not done on rnwy. Drag strip ends mrkd. Racing Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-48, about 10 n mi NW Birmingham Mun Arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18) Until cmsng VOR, V7E termp designated BHM LFR to Tanner Int. via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V15 and V1N, 5000'. (10-11)
BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down - relctn. (8-7) FLD: Caution - tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
EVERGREEN-RADIO: VOR radials 320° thru 360° out of tolerance acct excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inop. (-26)
**FLOMATON ARPT: Now a pvt arpt. (11-56)
**GUNTERSVILLE ARPT: Caution - paved drag strip 200' E of rnwy. (9-30)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
**HUNTSVILLE ARPT: Unicom decmsnd. (9-23)
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-TOWER: June 19, ILS not to be used for automatic apch below 300' Glide slope inop - equip. and const vcnty transmitter bldg. (8-22) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' & 1/2 mi is absolute take-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld.
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150°, and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2) About Oct 24, VOR will be relctd to lat 34-42-24, long. 87-29-27; freq changed from 117.5 mi to 109.6 mc.
**TALLADEGA ARPT: City name change. Formerly carried under Anniston. (7-3)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (6-18)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)
CLIFTON-CREENLEE COUNTY ARPT: Clsd until approx 12-1-57. (9-17)
ARIZONA: COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at min en route alt. (5-8)
FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (6-24)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)
MARANA ARPT: Reported inactive. (10-2)
PHOENIX AREA-SPECIAL AIR TRAFFIC RULES: Aircraft operg under VFR or VFR conditions shall not be operd Mon thru Fri from 0600M to 1800M on Green Arwy #5 and Victor Arwy 16 W of Phoenix in the areas described below except at the altitudes prescribed therefor unless special permission is obtained from Air Traffic Control. From 112-28 to 112-35, which is the area between north-south lines drawn thru the Perryville FM and the town of Buckeye, between 700' above the surface and 5000' MSL, regardless of weather conditions. Further, when the reported ceiling at Phoenix is less than 8000', acft shall not be operd at altitudes above 2000' MSL and below 4000' MSL in the area between 112-16 and 112-28, which is the area between north-south lines drawn thru the town of Tolleson and Perryville FM. When the reported ceiling at Phoenix is 8000' or more, acft shall not be operd at altitudes above 7000' MSL and below 9000' MSL in the area between 112-10 and 112-28, which is the area between north-south lines drawn thru the east edge of Glendale and the Perryville FM. (9-27) See chart page 63.
PHOENIX-SKY HARBOR ARPT-SPECIAL NOTICE: Following changes in instrument apch procedures: LFR procedures: Initial approach from Perryville FM 4000', from Tolleson Int. 2600'. Missed apch: Climb to 2500' on W course PHX LFR, make right climbing turn returning to LF range. Hold on E course LF rng at 5000' in standard pattern within 15 mi. VOR procedure: Initial approach from Perryville FM 4000', from Tolleson Int. 2600'. Missed apch: Climb to 2500' on radial 258, make a right climbing turn, returning to VOR. Hold east of VOR on radial 076 at 5000' in standard pattern within 15 mi. Tolleson Int - Int. GBN VOR radial 027 and PHX VOR radial 258 or W course PHX LF rng. All other items these procedures unchanged. (6-14)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft rqrg use of after burners for take-off, xcpt prior permission arpt manager. (12-7) Men & equip. along N edge rnwy 26L from apch end to a point approx 2000' W. (8-23)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. About Oct 15, VOR will be shut down until approx Dec. 15 - conversion to VORTAC. Durg this period, the following airways will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int.- PHX; V105E PRC-PHX. (9-23)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi at 11,000'; 060°-075°, 35 n mi at 11,000'; 075°-085°, 21 n mi at 11,000'; 090°-170°, 40 n mi at 12,000'; 225°-230°, 40 n mi at 7000'; 330°-345°, 35 n mi at 11,000'; 345°-360°, 25 n mi at 11,000'.
TUCSON ARPT:-SPECIAL NOTICE: As rqrd, target towing on a direct route off arwy to Ajo, Ariz. to be conducted week-ends - caution. (2-15)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
**YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11) Jet barriers installed rnwy 3-21. (9-3)
ARKANSAS: BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)

ARKANSAS: **NORTH LITTLE ROCK MUN ARPT: New fld. Type: L. Lat 34-50, long 92-16. Lctn: 4.5 mi N. Elev: 545. No. of rnwys: 1. Lngst rnwy & facs: 32.**

**PINE BLUFF-TONEY FLD: 194'(403'MSL) lgtd twr erected approx. 1 n mi SSW(204°T) at lat 34-14-46, long. 92-00-56. (10-10)

TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800'MSL 35 n mi. (5-21)

TEXARKANA MUN ARPT: 210'(510'MSL) lgtd twr being erected 12.5 n mi SSW(222°T) at lat 33-18-12, long. 94-09-31. (9-12)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)

ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000';040°-060°, 12,000';060°-090° 13,500'. (8-9)

BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°;20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

BONSALL-SHEARER'S RANCH ARPT: Abandoned until further notice. (2-4)

BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CONCORD-BUCHANAN FLD: Effect. Oct 15 right hand tfc estabd on rnwys 14 & 19. Pat. alt 800' indicated. Rnwy 6-24 to be used only for hi-velocity wind conditions. Low flgt over populated areas should be avoided as far as practicable.

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi;350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (8-30)

ELSINORE ARPT: Caution-glider activity week ends. Squirrel holds S edge of lndg area.

FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000';280°-320°, 26 n mi at 11,000'.

**FORT BRAGG-UNION LUMBER COMPANY ARPT: Now a private airport. (2-5)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked. Sept. 19, VOR shut down until approx Oct 17 - modernization. Durg this period the following arwys will be unusable for IFR opern: V23 Red Bluff-Talent Int.; V23E Fort Jones - Klamath Junction Int. The Bray Int. will be unusable. (9-19)

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000';10°-30°, 43 n mi at 9000';30°-120°, 35 n mi at 9000';120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)

FRESNO-RADIO: About Oct 21, LF rng will be shut down for approx 3 days - tune up and course realignment to 76A 136 N 256 A 316 N. (9-17) About Oct 24, Los Banos FM ident will be changed to dot dash. (10-2)

FRESNO AIR TERMINAL-TOWER: Sept 16, ILS glide slope shut down until approx Oct. 29 - relctn. (10-9)FLD: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5) Jet barriers installed both ends rnwy 11-29. First 1000' rnwy 29 is behind barrier, not to be used as rnwy, overrun area only. (10-11)

**GASQUET ARPT: Caution. Road materials piled S side. (9-23)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000';305°-340°, 7000';340°-040°, 12,000';040°-070°, 8000';070°-100°, 7000'; 100°-280°, 4000'. (9-13)

LONG BEACH ARPT-TOWER: ILS glide slope shut down indefinitely. (10-4) VHF/DF bearing unreliable below 12,000' MSL SW quad between 200° and 230°. (5-6) About Oct 15, radar arrival control will be cmsnd. Primary holding fixes will be Huntington Beach FM and Albacore Intsxn. (9-13)FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. Neon apch lgt land rnwy 30 discontd indefinitely. (1-1) Caution - temp p-line with wooden poles 29' hight serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1500P wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail. lndgs and tk-offs. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi.(6-25)

CALIFORNIA: **LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)**

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23) Effect. Oct 15, Castaic and Hollywood Hills FMs will be associated with Newhall LF rng. (9-27)

LOS ANGELES INTERNATIONAL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000' MSL beyond 30 n mi. (4-19)FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equip. crossing rnwy. During VFR wea conditions, civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 mc at least 10 mi out. During IFR wea, civil acft ctc Apch Ctl on 118.1 or 119.3; or listen 118.1 or 119.3 mc and trans 122.7 mc. USAF-NAVY-CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off-shore W of arpt. All jet acft departing rnwys 25L-25 R climbing in FVR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E-bound from Malibu of Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500'MSL. Acft not intending lndg at airport should avoid apch areas to W of arpt and E of airport between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Nov 30, transmissometer cmsnd furnishing rnwy visibility for rnwys 25L and 25R. Visibility to be added to observations when prevailing visibility is less than 1-1/2 mi. (6-21) Apch lgt lane sequenced flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (7-11)

LUCERNE VALLEY-DOUBLE J RCH ARPP: Length of strip reported increased to 3000'.

MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E; elev 174'; 1 rnwy-(15-33) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

NEWHALL -RADIO: Effective Oct 15, Castaic FM will be changed ti 4 dashes, NW course of LF rng. Hollywood Hills FM will be changed to 2 dashes, SE course of range. (FMs formerly on Los Angeles LF rng courses.) (9-27)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flight into Oakland, Alameda NAS or Hayward should contact Oakland Approach Control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco Approach Control on 118.5 mc. Communications during IFR flight should not be conducted with Oakland Approach Control or San Francisco Approach Control utilizing the freq 126.18 unless 118.1 or 118.5 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n miles N thru E at min instrument altitude (1-14) DME coverage 30°-60°, 26 nautical miles at 5000'; 60°-80°, 35 nautical miles at 5000'; 280°-290°, 35 n miles at 4000'; 340°-350°, 35 nautical miles at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (4-24)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 nautical miles at MEA xcpt 340°-030°, 6500'; 030°-040°, 8000'; 040°-060°, 7000' MSL. (8-6)

CALIFORNIA: **OAKLAND-METROPOLITAN OAKLAND INTNL ARPT: Dredging and clam shell equip working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd giving rnwy visibility observations rnwys 27L & R. (8-22)

OCEANSIDE-RADIO: July 10, VOR shut down-modernization. Durg this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flgts departing LAX via 208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period. (7-9)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000';150°-200°, 17 n mi at 7000';200°-280°, 35 n mi at 7000';330°-350°, 26 n mi at 13,000';350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E and W below 3000'MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13) Tetrahedron replaced by lgtd wind sock. (10-8)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000';150°-180°, 35 n mi at 9000'. (3-14)

PASO ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000';235°-245°, 26 n mi at 6000';245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W, adj to Heliport.

POMONA-BRACKETT FLD: Caution - men and equip on fld.

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30)

RIALTO-MORROW FLD: Clsd Suns due drag races. (10-8)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000';44°-49°, 17 n mi at 7000';49°-90°, 26 n mi at 7000';90°-130°, 43 n mi at 7000';130°-145°, 26 n mi at 7000';145°-153°, 17 n mi at 7000';153°-180°, 26 n mi at 7000';180°-225°, 43 n mi at 7000';225°-300°, 43 n mi at 5000';300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°

**SAN DIEGO-LINDBERGH FIELD: Jet barrier relocated overrun area rnwy 27. (10-4)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

SAN FRANCISCO INTNL ARPT: Confine opern to center rnwy 1R-19L due const. Taxiway F clsd from E edge rnwy 1L-19R to E end rnwy 28L-10R. Taxiway B clsd spur taxiway int. S end rnwy 1L-19R to spur taxiway int W end rnwy 10R-28L. Taxiway D clsd from S side rnwy 10R-28L to N side taxiway A. Men & equip. operg on turf areas between taxiway A and B S of terminal and S end of rnwys 1L-19R and 1R-19L. (10-8)

SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN RAFAEL-SAN FRANCISCO BAY ARPT: Caution-60' crane and trucks operg daylgt hrs W end rnwy. (5-17)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000';30°-45°, 35 n mi at 9000';80°-95°, 35 n mi at 4000';110°-260°, not checked. (10-23) LF rng has numerous multiples NW and E courses. (9-17)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable as to much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

SANTA PAULA ARPT: Work in progress S side of fld. Caution-trucks immediately S of rnwy. Area S of rnwy soft, muddy. (6-8)

SHOSHONE ARPT: Strip closed for paving. (8-9)

STOCKTON ARPT: Rnwys 11L-29R, 11R-29L, and 16-34 clsd due exten const work in progress. Rnwy 4-22 only avail with temp flare pot lgtg. Tetrahedron tied down to indicate active rnwy. Pilots should observe windsock for crosswind indication. Hvy equip. crossing SW end rnwy 4-22. Flagman on duty directing gnd tfc. Extreme caution advised at

CALIFORNIA: at all times. Intensive helicopter training conducted in vicinity of fld between 0800-1700 daily xcpt Sat and Sun. Acft utilizing SCK rdo rng for simulated range apchs should exercise extreme caution. Min alt for low apchs is 528'MSL. (8-12)

THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi;060°-085°, 40 n mi; 145°-175°, 40n mi;175° thru 180° to 250°, 20n mi; 250°-280°, 40n mi at MEA. (3-14)

THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)

UKIAH-RADIO: DME coverage 43 n mi;305°-355° at 6500'MSL;355°-60° at 9000';60°-100° at 7000'; 100°-150°, at 6000'. 105° thru S and W to 305° over water not checked. (10-11)

UKIAH ARPT: Dirt strip perm clsd. Use surfaced rnwy 15-33 only. (7-9)

VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000'MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)

VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'.

WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.

WOODLAND-WATTS ARPT: 200' at N end N/S rnwy under const. (9-5)

YUCCA VALLEY ARPT: New arpt reported: 2 mi E; 1 rnwy, 3200';lgts;BL4; fuel, F2.

COLORADO: ASPEN ARPT: Fld clsd due const. (9-4)

CHEYENNE WELLS ARPT: Sand drifts over 3' high - dangerous. (7-5)

COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21.

CRAIG ARPT: Rnwy clsd for const. Use 2500' strip immediately S rnwy. (8-27)

DENVER-STAPLETON FLD-TOWER: VHF/DF commun unreliable at 40 mi below 14,000' MSL 154° to 180° and below 16,000' MSL 181° thru 243°. VHF/DF bearings reliable in these areas. (5-8) FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segmented circle denotes rgt hand tfc. (9-12) 200' open ditch N side W end rnwy 8R-26L-flag mrkd day hrs, flashing red ngt hrs. (3-26)

EADS ARPT: Sand drifts over 3' high - dangerous. (7-5)

GRAND JUNCTION-WALKER ARPT: Rnwy 11-29 and neon apch lgts inop until about Jan 1, 1958 for reconst of rnwy and installing rnwy lgts. (8-20)

**LITTLETON-BAR NONE ARPT: Permanently closed. (10-9)

PARSHALL-SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)

PUEBLO-SPECIAL NOTICE: Controlled Firing(demolition) Area for use of the Pueblo Ordnance Depot established within the following described area: bounded on N by lat 38-22-00;E, long. 104-21-22;S, lat 38-18-00; W, long. 104-22-50. (4-30)

PUEBLO MEMORIAL ARPT: 2600' N end rnwy 17-35 clsd to hvy acft. Men & equip. on fld daylgt hrs. Ctc ctl twr for current fld conditions. (9-4)

New taxiways temp mrkd by delineators and/or taxiway lgts irregularly spaced. Unstable shoulders. National standard centerline apch lgtg system, configuration "A", 3000' long, serving rnwy 22 cmsnd. Existing sequence flasher installation serving rnwy 4 extended so that installation is now 2300' long, ending 700' from rnwy end. (6-10) Amber lenses installed on last 2000' rnwys 4-22, 7R-25L, 13R-31L and 13L-31R. (8-2)

NEW YORK-LA GUARDIA FLD-SPECIAL NOTICE: About Oct 15, acft enroute to LaGuardia Fld will be cleared to Sparkhill Int, 360° radial of IDL VOR and 249° radial of ILT VOR - holding SE one min left turn pat. in lieu of the Oradell Holding Pattern. (9-27)

NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbnd acft shall make initial ctc with LaGuardia apch ctl on 119.9 mc regardless of wea. ** FLD: Clsd to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. Lndg and take-off prohibited unless acft equipped with 2-way rdo capable of direct commun with ctl twr on gnd ctl 121.7 mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pattern; NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. Obstns and equip mrkd - flags days, lgtd ngts. Equip parked 250' from centerline of rnwys when not in use. Caution - use paved surface only, sod areas unsuitable for acft operns. Amber lenses have been installed on last 2000' of rnwys 4, 22, 13 and 31. Bi-directional lgts have been installed at apch end of rnwy 22 at a distance of 25'. Run-up pads under const adj to SE side taxiway 1 and 9 - flagged by day and lgtd at ngt. (7-30) High intensity left lane and 3600' left lane neon approach lighting system serving rnwy 4 decmsnd. Standard 3000' high intensity centerline configuration A apch lgt system serving rnwy 4 cmsnd. The center line systems will not be operd at an intensity greater than intensity NR2 pending removal of obstn lgts and poles in apch area. (10-3)

NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No ngt flying permitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)

NEW YORK-WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 min advance notice (tel LOngacre 4-2073). Direct commun by 2-way rdo on 122.8 mc required before apch and take-off. Caution - ship tfc in area. (9-27)

NIAGARA FALLS ARPT-TOWER: ILS lclzr and glide slope shut down. (4-25) VHF/DF unreliable below 3000' in NE quad, 4000' SE and SW quad and 4500' in NW quad. (6-22)

FLD: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara River as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16) 1000' W end rnwy 10L-28R clsd for lndg and take-off. Hi-voltage cable crossing rnwy and 2' excavation at W end. (6-24)

PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at MOCA. (6-14) DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)

NEW YORK: PLATTSBURGH MUN ARPT: VFR tfc pat. for all civil acft in vcnty of arpt is 800' to insure adequate separation from mil jet turbulence. Non-rdo equipped acft will not enter Plattsburgh ctl zone unless ceiling is 2500' and vixibility 3 mi. Non-rdo equipped acft will maintain 2000'MSL until W of arpt. Over that position, acft shall let down to pat. alt.

POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'. Sept 24, VOR/DME shut down until approx Oct 18 - modification and freq change to 111.8 mc. (9-26) S quad out of tolerance beyond 35 n mi due interference. Blue arwy 18 from Ridgewood Int to Poughkeepsie unsuitable IFR tfc. (10-11)

**POUGHKEEPSIE-DUTCHESS CO. ARPT: 305' (465'MSL) lgtd twr erected 19.8 mi SSE (163°T) at lat 41-56-11, long. 74-00-30. (9-16)

ROCHESTER-RADIO: VOR out of tolerance beyond 5 mi from 35°-80°, MOCA. (9-13)

ROCHESTER-MONROE CO. ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T-type hangars. Caution taxiing in these areas. No signal between sunset-sunrise to indicate gnd visibility of less than 3 mi and/or a ceiling of less than 1000'. (3-3)

ROME-GRIFFISS AFB-RADAR APPROACH CONTROL: Soon, CAA will assume jurisdiction of RAPCON and implement radar apch ctl serv at Griffiss AFB and Oneida Co. Arpt. Freqs: 118.5, 121.5, 126.18, 137.88, 236.6, 243.0, 363.8 mc. Normal clearance limits will be Starkville Int, Sherrill Int, Fly Creek Int, Taberg Int, RME HW and UTI MHW. (9-5)

ROMULUS-SPECIAL NOTICE: Hvy ammunition demolition approx 3 n mi NW at lat 42-46-57, long. 76-53-17, 0730-1615, Mon-Fri. Blasts cause shock and flying missiles up to 1000'.

SCHENECTADY CO. ARPT: Due to non-visibility twr unable to ctl tfc on apch end rnwy 10, NG ramp, and portions of taxiway serving rnwys 22 and 33. Caution - lndg jet acft using left hand pat. at 1879'MSL. (5-17)

SPITFIRE LAKE: No seaplane facilities avail. (7-30)

SYRACUSE-RADIO: VOR coverage 180°-220°, 35 n mi at MOCA. (6-14)

ULSTER COUNTY-SPECIAL NOTICE: Effective Oct 25, Caution Area C-216 is rescinded.

UPPER ST REGIS LAKE: No seaplane facilities avail. (7-30)

UTICA-RADIO: ILS LMM freq 254 kc usable dist 10 n mi from 270° clockwise to 360°.

UTICA MUN ARPT: Mil acft will not fly over arpt below 2000'MSL. Lgt acft operg in vcnty of Marcy during daylgt hrs. (10-22)

WATERTOWN-RADIO: DME coverage 35 n mi at MOCA. (6-14) About Nov 11 - VOR/DME will be shut down until approx Nov 29 - modification and freq change from 116.1 mc to 108.6 mc. About Nov 5, J fac will be temp converted to BMH, freq 224 kc, ident ART, lat 43-59-22, long. 76-01-12. To be returned to J fac on completion of VOR modification.

WESTHAMPTON BEACH-SUFFOLK CO. AFB-RADIO: USAF rdo bcn unreliable W quad beyond 20 mi. (3-22) USAF TVOR 20 and 40 mi courses not flgt-checked. (6-10)

WHITE PLAINS-WESTCHESTER CO ARPT: First 400' rnwy 23 not visible from ctl twr.

WURTSBORO-MAMAKATING ARPT: Glider and soaring operns being conducted during daylgt hrs within a 10 mi radius of arpt, 33 mi 300° heading from Newburgh.

NORTH CAROLINA: CHARLOTTE-RADIO: About Nov 4, LFR freq 284 kc will be changed to 307 kc.

CHARLOTTE-DOUGLAS ARPT: All acft operg in and out of arpt required to have operg transmitter and rcvr on a twr freq, xcpt in emerg or on prior approval of twr or arpt mgr's office. (1-20)

CHERRY POINT MCAS-RADIO: VOR may have radial error to 9° in 180°-300° sector.

ELIZABETH CITY-RADIO: VOR/DME shut down until approx Oct 24 - relctn to lat 36-15-27, long. 76-10-33. (9-25)

GREENSBORO-RADIO: DME coverage 140°-160°, 35 n mi at MEA. VOR radials 310°-360° out of tolerance due to excessive roughness and bends. (6-10)

HICKORY RADIO: VOR radials 150°-160° out of tolerance acct roughness and bends. (4-12)

**KINSTON-STALLINGS FLD: Formerly carried as Stallings Air Base. (10-2)

LAURINBURG-MAXTON ARPT: New arpt reported: Lctn 3.5 mi NNW; elev 220'; number of rnwys 1; longest rnwy 6500'; remarks - use NE/SW rnwy only. Transient acft park W ramp in vicinity arpt bcn. Caution - vehicular parking and tfc W ramp. (1-10)

MANTEO ARPT: Rnwy lgts inop. (1-30)

RALEIGH-DURHAM-RADIO: DME coverage 120°-230°, 35 n mi; 230°-310°, 26 n mi; 310°-360°, 35 n mi at MIN. VOR radials 030°-085° and 110°-275° out of tolerance, roughness and bends. (6-14) Concurrently with VOR shutdown for modernization the following temp MEAs are established: V155 RDU-LVL 2800'MSL, V194 RDU-CVI 3000'MSL, V128 RDU-LaGrange 3500'MSL, V3 RDU-LBT H fac 3300'MSL, V3W RDU-SOP 3000'MSL, V194 RDU-

NORTH CAROLINA: Norwood 4000'MSL. Holding at Moncure rqrs - altitude separation from V3W and V128S. All other holding at designated fixes to be MEA indicated above. (9-8)

RALEIGH-DURHAM ARPT: Due to non-visibility twr unable to ctl tfc on taxiway between rnwys 5 and 32. No signal between sunset-sunrise to indicate gnd visibility of less than 2.6 n mi and/or a ceiling of less than 1000'. Rnwy 18-36 lgtd sunset-sunrise when wind less than 6 mi unless other rnwy requested. (8-27)

RICH SQUARE ARPT: New arpt reported: 36-15N, 77-17W; elev 78'; 1 strip, turf, 2900', NW/SE; no facs; P-line NW. (10-7)

**ROCKY MOUNT ARPT: Ctc Rocky Mt Rdo for arpt info prior lndg. (9-6)

**SALISBURY ARPT: Unicom 122.8 mc cmsnd. Arpt clsd for const xcpt with prior approval during daylgt hrs by use of Unicom. (9-12)

WILMINGTON-SPECIAL NOTICE: Effective Oct 24, Warning Area W-523 will be established as follows: Beginning at lat 34-15-00, long. 77-39-00; thence SW to lat 34-05-00, long. 77-43-00; SE to 32-20-00, 77-20-00; SE 32-15-00, 77-00-00; NE to 33-04-00, 75-51-00; thence NW to point of beginning. Altitude: Surface to 50,000'MSL. Time of use: Daylgt hrs only during VFR. Activities Conducted: Air-to-air rocketry. Controlling Agency: Seymore Johnson AFB, Goldsboro, N.C. (9-5)

WILMINGTON-RADIO: VOR quad 65°-235° flgt-checked to shoreline only. (8-14)

WILMINGTON-NEW HANOVER CO. ARPT: Helicopters lndg and take-off use caution to avoid 55' unlgtd overhead hi-voltage p-line running W from ctl twr to arpt bndry. Due to non-visibility twr unable to ctl tfc on taxi strip between rnwys 16 and 23 and section W of hangar on taxi strip from term ramp to rnwy 9. (10-8)

WINSTON-SALEM SMITH REYNOLDS ARPT: Arpt tfc ctl exercised from temp twr lctd at NE edge of term ramp. Due to non-visibility, twr unable to ctlt tfc for 3000' on SE end rnwy 15-33 and taxiway parallel thereto and a portion of base leg rnwy 3 and final apch rnwy 9. Rnwy 33 clsd to no-rdo acft. (9-11)

NORTH DAKOTA: DICKINSON-RADIO: About Oct 28, VOR will be shut down until approx Dec 13 - conversion to VORTAC. (10-8) During this period, the following MEAs can be utilized: Direct Routes: MLS VOR to VIS VOR, 10,000'; MLS VOR to DIK LFR, 4500'; DIK LFR to BIS VOR 4100'.

FARGO RADIO: VOR radials 105° and 340° out of tolerance acct roughness and scalloping.

✱FARGO-HECTOR FLD-RADIO: ILS glide slope lctd 500' W new S end rnwy 17-35. About Oct 14, ILS glide slope and MM will be inop until approx Dec 14 - relctn. (10-7)

**FARGO-HECTOR FLD: Longest rnwy 7150 x 150' (9-27)

MINOT-RADIO: VOR shut down until approx Oct 16 - retuning and readjustment. (10-9)

MINOT INTNL ARPT: 1053' (3123'MSL) lgtd twr being erected 12.1 n mi S (191°T) at lat 48-03-02, long. 101-20-29. (8-14) 440' (2200'MSL) lgtd twr being erected 2 n mi SSW (222°T) at lat 48-12-56, long. 101-19-05. (8-15)

PEMBINA ARPT: Bcn lgtd but not rotating. (4-11)

WESTHOPE ARPT: Fld rough - use with caution. (6-14)

OHIO: AKRON ARPT: Due non-visibility twr unable ctl tfc SSW airdock on apch to rnwy 36.

AKRON-CANTON ARPT: Non-controlled area bounded by Arwys Amber 6, Red 19, Victor 103 and Red 17 - perm U.S. NAS Akron, Ohio acrobatic--camera gunnery area from surface to 20,000' during daylgt hrs VFR conditions only. (11-28)

**BEACH CITY-AMES ARPT: New arpt. Type: "P"; lat 40-39, long. 81-34; lctd 1 mi E; RR W; elev 1000'; 1 rnwy 1800' x 125' - turf; 80/87 oct fuel. (4-21)

CANTON-MARTIN ARPT: Clsd until further notice. (1-11)

CARDINGTON-SPRING VALLEY ARPT: Type "P"; 40-30N, 82-52W; lctd 1.5 ENE; elev 1030' 1 rnwy—2000' x 100' (sod)' 80/87 oct gas; remarks - wires W end. Soft when wet. E/W rnwy being lengthened to 2700'. (5-10)

CINCINNATI-RADIO: DME coverage 60°-150°, 35 n mi at MOCA. (6-14) VOR 045° radial V 5 out of tolerance due hvy visual and aural interference. (7-26) About Oct 15, LFR ident will be changed to LUK. (9-4)

CINCINNATI-GREATER CINCINNATI ARPT: Due to nonvisibility twr unable to ctl single-eng tfc on NW/SE taxiway from rnwy 18 to 200' SE of rnwy 18 unless such tfc remains on fld side of this taxiway. After lndg on rnwy in use acft taxi straight ahead to nearest intsxn. No 180° turns on rnwy prior to rcvg approval from twr.

CINCINNATI-LUNKEN ARPT: Due to non-visibility twr unable to ctl tfc on 360' of rnwy 20 beginning 1160' from apch end and in tfc pat directly NW of fld. Prior to departure acft with no rdo are rqrd to fone twr for taxi and take-off instructions. Use rnwys only unless otherwise authorized by twr. (4-22)

CLEVELAND-RADIO: DME coverage 60°-100°, 43 n mi at 2900'; 100°-145°, 35 n mi at 2500'; 170°-190°, 35 n mi at 2500'; 245°-310°, 35 n mi at 2000'; 310°-060°, not checked.

OHIO: **CLEVELAND-HOPKINS ARPT-TOWER: Radar surveillance PPI apch not avail. VHF/DF coverage 50°-180°, 2500'; 180°-50°, 3000' at 40 mi. (9-26) FLD: 2 way rdo capable communicating Cleveland Twr in satisfactory manner mandatory. Rnwy 14-32 restricted to NW tk-offs & SE lndgs. Const of N concourse in progress 800' N from main term. Elevated lgts 30" high installed all taxiways and rnwys 18R-36L. Taxi signs now installed all taxiways. W taxiway reads letter R, NW taxiway reads S, N taxiway reads T. Rnwy 9L-27R clsd for W lndgs only. Soon combination 1650' flash-blaze and left lane 1500' neon apch lgt system serving rnwy 5L will be decmsnd. Simultaneously, 3000' standard hi-intensity center line configuration A will be cmsnd. On or about Oct 15 sequence flashers will be cmsnd. (9-13)**

CLEVELAND-LAKEFRONT ARPT: New rnwy const in progress 200' N of present rnwy. Ctc CLE rdo or CEL unicom for lndg instructions. (11-29)

CLEVELAND-LAKEFRONT SEAPLANE FACILITY: Clsd for season, effect Nov 1. (10-7)

****COLUMBUS-SPECIAL NOTICE: During daylgt hrs Flight Test Area at any altitude is established within the following described area: beginning at intsxn of S bndry of Arwy Red 8 and SE bndry Amber 6 & proceeding SW along the SE bndry of Amber 6 to point of intsxn with the NE bndry Red 18; thence SE along the NE bndry of Red 18 to the point of intsxn with the N bndry of Arwy V-128; thence E along the N bndry of Arwy V-128 to point of intsxn with the NW bndry Arwy V-44; thence NE along the NW bndry of V-44 to point of intsxn with the W bndry of Blue 81, northerly along the W bndry Blue 81 to point of intsxn with the SW bndry V-38; NW along SW bndry V-38 to intsxn S bndry of Red 8; W along S bndry Red 8 to point of beginning. Test opern include: (1) Rolls in excess of 90° of level flgt; (2) dives in excess of 5,000'/min rate of descent, or greater than 20° dive angle; (3) stalls; (4) spins; (5) maneuvers during which a load of factor of three "g" is exceeded; (6) low level test runs conducted at high speeds. Only item 6 will be conducted within the confines of Victor Arwy 45 and Blue 15. (8-29)**

COLUMBUS-PORT COLUMBUS ARPT-SPECIAL NOTICE: VFR Jet Traffic Rules-Take-offs: Rnwy 27 - turn to a heading of 360° as soon as safety will permit and maintain 360° heading until clear of airport control zone. Rnwy 9 - turn to a heading of 110° as soon as safety will permit and maintain 110° until clear of airport control zone. Entering control zone-maximum airspeed 250 knots. Maintain 2000' MSL until on base leg for lndg apch. VFR Multi-engine Rules - Take-offs: Rnwy 23 and 27, a right turn following take-off is required to avoid hvy populated area W and SW of arpt. Approach for Landing: Maintain 2000' MSL until on base leg or if a straight-in apch is used maintain 2000' MSL as long as practical before starting normal descent on final approach. (3-23)

COLUMBUS-PORT COLUMBUS ARPT-TOWER: About Nov 4, radar departure control will be implemented. (10-1) FLD: Due to non-visibility twr unable to ctl tfc on E taxi strip btwn hangars 1 & 4. Rnwy 18-36 clsd for lndgs and tk-offs btwn 0700E and 1800E. Taxiing permitted on rnwy. Taxiway D clsd from rnwy 23 to new ramp from 0700E to 1800E. 2900' hi-intensity centerline apch lgtg system, configuration "A" serving rnwy 27 cmsnd. (9-19) Excavation 2' deep, 150' wide, in extension N taxiway between 6500'-8000' mark. Men & equip. working 0700-1700E daily. Men & equip also working 30' N of rnwy 12-30 0730-1600E. (10-10)

COLUMBUS-PRICE FLD: E/W rnwy clsd. Const. Use caution taxiing. (10-3)

DAYTON ARPT-TOWER: About Oct 30, ILS glide slope, MM and LMM will be shut down until approx. Nov. 30 - relctn and conversion, acct extension rnwy 6. Glide slope will be relctd 1050' NE of SW end extended rnwy and 400' NW centerline. MM and LMM will be relctd centerline 3540' SW of SW end extended rnwy. Glide slope angle will be 2.6°. Alt over MM 1210'MSL; over OM 2040'MSL. (9-30) FLD: Caution when apchg arpt as fluorescent street lgtg paralleling S bndry of arpt can be mistaken for rnwy lgtg. No grass operns. Rdo rcvr rqrd. Due to non-visibility, twr unable to ctl tfc on taxiway from E and N side to W side of hangars. Use unpainted area of concrete for taxiing in line with blacktop on taxistrip. That portion of rnwy 6-24 SW of row of red lgts clsd. (8-26) Rnwy 6-24 being extended 1000' SW end and 500' NE end; total length to be 7000'. On or about Oct 30 neon apch lgt lane to be shut down for approx. 30 days for relocation to rnwy 6 & conversion to standard 3000' hi-intensity centerline configuration A apch lgt system. (9-30)

Min hold alt at McEwen 3500'; V140 BNA VOR to Hartsville Int via BNA 056° MEA 3500'; V140 Hartsville Int. to Highway Int. via BNA 056° MEA 7000'; V7 BNA LFR to Lewisburg Int MEA 3000'. (10-8)

★NASHVILLE-BERRY FLD-TOWER: Effective Oct 1, apch ctl will utilize radar procedures to effect ctl and separation of arriving tfc destined for Berry Fld. Normal inbnd clearance limits for acft prior to radar ctl will be as follows: BWG VOR, GHM VOR, Murfreesboro Int, McEwen Int, Springfield Int, Greenbrier Int, SMV H fac, Smithville Int, Hartsville Int, Watervalley Int, Springhill Int, and BNA LFR. (8-31) FLD: Taxiway between ends of rnwy 9 and 15 clsd for an indefinite period. Rnwy 2R-20L clsd to all tfc as a rnwy - use as a taxiway. (12-28)

TRI-CITY ARPT-TOWER: ILS glide slope usable for apchs to MM only. (7-29)

UNION CITY-TOM STEWART ARPT: Two antenna poles under const 1500' E of N/S rnwy, 60' AGL, 400' AMSL. will be mrkd and lgtd. (9-25)

TEXAS: ABILENE MUN ARPT: Due to non-visibility twr unable to control tfc on taxiway from large hangar N including T-hangar area. (2-16)

**ABILENE-HUGHES ARPT: Clsd to all transient tfc. (9-26) UNICOM decmsnd. (o (10-3)

ALICE ARPT: Bndry lgts rnwy 13-31 unreliable. (5-28)

AMARILLO-SPECIAL NOTICE: Avoid flgt over or within 0.2 n mi of the following helium plants because of the possible release of natural gas: Amarillo Helium Plant on R.I. RR about 6.1 n mi W of Amarillo, Exell Helium Plant on S.F. RR about 30.3 n mi N.

AMARILLO AIR TERMINAL-TOWER: ILS lclzr has severe reflections from 98°-135° from 4 s mi out. (8-27) FLD: Neon apch lgt system removed due const. (6-24)

AUSTIN-BERGSTROM AFB-RADAR APPROACH CONTROL: Effective Nov 22, apch ctl will implement radar arrival ctl procedures. Radar separation standard will be applied as specified in the MANOP radar procedures for arpt tfc ctl twrs. Arriving acft will normally be cleared to the following fixes: Round Rock, Butler, Bergstrom, Manchaca, Oak Hill, Lake Travis, Austin VOR, Austin H fac, Bergstrom H fac and Austin ILS LOM. (9-26)

AUSTIN-MUELLER ARPT-TOWER: Apr 15, ILS MM shut down - relctn. (4-15) During this period, ILS lndg min rnwy 30 left raised to 300-1. (4-11) FLD: Acft lndg and taking-off are cautioned to avoid Bergstrom AFB tfc pat. - exten jet opern all alt. Neon apch lgt system inop. Unlgtd obstn on apch end rnwy 30. Touchdown point intsxn rnwy 30 with rnwy 3-21. Green rng lgts on rnwy 30 designate touchdown point ngts. (10-4) Const in progress 1100' SE of advertised touchdown point of rnwy 30L. (5-7)

BEAUMONT-JEFFERSON CO. ARPT: Due non-visibility twr unable to ctl tfc on ramp N of hangar #1. (2-13) Const with men & equip in clear zone NW of aprt & apch end rnwy 11.

BIG SPRING-SPECIAL NOTICE: Acft operg in vcnty of Big Spring Rng and Webb AFB in VFR wea exercise caution due to intensive jet tfc. Alt below 5000' saturated on Arwy Green 5 and V-16. (4-22)

BIG SPRING-HAMILTON ARPT: Caution all alts - intensive jet trng.

BROWNSVILLE-RADIO: About Nov 1, VOR will be shut down until approx Feb 1, conversion to VORTAC. (9-23) During shutdown LFR may be substituted for VOR on adj civil arwys.

CLARENDON-RADIO: About Oct 24, LFR will be perm decmsnd. (9-24)

COLLEGE STATION-RADIO: DME coverage 60°-90°, 26 n mi at 2000'; 95°-110°, 35 n mi at 2000'; 110°-135°, 35 n mi at 1600'; 135°-165°, 35 n mi at 2000'. (2-6)

TEXAS: **DALLARDSVILLE-BIG SANDY ARPT: No facilities. Emerg use only. Land at own risk. (9-19)

DALLAS-RADIO: Radial 325°-345° out of tolerance due to severe scalloping. (2-21) About Oct 24, Waxahachie and Duncanville FMs will be perm decmsnd. (9-21)

DALLAS-ADDISON ARPT: New arpt reported: 32-58N, 96-49W; elev: 644'; rnwys, 2, longest 4500' asphalt surface; Fuel: F4; Facs: S5; Lgtg BL4; attended 24 hrs. (9-8)

DALLAS-LOVE FLD: Acft arriving or passing within 5 mi at 3000'MSL or below, make initial ctc with Dallas Apch Ctl on 121.1 or 307.2 mc regardless of wea or flgt plan. Acft not equipped for 2-way commun on 121.1 or 307.2 mc will use other availfreq and ctc Love Twr. Formation take-off not permitted. Caution - acft often hidden from ctl twr view by bldg 250' NNE of twr when at alts of 2000' or less. Extensive ditching, grading and paving operns in progress entire arpt area including taxiways and ramp adj to rnwys and new term bldg. Hazard mrkd and lgtd. Ctc control twr for detailed taxi instructions.

EL PASO INTNL ARPT: Acft will fly one base leg of 90° to tfc pat. on entry and one cross wind leg to 90° after take-off; following vertical separation in ctl zone; hvy and mil acft no higher than 5000'MSL or 1000' above terrain; lgt acft no higher than 4500'MSL or 500' above terrain. All 360° overhead apchs will be made at 1000' above terrain and pitch out to left. Simulated apch ILS not allowed under 200' daylgt hrs. Rnwy 30 intermittently clsd. High and low pressure oxygen avail. Tfc make left hand apch to rnwys 26, 22 and 17; rgt hand to rnwy 35, 04 and 08. Exercise vigilance to maintain lateral separation with acft on final apch to rnwy 03 Biggs Air Force Base. Formation take-off prohibited. Turn on lndg lgts 5 mi out, during darkness. Single point JP-4 plus gas turbine compressor starting equip avail.

EL PASO-BIGGS AFB-RADAR APPROACH CONTROL: About Nov 1, RAPCON will be cmsnd Trans and rcvg: 118.1, 118.7, 119.1, 121.5, 126.18, 134.1, 136.8, 137.88, 138.42, 142.02, 236.6, 243.0, 270.6, 289.4, 335.8, 363.8 mc. Trans only: 114.5, rcvg only: 122.7, 3023.5 kc. IFF operg but not cmsnd. (10-1)

FORT STOCKTON-RADIO: About Nov 1, VOR will be shut down until approx Feb 1 - conversion to VORTAC. (9-23) During shutdown, following arwys unusable: V198 Rocksprings to Hudspeth; V211 Rocksprings to Ft. Stockton; V222 Junction to Culberson. (9-30)

FT. WORTH-RADIO: About Nov 1, VOR will be shut down until approx Feb 1, conversion to VORTAC. (9-23)

FT. WORTH-CARTER FLD-TOWER: About Oct 30, trans and rcvr 120.7 mc will be changed to 118.9 mc. Freq 123.9 mc will be cmsnd. (9-30) FLD; Paving equip operg in rnwy exten area SE of rnwy 13-31. Equip is 19' high, flagged days and lgtd ngts. Rnwy will be clsd to NW lndg periodically when equip is adj to rnwy end. (9-12)

FT WORTH-SAGINAW ARPT: First 300' rnwy 36 not usable acct p-line not yet removed.

GREENVILLE-MAJORS ARPT: All rnwys clsd xcpt 17R-35L due men and equip working during daylgt hrs. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Ngt lndg not advisable. (8-13)

**HARLINGEN-HARVEY RICHARDS ARPT: 994' (1049' MSL) lgtd twr erected 5 mi SW (225°T) at lat 26-08-56, long. 97-49-18. (7-20)

HONDO AIR BASE: Inten day and ngt USAF primary trng VFR to 10,000' Mon-Fri, within 35 mi radius. Clsd to all civil acft xcpt ofl bus. or prior approval USAF Operns or Civil Director of Flying. 2-way rdo rqrd. Clsd all acft ngts, Sat, Sun and holidays xcpt emerg or prior approval. Approval obtained during normal duty hrs or by letter. (1-23)

HOUSTON-RADIO: Due to unreliability of radials 120°-140° and 306°, instrument opern and apch procedures utilizing these radials are not authorized. In lieu thereof instrument operns between Houston VOR and CLL VOR are temp authorized utilizing GLS 315° radial and CLL 118° radial. Houston VOR to GLS VOR authorized utilizing GLS 314° radial. Courtney, Cypress and Fairbanks Ints remain using above temp radials and charted ELA VOR radials. No change in charted alts. Houston VOR instr apch procedure No. 1 authorized utilizing the 315° radial in lieu of the 306° radial for apch radial with applicable circling mins. Ceiling less than 500 and visibility of less than one mi not authorized. Use GLS 314° radial in lieu of HOU 134° radial for missed apch. Alternate missed apch procedure on HOU ILS authorized utilizing the HOU VOR 315° radial in lieu of 306° radial. (2-26)

HOUSTON-CLOVER ARPT: Caution on lndg and take-off. 80' (AGL) oil derricks erected on arpt and adj to bndrys. New N/S 6400' rnwy and paralleling taxi strips under const. Use only existing rnwys. (11-30)

**HOUSTON-INTNL ARPT: Tetrahedron replaced by lgtd wind sock-lctd at former tetrahedron lctn. Non-rdo equipped acft use extreme caution and abide by ctl twr lgt signals. Deep ruts on E shoulder of NW/SE rnwy. Stay on pavement. Rnwy 8-26 opened for take-off to [illegible] only, no lndgs. (3-11) Old apch lgt system changed to new centerline system, configuration A to rnwy 3. Flgt checked and opern normal. (9-12)

TEXAS: JEFFERSON-CYPRESS RIVER ARPT: Rough- use extreme caution. (4-25)
KARNACK-SPECIAL NOTICE: Avoid flying over Longhorn Ordnance Plant approx. 1.7 n mi ESE below 3000' - photo flash explosions daily 0700-1700. (11-3)
KERMIT-ROBINSON ARPT: Closed due to oil well drilling. (9-6)
LAMESA-ADCOCK ARPT: New arpt reported. 32-48N, 101-36W; lctd 5 mi NNE; elev 3050'; 1 strip N/S 2000'; F1 fuel. (8-27)
LAREDO-SPECIAL NOTICE: Acft operg around Laredo LFR and/or VOR or Laredo AFB should exercise extreme caution due to intensive jet tfc. Recommended arrivals and departures to Laredo Mun Arpt are NW or SE along Rio Grande for at least 15 mi prior to arriving over arpt or prior to departing on course. (8-3)
LEON-RADIO: About Oct. 21, H fac will be shut down until approx. Oct 28 - maintenance.
LONGVIEW-GREGG CO. ARPT: Two 40' lgtd antenna poles erected 1000' E of rnwys 17-35 and 500' S E/W taxiway. (12-4) Due non-visibility twr unable to ctl tfc on taxiway from N hangar to rnwy 13. (9-13)
LUBBOCK ARPT-TOWER: Mar 4, ILS glide slope shut down until approx. Nov. 1. (8-1) Aug 29, MM and LMM shut down until approx. Nov. 1. (8-29) FLD: N 1000' rnwy 17-35 clsd to all acft until about Nov. 1, for extension of rnwy. Rnwy 17 threshold lgts moved 1000' S. Men and hvy equip. working during daylgt hurs in apch zone rnwy 17 and parallel to the rnwy on W side from rnwy 12N. Rnwy 17-35 clsd to Convair and larger acft during const period except durg IFR wea conditions or with N or S winds of 20 knots or more. (9-26)
LUFKIN-RADIO: DME coverage 017°, 2400' 34 n mi; 032°, 2400' 35 n mi; 090°, 2000' 20 n mi; 170°, 1600' 40 n mi; 190°, 1600' 40 n mi; 310°, 2500' 25 n mi. (5-8)
LUFKIN-ANGELINA CO. ARPT: Sod strip clsd. Use hard surface rnwy only. (8-22)
MARFA-RADIO: Auto. rebroadcast feature cmsnd. Rcvg 122.1, 126.7, 135.9, 255.4 mc.
MARSHALL-BEER'S CADDO LAKE ARPT: Auto races being conducted periodically daylgt hrs Sundays. Fld will be clsd by a white X both ends of strip. Acft desiring to land circle fld and fld. will be opened as acft will be given priority. (4-17)
McALLEN-MILLER INTNL ARPT: Rnwy 18 clsd for take-offs and lndgs. (11-26)
MIDLAND-RADIO: Oct 14, VOR/DME will be shut down until approx. Oct 28-modernization.
MIDLAND ARPK: Mil student flying restricted from use of N/S rnwy. (10-12)
MINERAL WELLS-RADIO: VOR/DME coverage 30 n mi from 0°-95° at 2300'MSL. (6-15) About Nov. 1, VOR will be shut down until approx Feb - 1 conversion to VORTAC. (10-1) During shutdown flgts authorized to use MWL "H" in lieu of VOR. Altitudes as charted, routes as follows: V163 Mill Int to H fac by MLW 180. To FTW VOR by FTW 199. V16N ABI VOR to Breckenridge Int by ABI 055, to MWL "H"by MWL 262, to HTT "H" by MWL 062, to McKinney Int by HTT 056. V16 ABI VOR to MLW "H" by ABI 067 and MWL H 247, to DAL VOR by DAL 257. V16S ABI VOR to Crisco Int. by ABI 085, to MWL "H" by MWL 231, to Russell Int by MWL 091. Intsxns as follows: Breckenridge Int use radials ABI VOR 055, MWL "H" rad 262; Mill Int use ACT VOR 306, BRT VOR 255; Cisco Int use ABI VOR 085, MWL "H" 231; Russell Int use MWL "H" 091, FTW ILS; Newark Int use FTW VOR 128, MWL "H" 059; Lake Worth Int use FTW VOR 149. DAL VOR 257; Saginaw Int use DAL VOR rad. 257, FTW ILS: Chapel Int use MWL H rad. 332 , FTW VOR rad. 239; Haslet Int use MWL "H" rad 064°, FTW ILS. For Roanoke, Lewisville, and Little Elm Int use HTT Rad. 056 in lieu of MWL VOR 056.
**ODESSA-ECTOR COUNTY ARPT: 500'(3444'MSL) lgtd twr erected 5.5 n mi SSW(220°T) at lat 31-50-50, long. 102-27-15. (9-19) Rnwy 7-25 closed. (5-16)
ORANGE-BROWN ARPT: 787'(787'MSL) lgtd twr being erected 10 n mi WNW(297°T) at lat 30-08-59, long. 93-58-54. (10-3)
PORTLAND-HUNT ARPT: 172'MSL lgtd drilling derrick being erected 5 n mi ESE(113°T) at lat 27-51-46, long. 97-15-41. (9-18)
ROCKPORT-ARANSAS CO. ARPT: Caution-oil drilling operns, structures are moved intermittently and any rnwy may be clsd on short notice. (2-10)
SALT FLAT-RADIO: VOR radials 25° clockwise 045° unusable beyond 35 n mi. DME unusable 025° to 045° beyond 35 n mi at MEA 10,800'.
**SAN ANGELO-MATHIS FLD: 130' drilling derrick erected 2.5 n mi E has been removed. (9-10) 420'(2870'MSL) lgtd twr erected 19.6 n mi NNW(353°T) at lat 31-41-30, long. 100-31-45. (10-2)
SAN ANTONIO-RADIO: About Nov. 1, VOR will be shut down until approx Feb 1 - conversion to VORTAC. (9-23) During shutdown, LFR may be substituted for VOR as follows: V-17, V-68, V-198, V-163 Direct to next VOR; V163 W, V-222 SAT LFR 328 to Fredericksburg; V-163 SAT N Crs. & MTA Rad 163 to MTA VOR; V-17W SAT N Crs to Spring Branch Int; V-222 SAT LFR direct SIH Rbn thence via SIH 065 to Round Top Int V-68 SAT LFR 158 and CRP Rad 312. MEA's remain as charted. Reporting points remain as usable with following substitution: Blanco Int. SAT LFR 188 Brng. and AUS VOR 228, Sattler and

TEXAS: Kyle Intsxns. Use SAT LFR direct. CMK Rbn Crs. Use CMK Rbn for Bergstrom Int. Restoration of SAT VOR cancels this Notam. (10-3)
SAN MARCOS ARPT: NE/SW strip rough- caution. (8-6)
SNYDER-WINSTON FLD: Caution. Const of new E/W rnwy and connecting taxiway. 120' water twr under const 2000' E of admin bldg. To be painted & lgtd. (10-8)
SOMERSET-RADIO: About Oct 28, H fac will be shut down until approx. Nov. 4-maintenance.
TEXARKANA-SPECIAL NOTICE: Demolition in progress during daylight hours on Green Arwy #5 approx. 13.4 n mi WSW of Texarkana LF rng.
TILDEN-TRUE RANCH ARPT: New arpt reported: 28-18N, 98-36W; lctd 11-1/2 mi SSW; 1 strip (NW/SE) sod, 4000'; elev 320'MSL. (7-10)
UVALDE-LEONA RANCH STRIP: New lndg area reported: Lctd 35 n mi NW; lat 29-30, long. 100-22; elev 1720'; 1 strip - 2800'long. (1-28)

HERNDON-RADIO: VOR usable dist 35 n mi at MOCA NE quad. (6-14)

INDEPENDENCE-COX ARPT: Closed until further notice. (7-1)

LANGLEY AIR FORCE BASE: Lndgs and take-offs prohibited unless acft equipped with 2-way rdo. Clsd to civil acft unless oh ofl bus. Follow centerline all taxiways. Intensive jet operns 50 mi radius to 45,000' cont 0800-2400E. Conventional acft use rectangular pat alt 1000' MSL. Rnwy 12-30 perm clsd for lndgs and take-offs. Indicate in flgt plan when destined for NACA or TAC Hq. No overruns rnwy 17-35. Do not land short rnwys 07 or 25 acct jet barriers. Caution - hvy civil air tfc crossing extension line of rnwy 07-25, 3 to 5 mi from apch end of rnwy 07.

LAWRENCEVILLE-RADIO: VOR radials 185°-240° usable only to 22 n mi MOCA. (6-14)

LEXINGTON ARPT: Land at own risk. Unattended - no fuel.

LYNCHBURG-PRESTON GLEN ARPT: Signal for below VFR wea minimums inop, ngts.

MONTEBELLO-RADIO: VOR coverage 110°-220°, 35 n mi at MOCA. (6-14) DME coverage 150°-180°, 35 n mi at 3000'; 180°-210°, 35 n mi at 5000'.

NEWPORT NEWS-PATRICK HENRY ARPT: Rnwy 2-20 length 5000' - 1500' extension N end not to be used by acft over 26,000 lbs. (7-26)

NORFOLK AIR ROUTE TRAFFIC CONTROL CENTER: About Oct 29, ARSR will be inop. until approx Nov. 2. (10-1)

NORFOLK ARPT-TOWER: VHF/DF coverage 1500' within a 40 mi radius. (8-29) FLD: Const in progress N of term ramp adj to ramp and N/S taxiway. Area mrkd at ngt. Men and equip. on fld daylgt hrs. (4-26)

PULASKI-RADIO: VOR coverage 305°-15°, 22 n mi; 15°-55° and 195°-210°, 35 n mi at MOCA. (6-14) DME coverage 10°-40°, 35 n mi at 6000'; 40°-120°, 43 n mi at 6000'; 120°-200°, 35 n mi at 6000'; 200°-225°, 26 n mi at 6000'; 225°-255°, 43 n mi at 6000'; 255°-010°, 26 n mi at 6000'.

QUANTICO MCAS-SPECIAL NOTICE: Extensive helicopter and conventional acft operns involving flight testing, training, and simulated straffing demonstrations conducted daily in the Quantico MCAS arpt tfc control zone surface to 2000'. Over flights operg on arwys Red 45, Green 5, and Victor 16 are cautioned to remain clear of the Quantico tfc pat area durg VFR opern.. (5-15)

RICHMOND-BYRD FLD: Rnwy 6-24 clsd during daylgt hrs. During hrs of darkness opened full length and width xcpt last 1000' NE end; opened 150' width in center only. Const area and threshold NE end mrkd by flares at ngt. Rnwy 15-33 clsd to all operns due const. All acft rqrd to have operg 2-way rdo for ngt opern and at least functioning rdo rcvr for daylight opern. Due to non-visibility twr unable to control tfc N portion of N/S taxiway parallel to rnwy 2-20. Use paved area only - all other soft. Landing FEE for multi-eng executive and non-scheduled acft. (9-17)

ROANOKE-WOODRUM FLD-TOWER: About Oct 18, trans & rcvr 119.3 mc will be decmsnd; trans & rcvr 118.3 mc will be cmsnd. (10-7) FLD: Due to non-visibility twr unable to ctl tfc last 200' NE/SW taxi strip and 200' approx midway E/W strip. Men & equip. adj all rnwys and taxiways - caution. No 180° turns on rnwys. Landing FEE for multi-engine

VIRGINIA: acft. All acft rqrd to have operg 2-way rdo for day and ngt opern. (8-21)

WAVERLY ARPT: Unattended until further notice - no services avail. - land at own risk.

WINCHESTER ARPT: New arpt reported: Lctd 18 mi N; elev approx 900'; 1 rnwy; 3500' long. (graded dirt - shale); remarks - telephone line parallel to rnwy 100' to one side.

WASHINGTON: SPECIAL NOTICE: Unmrkd p-lines across coves in Puget Sound area & lakes.

BELLINGHAM-RADIO: VOR radial 281° beyond tolerance at 13 n mi, 1500'. Coverage 80°-90°, 25 n mi at 11,000'; 260°-300°, 15 n mi at 1500'. (10-11)

BELLINGHAM ARPT: 1000' NE end NE/SW rnwy clsd to hvy tfc. (11-19)

BREMERTON-KITSAP CO. ARPT: The first 2000' rnwy 1 clsd to all Naval acft.

ELLENSBURG-RADIO: DME and VOR coverage 40°-60°, 26 n mi at 7000'; 60°-150°, unknown prohibited area; 150°-175°, 26 n mi at 5500'; 175°-260°, 43 n mi at 10,000'; 260°-290°, 43 n mi at 8000'; 290°-40°, 26 n mi at 10,000'.

EPHRATA-RADIO: DME and VOR coverage 124°-209°, unknown prohibited area; 227°-280° 35 n mi at 8000'; 280°-340°, 26 n mi at 5000'; 340°-350°, 35 n mi at 5000'.

EPHRATA ARPT: Rnwy lgts on rnwy 2-20 inop. (10-8)

EVERETT-PAINE AFB-RADIO: USAF VHF/DF steers unreliable 080°-160° below 9000'.

OLYMPIA-RADIO: VOR coverage 340°-45°, 43 n mi at 4000'; 45°-135°, 43 n mi at 8000'; 135°-155°, 43 n mi at 7000'; 155°-225°, 43 n mi at 5000'; 225°-275°, 17 n mi at 5000'; 275°-340°, 43 n mi at 8000'. 314° radial on Shelton usable for 26 n mi at 2000'. 143° radial on Portland, Oreg intsxn usable for 35 n mi at 5000'.

OTHELLO ARPT: Caution - unlgtd power line approx 50' high E end - unmrkd.

PULLMAN-MOSCOW REGIONAL ARPT: Rnwy lgts avail. on request. W taxiway clsd. Use rnwy to taxi for E take-off. Take-off may be made from rnwy at center taxiway intsxn at pilot's discretion. (12-20)

RENTON ARPT: Until about Mar 15, 1958, const in progress - use rnwys & taxiways only.

SEATTLE-BOEIN G FLD: 2-way rdo required xcpt on prior request. Lgt gun signals issued on final apch. All daylgt VFR operns of single-eng acft confined to rnwy 12-30 (short rnwy) E of rnwy 13-31. Tfc pat E of arpt at 1000'. If equipped with retractable lndg gear drop gear prior to entering tfc pat. Avoid flying over rnwy 13-31 and approaches thereto. All turns when taxiing off rnwy 12-30 made toward the term (E). Multi-eng and jet acft use rnwy 13-31. Multi-eng acft tfc pat W of the arpt 1500'. Jet acft tfc pat W of the arpt 2500'. Due to non-visibility twr unable to ctl tfc on parking apron #4 and W of blast fence in front of Boeing Flight Center. W taxiway clsd to tfc until further notice.

SEATTLE-TACOMA INTNL ARPT-SPECIAL NOTICE: Green River instructor practice area for lgt acft lctd approx 3 mi SE. Practice acft flying at 800' and below. Other tfc cross this area at 1500' MSL min. (5-22)

SEATTLE-TACOMA INTNL ARPT-TOWER: Glide slope point of touchdown 1314' N of apch end rnwy 34. Glide slope rough not approved for auto apch. (3-15) FLD: Taxiway btwn rnwy 29 and rnwy 34 clsd. Rnwy 11-29 clsd. Radiosonde balloon being released at approx 0300Z, 0900Z, 1500Z and 2100Z daily - actual release time will be broadcast by Seattle Rdo. (8-14) Hi-intensity apch lgt sys S end rnwy 16-34. First row lgts at N end of sys perm discontd. Second and third row lgts at N end reestablished. First row lgts now 300' S of rnwy 34. (11-1) N 1000' rnwy 16-34 clsd for extension and grading. (7-8) Rnwy 2-20 clsd for resurfacing. (7-23)

SPOKANE-RADIO: DME and VOR coverage 36°-152°, 43 n mi at 7000'; 153°-224°, 43 n mi at 5000'; 225°-264°, 43 n mi at 6000'; 265°-35°, 43 n mi at 8000'. (6-17)

SPOKANE-FELTS FLD: Lgt acft use rectangular tfc pat and mrkd area S of rnwy.

SPOKANE-GEIGER FLD-TOWER: UHF/DF coverage 110°-260°, 50 n mi at 5000'; 261°-280°, unreliable, 281°-330°, 40 n mi at 9000'; 331°-110°, 50 n mi at 9000'; March 28, ILS lclzr and glide slope shut down for an indefinite period - relctn & rnwy extension. June 24, ILS LOM and LMM shut down - relctn. (7-3) FLD: Rnwy 16-34 clsd for const. Interim taxiway to apch end rnwy 25 clsd to 4-eng acft. (7-16)

TOLEDO-WINLOCK ARPT: Acft restricted to rnwys and taxiways due farming unsurfaced area on permanent basis. (2-14)

TROUT LAKE-HOLLENBECK AIR STRIP: New arpt reported: 46-00-30N, 121-32-00W; elev: 1820'; 1 rnwy (E/W) 1700' x 70'; remarks - trees E. (8-29)

YAKIMA-RADIO: VOR flgt-checked for en route Victor Arwys use only at min instr alts, and on the 123°, 161°, 191°, 298°, 321° and 336° radials at min terrain clearance alts. VOR coverage 30°-90°, unknown prohibited area; 90°-130°, 40 n mi at 5000'; 130°-195° 8000'; 195°-30°, 40 n mi at 10,000' MSL. (9-20)

YAKIMA ARPT: Const in progress on W end rnwy 9-27. First 350' rnwy 9 clsd during daylgt hrs. Area mrkd by crosses and flags by day. (1-18) Men and equip. working along rnwy 9-27. Open ditches along rnwy 9-27. (5-1)

WEST VIRGINIA: BLUEFIELD-MERCER CO. ARPT: Caution - const of new taxi strip and parking area. (8-8)
CHARLESTON-RADIO: VOR coverage 10°-58°, 26 n mi at 3000'; 270°-330°, 26 n mi at 2500'. (6-14)
CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test basis. (10-29)Acft fuel and servg avail. 0600-2400E daily. Other hrs by prior arrangement. (2-19)

VOR RECEIVER CHECK SIGNALS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods:(a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of 4° be indicated through use of the ground check or +6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

*New York (LaGuardia 108.6 mc)
*Chicago (Midway 111.0 mc)
*Kansas City (Municipal 113.0 mc)
*Los Angeles(International 111.0 mc)
*Pittsburgh(Greater Pittsburgh 108.6 mc)
**Atlanta (Municipal 112.0 mc)
**Miami (International 112.0 mc)
**Wichita (Municipal 111.0 mc)

NOTES: *Continuous monitoring
**Checked daily for accuracy

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS: IT IS YOUR RESPONSIBILITY!

This list covers recent obstructions (television towers, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. When the list does not appear in the Guide, all new obstructions will be carried as two-starred items in the NOTAMS. The list will be brought up to date each time it is issued; newly added or changed material will be indicated by arrows.

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

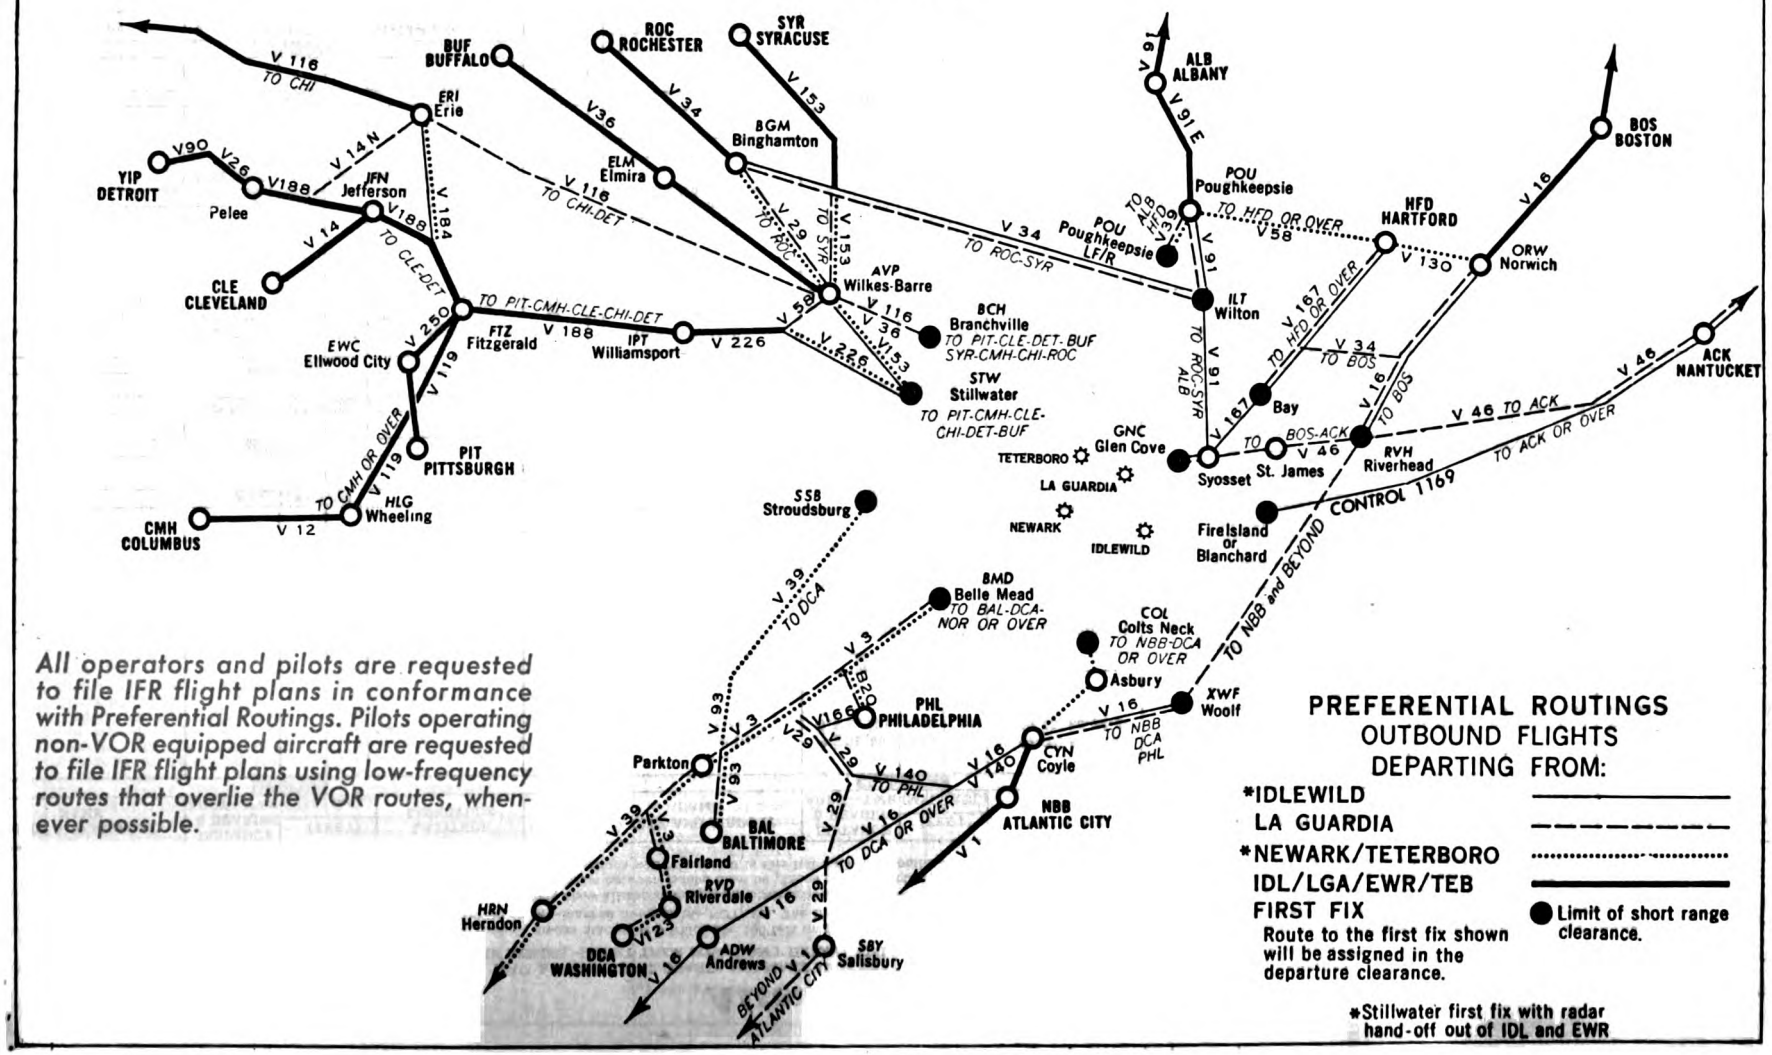
NEW YORK ARTC CENTER
PREFERENTIAL ROUTES

Published at Washington, D. C. by the
Coast and Geodetic Survey
AUGUST 7, 1957



All operators and pilots are requested to file IFR flight plans in conformance with Preferential Routings. Pilots operating non-VOR equipped aircraft are requested to file IFR flight plans using low-frequency routes that overlie the VOR routes, whenever possible.

PREFERENTIAL ROUTINGS
OUTBOUND FLIGHTS
DEPARTING FROM:

- *IDLEWILD
- LA GUARDIA
- *NEWARK/TETERBORO
- IDL/LGA/EWR/TEB

FIRST FIX
Route to the first fix shown will be assigned in the departure clearance.

● Limit of short range clearance.

*Stillwater first fix with radar hand-off out of IDL and EWR

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

EVANSVILLE, IND.-DRESS MEMORIAL ARPT, Procedure Number ILS-21, Comb. ILS-ADF, Amdt. 6, Effect. 2 Nov. 57: Correct the last transition to read "EVV R-010 & 153° brng to LOM" in lieu of "EVV R-010 & brng to LOM".

COLUMBUS, GA.-MUSCOGEE COUNTY ARPT; ADF Procedure Number 1, Amdt. 5, Effect. 9 Nov. 57: Delete first Caution Note "Tower 762 MSL 1 mi SE Final Approach crs between LOM and LMM."

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

Notices to Airmen - page 2

VOL. 12, NO. 17 **OCTOBER 29, 1957**

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

✓ FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or be telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

✓ CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e. g. Long Beach omnirange — (Voice) — . . .. -- -. . . . (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i. e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control tower. Where there is no control tower, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 20 cents.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

ATTENTION SIGNAL L/MF RANGES: Beginning 0001Z Nov 15, 1957, transmission of the attention signal preceding scheduled broadcasts on L/MF ranges will be discontinued. The attention signal will continue to be transmitted preceding special broadcasts and as deemed necessary to alert pilots using the L/MF range system that a voice transmission is about to be made.

ARMY EXERCISE, "ALL AMERICAN", (TAC-AIR 58-2): This military exercise will take place 3-18 December 1957 (with 5-9 December as the period of most intense activity) from 0600 EST through 1800 EST, at an altitude of 600' to 2000' during VFR conditions, days, within a 100 n mi radius of Fort Bragg, North Carolina. This activity will involve heavy concentrations of aircraft (maximum of 120 troop carrier and 8 jet type) in formations and streams entering and leaving the Fort Bragg Restricted Area (R-115) in support of airborne maneuvers.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

1957 FLIGHT INFORMATION MANUAL NOW AVAILABLE: Flight Information Manual, Vol. II, dated August 15, 1957, is now available from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., at 50 cents per copy.

OPERATING PROCEDURES FOR FLIGHT WITHIN THE CONTINENTAL CONTROL AREA:

On or about December 1, 1957, all airspace at and above 24,000'MSL above the continental United States (excluding Territory of Alaska), excluding prohibited and restricted areas penetrating the 24,000' level, will be designated as control area. This airspace is to be known as the "continental control area". Certain new regulations and procedures will govern flight in this area and all pilots and other personnel concerned with opern above 24,000' should become familiar with them. Announcement of the effective date will be made by NOTAM. Following is a summary of the method by which flight operns and air tfc control are to be conducted in the continental control area.

I. VFR OPERATION:

A. Visibility and Cloud Proximity Minimums - For VFR opern within the continental control area, flgt visibility must be at least 5 mi and acft must not be flown less than 1000' vertically and 1 mi horizontally from any cloud formation.

B. Cruising Altitudes:

1. From 24,000' through 28,000' (excluding arwys). To assist pilots operg under VFR in maintaining separation, the following cruising alts should be adhered to as good operg practice from 24,000' through 28,000':

Magnetic Crs	Indicated Altitudes
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or above 29,000'. Use of the following cruising alt for VFR flgt is required by regulation everywhere at or above 29,000':

Magnetic Crs	Indicated Altitudes
0-89° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
90-179° inc.	4000' intervals beginning at 30,000' (30,000', 34,000', etc.)
180-269° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)
270-359° inc.	4000' intervals beginning at 32,000' (32,000', 36,000', etc.)

II. ON-TOP OPERATION: Flgts made under VFR conditions on top within the continental control area must observe the new visibility and cloud proximity minimums and cruising alt rules for VFR opern in the continental control area. Opern of these flgts is otherwise unchanged. (Pilots are reminded that when cleared "VFR conditions on top" by air tfc control, tfc separation is not provided by air tfc control.)

III. IFR OPERATION: All IFR operns at and above 24,000'MSL within the continental control area will receive air tfc control service.

A. At and above 27,000'MSL - To simplify high alt navigation, a limited number of VOR, TACAN, VORTAC and L/MF facilities have been designated for high alt use. These navigation aids are the only ones which may be used for IFR routing at and above 27,000' and are depicted on special high alt charts.

The high-altitude facilities have been used to delineate a system of high-altitude tracks called "Jet Routes". These routes are coded on the charts by the letter J, followed by the appriate route number, followed by the letter V, T, or L to indicate the type of navigation to be used. For example:

J22V . . . . . VOR or VORTAC Jet Route #22
J19T . . . . . TACAN Jet Route #19
J3L . . . . . L/MF Jet Route #3

Use of the designated high-altitude route structure will facilitate air tfc control, and all pilots are requested to use the designated route structure to the maximum extent possible. However, use of this route structure is not mandatory. Pilots may conduct direct flgt off the designated Jet Routes, provided the acft will be flown on a route defined by the high-altitude facilities, and provided further that the facilities selected to define the route are not more than 300 n mi apart.

Routes flown at 27,000' and above will not have a defined width as is the case on arwys at the lower levels. The track to be made good will be direct between the navigation aids or fixes defining the Jet Route, or direct between the high-altitude facilities defining the route for flgts made off the designated Jet Routes.

All high-altitude facilities and a small number of intsxns formed by these aids will be designated as compulsory reporting points. When needed for tfc control purposes, pilots may be requested to make additional position reports.

Other navigation aids (TACAN, VOR, VORTAC, AND L/MF) not designated as high-altitude facilities will be used for routing or navigating of acft to and from the high-altitude Jet Route structure which begins at the 27,000' level. This routing may be via the Victor or colored arwy systems, or direct between navigation aids.

Since most flgt activity at 27,000' and above will be by military acft, only those charts prepared by the U.S. Air Force Aeronautical Chart and Information Center will be avail on the inception date of control of all airspace at and above 24,000'. In recognition of the fact that there will be some civil need for these charts, arrangements have been made for civil distribution of the Air Force charts through the United States Coast and Geodetic Survey.

B. Below 27,000' - Although the continental control area extends from 24,000' upward, the Jet Route structure does not commence until the 27,000' level is reached. The colored and Victor arwys extend up to, but do not include the 27,000' level.

Acft operg below 27,000' within the continental control area (from 24,000' through 26,000') may operate on the colored or Victor arwys, or fly direct between any Federally operated navigation aids.

In the case of direct flgts (from 24,000' through 26,000') the aids selected to define the route must not be more than 200 n mi apart, and the track to be made good will be direct between aids. The aids selected will be compulsory reporting points, and other position reports may be requested by air tfc control when needed.

C. Cruising Altitudes - Acft operg in accordance with IFR within the continental control area must be flown at the alts assigned by air tfc control. To assist pilots in flgt planning for IFR operns, the following system of altitude selection may be used:

1. From 24,000' through 28,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or Above 29,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
180-359° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)

While controllers will normally use the above system, other altitudes may be used in certain cases. Pilots are cautioned to fly at the alt assigned by air traffic control.

IV. AIR/GROUND COMMUNICATIONS: The CAA is currently installing a VHF and UHF air/ground communications system which will provide direct pilot-controller rdo communications throughout the continental control area. This system will be only partially installed at the time control of all airspace above 24,000' is commenced; therefore, interim communications will be conducted as follows:

	Ground Facility	VHF	UHF
A.	ARTC	Discrete channel as directed	301.4 or discrete channel as directed
B.	ATCS	122.1/122.2 or VOR 126.7 135.0/135.9	255.4 or 301.4 where avail.
C.	Airline company radio stations	Company frequency	none

IFR flgts should use direct ARTC controller-pilot communications, where available.

V. SPECIAL OPERATIONS: Certain mil operns cannot be conducted in accordance with the above, for example, missions involving use of radar navigation. Such cases are to be considered exceptional in nature and will be handled by special procedures.

Flgts using celestial navigation will be required to operate VFR or "VFR conditions on top" for those portions of the flgt where celestial navigation is involved. TACAN-only equipped acft will also be required to operate VFR or "VFR conditions on top" for those portions of flgts where designated high-altitude TACAN facilities are more than 200 or 300 n mi apart, as the case may be.

Questions concerning these operns or any phase of the control of all airspace above 24,000' should be referred to the appropriate CAA air route tfc control center.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.:

Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in 'main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be utilized:

FROM	TO	MEA
VOR civil arwy V-6, V-8, V-1510 Omaha, Nebr. VOR	*Lyman, Iowa Int	5500

*Descent to 2600 authorized westbound after passing Lyman Int.

Lyman, Iowa Int	Int OMA R-071 and LMN R-008 (DSM Temp Int)	8000
Int OMA R-071 and LMN R-008 (DSM Temp Int) via R-262 IOW	Iowa City, Iowa VOR	8000
VOR civil arwy V-52 Ottumwa, Iowa VOR	Int OTM R-286 and LMN R-008 (DSM Temp Int)	8000
VOR civil arwy V-13 Lamoni, Iowa VOR	*Int LMN R-008 and OMA R-071 (DSM Temp Int)	8000

*Descent to 4000 authorized after passing intersection southbound.

Int LMN R-008 and OMA R-071 via MCW R-182 (DSM Temp Int)	Alden, Iowa Int Mason City,	11,000
Alden, Iowa Int	Mason City, Iowa VOR	3000
VOR civil arwy V-13W Int FOD R-151 and OMA R-071 (DSM Temp Int)	Fort Dodge, Iowa (VOR)	8000
VOR civil arwy V-161 Waterloo, Iowa VOR	Int ALO R-214 and OTM R-286 (DSM Temp Int)	8000
VOR civil arwy V-6N, V-172 Int CID R-249 and LMN R-008 (DSM Temp Int)	Int R-249 CID and R-277 IOW (Grinnell Temp Int)	8000
Int R-249 CID and R-277 IOW (Grinnell Temp Int)	Cedar Rapids, Iowa VOR	2200

Des Moines, Iowa LFR	Iowa City, Iowa VOR	2200
Des Moines, Iowa LFR	Ottumwa, Iowa VOR	2200
Des Moines, Iowa LFR	Waterloo, Iowa VOR	2700
Des Moines, Iowa LFR	Fort Dodge, Iowa VOR	5000

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

LOUISVILLE, KY. VOR SHUTDOWN: During shutdown (Oct 21 through approx Nov 11) the following direct routings will be used in the Louisville area:

V-5: From CVG VOR via 224°M radial and 044°M bearing from Louisville LFR, MEA 3000. V-174 and V-1516: From Louisville LFR to York VOR via E crs LOU LFR to 172°M radial of Cincinnati VOR thence via 256°M radial of York VOR. V-4N: From LOU LFR to Lexington HW via the E crs of LOU LFR and 330°M bearing to LEX HW, MEA 3000. V-4S: From LOU LFR to LEX VOR via 134°M bearing from LOU LFR and the 270°M radial of LEX VOR, MEA 3000. V-5E: From LOU LFR to BWG VOR via 165°M bearing from LOU LFR and the 260°M radial of the BWG VOR, MEA 3000. V-51: LOU LFR direct to Highway Ky. Int MEA LOU LFR - Campbellville, Ky. 3000 - MEA Campbellville, Ky. - Highway, Ky. 6000. V-5: From LOU LFR to BWG VOR via S crs of LOU LFR and the 045°M radial of BWG VOR, MEA 3000. V-4 and V-1516: From LOU LFR to Evansville VOR via the W crs LOU LFR and 070°M radial of Evansville VOR, MEA 2500. V-227: From LOU LFR to Indianapolis VOR via the 304°M bearing from LOU LFR and the 184°M radial of IND VOR, MEA 3000. V-171 and V-174: From LOU LFR to Scotland VOR via the 304°M bearing from LOU LFR and the 123°M radial of Scotland VOR, MEA 3000. V-53: From LOU LFR to IND VOR via the N crs of LOU LFR to Nabb VOR thence via the 315°M radial of Nabb VOR and the 169°M radial of IND VOR - MEA from LOU LFR to Nabb VOR 2100 - MEA Nabb VOR to IND VOR 2600. V-47, V-51 and V-53E: From LOU LFR to Nabb VOR via the N crs of LOU LFR - MEA 2100. V-5E: LOU to Dry Ridge VHF Int unusable. V-4 and V-53: LOU to LEX VOR unusable. V-4N: From LOU to St Marks VHF Int unusable.

During the shutdown, the following non-compulsory reporting points in the Louisville area are temporarily redesignated as follows:

Georgetown, Ky. Int: the intsxn of the E crs of LOU LFR and the 172°M radial of CIN VOR, MEA 3000.
Chaplin, Ky. Int: the intsxn of the 134°M bearing from LOU LFR and the 270°M radial of LEX VOR, MEA 3000.
Campbellsville, Ky. Int: the intsxn of the 165°M bearing from LOU LFR and the 060°M radial of BWG VOR, MEA 3000.
Apalona, Ind. Int: the intsxn of the 070°M radial of Evansville VOR and the 168°M radial of Scotland VOR, MEA 2500.
Mitchell, Ind. Int: the intsxn of the 184°M radial of IND VOR and the 123°M radial of Scotland VOR, MEA 3000.

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957, as follows:

(1) Page 20, Bakersfield, Calif. - change CAA telephone number to EX 9-3735.
(2) Page 20, Flippin, Ark. - change CAA telephone number to GLenview 3-3333.
(3) Page 20, Little Rock, Ark. - change CAA telephone number to FRanklin 5-3269.
(4) Page 20, Little Rock, Ark. - change WB telephone number to FRanklin 4-0094*.
(5) Page 20, Muscle Shoals, Ala. - change CAA telephone number to EVergreen 3-6541.
(6) Page 21, Indianapolis, Ind. - change CAA telephone number to CH 4-3011.
(7) Page 21, Burley, Idaho - change CAA telephone number to OR 8-7451.
(8) Page 21, Topeka, Kansas - change CAA telephone number to CEntral 2-5478.
(9) Page 22, Helena, Mont. - change CAA telephone number to HIckory 2-8110.
(10) Page 23, Albuquerque, N. Mex. - change CAA telephone number to CH 3-7832.
(11) Page 23, Albuquerque, N. Mex. - change WB telephone number to CH 2-8857.
(12) Page 23, Findlay, Ohio - change CAA telephone number to GArden 2-3237.
(13) Page 23, Las Vegas, Nev. - change CAA telephone number to DU 4-2205.
(14) Page 24, Childress, Tex. - change CAA telephone number to WEbster 7-3892.

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Vol. 12, No. 14 dated Sept 17, 1957, as follows: (see Notes below)

(1) Page 70, under Civil Airways cancel items 5 and 6.
(2) Page 71, under Reporting Points cancel item 3.
(3) Page 73, cancel all reference to Sections 610.607, 610.610 and 610.614 wherever they appear.

Correct Airman's Guide Vol. 12, No. 15 dated October 1, 1957, as follows: (see Notes below)

(1) Page 4, under On Request Reporting Points cancel all reference to the Panoche, Tres, Gilroy and Morgan Hill, Calif., LF intersections effective October 24.

NOTE: Amendments 12 to Part 600 and 15 to Part 601 of Administrator's Regulations published in October 4, 1957, Federal Register will be corrected accordingly by November 8.

NOTE: Revision Notice to RF Charts 22 and 23 being issued by C&GS to reflect Airways, MEAs, Fixes, etc., to original configuration in this area by November 2.

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Seattle	WAC 304	WAC 364
Spokane	WAC 362	WAC 405
RC 2218	WAC 363	3071
		3073

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

ATLANTA-WASHINGTON CENTER BOUNDARIES CHANGES: Effective immediately, the Atlanta-Washington Center Boundaries are amended as follows: beginning at the present boundary at 35-47-20N, 79-31-00W direct to 34-46-00N, 80-12-30W thence following the present boundary along the Greensboro-Charlotte, N. C. Control Area Extension.

MINIMUM EN ROUTE ALTITUDE - CANCELLATION: Correct Airguide Vol. 12, No. 16 dated October 15, 1957, page 42 as follows: The MEA of 2200 ft from Pellston, Mich. LF/RBN to Sault Ste Marie, Mich., VOR on V-193 which was to be effective Nov 21, 1957, is cancelled.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item was reported.

** - New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.

✱ - New or revised radio data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)

AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)

**BESSEMER ARPT: Name change. Formerly carried as Durham Arpt. (12-1) Caution auto drag strip runs parallel to sod lndg strip with separation of 50'. Auto racing is not done on rnwy. Drag strip ends mrkd. Racing Sun only. (9-28)

ALABAMA: BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18) Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int via ADF track of 350°M from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. (10-21)

BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down - relctn. (8-7) FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)

DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.

ENTERPRISE ARPT: Const. Clsd until approx Dec. 1. (10-16)

EVERGREEN-RADIO: VOR radials 320°-360° out of tolerance acct excessive roughness and bends. (9-23)

EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inop. (2-6)

**FLOMATON ARPT: Now a private arpt. (11-56)

**GUNTERSVILLE ARPT: Caution - paved drag strip 200' E of rnwy. (9-30)

HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.

**HUNTSVILLE ARPT: Unicom decmsnd. (9-23)

MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)

MOBILE-BATES FLD-TOWER: June 18, ILS not to be used for automatic apch below 300'. Glide slope inop - equip and const vcnty transmitter bldg. (8-22) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' and 1/2 mi is absolute take-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)

MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)

MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)

MUSCLE SHOALS-RADIO: VOR courses 020°-050°, 110°-150° and 285°-335° clockwise from stn out of tolerance beyond 15 n mi acct scalloping and bends. (11-2) Soon VOR will be relctd to lat 34-42-24, long. 87-29-27; freq change from 117.5 mc to 109.6 mc. (9-26)

**TALLADEGA ARPT: City name change. Formerly carried under Anniston. (7-3)

ARIZONA: AJO ARPT: Bcn and lgts inop. (10-24)

CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail ngts upon prior req. Emerg only. (4-23)

CLIFTON-GREENLEE COUNTY ARPT: Clsd until approx Dec 1, 1957. (9-17)

COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vcnty. 2-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr guards: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)

GILA BEND-SPECIAL NOTICE: Tethered wiresonde balloons lctd 1.5 mi S Gila Bend AF Aux Fld, flying daily from 1300 Mon thru 1100 Fri from gnd to 2000' above gnd. Lgtd during hrs darkness. (10-18)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

ARIZONA: MARANA ARPT: Repoeted inactive. (10-2)
PHOENIX AREA-SPECIAL AIR TRAFFIC RULES: Aircraft operg under VFR or VFR conditions shall not be operd Mon thru Fri from 0600M to 1800M on Green Arwy #5 and Victor Arwy 16 W of Phoenix in the areas described below except at the altitudes prescribed therefor unless special permission is obtained from Air Traffic Control. From 112°28' to 112°35', which is the area between north-south lines drawn thru the Perryville FM and the town of Buckeye, between 700' above the surface and 5000' MSL, regardless of weather conditions. Further, when the reported ceiling at Phoenix is less than 8000', acft shall not be operd at alts above 2000' MSL and below 4000' MSL in the area between 112°16' and 112°-28', which is the area between north-south lines drawn thru the town of Tolleson and Perryville FM. When the reported ceiling at Phoenix is 8000' or more, acft shall not be operd at alts above 7000' MSL and below 9000' MSL in the area between 112°10' and 112°28', which is the area between north-south lines drawn thru the east edge of Glendale and the Perryville FM. (9-27)
PHOENIX-SKY HARBOR ARPT-SPECIAL NOTICE: Following changes in instrument apch procedutes: LFR procedure: Initial approach from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on W course PHX LFR, make right climbing turn returning to LFR. Hold on E course LFR at 5000 in standard pattern within 15 mi. VOR procedure: Initial apch from Perryville FM 4000, from Tolleson Int 2600. Missed apch: Climb to 2500 on radial 258, make a right climbing turn, returning to VOR. Hold east of VOR on radial 076 at 5000 in standard pattern within 15 mi. Tolleson Int - Int GBN VOR radial 027 and PHX VOR radial 258 or W course PHX LFR. All other items these procedures unchanged. (6-14)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take off xcpt prior permission arpt manager. (12-7) Men & equip. along N edge rnwy 26L from apch end to a point approx 2000' W. (8-23)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. About Nov 15, VOR will be shut down until approx Jan 15, 1958, conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int.-PHX; V105E PRC-PHX. (10-17)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed. (3-26)
**SEDONA-OAK CREEK CANYON ARPT: Longest rnwy avail 3400'. (4-16)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi 11,000'; 060°-075°, 35 n mi 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7,000'; 330°-345°, 35 n i 11,000'; 345°-360°, 25 n mi 11,000'.
TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct foute off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)
TUSCON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 mi at or below the following alt: (a) NW quad 10,000';(b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area.(2-11) Jet barriers installed rnwy 3-21. (9-3)
ARKANSAS: **BENTON-SALINE CO ARPT: New arpt. Type "P"; lat 34-33, long. 92-36; lctd W; hwy N; elev 325; 1 strip-turf; 2850' x 250'; no services. (1-15)
BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
**MARIANNA ARPT: New arpt. Type "L"; lat 34-47, long. 90-48; lctd 1 mi W; RR W; elev 181; 1 rnwy-2640' x 300'(sod); minor repairs & 80 oct fuel on call; caution-ruf. (3-6)
NORTH LITTLE ROCK MUN ARPT: New fld: Type: L. Lat 34-50, long. 92-16. Lctn: 4.5 mi N. Elev: 545. No. of rnwys: 1. Lngst rnwy & facs: 32.
**PINE BLUFF-TONEY FLD: 194'(403'MSL) lgtd twr erected approx. 1 n mi SSW(204°T) at lat 34-14-46, long. 92-00-56. (10-10)
TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800'MSL 35 n mi. (5-21)
TEXARKANA MUN ARPT: 210'(510'MSL) lgtd twr being erected 12.5 n mi SSW(222°T) at lat 33-18-12, long. 94-09-31. (9-12)
CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)
ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)

CALIFORNIA: BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)
BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300° 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
BONSALL-SHEARER'S RANCH ARPT: Abandoned. (2-4)
BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)
CAMARILLO-RADIO: All courses have multiples. (6-17)
**CONCORD-BUCHANAN FLD: Effect. Oct 15 right hand tfc estabd on rnwys 14 & 19. Pat. alt 800' indicated. Rnwy 6-24 to be used only for hi-velocity wind conditions. Low flgt over populated areas should be avoided as far as practicable.
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DINUBA-ALTA ARPT: Arpt unlgt. (4-22)
DIXON ARPT: Closed. (8-30)
ELSINORE ARPT: Caution-glider activity week ends. Squirrel holes S edge of lndg area.
FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
**FORT BRAGG-UNION LUMBER COMPANY ARPT: Now a private arpt. (2-5)
FT. JONES-RADIO: VOR has lgt course roughness all quads. Only arwy radials flgt-checked. Sept. 19, VOR shut down until approx Nov 4 - modernization. Durg this period the following arwys will be unusable for IFR opern: V23 Red Bluff - Talent Int.; V23E Fort Jones -Klamath Junction Int. The Bray Int. will be unusable. (10-16)
FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)
FRESNO-RADIO: Soon, LF rng will be shut down for tune up and course realignment to 76A 136 N 256 A 316N. (10-23) Soon, Los Banos FM ident will be changed to dot dash.
rrFRESNO AIR TERMINAL-TOWER: ILS glide slope relctd 750' W apch end rnwys 29 and 346' S rnwy centerline. Glide angle: 2°30'. Alt over MM 566' MSL; over OM 1440'MSL. FLD: Extreme caution advised in vicinity of arpt, particularly when using VOR arwys. Jet acft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5) Jet barriers installed both ends rnwy 11-29. First 1000' rnwy 29 is behind barrier, not to be used as rnwy, overrun area only. (10-11)
**GASQUET ARPT: Caution. Road materials piled S side. (9-23)
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)
★LONG BEACH ARPT-TOWER: ILS glide slope shut down indefinitely. (10-4) VHF/DF bearings unreliable below 12,000' MSL SW quad between 200° and 230°. (5-6) Oct 15, radar arrival control cmsnd. Primary holding fixes: Huntington Beach FM and Albacore Intsxn. (10-15) About Nov 11, ASR will be shut down until approx Dec 2 - modernization. (10-22)
FLD: Several 230' MSL portable oil derricks NW, W and S of fld. No fuel servicing avail. for civil acft 2400-0600. Neon apch lgt lane rnwy 30 discontd indefinitely. (1-1) Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1500P wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail. lndgs and tk-offs. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only-500'/1 mile. (6-25)
LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)
★LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23) Oct 15, Castaic and Hollywood Hills FMs associated with Newhall LF rng. (9-27)
★LOS ANGELES AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF freqs: 120.3, 121.5, 122.1, 124.5, 125.1, 125.9, 126.18, 132.0, 135.9 mc. (10-14)

CALIFORNIA: ★LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000 MSL beyond 30 n mi. (4-19) VHF/DF freqs: 118.1, 118.9, 119.3, 119.5, 120.3, 121.1, 121.5, 122.1, 122.5, 122.7, 126.18, 135.9 mc. (10-14) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30 min req thru twr. Equip crossing rnwy. During VFR wea conditinns, civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 mc at least 10 mi out. During IFR wea, civil acft ctc Apch Ctl on 118.1 or 119.3, or listen 118.1 or 119.3 mc and trans 122.7 mc. USAF-NAVY-CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urges to use extreme caution when operg off-shore W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E-bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descent below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing course at 3000' or above ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable to ctl tfc last 2400' rnwy 34. Nov 30, transmissiometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibility to be added to observations when prevailing visibility is less than 1-1/2 mi. Apch lgt lane sequenced flashers avail. on test basis at pilot's req. Flashers extend from 1200' to 3000' from end rnwy 25L.

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E; elev: 174'; 1 rnwy - (15-33) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD-SPECIAL NOTICE: Due to hby jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' durg stratus conditions. (6-17)

★MOUNTAIN VIEW-MOFFETT NAS-TOWER: CM twr gds 121.3, 122.5 mc and trans 121.3 mc.

★NEWHALL-RADIO: Oct 15, Castaic FM changed to 4 dashes, NW course of LF rng. Hollywood Hills FM changed to 2 dashes, SE course of rng. (FMs formerly on Los Angeles LFR)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a clt zone when wea is less than VFR, since ceiling & visibility mid-bay is frequently less than at the two terms. Rotating beam ceilometer in opern. Hereafter ceiling observations of less than 1500' will usually pertain to the MM location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jet operns in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communs and proposing IFR flight into Oakland, Alameda NAS or Hayward should ctc Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should ctc San Francisco Apch Ctl on 118.5 mc. Communs durg IFR should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communs channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (4-24)

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF operg test basis. Freqs: 118.1, 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc. Coverage 40 n mi at MEA xcpt 020°-050°, 8000' MSL. (10-14)

★OAKLAND-METROPOLITAN OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi at MEA xcpt 340°-30°, 6500'; 030°-040°, 8000'; 040°-060°, 7000' MSL. Delete 118.9 mc.

** FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd giving rnwy visibility observations rnwys 27L & R. (8-22)

OCEANSIDE-RADIO: July 10, VOR shut down until approx Nov 10 - modernization. Durg this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flgts departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period.

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as mrkd by yellow paint lines either side. Formation tk-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. Tetrahedron replaced by lgtd wind sock. (10-8)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'.

DOLGEVILLE ARPT: Closed. (12-31)
DUNKIRK ARPT: Caution - men and equip. all rnwys 0800-1600 Mon-Fri. (5-27)
EAST AURORA-PRONER ARPT: Reported abandoned. (9-6)
★FARMINGDALE-REPUBLIC ARPT-TOWER: Effect October 28, hrs of opern: 0700-1530 Mon-Fri. (10-25) FLD: Private arpt. Manufacturer's plant - official bus. only. Clsd to all operns unless previous arrangements are made by telephone to have twr open and adequate crash facs. Fuel unavail. transient acft. (4-5) 2 rnwys avail. (9-12)
GLEN FALLS-WARREN CO. ARPT: 91 octane not available. (6-11)
HEMPSTEAD-RADIO: About October 14 - LF rng will be shut down until approx October 28 - modernization. Concurrently, SW course will be realigned counterclockwise from 40° to 35°, to be on the Lido MHW". (9-30)
HUGUENOT-RADIO: VOR coverage restricted to 18 n mi. 210° clockwise to 230° at MOCA. (6-14) May 10, VOR monitor, category temp changed to (3). (5-10)
IDLEWILD-RADIO: VOR coverage 50°-75°, 17 n mi; 75°-50°, 26 n mi at MOCA. (6-14) About Nov 25, DME will be shut down until approx Dec 16 - modification and VOR freq change from 117.2 mc to 115.9 mc and conversion to VORTAC. (10-25)
ITHACA-TOMPKINS CO. ARPT: Arpt clsd to all but rdo equipped acft. Rnwy 14-32, men and equipment along side and on rnwy Mon thru Sat between 0800-1700 EST. Acft to ctc MOH 129.7-130.0mc or ELM twr or ELM rdo for lndg instructions. (6-4)
JAMESTOWN ARPT: Rnwy 7-25 csd to all tfc due major rehabilitation project. Arpt open for lgt plane activity during daylgt hrs only. Lgt acft use rnwy 12-30 - length 2700'. (5-17)
LAKE PLACID: Not a seaplane base - no facilities avail. Facilities for landplane avail. at Lake Placid Arpt. (7-22)
MASSENA-RADIO: Sept. 19, J fac temp converted to BMH indef. Freq: 242. kc. Ident: MSS. Lctd lat 44-56-00, long. 74-50-30. (10-24)
MIDDLETOWN-RANDALL'S ARPT-SPECIAL NOTICE: Extensive gliding and soaring operations conducted durg daylgt hrs within 15 mi radius of arpt - all alts from surface to 12,000'. (8-29)
NEW YORK: NEWBURGH-STEWART AFB-RADIO: USAF VHF/DF bearings unreliable below 7000' in all quads. (9-23)
NEW YORK CITY AREA - SPECIAL NOTICE: Acft operating VFR be alert for all types of tfc from Newark, Teterboro, LaGuardia, Idlewild, NAS Floyd Bennett, Westchester Co. Arpt, Mitchel AFB and Rockaway Arpt. VFR acft apchg Idlewild from S or W remain well off shore until reaching a point abeam SE of Floyd Bennett. VFR departures from R31L at Idlewild, unless cleared otherwise by Idlewild twr, shall climb straight ahead to an alt of 1200' before turning left. Floyd Bennett tfc can normally be avoided by not exceeding a heading of less than 270° mag until abeam Floyd Bennett prior to proceeding on desired course. VFR acft not intending lndg at any of New York metropolitan arpts should avoid apch areas thereto below 2500'. Recommended crossing traffic plan crossing area at 2500' or above, ceiling permitting, avoid shoreline S of Flatbush, Floyd Bennett and Idlewild due hi-density tfc in that area. Acft arriving or departing Idlewild or LaGuardia requested to remain well clear of Mitchel AFB.
NEW YORK CITY-SPECIAL NOTICE: Unless authorized by ATC all acft shall follow standard left-hand rectangular tfc pat. within 4.3 n mi radius of arpt; in lndg join tfc pat at or above 1200' MSL, weather permitting. This applies to New York International (Idlewild) Arpt; La Guardia Fld, N. Y., and Newark Arpt, N. J.
NEW YORK INTNL (IDLEWILD) ARPT-SPECIAL NOTICE: About Nov 1, acft enroute to Idlewild Arpt will be cleared to Brentwood Int, 076° radial of IDL VOR and 185° radial of ILT VOR -holding E one min left turn pattern, Lido rng in lieu of Long Beach and Scotland rdo bcn. (10-17)
★NEW YORK INTNL (IDLEWILD) ARPT-TOWER: VHF/DF coverage 055°-230°, 1500'; 230°-055°, 2000' at 40 n mi. (9-9) Chg ILS remarks column: Only alternate opern of either ILS rnwy 4 or 22. Simultaneous opern not avail. (10-28) FLD: Lndgs and tk-offs prohibited unless acft equip. with functionioning 2-way rdo, capable of direct 2-way commun with ctl twr. Clsd to fighter type, motorless and jet propelled acft. Clsd to mil acft xcpt on offl bus. or flag rank or higher. Caution - use paved surfaces only. Rnwy 1L-19R, 1R-19L and 7L-25R perm clsd for lndgs and tk-offs, avail. for taxiing. Rolling surface S end rnwy 7R-25L. NATCC preferential rnwy sustem in effect. 185' MSL ctl twr is highest arpt structure. Caution - taxi A - acft running up on clsd rnwys 7L-25R, S of intsxn with rnwys 13L-31R. No thru taxiing past gates 7A-8A. Const in progress adj all paved surfaces. 150' cranes and hvy truck operns within arpt bndry - mrkd. Follow center-line all taxiways. New taxiways temp mrkd by delineators and/or taxiway lgts irregularly spaced. Unstable shoulders. National standard centerline apch lgtg system, configuration "A", 3000' long, serving rnwy 22 cmsnd. Existing sequence flasher installation serving rnwy 4 extended so that installation is now 2300' long, ending 700' from rnwy end. (6-10) Amber lenses installed on last 2000' rnwys 4-22, 7R-25L, 13R-31L, and 13L-31R. (8-2) Const equip. 35' high active 2000' from apch end rnwy 31R. New rnwy const. (10-24)
NEW YORK-LA GUARDIA FLD-SPECIAL NOTICE: About October 15, acft enroute to La Guardia Fld will be cleared to Sparkhill Int, 360° radial of IDL VOR and 249° radial of ILT VOR-holding SE one mi n. left turn pat. in lieu of the Oradell Holding Pattern. (9-27)
NEW YORK-LA GUARDIA FLD-TOWER: ADF on LOM subject to 30° oscillations in W quad. All inbound acft shall make initial contact with La Guardia apch ctl on 119.9 mc
** regardless of wea. FLD: Clsd to jet propelled acft, motorless, fighter type and acft over 105,000 lbs, also mil acft xcpt those carrying high govt officials. lndgs and take-offs prohibited unless acft equipped with 2-way rdo, capable of direct commun with ctl twr on gnd ctl 121.7 mc. See Special Notice under New York City. Pilots adhere strictly to CAA approved tfc pat. NATCC preferential system in effect. Transient helicopters land N of bullseye at Marine Air Terminal. Obstns and equip. mrkd -flags days, lgtd nights. Equip. parked 250' from centerline of rnwys when not in use. Caution-use paved surface only, sod areas unsuitable for acft operns. Amber lenses have been installed on last 2000' of rnwys 4, 22, 13, & 31. Bi-directional lgts have been installed at apch end of rnwy 22 at a distance of 25'. Run-up pads under const adj to SE side taxiway 1 & 9 - flagged by day & lgtd at night. (7-30) High intensity left lane and 3600' left lane neon apch lgt system serving rnwy 4 decmsnd. Standard 3000' high intensity center line configuration A apch lgt system serving rnwy 4 cmsnd. The center line systems will not be operd at an intensity greater than intensity NR2 pending removal of obstn lgts & poles in apch area.
NEW YORK-STATEN ISLAND ARPT: N/S rnwy clsd. No night flying permitted. Stay clear of marked-off area in vcnty of windsock. Use grass for taxiing. (5-22)

NEW YORK: **NEW YORK-WEST 30TH STREET HELIPORT: Open daylgt hrs only on 30 min advance notice. (tel. Longacre 4-2073). Direct commun by 2-way rdo on 122.8 mc rqrd before apch and takeoff. Caution - ship tfc in area. (9-27)

NIAGARA FALLS ARPT-TOWER: ILS lclzr and glide slope shut down. (4-25) VHF/DF unreliable below 3000' in NE quad, 4000' SE and SW quad and 4500' in NW quad. FLD: Local flying area consists of arc with diameter of 115 n mi circumscribed from center of arpt with Lake Erie and the Niagara Riv as W bndry and Lake Ontario as N bndry. Avoid flying over mink farm 2.6 n mi N. Rnwy 18-36 restricted. Usable when wind is 20 mph or greater from N or S. (11-16) 1000' W end rnwy 10L-28R clsd for lndg and tk-off. Hi-voltage cable crossing rnwy and 2' excavation at W end. (6-24)

PLATTSBURGH-RADIO: VOR radials 260°-280° usable dist 35 n mi at MOCA. (6-14) DME coverage 265°-280°, 35 n mi at 6000'; 280°-310°, 35 n mi at 4700'; 310°-10°, 35 n mi at 2000'. (6-12)

PLATTSBURGH MUN ARPT: VFR tfc pat for all civil acft in vcnty of arpt is 800' to insure adequate separation from mil jet acft and jet turbulence. Non-rdo equipped acft will not enter Plattsburgh ctl zone unless ceiling is 2500' and visibility 3 mi. Non-rdo equipped acft will maintain 2000' MSL until W of arpt. Over that position acft shall let down to pat alt.

POUGHKEEPSIE-RADIO: DME coverage 290°-90°, 43 n mi at 5000'. Sept. 24, VOR/DME shut down until approx Oct 28 - modification and freq change to 112.2 mc. S quad out of tolerance beyond 35 n mi due interference. Blue arwy 18 from Ridgewood Int. to Poughkeepsie unsuitable IFR tfc. (10-11)

**POUGHKEEPSIE-DUTCHESS CO. ARPT: 305' (465' MSL) lgtd twr erected 19.8 n mi SSE (163° T) at lat 41-56-11, long. 74-00-30. (9-16)

ROCHESTER-RADIO: VOR out of tolerance beyond 5 mi from 35°-80°, MOCA.

ROCHESTER-MONROE CO. ARPT: Due to non-visibility twr unable to ctl tfc in areas S side of fld at E end of hangar line and in vcnty of T-type hangars. Caution taxiing in these areas. No signal between sunset-sunrise to indicate gnd visibility of less than 3 mi and/or a ceiling of less than 1000'. (3-3)

✱ROME-GRIFFISS AFB-RADAR APPROACH CONTROL. Oct 21, CAA assumed jurisdiction of RAPCON and implemented radar apch ctl serv at Griffiss AFB and Oneida Co. Arpt. Freqs: 118.5, 121.5, 126.18, 137.88, 236.6, 243.0, 363.8 mcs. Normal clearance limits are Starkville, Sherrill, Fly Creek, Taberg Intsxns, RME HW and UTI MHW. (10-21)

ROMULUS-SPECIAL NOTICE: Heavy ammunition demolition approx 3 n mi NW at lat 42-46-57, long. 76-53-17, 0730-1615, Mon-Fri. Blasts cause shock and flying missiles up to 1000'.

SCHENECTADY CO. ARPT: Due to non-visibility twr unable to ctl tfc on apch end rnwy 10, NG ramp and portions of taxiway serving rnwys 22 and 33. Caution - landing jet acft using left hand pat at 1879' MSL.

SPITFIRE LAKE: No seaplane facilities avail. (7-30)

SURACUSE-RADIO: VOR coverage 180°-220°, 35 n mi at MOCA. (6-14)

ULSTER CO.-SPECIAL NOTICE: Effect. Oct 25, Caution Area C-216 is rescinded.

UPPER ST. REGIS LAKE: No seaplane facilities avail. (7-30)

UTICA-RADIO: ILS LMM freq 254 kc usable dist 10 n mi from 270° clockwise to 360°.

UTICA-ONEIDA CO. ARPT-TOWER: About Nov 19, CAA ctl twr will be cmsnd. Trans & rcvs: 118.1, 121.5, 243.0, 257.8, 348.6 mc. Trans only: 332 kc. Rcv only: 3023.5 kc, 122.5 mc. Freq 121.9 mc for ctl gnd tfc. Class: C(g). (10-21)

UTICA MUN ARPT: Mil acft will not fly over arpt below 2000' MSL. Light acft operg in vcnty of Marcy durg daylgt hrs. (10-22)

WATERTOWN-RADIO: DME coverage 35 n mi at MOCA. (6-14) About Nov 11, VOR/DME will be shut down until approx Nov 29 - modification and freq change from 116.1 mc to 108.6 mc. About Nov 5, J fac will be temp converted to BMH, freq 224 kc, ident ART. Lat 43-59-22, long. 76-01-12. To be returned to J fac on completion of VOR modification.

WATERTOWN ARPT: Contact lgts all rnwys and taxi strips mrkd with 4' flag stakes. (10-25)

WESTHAMPTON BEACH-SUFFOLK CO. AFB-RADIO: USAF rdo bcn unreliable west quad beyond 20 mi. (3-22) USAF TVOR 20 and 40 mi courses not flgt-checked. (6-10)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

TRANSITION				CEILING AND VISIBILITY MINIMUMS

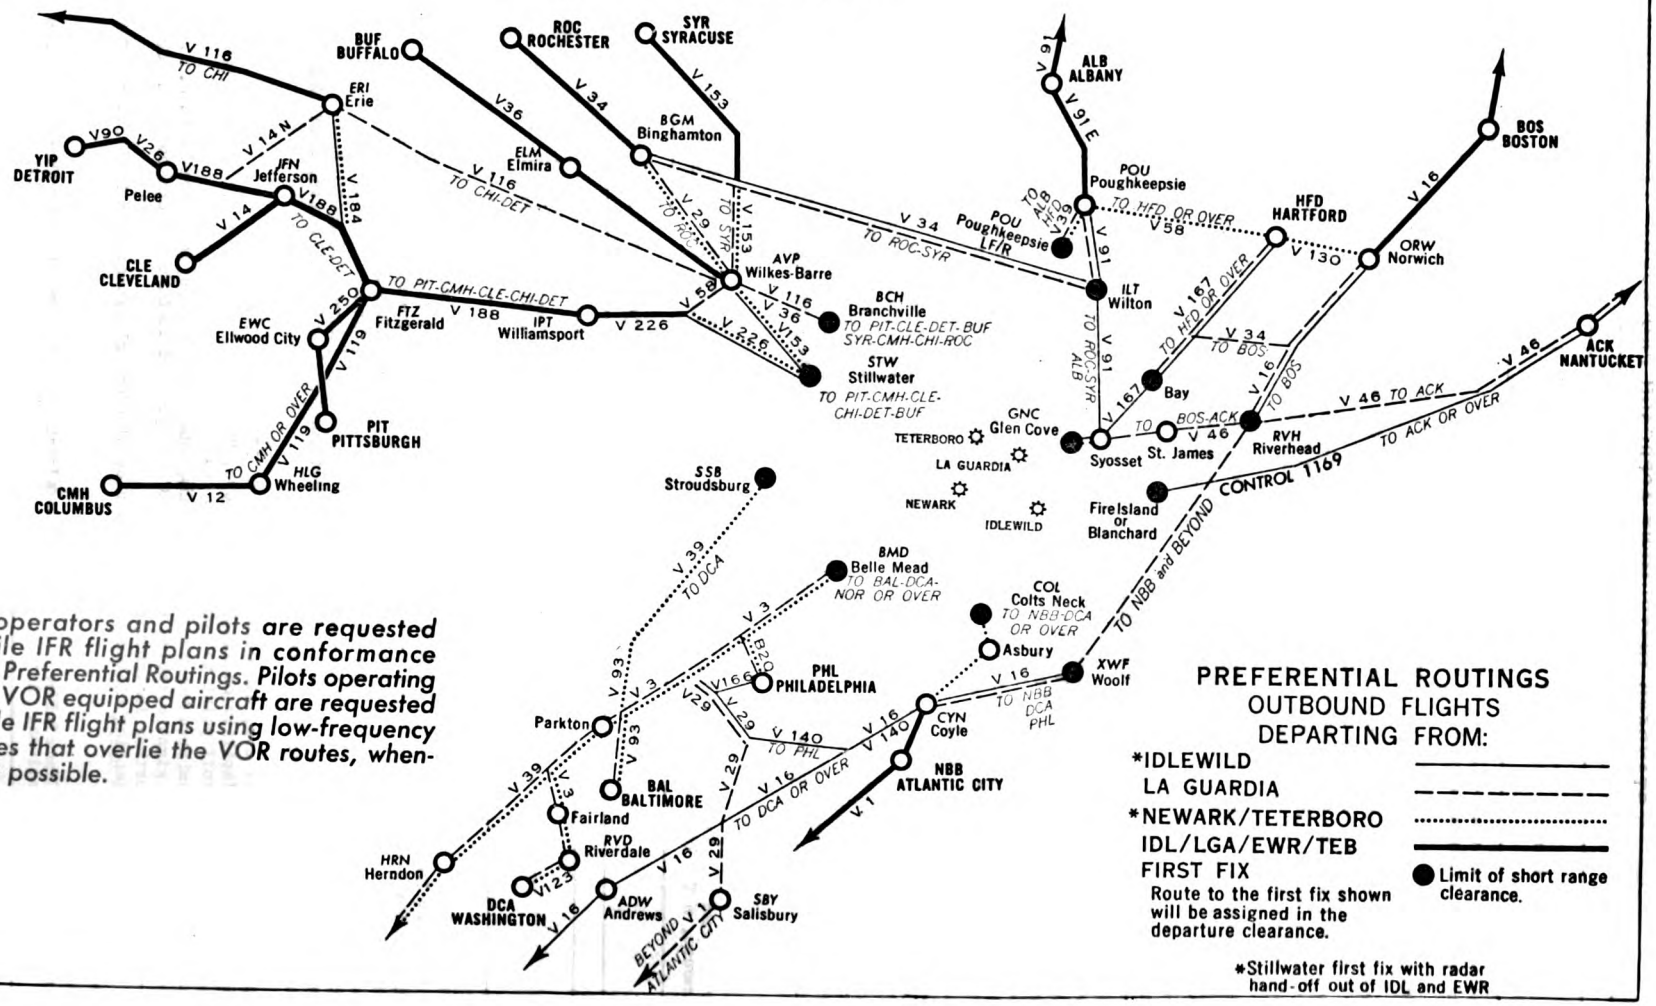
NEW YORK ARTC CENTER
PREFERENTIAL ROUTES

Published at Washington, D. C. by the
Coast and Geodetic Survey
AUGUST 7, 1957



All operators and pilots are requested to file IFR flight plans in conformance with Preferential Routings. Pilots operating non-VOR equipped aircraft are requested to file IFR flight plans using low-frequency routes that overlie the VOR routes, whenever possible.

PREFERENTIAL ROUTINGS
OUTBOUND FLIGHTS
DEPARTING FROM:

*IDLEWILD
LA GUARDIA
*NEWARK/TETERBORO
IDL/LGA/EWR/TEB

FIRST FIX
Route to the first fix shown will be assigned in the departure clearance.

● Limit of short range clearance.

*Stillwater first fix with radar hand-off out of IDL and EWR

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
➔ New or revised data
* = Automatic voice identification
■ Information deleted.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR . . . . Air Route Surveillance Radar
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, CAA
CI . . . . . Control Tower, (City, County, Private, etc.)
CM. . . . . Control Tower, (Military, listing only civil frequencies available)
D . . . . . Distantly controlled
DME. . . . . Distance Measuring Equipment
FM. . . . . VHF fan marker (100 watts)
GCA. . . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L MF (200-415 kc) voice facility on other than range frequency
LFM. . . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
➔ MA. . . . . Range (adcock, vertical radiators), power less than 50 watts
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . . VHF middle marker
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype

TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

RADAR AVAILABLE: How and Where

(12 November 1957)

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar. GCA = Ground Controlled Approach (Military Equivalent of Combined ASR and PAR Equipment) ARSR = Air Route Surveillance Radar. RAPCON = Radar Approach Control.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control (RAPCON), page 4. For ATCRBS see note page 4.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2, 000 to 18, 000 kc and receive any frequency from 1, 500 to 9, 050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: See Page 4.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded. Other transmitting frequencies listed are guarded plus 3023.5kc; 122.5 mc, unless 122.7 mc is shown under Remarks. Transmit and guard 121.5 mc all locations.

RADAR WEATHER ADVISORY SERVICE - continued from page 3.

RADAR WEATHER ADVISORY SERVICE: Pilots may be aided in avoiding hazardous weather by obtaining Radar Advisory Service from radar facilities of the Air Defense Command through use of the following procedures:

1. Using the frequency 133.2 mc. (or 121.5 mc if 133.2 mc not available) transmit:
   "STARGAZER THIS IS (aircraft identification), POSITION (_____), HEADING (_____), IFR (or) VFR FLIGHT PLAN, OVER"
   The word "STARGAZER" is a special call sign which automatically indicates a request for radar advisory service. After contact is established the pilot will use the call sign of the radar station which responds.
   (a) If the aircraft has dual radio installation the pilot on an IFR flight plan should maintain a guard on the normal ATC frequency while in contact with the radar facility.
   (b) If the aircraft does not have dual radio installation the pilot on an IFR flight plan shall, prior to leaving the normal ATC frequency, advise the ARTC Center (direct or via appropriate communication station), "CHANGING TO RADAR ADVISORY SERVICE".

2. The radar director will answer the "STARGAZER" call:
   "(aircraft identification) THIS IS (name of radar site), (instructions)"
   The instructions will normally consist of one of the following:
   (a) "UNABLE" (This is a procedural word used by ADC radar facilities when radar advisory service cannot be furnished for any reason. Upon receipt the pilot shall terminate the contact immediately and return to the normal enroute frequency.)
   (b) General information concerning the storm area and, if appropriate, "STANDBY FOR ATC CLEARANCE". (This instruction is for pilots on IFR flight plans only. It signifies that the radar director will obtain approval from the ARTC Center for the new flight path before giving vectors. The pilot shall standby on the radar advisory frequency).
   (c) General information concerning storm area and a suggested flight path or specific vectors to avoid the storm. (This is for pilots on VFR flight plans. Pilot may take action at his own discretion).
   (d) "UNABLE - SUGGEST YOU CONTACT (call sign of adjacent ADC radar)". (The radar director will make this statement if he determines from observation of the aircraft's position on his radar that another radar site can better serve the pilot's needs).
   (e) "NO CIRCUITS FOR ATC CLEARANCE, OBTAIN YOUR OWN CLEARANCE - SUGGESTED FLIGHT PATH IS....." (This signifies that the radar site does not have a communication circuit with the ARTC Center and, therefore, the pilot must obtain his own ATC clearance if a deviation from current clearance is indicated by the suggested flight path).

3. The pilot shall immediately return to the normal enroute frequency when:
   (a) radio contact with the director is lost.
   (b) notified by the radar director that radar contact has been lost.
   (c) the advisory service is completed.

4. In all cases the information furnished by the radar facility is advisory in nature and the responsibility for safe operation of the aircraft rests with the pilot.

RADAR BEACONS - (continued from page 3)

ATCRBS - Air traffic control radar beacon transponders (ATC transponders) are being installed in some civil aircraft to participate in the forth-coming in-service evaluation of this beacon system. Since the ATC transponder can be used with Mode 3 of the IFF Mark X system, the following will govern the operation of the ATC transponder in order to reduce interference and clutter on IFF Mark X radar displays.

1. Within the environment test area designated within a 200-mile radius of the following locations, the ATC transponder will be operated in accordance with the request of air traffic control. Ground equipment installations will start approximately October 1, 1957, at the following locations: New York center; Idlewild, La Guardia and Newark towers. Installation at the Washington center and tower, the Chicago center and O'Hare tower and the Norfolk center will follow as soon as equipment becomes available. Notification of the start of the actual evaluation will be made at a later date.

2. Air traffic control transponders will be adjusted to Code 00 and turned on only in aircraft operating on an IFR flight plan unless otherwise requested by any ground station.

3. When filing a domestic IFR flight plan for an aircraft equipped with a functioning ATC transponder, this shall be made known by adding the word "transponder" immediately following the aircraft identification. Example: "Braniff six transponder".

4. Aircraft using the "Stargazer" service offered by the Air Defense Command will advise the radar operator of the status of the ATC transponder and will operate it in accordance with the operator's request regardless of the type of flight being conducted.

5. Aircraft operating from the domestic area will comply with (3) above. Aircraft entering the domestic control area will only advise oceanic air traffic control of the status of the Air Traffic Control transponder when making the first radio report to the United States oceanic air traffic control center.

ILS localizer identifier is preceded by International Morse Code "I" (two dots). Time interval between the "I" designator and the first letter of the assigned characteristic will be 0.6 second. *-Automatic voice identification. **-Distance from markers to approach end ILS runway. NOTE: The service area of compass locators is 15 miles.
(L5) - Instrument Approach (neon) (L7) - Hi-intensity Approach Lights W - Without voice BC - Back course BC-restricted = Not suitable for approaches

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

✓ FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or be telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

✓ CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e. g. Long Beach omnirange (Voice) . - .. - . - . . . (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control tower. Where there is no control tower, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power-generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

ATTENTION SIGNAL L/MF RANGES: Beginning 0001Z Nov 15, 1957, transmission of the attention signal preceding scheduled broadcasts on L/MF ranges will be discontinued. The attention signal will continue to be transmitted preceding special broadcasts and as deemed necessary to alert pilots using the L/MF range system that a voice transmission is about to be made.

ARMY EXERCISE, "ALL AMERICAN", (TAC-AIR 58-2): This military exercise will take place 3-18 December 1957 (with 5-9 December as the period of most intense activity) from 0600 EST through 1800 EST, at an altitude of 600' to 2000' during VFR conditions, days, within a 100 n mi radius of Fort Bragg, North Carolina. This activity will involve heavy concentrations of aircraft (maximum of 120 troop carrier and 8 jet type) in formations and streams entering and leaving the Fort Bragg Restricted Area (R-115) in support of airborne maneuvers.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

1957 FLIGHT INFORMATION MANUAL NOW AVAILABLE: Flight Information Manual, Vol. II, dated August 15, 1957, is now available from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., at 50 cents per copy.

DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be utilized:

FROM	TO	MEA
VOR civil arwy V-6, V-8, V-1510		
Omaha, Nebr. VOR	*Lyman, Iowa Int	5500
*Descent to 2600 authorized westbound after passing Lyman Int.		
Lyman, Iowa Int	Int OMA R-071 and LMN R-008 (DSM Temp Int)	8000
Int OMA R-071 and LMN R-008 (DSM Temp Int) via R-262 IOW	Iowa City, Iowa VOR	8000
VOR civil arwy V-52		
Ottumwa, Iowa VOR	Int OTM R-286 and LMN R-008 (DSM Temp Int)	8000
VOR civil arwy V-13		
Lamoni, Iowa VOR	*Int LMN R-008 and OMA R-071 (DSM Temp Int)	8000
*Descent to 4000 authorized after passing intersection southbound.		
Int LMN R-008 and OMA R-071 via MCW R-182 (DSM Temp Int)	Alden, Iowa Int Mason City,	11,000
Alden, Iowa Int	Mason City, Iowa VOR	3000
VOR civil arwy V-13W		
Int FOD R-151 and OMA R-071 (DSM Temp Int)	Fort Dodge, Iowa (VOR)	8000
VOR civil arwy V-161		
Waterloo, Iowa VOR	Int ALO R-214 and OTM R-286 (DSM Temp Int)	8000
VOR civil arwy V-6N, V-172		
Int CID R-249 and LMN R-008 (DSM Temp Int)	Int R-249 CID and R-277 IOW (Grinnell Temp Int)	8000
Int R-249 CID and R-277 IOW (Grinnell Temp Int)	Cedar Rapids, Iowa VOR	2200
Omaha, Nebr. VOR	Des Moines, Iowa LFR	2600
Des Moines, Iowa LFR	Cedar Rapids, Iowa VOR	2200
Lamoni, Iowa VOR	Des Moines, Iowa LFR	2300
Des Moines, Iowa LFR	Mason City, Iowa VOR	3000
Des Moines, Iowa LFR	Iowa City, Iowa VOR	2200
Des Moines, Iowa LFR	Ottumwa, Iowa VOR	2200
Des Moines, Iowa LFR	Waterloo, Iowa VOR	2700
Des Moines, Iowa LFR	Fort Dodge, Iowa VOR	5000

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

LOUISVILLE, KY. VOR SHUTDOWN: During shutdown (Oct 21 through approx Nov 11) the following direct routings will be used in the Louisville area:

V-5: From CVG VOR via 224°M radial and 044°M bearing from Louisville LFR, MEA 3000. V-174 and V-1516: From Louisville LFR to York VOR via E crs LOU LFR to 172°M radial of Cincinnati VOR thence via 256°M radial of York VOR. V-4N: From LOU LFR to Lexington HW via the E crs of LOU LFR and 330°M bearing to LEX HW, MEA 3000. V-4S: From LOU LFR to LEX VOR via 134°M bearing from LOU LFR and the 270°M radial of LEX VOR, MEA 3000. V-5E: From LOU LFR to BWG VOR via 165°M bearing from LOU LFR and the 260°M radial of the BWG VOR, MEA 3000. V-51: LOU LFR direct to Highway Ky. Int MEA LOU LFR - Campbellville, Ky. 3000 - MEA Campbellville, Ky. - Highway, Ky. 6000. V-5: From LOU LFR to BWG VOR via S crs of LOU LFR and the 045°M radial of BWG VOR, MEA 3000. V-4 and V-1516: From LOU LFR to Evansville VOR via the W crs LOU LFR and 070°M radial of Evansville VOR, MEA 2500. V-227: From LOU LFR to Indianapolis VOR via the 304°M bearing from LOU LFR and the 184°M radial of IND VOR, MEA 3000. V-171 and V-174: From LOU LFR to Scotland VOR via the 304°M bearing from LOU LFR and the 123°M radial of Scotland VOR, MEA 3000. V-53: From LOU LFR to IND VOR via the N crs of LOU LFR to Nabb VOR thence via the 315°M radial of Nabb VOR and the 169°M radial of IND VOR - MEA from LOU LFR to Nabb VOR 2100 - MEA Nabb VOR to IND VOR 2600. V-47, V-51 and V-53E: From LOU LFR to Nabb VOR via the N crs of LOU LFR - MEA 2100. V-5E: LOU to Dry Ridge VHF Int unusable. V-4 and V-53: LOU to LEX VOR unusable. V-4N: From LOU to St Marks VHF Int unusable.

During the shutdown, the following non-compulsory reporting points in the Louisville area are temporarily redesignated as follows:

Georgetown, Ky. Int: the intsxn of the E crs of LOU LFR and the 172°M radial of CIN VOR, MEA 3000.
Chaplin, Ky. Int: the intsxn of the 134°M bearing from LOU LFR and the 270°M radial of LEX VOR, MEA 3000.
Campbellsville, Ky. Int: the intsxn of the 165°M bearing from LOU LFR and the 060°M radial of BWG VOR, MEA 3000.
Apalona, Ind. Int: the intsxn of the 070°M radial of Evansville VOR and the 168°M radial of Scotland VOR, MEA 2500.
Mitchell, Ind. Int: the intsxn of the 184°M radial of IND VOR and the 123°M radial of Scotland VOR, MEA 3000.

RADIO INTERFERENCE (General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

✓ CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING POINT AMENDMENTS: Effective December 19, 1957, unless otherwise advised the following civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS:

(1) Green civil arwy No. 9 (Hawaiian Islands) is amended to read: "From the intsxn of the W crs of the Honolulu, Oahu, T.H. rdo rng and the S crs of the Port Allen, Kauai, T.H. rdo rng via the Honolulu, Oahu, T.H. rdo rng stn to the intsxn of the NE crs of the Honolulu rdo rng and the N crs of the Hilo, T.H. rdo rng, excluding the portion at and below 5000 ft MSL which overlaps the Kaneohe Naval Airspace Reservation (P-331)." (Note: Redescribed first portion to begin at Swordfish Int - Int of S crs Port Allen and realigned W crs Honolulu. West Honolulu to be swung to 261°T concurrently)

(2) Amber civil arwy No. 10 (Hawaiian Islands) is amended by changing the words which read: "excluding the portion above 10,000', " to read: "excluding the portion above 21,000' MSL which overlaps Warning Area (W-321)."

(3) Amber civil arwy No. 11 (Hawaiian Islands) is amended to read: "From the intsxn of the S crs of the Maui, T.H. rdo rng and the W crs of the Hilo, T.H. rdo rng via the Maui, T.H. rdo rng stn to the intsxn of the N crs of the Maui, T.H. rdo rng and a point 38 s mi N of the Maui, T.H. rdo rng stn." (Note: Deleted portion Amber 11 between North Maui Int and a point 38 mi N of Maui rdo rng stn)

(4) Amber civil arwy No. 12 (Hawaiian Islands) is amended to read: "From the intsxn of the S crs of the Hilo, Hawaii, T.H. rdo rng and a point 37 s mi S of the Hilo rdo rng stn via the Hilo, Hawaii, T.H. rdo rng stn to the intsxn of the N crs of the Hilo rdo rng and the SE crs of the Maui, T.H. rdo rng." (Note: Deleted portion Amber 12 between Kuku Point Int and North Hilo Int.)

(5) Amber civil arwy No. 13 (Hawaiian Islands) is added to read: "From the intsxn of the S crs of the Port Allen, Kauai, T.H. rdo rng and a line bearing 246°T from the Honolulu, Oahu, T.H. rdo rng to the Port Allen, Kauai, T.H rdo rng stn." (Note: New arwy. Port Allen control area extension amended accordingly)

(6) Red civil arwy No. 87 (Hawaiian Islands) is amended to read: "From the intsxn of the NW crs of the Port Allen, Kauai, T.H. rdo rng and a point 100 mi NW of the Port Allen rdo rng stn via the Port Allen, Kauai, T.H. rdo rng stn; the intsxn of the SE crs of the Port Allen rdo rng and the W crs of the Honolulu rdo rng; Honolulu, Oahu, T.H. rdo rng stn; Maui, T.H. rdo rng stn; intsxn of the SE crs of the Maui, T.H. rdo rng and the N crs of the Hilo rdo rng; Hilo, Hawaii, T.H. rdo rng stn to the intsxn of the E crs of the Hilo rdo rng and the SE crs of the Maui rdo rng. The portions of the arwy at and below 5000'MSL which lie within the Bonham restricted area (R-509) and the Bonham warning area (W-510) are excluded."

(7) Red civil arwy No. 113 (Hawaiian Islands) is amended to read: "From the intsxn of the S crs of the Port Allen, Kauai, T.H., rdo rng and a line bearing 246°T from the Honolulu, Oahu T.H. rdo rng stn via the Honolulu, Oahu, T.H. rdo rng stn; Makapuu Point, Oahu, T.H. nondirectional rdo bcn; the intsxn of a line bearing 62°T from the Makapuu Point nondirectional rdo bcn and the N crs of the Maui, T.H. rdo rng to the intsxn of the N crs of the Maui, T.H. rdo rng and the NE crs of the Honolulu rdo rng." (Note: added a portion from South Port Allen Int via Honolulu rng to Makapuu Point H; added portion from Skipjack Int to North Maui Int. Skipjack Int: Intsxn N Maui and a 62°T bearing from Makapuu H - compulsory.)

(8) VOR civil arwy No. 4 (Seattle, Wash. to Washington, D.C.) is amended by changing the portion which reads: "Topeka, Kans. omni stn, including a S alternate;" to read: "Topeka, Kans. omni stn, including a S alternate via the intsxn of the Salina omnirange 095°T and the Topeka omnirange 236°T radials." (Note: Redesignate V4S between Salina VOR and Topeka VOR.)

(9) VOR civil arwy No. 7 (Miami, Fla. to Green Bay, Wis.) is amended by changing the portion which reads: "Chicago Heights, Ill. omni stn, including an E alternate via the intsxn of the Lafayette omnirange 353°T and the Chicago Heights omnirange 143°T radials;" to read: "Chicago Heights, Ill. omni stn;" (Note: Revoked V7E between Lafayette VOR and Chicago Heights VOR.)

(10) VOR civil arwy No. 8 (Long Beach, Calif. to Washington, D.C.) is amended by changing the portion which reads: "Las Vegas, Nev. omni stn;" to read: "Las Vegas, Nev. omni stn, including a S alternate via the intsxn of the Daggett omnirange 062°T and the Las Vegas omnirange 212°T radials;" (Note: Added V8S between Daggett VOR and Las Vegas VOR.)

(11) VOR civil arwy No. 9 (New Orleans, La. to Milwaukee, Wis.) is amended by changing the portion which reads: "From the New Orleans, La. omni stn via the McComb, Miss. omni stn, including a W alternate and also an E alternate from the New Orleans omni stn to the McComb omni stn via the point of intsxn of the New Orleans omnirange 036°T and the Mobile, Ala. omnirange 260°T radials;" to read: "From the New Orleans, La. omni stn via the McComb, Miss. omni stn, including a W alternate and also an E alternate from the New Orleans omni stn to the McComb omni stn via the Picayune, Miss. omni stn;" (Note: Redesignated V9E between New Orleans VOR and McComb VOR via Picayune VOR.)

(12) VOR civil arwy No. 10 (Pueblo, Colo. to New York, N.Y.) is amended by changing the portion which reads: "Emporia, Kans. omni stn, including a N alternate;" to read: "Emporia, Kans. omni stn;" (Note: Revoked V10N between Hutchinson VOR and Emporia VOR.)

(13) VOR civil arwy No. 12 (Santa Barbara, Calif. to Philadelphia, Pa.) is amended by changing the portion which reads: "Prescott, Ariz. omni stn; Winslow, Ariz. omni stn; to read: "intsxn of the Needles omnirange 077°T and the Drake omnirange 274°T radials; Drake, Ariz. omni stn; Winslow, Ariz. omni stn, including a S alternate from the Needles omni stn to the Winslow omni stn via the Prescott, Ariz. omni stn and the intsxn of the Prescott omnirange 095°T and the Winslow omnirange 248°T radials;" by changing the portion which reads: "Amarillo, Tex. omni stn, including a N alternate;" to read: "Amarillo, Tex. omni stn, including a N alternate and also a S alternate via the point of intsxn of the Texico, N.Mex. omni stn 021°T and the Amarillo omnirange 252°T radials;" and by changing the portion which reads: "Wichita, Kans. omni stn, including a N alternate from the Gage omni stn to the Wichita omni stn via the intsxn of the Gage omnirange044°T and the Wichita omnirange 245°T radials and also a S alternate from the Anthony omni stn to the Wichita omni stn via the intsxn of the Anthony omnirange 060°T and the Wichita omnirange 190°T radials; Emporia, Kans. omni stn, including a N alternate via the intsxn of the Wichita omnirange 046°T and the Emporia omnirange 259°T radials;" to read: "Wichita, Kans. omni stn, including a N alternate from the Gage omni stn to the Wichita omni stn via the point of intsxn of the Wichita omnirange 245°T radial with the Gage omnirange direct radial to the Hutchinson, Kans. omni stn and also a S alternate from the Anthony omni stn to the Wichita omni stn via the intsxn of the Anthony omnirange 060°T and the Wichita omnirange 190°T radials; Emporia, Kans. omni stn, including a N alternate via the point of intsxn of the Wichita omnirange direct radial to the point of intsxn of the Hutchinson, Kans. omnirange 062°T and the Topeka, Kans. omnirange 236°T radials with the Emporia omnirange direct radial to the Hutchinson, Kans. omni stn;" (Note: Added V12S between Tucumcari VOR and Amarillo VOR. Redesignated V12 between Needles VOR and Winslow VOR. Added Drake VOR and Also V12S between Needles VOR and Winslow VOR via Prescott VOR. Redesignated V12N between Gage VOR and Wichita VOR and between Wichita VOR and Emporia VOR.)

(14) VOR civil arwy No. 13 (Houston, Tex. to Duluth, Minn.) is amended by changing the portion which reads: "and also a W alternate via the intsxn of the Houston omnirange 353°T and the Lufkin omnirange 218°T radials;" to read: "and also a W alternate via the intsxn of the Houston omnirange 353°T and the Lufkin omnirange 223°T radials;" (Note: Changed Lufkin 218°T radial to 223°T.)

(15) VOR civil arwy No. 14 (Roswell, N.Mex. to Boston, Mass.) is amended by changing the portion which reads: "Springfield, Mo. omni stn, including a N alternate via the intsxn of the Neosho omnirange 045°T and the Springfield omnirange 261°T radials and also a S alternate;" to read: "Springfield, Mo. omni stn, including a N alternate via the intsxn of the Neosho omnirange 044°T and the Springfield omnirange 261°T radials and also a S alternate via the point of intsxn of the Neosho omnirange 074°T radials with the Springfield omnirange direct to the Fayetteville, Ark. omni stn;" (Note: Redesignated V14S between Neosho VOR and Springfield VOR via Billings Int.)

(16) VOR civil arwy No. 15 (Galveston, Tex. to Minot, N.Dak.) is amended by changing the portion which reads: "intsxn of the Houston omnirange 323°T and the College Station omnirange 127°T radials;" to read: "intsxn of the Houston omnirange 323°T and the College Station omnirange 124°T radials;" (Note: Changed College Station 127°T radial to 124°T.)

(17) VOR civil arwy No. 16 (Los Angeles, Calif. to Boston, Mass.) is amended by changing the portion which reads: "intsxn of the Phoenix omnirange 160°T and the Tucson omnirange 315°T radials;" to read: "point of intsxn of the Phoenix omnirange 161°T radial with the Casa Grande, Ariz. omnirange direct radial to the San Simon, Ariz. omni stn;" (Note: Redesignated V16 between Phoenix VOR and Tucson VOR.)

(18) VOR civil arwy No. 20 (Laredo, Tex. to Richmond, Va.) is amended by changing the portion which reads: "Lake Charles, La. omni stn, including a S alternate from the Houston omni stn to the Lake Charles omni stn via the intsxn of the Houston omnirange 090°T and the Lake Charles direct radial to the Galveston, Tex. omni stn; Lafayette, La. omni stn;" to read: "Lake Charles, La. omni stn, including a N alternate via the intsxn of the Beaumont omnirange 060°T and the Lake Charles omnirange 271°T radials and also a S alternate from the Houston omni stn to the Lake Charles onni stn via the intsxn of the Houston omni 090°T and the Lake Charles omnirange 241°T radials; Lafayette, La. omni stn, including a N alternate via the intsxn of the Lake Charles omnirange 058°T and the Lafayette omnirange 287°T radials and also a S alternate via the intsxn of the Lake Charles omnirange 119°T and the Lafayette omnirange 255°T radials;" and by changing the portion which reads: "intsxn of the New Orleans omnirange 066°T and the Mobile omnirange 242°T radials; Mobile, Ala. omni stn, including a N alternate from the New Orleans omni stn to the Mobile omni stn via the intsxn of the New Orleans omnirange 036°T and the Mobile omnirange 260°T radials; Evergreen, Ala. omni stn, including a N alternate via the intsxn of the Mobile omnirange 015°T and the Evergreen omnirange 244°T radials;" to read: "intsxn of the New Orleans omnirange 066°T and the Mobile omnirange 242°T radials; Mobile, Ala. omni stn, including a N alternate from the New Orleans omni stn to the Mobile omni stn via Picayune, Miss. omni stn; Evergreen, Ala. omni stn, including a N alternate via the intsxn of the Mobile omnirange 015°T and the Evergreen omnirange 246°T radials;" (Note: Added V20N between Beaumont VOR and Lake Charles VOR. Redesignated V20S between Houston VOR and Lake Charles VOR. Added V20N and V20S between Lake Charles VOR and Lafayette VOR. Redesignated V20N between New Orleans VOR and Mobile VOR via Picayune VOR. Redesignated V20N between Mobile VOR and Evergreen VOR.)

(19) VOR civil arwy No. 47 (Louisville, Ky. to Detroit, Mich.) is amended by changing the portion which reads: "Sidney, Ohio, omni stn, including a W alternate from the Cincinnati omni

stn to the Sidney omni stn via the point of intsxn of the Cincinnati omnirange 004°T radial with the Dayton, Ohio, Dayton Arpt ILS lclzr SW crs and the point of intsxn of the Dayton Arpt ILS lclzr SW crs with the Sidney omnirange direct radial to the Cincinnati omni stn;" to read: Sidney, Ohio, omni stn, including a W alternate from the Cincinnati omni stn to the point of intsxn of the Dayton, Ohio, Dayton Arpt ILS lclzr SW crs with the Sidney omnirange direct radial to the Cincinnati omni stn via the point of intsxn of the Cincinnati omnirange 004°T radial with the Dayton Arpt ILS lclzr SW crs;" (Note: Revoked portion of V47W between Englewood Int and the Sidney VOR which coincided with V47.)

(20) VOR civil arwy No. 51 (Miami, Fla. to Chicago, Ill.) is amended by changing the portion which reads: "Nabb, Ind. omni stn; point of intsxn of the Cincinnati, Ohio, omnirange 318° T and the Nobb omnirange 359°T radials; Lafayette, Ind. omni stn; Chicago Heights, Ill. omni stn;" to read: "Nobb, Ind. omni stn; Shelbyville, Ind. omni stn; Lafayette, Ind. omni stn; Chicago Heights, Ill. omni stn;" (Note: Redesignated V51 between Nabb VOR and Chicago Heights VOR via Shelbyville VOR and Lafayette VOR.)

(21) VOR civil arwy No. 53 (Charleston, S.C. to Chicago, Ill.) is amended by changing the portion which reads: "Indianapolis, Ind. omni stn, including an E alternate from the Louisville omni stn to the Indianapolis omni stn via the Nabb, Ind. omni stn and the point of intsxn of the Indianapolis omnirange 137°T and the Nabb, Ind. omnirange 359°T radials; Lafayette, Ind. omni stn, including a W alternate; Peotone, Ill. omni stn;" to read: "Indianapolis, Ind. omni stn; intsxn of the Indianapolis omnirange 311°T and the Peotone omnirange 153°T radials; Peotone, Ill. omni stn;" (Note: Revoked V53E between Louisville VOR and Indianapolis VOR via Nabb VOR and Hartsville Int. Redesignated V53 between Indianapolis VOR and Peotone VOR. Revoked V53W between Indianapolis VOR and Lafayette VOR. Removed Lafayette VOR from V53.)

(22) VOR civil arwy No. 60 (Albuquerque, N. Mex. to Lubbock, Tex.) is amended to read: "From the Albuquerque, N. Mex. omni stn via the Otto, N. Mex. omni stn, including a S alternate; Las Vegas, N. Mex. omni stn; Tucumcari, N. Mex. omni stn; Texico, N. Mex. omni stn; to the Lubbock, Tex. omni stn." (Note: Texico VOR to V60.)

(23) VOR civil arwy No. 62 (Santa Fe, N. Mex. to Abilene, Tex.) is amended to read: "From the Santa Fe, N. Mex. omni stn via the Anton Chico, N. Mex. omni stn; Texico, N. Mex. omni stn; Lubbock, Tex. omni stn; intsxn of the Lubbock omni stn 101°T and the Abilene omnirange 327°T radials; to the Abilene, Tex. omni stn." (Note: Added Texico VOR to V62.)

(24) VOR civil arwy No. 66 (San Diego, Calif. to Charlotte, N.C.) is amended by changing the portion which reads: "Tucson, Ariz. omni stn including a N alternate via the intsxn of the Gila Bend omnirange 100°T and the Tucson omnirange 315°T radials;" to read: "Tucson, Ariz. omni stn, including a N alternate from the Gila Bend omni stn to the Tucson omni stn via the Casa Grande, Ariz. omni stn and the point of intsxn of the Phoenix, Ariz. omnirange 161°T radial with the Casa Grande omnirange direct radial to the San Simon, Ariz. omni stn;" and by changing the portion which reads: "intsxn of the Culberson omnirange 090°T and the Midland omnirange 234°T radials;" to read: "intsxn of the Culberson omnirange 090°T and the Midland omnirange 242°T radials;" (Note: Redesignated V66N between Gila Bend VOR and Tucson VOR. Redesignated V66 between Culberson VOR and Midland VOR by changing Midland 234°T to 242°T.)

(25) VOR civil arwy No. 70 (Corpus Christi, Tex. to Evergreen, Ala.) is amended to read: "From the Corpus Christi, Tex. omni stn via the Palacios, Tex. omni stn; Galveston, Tex. omni stn; intsxn of the Galveston omnirange 067°T and the Lake Charles omnirange 241°T radials; Lake Charles, La. omni stn; Lafayette, La. omni stn; Baton Rouge, La. omni stn; Picayune, Miss. omni stn; to the Evergreen, Ala. omni stn." (Note: Designated slight dog-leg in V70 between Galveston VOR and Lake Charles VOR to make it coincide with V20S. Added new portion to V70 from Baton Rouge VOR to Evergreen VOR via Picayune VOR. Revoked portion of V70 from Baton Rouge VOR to Hammond Int.)

(26) VOR civil arwy No. 77 (Cotulla, Tex. to Des Moines, Iowa) is amended by changing the portion which reads: "Wichita, Kans. omni stn; Topeka, Kans. omni stn;" to read: "Wichita Kans. omni stn; point of intsxn of the Hutchinson, Kans. omnirange 062°T and the Topeka omnirange 236°T radials; Topeka, Kans. omni stn;" (Note: Redesignated V77 between Wichita VOR and Topeka VOR.)

(27) VOR civil arwy No. 83 (Carlsbad, N. Mex. to Pueblo, Colo.) is amended to read: "From the Carlsbad, N. Mex. omni stn via the Roswell, N. Mex. omni stn; Corona, N. Mex. omni stn, including an E alternate via the intsxn of the Roswell omnirange 335°T and the Corona omnirange 125°T radials; Otto, N. Mex. omni stn; Santa Fe, N. Mex. omni stn; intsxn of the Santa Fe omnirange 010°T and the Alamosa omnirange 183°T radials; Alamosa, Colo. omni stn; to the Pueblo Colo. omni stn." (Note: Added new portion to V83 from Santa Fe VOR to Pueblo VOR via Alamosa VOR.)

(28) VOR civil arwy No. 94 (Casa Grande, Ariz. to Longview, Tex.) is amended by changing the caption and by changing all before the Newman, Tex. omni stn to read: "From the Casa Grande, Ariz. omni stn via the San Simon, Ariz. omni stn; point of intsxn of the San Simon omnirange 089°T and the El Paso, Tex. omnirange 293°T radials; point of intsxn of the El Paso omnirange 293°T and the Newman omnirange 272°T radials; Newman, Tex. omni stn;" (Note: Added new portion to V94 from Casa Grande VOR to San Simon VOR.)

(29) VOR civil arwy No. 97 (Miami, Fla. to Minneapolis, Minn.) is amended by changing the portion which reads: "Cincinnati, Ohio, omni stn; Indianapolis, Ind. omni stn, including an E alternate and also a W alternate via the point of intsxn of the Nabb, Ind. omnirange 359°T and the Indianapolis omnirange 137°T radials; intsxn of the Indianapolis omnirange 341°T and the Chicago Heights omnirange 143°T radials; to the Chicago Heights, Ill. omni stn." to read: "Cincinnati, Ohio omni stn; Shelbyville, Ind. omni stn, including an E alternate via the intsxn of the Cincinnati omnirange 321°T and the Shelbyville omnirange 110°T radials and also a W alternate via the intsxn of the Cincinnati omnirange 290°T and the Shelbyville omnirange 172° T radials; Lafayette, Ind. omni stn, including a W alternate from the Shelbyville omni stn to the Lafayette omni stn via the Indianapolis, Ind. omni stn and the intsxn of the Indianapolis omnirange 344°T and the Lafayette omnirange 133°T radials; to the Chicago Heights, Ill. omni stn." (Note: Redesignated V97 between Cincinnati VOR and Chicago Heights VOR. Added Shelbyville VOR.)

(30) VOR civil arwy No. 128 (Chicago, Ill. to Charleston, W. Va.) is amended by changing all before the Cincinnati, Ohio, omni stn to read: "From the point of intsxn of the Joliet, Ill omnirange 056°T and the Peotone omnirange 003°T radials via the Peotone, Ill. omni stn; intsxn of the Peotone omnirange 153°T and the Indianapolis omnirange 311°T radials; Indianapolis, Ind. omni stn; intsxn of the Indianapolis omnirange 137°T and the Cincinnati omnirange 290°T radials; Cincinnati, Ohio, omni stn;" (Note: Redesignated V128 between Peotone VOR and Cincinnati VOR by-passing Lafayette VOR.)

(31) VOR civil arwy No. 132 (Cheyenne, Wyo. to Springfield, Mo.) is amended by changing the portion which reads: "point of intsxn of the Wichita, Kans. omnirange 046°T and the Emporia Kans. omnirange 259°T radials;" to read: "point of intsxn of the Wichita, Kans. omnirange direct radial to the intsxn of the Hutchinson, Kans. omnirange 062°T and the Topeka, Kans. omnirange 236°T radials with the Hutchinson, Kans. omnirange direct radial to the Emporia, Kans. omni stn;" (Note: Redesignated V132 between Hutchinson VOR and Chanute VOR.)

(32) VOR civil arwy No. 137 (Thermal, Calif. to Ukiah, Calif.) is amended by changing all before the Agnew, Calif. omni stn to read: "From the Thermal, Calif. omni stn via the Palmdale, Calif. omni stn; to the point of intsxn of the Bakersfield, Calif. omnirange 210°T and the Coalinga omnirange 152°T radials. From the Coalinga, Calif. omni stn via the Salinas, Calif. omni stn; Agnew, Calif. omni stn;" (Note: Revoked portion of V137 between Maricopa Int and Coalinga VOR.)

(33) VOR civil arwy No. 172 (Denver, Colo. to Chicago, Ill.) is amended to read: "From the Denver, Colo. omni stn via the point of intsxn of the Denver omnirange 061°T and the Imperial, Nebr. omnirange 271°T radials; point of intsxn of the Imperial omnirange 271°T and the North Platte omnirange 246°T radials; to the North Platte, Nebr. omni stn. From the Des Moines, Iowa, omni stn via the point of intsxn of the Des Moines omnirange 071°T and the Iowa City, Iowa, omnirange 283°T radials; Cedar Rapids, Iowa, omni stn; Polo, Ill. omni stn; to the Chicago, Ill. International (O'Hare) Arpt terminal omni stn." (Note: Added new portion to V172 from Denver VOR to North Platte VOR.)

(34) VOR civil arwy No. 177 (Wheatfield, Ill. to Janesville, Wis.) is amended to read: "From the point of intsxn of the Peotone, Ill. omnirange 096°T and the Chicago Heights omnirange 128°T radials to the Chicago Heights, Ill. omni stn. From the Naperville, Ill. omni stn to the Janesville, Wis. omni stn." (Note: Added new portion to V177.)

(35) VOR civil arwy No. 193 (Keeler, Mich. to Sault Ste. Marie, Mich.) is amended by changing the portion which reads: "to the Pellston, Mich. non-directional rdo bcn." to read: "Pellston, Mich. non-directional rdo bcn; to the Sault Ste. Marie, Mich. omni stn." (Note: Added new portion to V193 from Pellston Rbn to Sault Ste. Marie VOR.)

(36) VOR civil arwy No. 214 (Shelbyville, Ind. to Wheeling, W. Va.) is amended to read: "From the Shelbyville, Ind. omni stn to the point of intsxn of the Cincinnati, Ohio, omnirange 004°T and the Dayton, Ohio, omnirange 209°T radials. From the Columbus, Ohio, Port Columbus Arpt ILS lclzr via the Zanesville, Ohio, omni stn; point of intsxn of the Parkersburg, W. Va. omnirange 006°T and the Wheeling omnirange 252°T radials; to the Wheeling, W Va. omni stn." (Note: Added new portion to V214 from Shelbyville VOR to Camden Int.)

(37) VOR civil arwy No. 227 (Louisville, Ky. to Peotone, Ill.) is amended to read: "From the Louisville, Ky. omni stn via the intsxn of the Louisville omni stn via the intsxn of the Louisville omnirange 310°T and the Indianapolis omnirange 185°T radials; Indianapolis, Ind. omni stn; intsxn of the Indianapolis omnirange 311°T and the Lafayette omnirange 159°T radials; Lafayette, Ind. omni stn; intsxn of the Lafayette omnirange 313°T and the Peotone omnirange 153°T radials; to the Peotone, Ill. omni stn." (Note: Added new portion to V227 from Indianapolis VOR to Peotone VOR via Lafayette VOR.)

(38) VOR civil arwy No. 240 (New Orleans, La. to Mobile, Ala.) is amended to read: "From the New Orleans, La. omni stn via the intsxn of the New Orleans omnirange 106°T and the Mobile omnirange 224°T radials; to the Mobile, Ala. omni stn." (Note: Added new portion to V240 from Dog Int to New Orleans VOR.)

(39) VOR civil arwy No. 249 (Caldwell, N. J. to Utica, N. Y.) is amended by changing the portion which reads: "to the Utica, N. Y., Oneida County Arpt, ILS outer Marker." to read: "to the Utica, N. Y. nondirectional rdo bcn." (Note: Redesignated V249 to terminate at Utica 'H'.)

(40) VOR civil arwy No. 275 (Cincinnati, Ohio to Detroit, Mich.) is amended by changing the portion which reads: "point of intsxn of the Findlay omnirange 211°T radial with the Sidney, Ohio, omnirange direct radial to the Ft Wayne, Indiana, omni stn;" to read: "point of intsxn of the Findlay omnirange 212°T radial with the Sidney, Ohio, omnirange direct radial to the Ft Wayne, Ind. omni stn;" (Note: Changed Findlay 211°T radial to 212°T in V275 to provide 15° separation between V275 and V47 at Findlay VOR.)

(41) VOR civil arwy No. 280 (El Paso, Tex. to Kansas City, Mo.) is amended to read: "From the El Paso, Tex. omni stn via the point of intsxn of the El Paso omnirange 092°T and the Pinon omnirange 219°T radials; Pinon, N. Mex. omni stn; Roswell, N. Mex. omni stn; point of intsxn of the Roswell omnirange 063°T and the Lubbock, Tex. omnirange 277°T radials; Texico, N. Mex. omni stn; intsxn of the Texico omnirange 021°T and the Amarillo omnirange 267°T radials; to the Amarillo, Tex. omni stn. From the Gage, Okla. omni stn via the Hutchinson, Kans. omni stn; intsxn of the Hutchinson omnirange 062°T and the Topeka omnirange 236°T radials; Topeka, Kans. omni stn; intsxn of the Topeka omnirange 064°T and the Kansas City omnirange 275°T radials; to the Kansas City, Mo. omni stn." (Note: Added new portion to V280 from Roswell VOR to Amarillo VOR via Texico VOR. Added new portion to V280 from Gage VOR to Kansas City VOR.)

(42) VOR civil arwy No. 286 (Front Royal, Va. to Cape Charles, Va.) is added to read: "From the Front Royal, Va. omni stn via the point of intsxn of the Brooke omnirange 306°T radial with the Gordonsville, Va. omnirange direct radial to the Herndon, Va. omni stn; Brooke Va. omni stn; to the Cape Charles, Va. omni stn. The portions of this arwy which overlie the Quantico Restricted Area (R-37), the West Dahlgren Restricted Area (R-38) and the Camp A. P. Hill Restricted Area (R-40) are excluded." (Note: New arwy.)

(43) VOR civil arwy No. 288 (Lucin, Utah, to Ft Bridger, Wyo.) is added to read: "From the Lucin, Utah, omni stn via the point of intsxn of the Ft Bridger omnirange 278°T radial with the Ogden, Utah, omnirange direct radial to the Malad City, Idaho, omni stn; to the Ft Bridger Wyo. omni stn." (Note: New arwy.)

(44) VOR civil arwy No. 289 (Beaumont, Tex. to Lufkin, Tex.) is added to read: "From the Beaumont, Tex. omni stn via the intsxn of the Beaumont omnirange 334°T and the Lufkin omnirange 160°T radials; to the Lufkin, Tex. omni stn, including an E alternate via the intsxn of the Beaumont omnirange 349°T and the Lufkin omnirange 145°T radials." (Note: New arwy.)

(45) VOR civil arwy No. 290 (unassigned)

(46) VOR civil arwy No. 291 (Prescott, Ariz. to Valle, Ariz.) is added to read: "From the Prescott, Ariz. omni stn via the Drake, Ariz. omni stn; to the Valle, Ariz. omni stn." (Note: New arwy.)

(47)VOR civil arwy No. 1518 (Los Angeles, Calif. to Washington, D.C.) is amended by changing the portion which reads: "Needles, Calif. omni stn; Prescott, Ariz. omni stn; Winslow, Ariz. omni stn;" to read: "Needles, Calif. omni stn; intsxn of the Needles omnirange 077°T and the Drake omnirange 274°T radials; Drake, Ariz. omni stn; Winslow, Ariz. omni stn;" (Note: Redesignated V1518 between Needles VOR and Winslow VOR to add Drake VOR and remove Prescott VOR.)

(48) Hawaiian VOR civil arwy No. 1, is amended to read: "From the Hilo, Hawaii, T.H. Omni stn to the point of intsxn of the Hilo omni 034°T and the Upolu Point, Hawaii, T.H. omnirange 096°T radials." (Note: Changed Hilo 041°T radial to Hilo 034°T.)

(49) Hawaiian VOR civil arwy No. 2, is amended to read: "From the Lihue, Kauai, T.H. omni stn via the point of intsxn of the Lihue omnirange 126°T and the Honolulu omnirange 261° T radials; Honolulu, Oahu, T.H. omni stn, including a S alternate from the Lihue omni stn to the Honolulu omni stn via the intsxn of the Lihue omnirange 141°T and the Honolulu omnirange 246°T radials; Lanai, T.H. omni stn, including a S alternate; point of intsxn of the Lanai omnirange 111°T and the Upolu Point omnirange 302°T radials; Upolu Point, Hawaii, T.H. omni stn; point of intsxn of the Upolu Point omnirange 096°T and the Hilo omnirange 334°T radials; Hilo Hawaii, T.H. omni stn; to the intsxn of the Hilo omnirange 089°T radial with a point 33 s mi E from the Hilo omni stn. The portions of this arwy which overlap the Kahoolawe Restricted Area (R-327) are excluded." (Note: Changed Honolulu 246°T to 261°T in V2 between Lihue and Honolulu VORs. Changed Hilo 336°T to 334°T between Paradise Int and Hilo VOR.)

(50) Hawaiian VOR civil arwy No. 3, is amended to read: "From the intsxn of the Hilo omnirange 173°T radial with a point 36 s mi S from the Hilo omni stn via the Hilo, Hawaii, T.H. omni stn; to the point of intsxn of the Hilo omnirange 004°T and the Upolu Point, Hawaii, T.H. omnirange 096°T radials." (Note: Changed Hilo 006°T radial to 004°T.)

(51) Hawaiian VOR civil arwy No. 4, is amended to read: "From the point of intsxn of the Lihue, Kauai, T.H. omnirange 186°T and the Honolulu omnirange 246°T radials via the Honolulu, Oahu, T.H. omni stn, including a N alternate from the Point of intsxn of the Lihue omnirange 189°T and the Honolulu omnirange 261°T radials to the Honolulu omni stn; to the point of intsxn of the Honolulu omnirange 061°T and the Kahului, Maui, T.H. omnirange 352°T radials. In addition, this arwy shall include the airspace between straight lines starting from a point on each outer bndry of the arwy, at a distance of 50 s mi SW and also NE from the Honolulu omni stn, and diverging southwestward and northeastward at angles of 6° relative to the airway's centerline. The N alternate shall include the airspace between straight lines starting from a point on each outer bndry of the N alternate, at a distance of 50 s mi W from the Honolulu omni stn, and diverging westward at angles of 6° relative to the N alternate's centerline. The portion of this arwy at and below 5000'MSL, which overlaps the Kaneohe Bay Airspace Reservation (P-331) is excluded. The portion of this arwy which overlaps the Waikane Restricted Area (R-496) is excluded." (Note: Redesignated V4. Added V4N. Enlarged V4 NE and SW from Honolulu VOR and V4N west from Honolulu VOR to fan shaped configuration commencing 50 mi each way from the VOR.)

(52) Hawaiian VOR civil arwy No. 5, is amended to read: "From the point of intsxn of the Lanai, T.H. omnirange 111°T and the Kahului omnirange 204°T radials to the Kahului, Maui, T.H. omni stn. The portion of this arwy which overlaps the Kahoolawe Restricted Area (R-327) is excluded." (Note: Redesignated V5 to go from Kahului VOR to intsxn Kahului 204°T and Lanai 111°T.)

(53) Hawaiian VOR civil arwy No. 6, is amended to read: "From the point of intsxn of the Molokai, T.H. omnirange 067°T and the Kahului, Maui, T.H. omnirange 331°T radials via the Kahului, Maui, T.H. omni stn; point of intsxn of the Kahului omnirange 080°T and the Hilo omnirange 334°T radials; to the Hilo, Hawaii, T.H. omni stn. The portion of this arwy between the Kahului omni stn and the point of intsxn of the Kahului omni 331°T and the Molokai omnirange 067°T radials which lies in proximity to the Mokuhoonike Restricted Area (R-326) shall be used only after obtaining prior approval from Civil Aeronautics Administration Air Traffic Control." (Note: RevokedV6 from Lanai VOR to Maui VOR and redesignated new V6 as described above.)

(54) Hawaiian VOR civil arwy No. 7, is amended to read: "From the Lanai, T.H. omni stn to the Molokai, T.H. omni stn. The portion of this arwy which overlaps the Molokai Restricted Area (R-325) is excluded." (Note: Redesignated V7 from Lanai VOR to Molokai VOR rather than to North Lanai Int.)

(55) Hawaiian VOR civil arwy No. 8, is amended to read: "From the point of intsxn of the Honolulu, Oahu, T.H. omnirange 179°T and the Molokai, T.H. omnirange 268°T radials via the Molokai, T.H. omni stn; to the point of intsxn of the Molokai omnirange 067°T and the Upolu Point, Hawaii, T.H. omnirange 012°T radials. In addition, this arwy shall include the airspace between straight lines starting from a point on each outer bndry of the arwy, at a distance of 50 s mi NE from the Molokai omni stn, and diverging northeastward at angles of 6° relative to the centerline of the arwy. The portion of this arwy which overlaps the West Molokai Restricted Area (R-325) shall be used only after obtaining prior approval from Civil Aeronautics Administration Air Traffic Control."

(56) Hawaiian VOR civil arwy No. 9, is amended to read: "From the point of intsxn of the Lanai, T.H. omnirange 224°T and the Honolulu omnirange 179°T radials to the Honolulu, Oahu T.H. omni stn. In addition, this arwy shall include the airspace between straight lines starting from a point on each outer bndry of the arwy, at a distance of 50 s mi S from the Honolulu omni stn, and diverging southward at angles of 6° relative to the centerline of the arwy. The portion of this arwy above 21,000'MSL, which overlaps Warning Area C (W-321) is excluded." (Note: Redesignated V9 by enlarging a portion of it to a fan shaped configuration and modifying the portion of the arwy excluded from W-321.)

(57) Hawaiian VOR civil arwy No. 10, is amended to read: "From the Upolu Point, Hawaii, T.H. omni stn to the point of intsxn of the Upolu Point omnirange 096°T and the Hilo, Hawaii, T.H. omnirange 034°T radials." (Note: Changed Hilo 041°T radial to 034°T.)

(58) Hawaiian VOR civil arwy No. 11, is added to read: "From the Upolu Point, Hawaii, T.H. omni stn to the point of intsxn of the Upolu Point omnirange 349°T and the Kahului, Maui T.H. omnirange 080°T radials." (Note: New arwy.)

CONTROL AREAS:

(1) Amber civil arwy No. 13 (Hawaiian Islands) is added to read: "All of Amber civil arwy No. 13."

(2) VOR civil arwy No. 12 (Santa Barbara, Calif. to Philadelphia, Pa.) is amended to read: "All of VOR civil arwy No. 12 including N and S alternates, but excluding the airspace between the main arwy and its S alternate arwy from the Needles, Calif. omni stn to the Winslow, Ariz. omni stn."

(3) VOR civil arwy No. 53 (Charlotte, S.C. to Chicago, Ill.) is amended to read: "All of VOR civil arwy No. 53."

(4) VOR civil arwy No. 70 (Corpus Christi, Tex. to Evergreen, Ala.) is amended to read: "All of VOR civil arwy No. 70."

(5) VOR civil arwy No. 83 (Carlsbad, N. Mex. to Pueblo, Colo.) is amended to read: "All of VOR civil arwy No. 83 including an E alternate."

(6) VOR civil arwy No. 94 (Casa Grande, Ariz. to Longview, Tex.) is amended to read: "All of VOR civil arwy No. 94."

(7) VOR civil arwy No. 172 (Denver, Colo. to Chicago, Ill.) is amended to read: "All of VOR civil arwy No. 172."

(8) VOR civil arwy No. 177 (Wheatfield, Ill. to Janesville, Wis.) is amended to read: "All of VOR civil arwy No. 177."

(9) VOR civil arwy No. 214 (Shelbyville, Ind. to Wheeling, W. Va.) is amended to read: "All of VOR civil arwy No. 214."

(10) VOR civil arwy No. 227 (Louisville, Ky. to Peotone, Ill.) is amended to read: "All of VOR civil arwy No. 227."

(11) VOR civil arwy No. 240 (New Orleans, La. to Mobile, Ala.) is amended to read: "All of VOR civil arwy No. 240."

(12) VOR civil arwy No. 280 (El Paso, Tex. to Kansas City, Mo.) is amended to read: "All of VOR civil arwy No. 280."

(13) VOR civil arwy No. 286 (Front Royal, Va. to Cape Charles, Va.) is added to read: "All of VOR civil arwy No. 286."

(14) VOR civil arwy No. 288 (Lucin, Utah to Ft Bridger, Wyo.) is added to read: "All of VOR civil arwy No. 288."

(15) VOR civil arwy No. 289 (Beaumont, Tex. to Lufkin, Tex.) is added to read: "All of VOR civil arwy No. 289."

(16) VOR civil arwy No. 290 (unassigned)

(17) VOR civil arwy No. 291 (Prescott, Ariz. to Valle, Ariz.) is added to read: "All of VOR civil arwy No. 291."

(18) Hawaiian VOR civil arwy No. 4 is amended to read: "All of Hawaiian VOR civil arwy No. 4 including a N alternate, but excluding the airspace between the main arwy and the N alternate arwy."

(19) Hawaiian VOR civil arwy No. 11 is added to read: "All of Hawaiian VOR civil arwy No. 11."

CONTROL AREA EXTENSIONS:

(1) (Akron, Colo.) is amended to read: "Within 5 mi either side of the 167°T radial of the Akron, Colo. omnirange extending from the omni stn to a point 25 mi S."

(2) (St Joseph, Mo.) is amended to read: "The airspace within a 25 mi radius of Rosecrans Memorial Arpt bounded on the NE by VOR civil arwy No. 15 and on the SE by VOR civil arwy No. 77."

(3) (Casper, Wyo.) is amended to read: "The airspace within a 25 mi radius of the Casper rdo rng stn lying in the SW, NW and NE quads of the rdo rng, and within 5 mi either side of the Casper Air Terminal ILS lclzr crs extending from the localizer to a point 25 mi W of the arpt."

(4) (Wilmington, N. C.) is amended by changing the words which read: "Oakes, Nassau, BWI, nondirectional rdo bcn" to read: "Nassau, BWI, nondirectional rdo bcn." (Note: Oakes H relctd to Nassau International to a point at lat 25-03-00, long. 77-28-00, named Nassau, no change in frequency or ident.)

(5) (Ukiah, Calif.) is added to read: "Within 5 mi either side of the 218°T radial of the Ukiah omnirange extending from the omni stn to a point 17 mi SW."

(6) (Albuquerque, N. Mex.) is amended by adding the following position to present control area extension: "that airspace lying SW of Albuquerque bounded on the N by VOR civil arwy No. 12, on the E by VOR civil arwy No. 19 and on the SW by VOR civil arwy No. 192, excluding the portion which conflicts with restricted area R-313."

(7) (Dallas, Tex.)(Dallas-Houston-Austin area) is amended to read: "All of the airspace bounded on the E by a line 5 mi E of and parallel to the 133°T radial of the Dallas, Tex. omnirange, the 353°T and 140°T radials of the Leona, Tex. omnirange and the 353°T radial of the Houston, Tex. omnirange and by Red civil arwy No. 96, bounded on the SW by Red civil arwy No. 32, on the NW by Amber civil arwy No. 4 to the Waco, Tex. rdo rng stn and by Blue civil arwy No. 5 to the Dallas nondirectional rdo bcn, and bounded on the N by VOR civil arwy No16."

(8) (Fortuna, Calif.) is amended to read: "The airspace E of Fortuna lying within a 30 mi radius of the Arcata Arpt bounded on the W by VOR civil arwy No. 27; the airspace W of Fortuna bounded on the E by VOR civil arwy No. 27, on the S by Fortuna control area extension 601.1415, on the W by long. 124-30-00, and on the N by a line drawn through points at lat 41-07-45, long. 124-30-00 and lat 41-04-30, long. 124-20-00."

(9) (Crescent City, Calif.) is amended by changing the portion which reads: "to points 20 mi NW and SW." to read: "to points 25 mi NW and 20 mi SW of the omni stn."

(10) (Wink, Tex.) is amended to read: "The airspace SE of Wink bounded on the E by the Midland, Tex. control area extension, on the SE by a line drawn through points at lat 31-30-00, long. 102-47-00 and lat 31-24-00, long. 103-01-40, on the W by VOR civil arwy No. 79, and on the NW by VOR civil arwy No. 66; the airspace NW of Wink bounded on the E by VOR civil arwy No. 79, on the S by VOR civil arwy No. 16N, and on the NW by the arc of a 20-mile radius circle centered on the Wink omni stn." (Note: Rewritten due to redesignation of VOR No. 66)

(11) (Gainesville, Fla.) is amended to read: "The airspace within a 15 mi radius of the Gainesville Municipal Arpt excluding the portion above 5000'MSL which overlaps Jacksonville restricted area R-161-B and excluding the portion above 15,000'MSL which overlaps Jacksonville restricted area R-161-D."

(12) (Battle Mountain, Nev.) is added to read: "Within 5 mi either side of the 218°T and 348°T radials of the Battle Mountain omnirange extending from the omni stn to points 23 mi SW and 12 mi N of the omni stn."

(13) (Williams, Ariz.) is added to read: "The airspace bounded by a line beginning at a point at lat 33-22-00, long. 111-47-00, extending to a point at lat 33-22-00, long. 111-13-00, thence to a point at lat 32-56-00, long. 110-31-00, thence to a point at lat 32-42-00, long. 110-42-00, thence to a point at lat 32-53-00, long. 111-34-00 thence to the point of beginning."

(14) (Tucson, Ariz.) is added to read: "The airspace NE of Tucson bounded on the N by VOR civil arwy No. 94, on the SE by VOR civil arwy No. 202 and on the S and SW by VOR civil arwy No. 16."

(15) (Fort Bridger, Wyo.) is added to read: "Within 5 mi either side of the 45°T radial of the Ft Bridger omnirange extending from the omni stn to a point 15 mi NE and within 5 mi either side of the 346°T radial of the omnirange extending from the omni stn to a point 25 mi N."

(16) (Bryce Canyon, Utah) is added to read: "Within 5 mi either side of the 110°T radial of the Bryce Canyon omnirange extending from the omni stn to a point 25 mi SE."

(17) (Truth or Consequences, N. Mex.) is added to read: "The airspace bounded on the E by Amber civil arwy No. 3 and on the SW and NW by VOR civil arwy No. 19. The portion of this control area above 20,000'MSL which overlaps the White Sands restricted area, Area 2 (R-521), (published in Section 608.39 of this Chapter), shall be used only after obtaining prior approval from Civil Aeronautics Administration Air Traffic Control."

(18) (Neah Bay, Wash.) is added to read: "The airspace lying S of the United States-Canadian Border and the Vancouver Oceanic Flight Information Region within lines drawn tangent to the circumference of a 5 mi radius circle centered on the Neah Bay, Wash. rdo rng stn and the circumference of a 15 mi radius circle centered on the intsxn of the NW crs of the Neah Bay rdo rng and a point at lat 48-40-00, long. 125-17-30, excluding the portion below 5000' MSL." (Note: Beale Int: intsxn NW Neah and the above point of lat and long. to be designated by Canada as noncompulsory concurrently.)

(19) (Port Allen, Kauai, T.H.) is amended to read: "The airspace lying NE of Port Allen bounded on the S by Red civil arwy No. 87, on the W by long. 159-30-00, and on the NE by the arc of a circle 25 s mi in radius centered at lat 21-58-07, long. 159-20-27." (Note: Portion on S crs deleted and designated as Amber arwy No. 13.)

(20) (Kaneohe, Oahu, T.H.) is amended by deleting the words which read: "and excluding the airspace below 5000' lying within caution area C-330." (Note: Caution area C-330 rescinded per ASP Mtg 513.)

(21) (Kahului, Maui, T.H.) is added to read: "The airspace lying N of Kahului within a 25 s mi radius of the Kahului, Maui, T.H. omni stn bounded on the SW and S by VOR civil arwy No. 6."

(22) (Hilo, Hawaii, T.H.) is amended by adding the following to present control area extension: "The airspace lying E of Hilo bounded by a line beginning at a point at lat 19-39-30, long. 154-30-20, thence extending clockwise along the arc of a circle centered at a point at lat 19-39-30, long. 154-46-00, to a point at lat 19-25-30, long. 154-41-00, thence to a point at lat 19-34-00, long. 154-55-00, thence to a point at lat 19-39-30, long. 154-56-00, thence to point of beginning."

(23) (Savannah, Ga.) is amended to read: "The airspace within a 40 mi radius of Hunter AFB, Savannah, Ga. excluding the portion S of lat 31-35-00 and excluding the portions which overlap Restricted Areas R-159 and R-339 and Warning Areas W-132, W-157 and W-160 at all times and all altitudes."

CONTROL ZONES:

(1) (St Joseph, Mo.) is amended by changing the name "Rosecrans Field," to read: "Rosecrans Memorial Airport,"

(2) (LaCrosse, Wis.) is amended by deleting the portion which reads: "and extending 2 mi either side of the 146°T radial of the LaCrosse omnirange to a point 10 mi SE of the omni stn." and by adding the following portion to read: "and extending 2 mi either side of the 227°T radial of the LaCrosse terminal omnirange to a point 12 mi SW of the terminal omni stn."

(3) (Great Falls, Mont.) is amended by changing the name "Great Falls Municipal Airport" to read: "Great Falls International Airport," wherever it appears."

(4) (Billings, Mont.) is amended by changing the name "Billings Municipal Airport" to read: "Logan Field, Billings, Mont."

(5) (Sault Ste. Marie, Mich.) is amended by adding the following portion to present control zone:"and within 2 mi either side of the 146°T & 326°T radials of the omnirange extending to a point 12 mi SE of the omni stn."

(6) (Honolulu, Oahu, T.H.) is amended to read: "Within a 5 mi radius of Honolulu Intnl Arpt, within a 3 mi radius of the Barber's Point Naval Airstation, and within 2 mi either side of the W crs of the Honolulu rdo rng extending to a point 10 mi W of the rdo rng stn."

REPORTING POINTS:

(1) Green civil arwy No. 9 (Hawaiian Islands) is amended to read: "The intsxn of the S crs of the Port Allen, Kauai, T.H. rdo rng and the W crs of the Honolulu, Oahu, T.H. rdo rng; the intsxn of the W crs of the Honolulu, Oahu, T.H. rdo rng and a line bearing 222°T from the Kahuku, Oahu, T.H. nondirectional rdo bcn; Honolulu, Oahu, T.H. rdo rng stn; the intsxn of the NE crs of the Honolulu, Oahu, T.H. rdo rng and a line bearing 007°T from the Makapuu Point, Oahu, T.H. nondirectional rdo bcn; the intsxn of the NE crs of the Honolulu, Oahu, T.H. rdo rng and the N crs of the Maui, T.H. rdo rng; the intsxn of the NE crs of the Honolulu, Oahu, T.H. rdo rng and the N crs of the Hilo, Hawaii, T.H. rdo rng." (Note: Green 9 swung with realigned W crs Honolulu (to 261°T from stn). Reporting points: (new) Swordfish Int - S Port Allen and W Honolulu; Coconut Int - W Honolulu and 222°T bearing from Kahuku. H.; Banana Int - NE Honolulu and a 007°T bearing from Makapuu Pt. H. Maki Int deleted as compulsory LF reporting point)

(2) Amber civil arwy No. 10 (Hawaiian Islands) is amended by adding the following reporting point: "The intsxn of the S crs of the Honolulu, Oahu, T.H. rdo rng and a line bearing 237°T from the Makapuu Point, Oahu, T.H. nondirectional rdo bcn." (Note: named Southgate)

(3) Amber civil arwy No. 12 (Hawaiian Islands) is amended by changing the words "east crs of the Maui, T.H. rdo rng" to read: "SE crs of the Maui, T.H. rdo rng."

(4) Amber civil arwy No. 13 (Hawaiian Islands) is added to read: "No reporting points designation."

(5) Red civil arwy No. 113 (Hawaiian Islands) is amended to read: "The intsxn of the S crs of the Port Allen, Kauai, T.H. rdo rng and a line bearing 246°T from the Honolulu, Oahu, T.H. rdo rng stn; Makapuu Point, Oahu, T.H. nondirectional rdo bcn; the intsxn of a line bearing 062°T from the Makapuu Point, Oahu, T.H. nondirectional rdo bcn and the N crs of the Maui, T.H. rdo rng." (Note: S Port Allen Int redescribed as intsxn S crs of Port Allen and a 246°T bearing from Honolulu rng stn; SKIPJACK Int added - intsxn of N crs Maui and a 62°T bearing from Makapuu Point H.)

(6) Red civil arwy No. 87 (Hawaiian Islands) is amended by changing the words which read: "intsxn of the E crs of the Maui, T.H. rdo rng and the E crs of the Hilo, T.H. rdo rng." to read: "intsxn of the SE crs of the Maui, T.H. rdo rng and the E crs of the Hilo, T.H. rdo rng."

(7) Other reporting points is amended by adding the following reporting points to read:

(a) Carp Int: The intsxn of a direct line between the Carolina Beach (Wilmington, N.C.) nondirectional rdo bcn and the Nassau, BWI, nondirectional rdo bcn and the western bndry of the New York Oceanic Control Area."

VOR REPORTING POINTS:

(1) VOR Domestic reporting points is amended by adding the following reporting points:

(a) Coconut Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 261°T radial and a line bearing 222°T from the Kahuku, Oahu, T.H. nondirectional rdo bcn.

(b) Swordfish Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 261°T and the Lihue, Kauai, T.H. omnirange 189°T radials.

(c) Tuna Int: The intsxn of the Molokai, T.H. omnirange 067°T and the Upolu Point Hawaii, T.H. omnirange 012°T radials.

(d) Banana Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 061°T and the Lanai, T.H. omnirange 320°T radials.

(e) Banning Int: The intsxn of the Ontario, Calif. omnirange 091°T and the March, Calif. omnirange 061°T radials.

(f) Sumatra Int: The intsxn of the Miles City, Mont. omnirange 286°T and the Billings, Mont. omnirange 036°T radials.

(g) Kahului, Maui, T.H. omnirange station.

(h) Molokai, T.H. omnirange station.

(2) VOR Domestic reporting points is amended by changing the following reporting points:

(a) Southgate Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 179°T and the Molokai, T.H. omnirange 268°T radials.

(b) North Maui Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 061°T and the Kahului, Maui, T.H. omnirange 352°T radials.

(c) Paradise Int: The intsxn of the Upolu Point, Hawaii, T.H. omnirange 096°T and the Hilo, Hawaii, T.H. omnirange 334°T radials.

(d) Grass Shack Int: The intsxn of the Upolu Point, Hawaii, T.H. omnirange 096° T and the Hilo, Hawaii, T.H. omnirange 004°T radials.

(e) Hibiscus Int: The intsxn of the Upolu Point, Hawaii, T.H. omnirange 096°T and the Hilo, Hawaii, T.H. omnirange 034°T radials.

(3) VOR Domestic reporting points is amended by revoking the following reporting points:

(a) Hula Girl Int; The intsxn of the Lihue, Kauai, T.H. omnirange 141°T and the Honolulu omnirange 246°T radials.

(b) Makai Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 246°T and the Lihue, Kauai, T.H. omnirange 126°T radials.

(c) Kaneohe Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 061°T and the Lanai, T.H. omnirange 318°T radials.

(d) North Lanai Int: The intsxn of the Honolulu, Oahu, T.H. omnirange 061°T and the Lanai, T.H. omnirange 337°T radials.

(e) Rainbow Int: The intsxn of the Maui, T.H. omnirange 191°T and the Lanai, T.H. omnirange 111°T radials.

(f) Pineapple Int: The intsxn of the Lanai, T.H. omnirange 111°T and the Maui, T.H. omnirange 237°T radials.

(g) Waterway Int: The intsxn of the Galveston, Tex. omnirange 064°T; the Lake Charles, La. omnirange 244°T and the Beaumont, Tex. omnirange 168°T radials.

(h) Stonyfork Int: The intsxn of the Elmira, N.Y., omnirange 212°T and the Bradford, Pa. omnirange 097°T radials.

(i) Trumansburg Int: The intsxn of the Elmira, N.Y. omnirange 029°T and the Rochester, N.Y. omnirange 130°T radials.

(j) Maui, T.H. omnirange station.

(k) Wisbon Int: The intsxn of the Herndon, Va. omnirange 045°T and the Baltimore, Md. omnirange 281°T radials.

✓ LOCATION IDENTIFIERS: The following changes affect the use of the location identifiers:

BPT Beaumont, Tex., Jefferson County Arpt (change from BUJ 1700Z Dec 1, 1957)

✓ ON REQUEST REPORTING POINTS: The following on request reporting points are designated, redesignated, renamed or cancelled and shall become effective as indicated:

DESIGNATED: Effective November 21, 1957

(1) SMALL, OHIO (VHF) INTSXN - the intsxn of the 222°M radial of the Wheeling, W.Va. VOR and the 309°M radial of the Morgantown, W.Va. VOR. (corrects Airgi Vol. 12 #16, pg 36, item 27)

DESIGNATED: Effective December 19, 1957

(1) ADMIRE, KANS. (VHF) INTSXN - the intsxn of the 085°M radial of the Salina, Kans VOR and the 227°M radial of the Topeka, Kans. VOR.

(2) ALMA, TEX. (VHF) INTSXN - the intsxn of the 154°T radial of the Dallas, Tex. VOR and the 100°M radial of the Britton, Tex. VOR. (depict on Dallas-Ft Worth VOR Terminal Area Chart)

(3) BACHELOR, CALIF. (LF) INTSXN - the intsxn of the S crs Riverside, Calif. LFR and the 203°M brng to Oceanside, Calif. Rbn.

(4) BAILEY, ILL. (VHF) INTSXN - the intsxn of the 175°M radial of the Chicago Heights, Ill. VOR and the 094°M radial of the Peotone, Ill. VOR.

(5) BARRETT LAKE, CALIF. (LF) INTSXN - the intsxn of the E crs of the San Diego, Calif. LFR and the 348°M brng to Julian, Calif. Rbn.

(6) BEALLSVILLE, OHIO (VHF) INTSXN - the intsxn of the 289°M radial of the Morgantown, W.Va. VOR and the 040°M radial of the Parkersburg, W.Va. VOR.

(7) BEAVER, PA. (VHF) INTSXN - the intsxn of the 331°M radial of the Pittsburgh, Pa. VOR and the 248°M radial of the Ellwood, Pa. VOR. (depict on Pittsburgh VOR Terminal Area and Departure Chart)

(8) BEDIAS, TEX. (VHF) INTSXN - the intsxn of the 162°M radial of the Leona, Tex. VOR and the 051°M radial of the College Station, Tex. VOR.

(9) BENICIA, CALIF. (VHF) INTSXN - the intsxn of the 348°M radial of the Oakland, Calif. VOR and the 216°M radial of the Sacramento, Calif. VOR.

(10) BLUEFIN, T.H. (VHF) INTSXN - the intsxn of the 056°M radial of the Molokai, T.H VOR and the 320°M radial of the Kahului, T.H. VOR.

(11) BOLIVAR, TEX. (VHF) INTSXN - the intsxn of the 059°) adial of the Galveston, Tex. VOR and the 105°M radial of the Houston, Tex. VOR.

(12) BOX SPRINGS, CALIF. (VHF) INTSXN - the intsxn of the 076°M radial of the Ontario, Calif. VOR and the 314°M radial of the March, Calif. VOR.

(13) BRETON, MISS. (VHF) INTSXN - the intsxn of the 100°M radial of the New Orleans, La. VOR and the 219°M radial of the Mobile, Ala. VOR.

(14) CUMBERLAND, VA. (LF & VHF) INTSXN - the intsxn of the 192°M radial of the Gordonsville, Va. VOR and a 092°M brng to Richmond Va. LFR.

(15) DOBBIN, TEX. (VHF) INTSXN - the intsxn of the 162°M radial of the Leona, Tex. VOR and the 101°M radial of the College Station, Tex. VOR.

(16) DORA, N.MEX. (VHF) INTSXN - the intsxn of the 204°M radial of the Texico, N.Mex VOR and the 051°M radial of the Roswell, N. Mex. VOR.

(17) FALL RIVER, TENN. (VHF) INTSXN - the intsxn of the 154°M radial of the Graham, Tenn. VOR and the S crs of the Nashville, Tenn. ILS lclzr.

(18) FALLS, IDAHO (LF & VHF) INTSXN - the intsxn of the 015°M radial of the Pocatallo, Idaho VOR and the 150°M brng to Pocatello, Idaho LOM.

(19) FILLMORE, IND. (VHF) INTSXN - the intsxn of the 246°M radial of the Indianapolis, Ind. VOR and the 009°M radial of the Scotland, Ind. VOR.

(20) HALIBUT, T.H. (VHF) INTSXN - the intsxn of the 069°M radial of the Kahului, T.H. VOR and the 323°M radial of the Hilo, T.H. VOR.

(21) HANOVER, PA. (VHF) INTSXN - the intsxn of the 173°M radial of the Harrisburg, Pa. VOR and the 023°M radial of the Westminister, Md. VOR.

(22) HIRAM, OHIO (VHF) INTSXN - the intsxn of the 276°M radial of the Youngstown, Ohio VOR and the 160°M radial of the Chardon, Ohio VOR.

(23) HITCHCOCK, TEX. (VHF) INTSXN - the intsxn of the 278°M radial of the Galveston, Tex. VOR and the 147°M radial of the Houston, Tex. VOR.

(24) HOLYOKE, COLO. (VHF) INTSXN - the intsxn of the 124°M radial of the Sidney, Nebr. VOR and the 234°M radial of the North Platte, Nebr. VOR.

(25) HOPE, IND. (VHF) INTSXN - the intsxn of the 136°M radial of the Indianapolis, Ind. VOR and the 350°M radial of the Nabb, Ind. VOR and the 171°M radial of the Shelbyville, Ind. VOR.

(26) HULA GIRL, T.H. (LF) INTSXN - the intsxn of the 235°M brng from Honolulu, T.H. LFR and the 124°M brng from Port Allen, T.H. LFR.

(27) HULA GIRL, T.H. (VHF) INTSXN - the intsxn of the 235°M radial of the Honolulu, T.H. VOR and the 130°M radial of the Lihue, T.H. VOR. (formerly compulsory)

(28) KENTLAND, IND. (VHF) INTSXN - the intsxn of the 151°M radial of the Peotone, Ill. VOR and the 311°M radial of the Lafayette, Ind. VOR and the 061°M radial of the Roberts, Ill. VOR.

(29) LEBANON, IND. (VHF) INTSXN - the intsxn of the 343°M radial of the Indianapolis, Ind. VOR and the 131°M radial of the Lafayette, Ind. VOR and the 312°M radial of the Shelbyville, Ind. VOR.

(30) LINDEN, IND. (VHF) INTSXN - the intsxn of the 310°M radial of the Indianapolis, Ind. VOR and the 157°M radial of the Lafayette, Ind. VOR.

(31) LOSOYA, TEX. (VHF) INTSXN - the intsxn of the 174°M radial of the San Antonio, Tex. VOR and the 274°M brng to the Somerset, Tex. Rbn.

(32) LOWELL, IND. (VHF) INTSXN - the intsxn of the 094°M radial of the Peotone, Ill. VOR and the 156°M radial of the Chicago Heights, Ill. VOR.

(33) MADISONVILLE, TEX. (VHF) INTSXN - the intsxn of the 147°M radial of the Leona, Tex. VOR and the 051°M radial of the College Station, Tex. VOR.

(34) MAGNOLIA, TEX. (VHF) INTSXN - the intsxn of the 116°M radial of the College Station, Tex. VOR and the 162°M radial of the Leona, Tex. VOR.

(35) MAKAI, T.H. (LF) INTSXN - the intsxn of the SE crs of the Port Allen, T.H. LFR and the 235°M brng from Honolulu, T.H. LFR.

(36) MAKAI, T.H. (VHF) INTSXN - the intsxn of the 235°M radial of the Honolulu, T.H. VOR and the 115°M radial of the Lihue, T.H. VOR. (formerly compulsory)

(37) MARLIN, T.H. (VHF) INTSXN - the intsxn of the 323°M radial of the Hilo, T.H. VOR and the 030°M radial of the Upolu Point, T.H. VOR.

(38) MEGGETT, S.C. (LF) INTSXN - the intsxn of the 105°M radial of the Allendale, S.C. VOR and the SW crs of the Charleston, S.C. LFR.

(39) MIDWAY, TEX. (VHF) INTSXN - the intsxn of the 132°M radial of the Leona, Tex. VOR and the 051°M radial of the College Station, Tex. VOR.

(40) MONTAUK PT, N.Y. (VHF) INTSXN - the intsxn of the 201°M radial of the Norwich, Conn. VOR and the 098°M radial of the Riverhead, N.Y. VOR.

(41) MORENO, CALIF. (LF) INTSXN - the intsxn of the E crs of the Riverside, Calif. LFR and the 360°M radial of the March, Calif. VOR.

(42) MORENO, CALIF. (VHF) INTSXN - the intsxn of the 076°M radial of the Ontario, Calif. VOR and the 360°M radial of the March, Calif. VOR.

(43) MORGAN HILL, CALIF. (LF) INTSXN - the intsxn of the SE crs of the Oakland, Calif. LFR and the NW crs of the Fresno, Calif. LFR.

(44) NEW WAVERLY, TEX. (VHF) INTSXN - the intsxn of the 132°M radial of the Leona, Tex. VOR and the 215°M radial of the Lufkin, Tex. VOR.

(45) NORTH LANAI, T.H. (VHF) INTSXN - the intsxn of the 050°M radial of the Honolulu, T.H. VOR and the 326°M radial of the Lanai, T.H. VOR. (formerly compulsory)

(46) ORCHID, T.H. (LF) INTSXN - the intsxn of the W crs of the Honolulu, T.H. LFR and the 122°M brng from Port Allen, T.H. LFR.

(47) ORCHID, T.H. (VHF) INTSXN - the intsxn of the 250°M radial of the Honolulu, T.H. VOR and the 130°M radial of the Lihue, T.H. VOR.

(48) PANSY, T.H. (VHF) INTSXN - the intsxn of the 122°M radial of the Honolulu, T.H. VOR and the 242°M radial of the Molokai, T.H. VOR.

(49) PICAYUNE, MISS. (VOR)

(50) PYOTE, TEX. (VHF) INTSXN - the intsxn of the 231°M radial of the Midland, Tex. VOR and the 154°M radial of the Wink, Tex. VOR.

(51) ROSENBERG, TEX. (VHF) INTSXN - the intsxn of the 247°M radial of the Houston, Tex. VOR and the 097°M radial of the Eagle Lake, Tex. VOR.

(52) ROSWELL, GA. (VHF) INTSXN - the intsxn of the 009°M radial of the Atlanta, Ga. VOR and the 285°M radial of the Norcross, Ga. VOR.

(53) SALT, KANS. (VHF) INTSXN - the intsxn of the 032°M radial of the Gage, Okla. VOR and the 214°M radial of the Hutchinson, Kans. VOR and the 235°M radial of the Wichita, Kans. VOR.

(54) SANTA ROSA, TEX. (VHF) INTSXN - the intsxn of the 109°M radial of the Childress, Tex. VOR and the 252°M radial of the Wichita Falls, Tex. VOR.

(55) SCURRY, TEX. (VHF) INTSXN - the intsxn of the 139°M radial of the Dallas, Tex. VOR and the 082°M radial of the Britton, Tex. VOR.

(56) SEABROOK, TEX. (VHF) INTSXN - the intsxn of the 105°M radial of the Houston, Tex VOR and the 355°M radial of the Galveston, Tex. VOR.

(57) SPALDING, NEBR. (VHF) INTSXN - the intsxn of the 055°M radial of the North Platte, Nebr. VOR and the 345°M radial of the Grand Island, Nebr. VOR.

(58) SUTRO, CALIF. (VHF) INTSXN - the intsxn of the 249°M radial of the Oakland, Calif. VOR and the 287°M radial of the San Francisco, Calif. VOR.

(59) SWEET PEA, T.H. (VHF) INTSXN - the intsxn of the 069°M radial of the Kahului, T.H. VOR and the 338°M radial of the Upolu Point, T.H. VOR.

(60) TIDE, MICH. (VHF) INTSXN - the intsxn of the 073°M radial of the Naperville, Ill. VOR and the 020°M radial of the Chicago Heights, Ill. VOR.

(61) VAIL, CALIF. (LF) INTSXN - the intsxn of the S crs of the Riverside, Calif. LFR and the 222°M brng to Oceanside, Calif Rbn.

(62) VEGA, TEX. (VHF) INTSXN - the intsxn of the 009°M radial of the Texico, N. Mex. VOR and the 255°M radial of the Amarillo, Tex. VOR.

(63) VOLTA, CALIF. (LF) INTSXN - the intsxn of the S crs of the Stockton, Calif. LFR and the SW crs of the Castle, Calif. LFR.

(64) WESLEY, PA. (VHF) INTSXN - the intsxn of the 105°M radial of the Youngstown, Ohio VOR and the 035°M radial of the Ellwood City, Pa. VOR.

(65) WHEATFIELD, IND. (VHF) INTSXN - the intsxn of the 126°M radial of the Chicago Heights, Ill. VOR and the 094°M of the Peotone, Ill. VOR.

(66) WHITELAND, IND. (VHF) INTSXN - the intsxn of the 251°M radial of the Shelbyville, Ind. VOR and the 136°M radial of the Indianapolis, Ind. VOR.

(67) WILLIS, TEX. (VHF) INTSXN - the intsxn of the 101°M radial of the College Station, Tex. VOR and the 147°M radial of the Leona, Tex. VOR and the 326°M radial of the Galveston Tex. VOR.

(68) WILSEY, KANS. (VHF) INTSXN - the intsxn of the 052°M radial of the Hutchinson, Kans. VOR and the 288°M radial of the Emporia, Kans. VOR and the 027°M radial of the Wichita, Kans. VOR.

(69) WINTHROP, IND. (VHF) INTSXN - the intsxn of the 310°M radial of the Indianapolis, Ind. VOR and the 151°M radial of the Peotone, Ill. VOR.

(70) ZORO, IND. (VHF) INTSXN - the intsxn of the 156°M radial of the Chicago Heights, Ill. VOR and the 048°M radial of the Roberts, Ill. VOR.

REDESIGNATED: Effective December 19, 1957

(1) ADVANCE, IND. (VHF) INTSXN - the intsxn of the 043°M radial of the Terre Haute, Ind. VOR and the 310°M radial of the Indianapolis, Ind. VOR.

(2) AETNA, OKLA. (VHF) INTSXN - the intsxn of the 032°M radial of the Gage, Okla. VOR and the 245°M radial of the Anthony, Kans. VOR.

(3) ANNA, OHIO (VHF) INTSXN - the intsxn of the 310°M radial of the Sidney, Ohio VOR and the 213°M radial of the Findlay, Ohio VOR.

(4) BANTA, IND. (VHF) INTSXN - the intsxn of the 169°M radial of the Indianapolis, Ind. VOR and the 251°M radial of the Shelbyville, Ind. VOR.

(5) BOERNE, TEX. (VHF) INTSXN - the intsxn of the 300°M radial of the San Antonio, Tex. VOR and the 336°M radial of the Kelly, Tex. VOR.

(6) BURTON, S.C. (VHF) INTSXN - the intsxn of the 047°M radial of the Savannah, Ga. VOR and the 152°M radial of the Allendale, S.C. VOR.

(7) CASSODAY, KANS. (VHF) INTSXN - the intsxn of the 285°M radial of the Chanute, Kans. VOR and the 051°M radial of the Wichita, Kans. VOR.

(8) CITRONELLE, ALA. (VHF) INTSXN - the intsxn of the 010°M radial of the Mobile, Ala. VOR and the 242°M radial of the Evergreen, Ala. VOR.

(9) CORAL, T.H. (LF) INTSXN - the intsxn of the S crs of the Honolulu, T.H. LFR and the 260°M brng from Maui, T.H. LFR.

(10) CORAL, T.H. (VHF) INTSXN - the intsxn of the 168°M radial of the Honolulu, T.H. VOR and the 228°M radial of the Molokai, T.H. VOR.

(11) CORTARO, ARIZ. (VHF) INTSXN - the intsxn of the 303°M radial of the Tucson, Ariz. VOR and the 180°M brng to Tucson, Ariz. LFR.

(12) EASTWOOD, TEX. (VHF) INTSXN - the intsxn of the 158°M radial of the San Antonio, Tex. VOR and the 115°M radial of the Kelly, Tex. VOR.

(13) FAIRGROUND, CALIF. (LF) INTSXN - the intsxn of the 075°M brng to the Ontario, Calif. LOM and the NE crs of the Long Beach, Calif. LFR.

(14) FIELD, N. MEX. (VHF) INTSXN - the intsxn of the 170°M radial of the Tucumcari, N. Mex. VOR and the 277°M radial of the Texico, N. Mex. VOR.

(15) FLORENCE, KANS. (VHF) INTSXN - the intsxn of the 285°M radial of the Chanute, Kans. VOR and the 068°M radial of the Hutchinson, Kans. VOR and the 027°M radial of the Wichita, Kans. VOR.

(16) GILROY, CALIF. (LF) INTSXN - the intsxn of the NW crs of the Fresno, Calif LFR and the S crs of the Travis, Calif. LFR.

(17) GUADALUPE, TEX. (VHF) INTSXN - the intsxn of the 325°M radial of the San Antonio, Tex. VOR and the 358°M radial of the Kelly, Tex. VOR.

(18) HAMMOND, LA. (VHF) INTSXN - the intsxn of the 259°M radial of the Picayune, Miss. VOR and the 355°M radial of the New Orleans, La. VOR.

(19) HIGH ISLAND, TEX. (VHF) INTSXN - the intsxn of the 059°M radial of the Galveston, Tex. VOR and the 176°M radial of the Beaumont, Tex. VOR.

(20) KING TEX. (VHF) INTSXN - the intsxn of the 135°M radial of the Midland, Tex. VOR and the 192°M radial of the Big Spring, Tex. VOR.

(21) LAGOON, T.H. (LF) INTSXN - the intsxn of the 105°M brng from the Honolulu, T.H. LFR and the 226°M brng from the Makapuu Point, T.H. Rbn.

(22) LANARK, N. MEX. (VHF) INTSXN - the intsxn of the 281°M radial of the El Paso, Tex. VOR and the 260°M radial of the Newman, Tex. VOR and the 065°M radial of the Columbus, N. Mex. VOR.

(23) LOTTS, GA. (VHF) INTSXN - the intsxn of the 284°M radial of the Savannah, Ga. VOR and the 212°M radial of the Allendale, S.C. VOR.

(24) PACIFIC, CALIF. (VHF) INTSXN - the intsxn of the 125°M radial of the Los Angeles, Calif. VOR and the 265°M radial of the Oceanside, Calif. VOR.

(25) PENWELL, TEX. (VHF) INTSXN - the intsxn of the 231°M radial of the Midland, Tex. VOR and the 095°M radial of the Wink, Tex. VOR.

(26) SCHOOL, N. MEX. (VHF) INTSXN - the intsxn of the 213°M radial of the Tucumcari, N. Mex. VOR and the 095°M radial of the Anton Chico, N. Mex. VOR.

(27) STERLING, TEX. (VHF) INTSXN - the intsxn of the 282°M radial of the San Angelo, Tex. VOR and the 140°M radial of the Big Spring, Tex. VOR.

(28) TOLTEC, AIRZ. (VHF) INTSXN - the intsxn of the 091°M radial of the Casa Grande, Ariz. VOR and the 147°M radial of the Phoenix, Ariz. VOR.

(29) WHITNEY, TEX. (VHF) INTSXN - the intsxn of the 344°M radial of the Waco, Tex. VOR and the 193°M radial of the Britton, Tex. VOR.

(30) WOODSIDE, CALIF. (LF & VHF) INTSXN - the intsxn of the 142°M radial of the San Francisco, Calif. TVOR and the 258°M radial of the Agnew, Calif. VOR and the 084°M brng to the Moffett, Calif. LFR. (depict on San Francisco-Oakland Terminal Area and AL Charts)

(31) ZIONSVILLE, IND. (VHF) INTSXN - the intsxn of the 020°M radial of the Indianapolis, Ind. VOR and the 312°M radial of the Shelbyville, Ind. VOR.

RENAMED: Effective December 19, 1957

(1) FOWLER, CALIF. (VHF) INTSXN - the intsxn of the 031°M radial of the Coalinga, Calif. VOR and the 143°M radial of the Fresno, Calif. VOR. (formerly Bowles Int)

CANCELLED: Effective December 19, 1957

(1) ACTON, IND. (VHF) INTSXN - the intsxn of the 121°M radial of the Indianapolis, Ind. VOR and the 045°M radial of the Scotland, Ind. VOR.

(2) BEACON, ILL. (VHF) INTSXN - the intsxn of the 075°T radial of the Naperville, Ill. VOR and the 013°T radial of the Chicago Heights, Ill. VOR.

(3) CAMERON, W.VA. (VHF) INTSXN - the intsxn of the 307°M radial of the Morgantown, W. Va. VOR and the 228°M radial of the Pittsburgh, Pa. VOR.

(4) CASA GRANDE, ARIZ. (VHF) INTSXN - the intsxn of the 086°M radial of the Gila Bend Ariz. VOR and the 174°M radial of the Phoenix, Ariz. VOR.

(5) CHARLOTTESVILLE, IND. (VHF) INTSXN - the intsxn of the 318°T radial of the Cincinnati, Ohio VOR and the 359°T radial of the Nabb, Ind. VOR.

(6) CONROE, TEX. (VHF) INTSXN - the intsxn of the 345°M radial of the Houston, Tex. VOR and the 103°M radial of the College Station, Tex. VOR.

(7) DIAMOND HEAD, T.H. (LF) INTSXN - the intsxn of the 350°M brng to Makapuu Point, T.H. Rbn and the 285°M brng to the Honolulu, T.H. LFR.

(8) DIAMOND HEAD, T.H. (VHF) INTSXN - the intsxn of the 350°M brng to Makapuu Pt, T.H. Rbn and the 107°M radial of the Honolulu, T.H. VOR.

(9) FARWELL, TEX. (VHF) INTSXN - the intsxn of the 299°M radial of the Lubbock, Tex VOR and the 242°M brng to Clovis, N. Mex. VOR.

(10) GREENCASTLE, IND. (VHF) INTSXN - the intsxn of the 065°M radial of the Terre Haute, Ind. VOR and the 354°M radial of the Scotalnd, Ind. VOR.

(11) HARTSVILLE, IND. (VHF) INTSXN - the intsxn of the 359°T radial of the Nabb, Ind. VOR and the 137°T radial of the Indianapolis, Ind. VOR.

(12) HILLVIEW, CALIF. (VHF) INTSXN - the intsxn of the 094°M radial of the Agnew, Calif. VOR and the 227°M radial of the Modesto, Calif. VOR.

(13) HORTON, IND. (VHF) INTSXN - the intsxn of the 020°M radial of the Indianapolis, Ind VOR and the 120°M radial of the Lafayette, Ind. VOR.

(14) KANEOHE, T.H. (LF) INTSXN - the intsxn of the NE crs of the Honolulu, T.H. LFR and the 290°M brng to the Kahuku, T.H. Rbn.

(15) KOKO, T.H. (LF) INTSXN - the intsxn of the 350°M brng to the Makapuu Point, T.H. Rbn and the 300°M radial of the Honolulu, T.H. LFR.

(16) KOKO, T.H. (VHF) INTSXN - the intsxn of the 350°M brng to Makapuu Point, T.H. Rbn and the 122°M radial of the Honolulu, T.H. VOR.

(17) LAKE SHORE, ILL. (VHF) INTSXN - the intsxn of the 075°T radial of the Naperville, Ill. VOR and the 358°T radial of the Chicago Heights, Ill. VOR.

(18) MONAHANS, TEX. (VHF) INTSXN - the intsxn of the 223°M radial of the Midland, Tex VOR and the 120°M radial of the Winks, Tex. VOR.

(19) MONTICELLO, IND. (VHF) INTSXN - the intsxn of the 340°M radial of the Indianapolis Ind. VOR and the 141°M radial of the Chicago Heights, Ill. VOR.

(20) MORVEN, VA. (VHF) INTSXN - the intsxn of the 245°T radial of the Flat Rock, Va. VOR and the N crs of the Blackstone, Va. LFR.

(21) NEWLAND, IND. (VHF) INTSXN - the intsxn of the 351°M radial of the Lafayette, Ind VOR and the 141°M radial of the Chicago Heights, Ill. VOR.

(22) PALA, CALIF. (LF) INTSXN - the intsxn of the S crs of the Riverside, Calif. LFR and the W crs of the Thermal, Calif. LFR.

(23) PANOCHE, CALIF. (LF) INTSXN - the intsxn of the S crs of the Stockton, Calif. LFR and the W crs of the Fresno, Calif. LFR.

(24) PICAYUNE, MISS. (VHF) INTSXN - the intsxn of the 036°T radial of the New Orleans La. VOR and the 155°T radial of the McComb, Miss. VOR.

(25) PITTSBORO, IND. (VHF) INTSXN - the intsxn of the 324°T radial of the Indianapolis, Ind. VOR and the 045°T radial of the Terre Haute, Ind. VOR.

(26) PLEASANT HILL, N.MEX. (VHF) INTSXN - the intsxn of the 096°M radial of the Anton Chico, N. Mex. VOR and the 134°M radial of the Tucumcari, N. Mex. VOR.

(27) RICHMOND, TEX. (VHF) INTSXN - the intsxn of the 255°T radial of the Houston, Tex VOR and the 106°T radial of the Eagle Lake, Tex. VOR.

(28) RUSHVILLE, IND. (VHF) INTSXN - the intsxn of the 106°M radial of the Indianapolis, Ind. VOR and the 318°M radial of the Cincinnati, Ohio VOR.

(29) SHELBY, IND. (VHF) INTSXN - the intsxn of the 094°M radial of the Peotone, Ill. VOR and the 156°M radial of the Chicago Heights, Ill. VOR.

(30) SHELBYVILLE, IND. (VHF) INTSXN - the intsxn of the 359°T radial of the Nabb, Ind. VOR and the 122°T radial of the Indianapolis, Ind. VOR.

(31) SOUTHGATE, T.H. (LF) INTSXN - the intsxn of the S crs of the Honolulu, T.H. LFR and the 044°M brng to the Makapuu Point, T.H. Rbn. (changed to compulsory)

(32) THAYER, IND. (VHF) INTSXN - the intsxn of the 141°M radial of the Chicago Heights, Ill. VOR and the 094°M radial of the Peotone, Ill. VOR.

(33) TRES, CALIF. (LF) INTSXN - the intsxn of the SE crs of the Oakland, Calif. LFR and the W crs of the Fresno, Calif. LFR.

(34) VAIL LAKE, CALIF. (VHF) INTSXN - the intsxn of the 047°M radial of the Oceanside Calif. VOR and the 128°M radial of the March, Calif. VOR and the 240°M radial of the Thermal Calif. VOR

1/ HOLDING PATTERNS: The following holding patterns have been designated, redesignated or cancelled and shall become effective December 19, 1957

DESIGNATED:

(1) TULSA, OKLA. (VOR) - direction of holding - E on the 079°M radial; direction of turns - right; time - 2 mins; min alt 1900'.

(2) PRYOR, ILKA. (VHF) INTSXN - direction of holding - E on the 079°M radial of the Tulsa, Okla. VOR; direction of turns - 2 mins; min alt 2000'.

(3) ADAIR, OKLA. (VHF) INTSXN - direction of holding - NE on 050°M radial of the Tulsa, Okla. VOR; direction of turns - right; time - 2 mins; min alt 2600'.

(4) COLLEGE, OKLA. (VHF) INTSXN - direction of holding - NE on 035°M radial of the Tulsa, Okla. VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(5) NOWATA, OKLA. (VHF) INTSXN - direction of holding - N on 017°M radial of the Tulsa Okla. VOR; direction of turns - right; time - 2 mins; min alt 2600'.

(6) SAND SPRINGS, OKLA. (VHF) INTSXN - direction of holding - W on 236°M radial of the Tulsa, Okla. VOR; direction of turns - right; time - 2 mins; min alt 3500'.

(7) SAPULPA, OKLA. (VHF) INTSXN - direction of holding SW on 219°M radial of the Tulsa, Okla. VOR; direction of turns - right; time - 2 mins; min alt 3500'.

(8) WAGONER, OKLA. (VHF) INTSXN - direction of holding - SE on 113°M radial of the Tulsa, Okla. VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(9) SURF, ILL. (VHF) INTSXN - direction of holding - NE on 073°M radial of the Naperville, Ill. VOR; direction of turns - right; time 1 min.

(10) LOSOYA, TEX. (VHF) INTSXN - direction of holding - S on 174°M radial of the San Antonio, Tex. VOR; direction of turns - left; time - 2 mins; min alt 2200'.

(11) LOSOYA, TEX. (LF) INTSXN - direction of holding - S on S crs of the San Antonio, Tex. LFR; direction of turns - left; time - 2 mins; min alt 2200'.

(12) WHITNEY, TEX. (VHF) INTSXN - direction of holding - N on 344°M radial of the Waco, Tex. VOR; direction of turns - right; time - 1 min; min alt 1700'.

(13) BARRETT LAKE, CALIF. (LF) INTSXN - direction of holding - E on E crs of the San Diego, Calif. LFR; direction of turns - left; time - 1 min.

(14) HANOVER, PA. (VHF) INTSXN - direction of holding - N on 173°M radial of the Harrisburg, Pa. VOR; direction of turns - right; time - 1 min; min alt 3000'.

(15) WESLEY, PA. (VHF) INTSXN - direction of holding - NE on 035°M radial of the Ellwood City, Pa. VOR; direction of turns - right; time - 1 min; min alt 4000'.

(16) MONTAUK POINT, N.Y. (VHF) INTSXN - direction of holding - W on 098°M radial of the Riverhead, N.Y. VOR; direction of turns - left; time - 1 min.

(17) HIRAM, OHIO (VHF) INTSXN - direction of holding - W on 276°M radial of the Youngstown, Ohio VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(18) CUMBERLAND, VA. (LF & VHF) INTSXN - direction of holding - W on 092°M brng to Richmond, Va. LFR; direction of turns - left; time - 1 min; min alt 2000'.

(19) CLINT, TEX. (Rbn) - direction of holding - E on 260°M brng inbnd (080° outbnd); direction of turns - left; time - 2 mins; min alt 5000'.

(20) MAXWELL, IND. (VHF) INTSXN - direction of holding - E on 082°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

(21) ADVANCE, IND. (VHF) INTSXN - direction of holding - NW on 310°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

(22) BANTA, IND. (VHF) INTSXN - direction of holding - S on 169°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

(23) ZIONSVILLE, IND. (VHF) INTSXN - direction of holding - N on 020°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

(24) BELLWOOD, VA. (LF & VHF) INTSXN - direction of holding - SW on SW crs of the Richmond, Va. ILS; direction of turns - right; time - 1 min.

(25) BRODNAX, VA. (LF) INTSXN - direction of holding - SW on SW crs of the Richmond Va. LFR; direction of turns - right; time - 2 mins; min alt 1800'.

(26) CHASE CITY, VA. (VHF) INTSXN - direction of holding - E on 266°M radial of the Lawrenceville, Va. VOR; direction of turns - left; time - 2 mins; min alt 3000'.

(27) DINWIDDIE, VA. (LF) INTSXN - direction of holding - SW on SW crs of the Richmond, Va. LFR; direction of turns - right; time - 2 mins; min alt 1500'.

(28) McKENNEY, VA. (VHF) INTSXN - direction of holding - SW on 040°M radial of the Lawrenceville, Va. VOR; direction of turns - right; time - 1 min; min alt 1500'.

(29) MORVEN, VA. (LF) INTSXN - direction of holding - W on 092°M brng to the Richmond, Va. LFR; direction of turns - left; time - 1 min; min alt 2000'.

(30) ROCKVILLE, VA. (VHF) INTSXN - direction of holding - NE on 031°M radial of the Flat Rock, Va. VOR; direction of turns - right; time - 2 mins; min alt 2000'.

(31) SHEPPARDS, VA. (VHF) INTSXN - direction of holding - W on 266°M radial of the Flat Rock, Va. VOR; direction of turns - right; time - 1 min; min alt 3000'.

(32) RICHMOND, VA. (LFR) - direction of holding - SW on SW crs; direction of turns - right; time - 2 mins; min alt 1500'.

(33) CHESTER, VA. (FM) - direction of holding - SW on SW crs of the Richmond, Va. LFR; direction of turns - right; time - 2 mins; min alt 1500'.

(34) LAWRENCEVILLE, VA. (VOR) - direction of holding - SW on 214°M radial; direction of turns - right; time - 2 mins; min alt 1500'.

(35) SEAWEED, T.H. (VHF) INTSXN - direction of holding - NW on 115°M radial of the Lihue, T.H. VOR; direction of turns - right; time - 2 mins.

(36) DRIFTWOOD, T.H. (LF) INTSXN - direction of holding - NW on SE crs of the Port Allen, T.H. LFR; direction of turns - right; time - 2 mins.

(37) ORCHID, T.H. (VHF) INTSXN - direction of holding - W on 250°M radial of the Honolulu, T.H. VOR; direction of turns - right; time - 2 mins.

(38) ORCHID, T.H. (LF) INTSXN - direction of holding - W on W crs of the Honolulu, T.H. LFR; direction of turns - right; time - 2 mins.

(39) COCONUT, T.H. (VHF) INTSXN - direction of holding - W on 250°M radial of the Honolulu, T.H. VOR; direction of turns - right; time - 1 min.

(40) COCONUT, T.H. (LF) INTSXN - direction of holding - W on W crs of the Honolulu, T.H. LFR; direction of turns - right; time - 1 min.

(41) SOUTHGATE, T.H. (LF) INTSXN - direction of holding - S on S crs of the Honolulu, T.H. LFR; direction of turns - left; time - 1 min.

(42) SOUTHGATE, T.H. (VHF) INTSXN - direction of holding - E on 257°M radial of the Molokai, T.H. VOR; direction of turns - right; time - 1 min.

(43) CORAL, T.H. (LF) INTSXN - direction of holding - S on S crs of the Honolulu, T.H. LFR; direction of turns - right; time - 2 mins.

(44) CORAL, T.H. (VHF) INTSXN - direction of holding - S on 168°M radial of the Honolulu T.H. LFR; direction of turns - right; time - 2 mins.

(45) BANANA, T.H. (LF) INTSXN - direction of holding - NE on NE crs of the Honolulu, T.H. LFR; direction of turns - right; time - 2 mins.

(46) BANANA, T.H. (VHF) INTSXN - direction of holding - NE on 050°M radial of the Honolulu, T.H. VOR; direction of turns - right; time - 2 mins.

(47) ALMA, TEX. (VHF) INTSXN - direction of holding - SE on 154°M radial of the Dallas, Tex. VOR; direction of turns - right; time - 2 mins; min alt 2000'.

(48) MESQUITE, TEX. (VHF) INTSXN - direction of holding - SE on 124°M radial of the Dallas, Tex. VOR; direction of turns - right; time - 1 min; min alt 2000'.

REDESIGNATED:

(1) BOERNE, TEX. (VHF) INTSXN - direction of holding - NW on 300°M radial of the San Antonio, Tex. VOR; direction of turns - right; time - 2 mins; min alt 2800'.

(2) FAIRGROUND, CALIF. (VHF) INTSXN - direction of holding - E on W crs of the Ontario, Calif. ILS; direction of turns - left; time - 2 mins; min alt 3000'.

(3) ALBACORE, CALIF. (VHF) INTSXN - direction of holding - SE on 125°M radial of the Los Angeles, Calif. VOR; direction of turns - left; time - 1 min; min alt 2500'.

(4) LONOKE, ARK. (VHF) INTSXN - direction of holding - NE on 055°M radial of the Little Rock, Ark. VOR; direction of turns - right; time - 1 min; min alt 1500'.

(5) FLAT ROCK, VA. (VOR) - direction of holding - NW on 300°M radial; direction of turns - right; time - 1 min; min alt 2000'.

(6) WOODSIDE, CALIF. (LF & VHF) INTSXN - direction of holding - NW on 142°M radial of the San Francisco, Calif. TVOR; direction of turns - left; time - 1 min; min alt 4000'. (depict on San Francisco-Oakland Terminal Area and AL Charts)

(7) McEWEN, TENN. (VHF) INTSXN - direction of holding - W on 266°M radial of the Nashville, Tenn. VOR; direction of turns - left; time - 2 mins; min alt 3000'.

CANCELLED:

(1) TULSA, OKLA. (VOR) - direction of holding - N on 330°M radial; direction of turns - right; time - 2 mins; min alt 2000'.

(2) LAKE SHORE, ILL. (VHF) INTSXN - direction of holding - E on 073°M radial of the Naperville, Ill. VOR; direction of turns - right; time - 1 min.

(3) HOBART, IND. (VHF) INTSXN - direction of holding - E on 087°M radial of the Chicago Heights, Ill. VOR; direction of turns - right; time - 1 min; min alt 2000'.

(4) PITTSBORO, IND. (VHF) INTSXN - direction of holding - NW on 323°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

(5) ACTON, IND. (VHF) INTSXN - direction of holding - SE on 121°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 211)
(December 4, 1957)

(1) Section 608.11, the Fort McClellan Restricted Area, Alabama (R-131), amended August 14, 1957 in 22 F.R. 6498 is further amended to include the following described area: "Beginning at lat 33-41-20, long. 85-59-00; S to lat 33-40-40, long. 85-59-00; W to lat 33-40-40, long. 86-00-00; N to lat 33-41-20, long. 86-00-00; E to point of beginning.

(2) Section 608.31, the Grand Marais Restricted Area, Minnesota (R-187), amended August 14, 1957 in 22 F.R. 6498 is further amended by changing the "Controlling Agency" column to read: "Commander, 343rd Fighter Group (Air Defense), Duluth, Minnesota".

✓ CAR 60 CHANGE: The following revision to Part 60 of the Civil Air Regulation is effective December 1, 1957:

60.45 Course to be flown. Aircraft operating IFR in controlled airspace shall be flown as follows unless otherwise authorized by air traffic control:

(a) On civil airways. Along the center line of the airway.

(b) On other routes. Along the direct course between the navigational aids or fixes defining the route.

✓ COMPLIANCE WITH CANADIAN AIR REGULATIONS: All pilots are cautioned when flying into Canada to review Canadian Air Regulations. Special attention should be given to parts of Canadian Air Regulations which are different from U.S. Civil Air Regulations; for example, there is no VFR on top in Canada.

✓ FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II, dated August 15, 1957, as follows:

(1) Page 20, Los Angeles, Calif. - change WB telephone number to OR 8-7444*.

(2) Page 20, add - Marysville, Calif. - CAA telephone number SH 2-1449.

(3) Page 20, Sacramento, Calif. - change CAA telephone number to GL 5-9390.

(4) Page 20, Trinidad, Colo. - change CAA telephone number to VIctor 6-2623.

(5) Page 20, delete - Williams, Calif. - CAA 2811.

(6) Page 21, Valdosta, Ga. - change CAA telephone number to CHerry 4-2361.

(7) Page 22, Cadillac, Mich. - delete CAA telephone number

(8) Page 22, Chadron, Nebr. - change CAA telephone number to HEmlock 2-3153.

(9) Page 22, Grand Marais, Mich. - change CAA telephone number to 341.

(10) Page 22, Whitehall, Mont. - change CAA telephone number to ATwater 7-3811.

(11) Page 25, Ellensburg, Wash. - change CAA telephone number to WO 2-4711.

(12) Page 25, Rawlins, Wyo. - change CAA telephone number to EAst 4-3241.

(13) Page 26, Region 4 - General Safety Office - change Sacramento, Calif. telephone number to GL 6-8963.

(14) Page 58, under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

(15) Page 59, under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

(16) Page 59, under Traffic Information, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

(17) Page 76, add - Midland, Tex. (Air Terminal): 170°; over apch ends rnwys 22 and 28; 1000'.

(18) Page 76, add - Minot, N. Dak. 257°; 1 mi N of arpt.

(19) Page 76, Muscle Shoals, Ala.: 290°; above wind tee on arpt; 1000'.

(20) Page 77, Pueblo, Colo. (Pueblo Memorial): 256°; centerline E end of rnwy 8-26.

(21) Page 77, Salt Lake City, Utah: 158°; centerline rnwy 34L/16R entire length, No. 1 arpt; 4400'.

(22) Page 79, delete - Dayton, Ohio

(23) Page 80, delete - Midland, Tex. (Air Terminal)

(24) Page 82, South Bend, Ind. (St Joseph County): 178°; center of N/S taxiway 200' N of N edge of parking ramp.

OPERATING PROCEDURES FOR FLIGHT WITHIN THE CONTINENTAL CONTROL AREA: On or about December 1, 1957, all airspace at and above 24,000'MSL above the continental United States (excluding Territory of Alaska), excluding prohibited and restricted areas penetrating the 24,000' level, will be designated as control area. This airspace is to be known as the "continental control area". Certain new regulations and procedures will govern flight in this area and all pilots and other personnel concerned with opern above 24,000' should become familiar with them. Announcement of the effective date will be made by NOTAM. Following is a summary of the method by which flight operns and air tfc control are to be conducted in the continental control area.

I. VFR OPERATION:

A. Visibility and Cloud Proximity Minimums - For VFR opern within the continental control area, flgt visibility must be at least 5 mi and acft must not be flown less than 1000' vertically and 1 mi horizontally from any cloud formation.

B. Cruising Altitudes:

1. From 24,000' through 28,000' (excluding arwys). To assist pilots operg under VFR in maintaining separation, the following cruising alts should be adhered to as good operg practice from 24,000' through 28,000':

Magnetic Crs	Indicated Altitudes
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or above 29,000'. Use of the following cruising alt for VFR flgt is required by regulation everywhere at or above 29,000':

Magnetic Crs	Indicated Altitudes
0-89° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
90-179° inc.	4000' intervals beginning at 30,000' (30,000', 34,000', etc.)
180-269° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)
270-359° inc.	4000' intervals beginning at 32,000' (32,000', 36,000', etc.)

II. ON-TOP OPERATION: Flgts made under VFR conditions on top within the continental control area must observe the new visibility and cloud proximity minimums and cruising alt rules for VFR opern in the continental control area. Opern of these flgts is otherwise unchanged. (Pilots are reminded that when cleared "VFR conditions on top" by air tfc control, tfc separation is not provided by air tfc control.)

III. IFR OPERATION: All IFR operns at and above 24,000'MSL within the continental control area will receive air tfc control service.

A. At and above 27,000'MSL - To simplify high alt navigation, a limited number of VOR, TACAN, VORTAC and L/MF facilities have been designated for high alt use. These navigation aids are the only ones which may be used for IFR routing at and above 27,000' and are depicted on special high alt charts.

The high-altitude facilities have been used to delineate a system of high-altitude tracks called "Jet Routes". These routes are coded on the charts by the letter J, followed by the appriate route number, followed by the letter V, T, or L to indicate the type of navigation to be used. For example:

J22V . . . . . VOR or VORTAC Jet Route #22
J19T . . . . . TACAN Jet Route #19
J3L . . . . . L/MF Jet Route #3

Use of the designated high-altitude route structure will facilitate air tfc control, and all pilots are requested to use the designated route structure to the maximum extent possible. However, use of this route structure is not mandatory. Pilots may conduct direct flgt off the designated Jet Routes, provided the acft will be flown on a route defined by the high-altitude facilities, and provided further that the facilities selected to define the route are not more than 300 n mi apart.

Routes flown at 27,000' and above will not have a defined width as is the case on arwys at the lower levels. The track to be made good will be direct between the navigation aids or fixes defining the Jet Route, or direct between the high-altitude facilities defining the route for flgts made off the designated Jet Routes.

All high-altitude facilities and a small number of intsxns formed by these aids will be designated as compulsory reporting points. When needed for tfc control purposes, pilots may be requested to make additional position reports.

Other navigation aids (TACAN, VOR, VORTAC, AND L/MF) not designated as high-altitude facilities will be used for routing or navigating of acft to and from the high-altitude Jet Route structure which begins at the 27,000' level. This routing may be via the Victor or colored arwy systems, or direct between navigation aids.

Since most flgt activity at 27,000' and above will be by military acft, only those charts prepared by the U.S. Air Force Aeronautical Chart and Information Center will be avail on the inception date of control of all airspace at and above 24,000'. In recognition of the fact that there will be some civil need for these charts, arrangements have been made for civil distribution of the Air Force charts through the United States Coast and Geodetic Survey.

B. Below 27,000' - Although the continental control area extends from 24,000' upward, the Jet Route structure does not commence until the 27,000' level is reached. The colored and Victor arwys extend up to, but do not include the 27,000' level.

Acft operg below 27,000' within the continental control area (from 24,000' through 26,000') may operate on the colored or Victor arwys, or fly direct between any Federally operated navigation aids.

In the case of direct flgts (from 24,000' through 26,000') the aids selected to define the route must not be more than 200 n mi apart, and the track to be made good will be direct between aids. The aids selected will be compulsory reporting points, and other position reports may be requested by air tfc control when needed.

C. Cruising Altitudes - Acft operg in accordance with IFR within the continental control area must be flown at the alts assigned by air tfc control. To assist pilots in flgt planning for IFR operns, the following system of altitude selection may be used:

1. From 24,000' through 28,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or Above 29,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
180-359° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)

While controllers will normally use the above system, other altitudes may be used in certain cases. Pilots are cautioned to fly at the alt assigned by air traffic control.

IV. AIR/GROUND COMMUNICATIONS: The CAA is currently installing a VHF and UHF air/ground communications system which will provide direct pilot-controller rdo communications throughout the continental control area. This system will be only partially installed at the time control of all airspace above 24,000' is commenced; therefore, interim communications will be conducted as follows:

Ground Facility	VHF	UHF
A. ARTC	Discrete channel as directed	301.4 or discrete channel as directed
B. ATCS	122.1/122.2 or VOR 126.7 135.0/135.9	255.4 or 301.4 where avail.
C. Airline company radio stations	Company frequency	none

IFR flgts should use direct ARTC controller-pilot communications, where available.

V. SPECIAL OPERATIONS: Certain mil operns cannot be conducted in accordance with the above, for example, missions involving use of radar navigation. Such cases are to be considered exceptional in nature and will be handled by special procedures.

Flgts using celestial navigation will be required to operate VFR or "VFR conditions on top" for those portions of the flgt where celestial navigation is involved. TACAN-only equipped acft will also be required to operate VFR or "VFR conditions on top" for those portions of flgts where designated high-altitude TACAN facilities are more than 200 or 300 n mi apart, as the case may be.

Questions concerning these operns or any phase of the control of all airspace above 24,000' should be referred to the appropriate CAA air route tfc control center.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N.J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2600' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200, 5), an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

MINIMUM EN ROUTE ALTITUDES: The following minimum en route IFR altitudes are amended as follows, effective December 19, 1957:

Section 610.19 Green Civil Airway 9 is amended to read:

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) Month and day item was reported.
** New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
★ New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends & rufness out of tolerance.
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
**BESSEMER ARPT: Name change. Formerly carried as Durham Arpt. (12-1) Caution-auto drag strip runs parallel to sod lndg strip with separation of 50'. Auto racing is not done on rnwy. Drag strip ends mrkd. Racing Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution-all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18) Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int. via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18N, 5000'. (10-21)
BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down-relctn. (8-7) FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft, including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl tower. (7-9) Acft requiring after-burners prohibited use of airport. Extensive const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)
DOTHAN-NAPIER FLD: Caution-helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Closed until approx Dec 1. (10-16)
EVERGREEN-RADIO: VOR radials 320° thru 360° out of tolerance acct excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inoperative.
**FLOMATON ARPT: Now a private airport. (11-56)
**GUNTERSVILLE ARPT: Caution, paved drag strip 200' E of rnwy. (9-30)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness & bends out of tolerance.
**HUNTSVILLE ARPT: Unicom decmsnd. (9-23)
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scalloping. (6-19)
MOBILE-BATES FLD-TOWER: June 19, ILS not to be used for automatic apch below 300'. Glide slope inop-equip. and const vcnty transmitter bldg. (8-22) FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' & 1/2 mi is absolute tk-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld.
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
**TALLADEGA ARPT: City name change. Formerly carried under Anniston. (7-3)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (10-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Closed until approximately December 1, 1957.
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi;090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°,30 n mi; 235°-255°, 35 n mi at MEA. (5-8)

ARIZONA: FT. HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. 2-way rdo and prior clearance from Libby AAF twr rqrd before flgt witin R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)

**GILA BEND-SPECIAL NOTICE: Caution Area C-308 terms of use is changed to read as follows: (a) Activities conducted: Jet trng & acrobatics. (b) Controlling Agency: Luke AFB. (c) Limiting altitude: 4000' MSL to 45,000' MSL. (d) Time of use: 0600-2200 hrs, Mondays thru Fridays. (9-17) Tethered wiresonde balloons lctd 1.5 mi S Gila Bend AF Aux Fld, flying daily from 1300 Mon thru Fri from gnd to 2000' above gnd. Lgtd durg hrs darkness. (10-18)

GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)

GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)

GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

MARANA ARPT: Reported inactive. (10-2)

PHOENIX AREA-SPECIAL AIR TRAFFIC RULES: Aircraft operg under VFR or VFR conditions shall not be operd Mon thru Fri from 0600M to 1800M on Green Airway #5 and Victor Arwy 16W of Phoenix in the areas described below except at the altitudes prescribed therefor unless special permission is obtained from Air Traffic Control. From 112°28' to 112° 35', which is the area between north-south lines drawn thru the Perryville FM and the town of Buckeye, between 700' above the surface and 5000' MSL, regardless of weather conditions. Further, when the reported ceiling at Phoenix is less than 8000', acft shall not be operd at altitudes above 2000' MSL and below 4000' MSL in the area between 112°16' and 112°28', which is the area between north-south lines drawn thru the town of Tolleson and Perryville FM. When the reported ceiling at Phoenix is 8000' or more, acft shall not be operd at altitudes above 7000' MSL and below 9000' MSL in the area between 112°10' and 112°28', which is the area between north-south lines drawn thru the east edge of Glendale and the Perryville FM. (9-27)

PHOENIX-SKY HARBOR ARPT-SPECIAL NOTICE: Following changes in instrument apch procedures: LFR procedure: Initial approach from Perryville FM 4000', from Tolleson Int. 2600 . Missed approach: Climb to 2500' on W course PHX LFR, make right climbing turn returning to LFR. Hold on E course LFR at 5000' in standard pattern within 15 mi. VOR procedure: Initial approach from Perryville FM 4000', from Tolleson Int. 2600'. Missed approach: Climb to 2500' on radial 258, make a right climbing turn, returning to VOR. Hold east of VOR on radial 076 at 5000' in standard pattern within 15 mi. Tolleson Int - Intsxn GBN VOR radial 027 and PHX VOR radial 258 or W course PHX LFR. All other items these procedures unchanged. (6-14)

PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take-off except prior permission arpt manager. (12-7) Men & equip. along N edge rnwy 26L from apch end to a point approx 2000' W. (8-23)

PRESCOTT-RADIO: VOR coverage 165°-225°, 35 n mi at 10,000'; 135°-145°, and 165°-185°, 39 n mi at 10,000'. About Nov 15, VOR will be shut down until approx Jan 15, 1958 - conversion to VORTAC. Durg this period, the following arwys will be unusable durg IFR conditions: V12 EED-INW; V105 White Hills Int.-PHX; V105E PRC-PHX. (10-17)

SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)

SCOTTSDALE-THUNDERBIRD #2 ARPT: Closed.

**SEDONA-OAK CREEK CANYON ARPT: Name change. Formerly carried as Oak Creek Arpt Longest rnwy avail. 3400'. (4-16)

TUCSON-RADIO: VOR/DME coverage 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi at 11,000'; 060°-075°, 35 n mi at 11,000'; 075°-085°, 21 n mi at 11,000'; 090°-170°, 40 n mi at 12,000'; 225°-230°, 40 n mi at 7000'; 330°-345°, 35 n mi at 11,000'; 345°-360°, 25 n mi at 11,000'.

TUCSON ARPT-SPECIAL NOTICE: As rqrd, target towing on a direct route off arwy to Ajo, Ariz to be conducted wk-ends - caution. (2-15)

TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/FD steers unreliable beyond 35 n mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)

ARIZONA: YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)

**YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to heavy jet tfc. B-57 type acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11). Jet barriers installed rnwy 3-21. (9-3)

ARKANSAS: **BENTON-SALINE CO ARPT: New arpt. Type "P"; lat 34-33, long. 92-36; lctd W; hwy N; elev: 325'; 1 strip turf; 2850' x 250'; no services. (1-15)

BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)

LITTLE ROCK-ADAMS FLD: Trenches 6" wide, 30" deep being dug and back filled approx 12' both sides rnwy 17-35. Caution advised. (11-5)

**MARIANNA ARPT: New arpt. Type "L"; lat 34-47, long. 90-48; lctd 1 mi W; RR W; elev: 181'; 1 rnwy - 2640' x 300' (sod); minor repairs & 80 oct fuel on call; caution - ruf. (3-6)

**NORTH LITTLE ROCK MUN ARPT: New fld. Type: "L" Lat 34-50, long. 92-16. Lctn: 4.5 n mi N. Elev: 545. No. of rnwys: 1. Lngst rnwy & facs: 32.

TEXARKANA-RADIO: DME coverage 145°-235°, 1700' MSL 30 n mi; 235°-270°, 1800' MSL 35 n mi. (5-21)

CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip. on fld. (4-26)

ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)

BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)

BLYTHE-RADIO: VOR/DME coverage 45 n mi except 25 n mi 180°-200°; 30 n mi 280°-300°; 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)

**BONSALL-SHEARER'S RANCH ARPT: Abandoned.

BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)

CAMARILLO-RADIO: All courses have multiples. (6-17)

**CONCORC-BUCHANAN FLD: Effect. Oct 15 right hand tfc estabd on rnwys 14 and 19. Pat alt 800' indicated. Rnwy 6-24 to be used only for hi-velocity wind conditions. Low flight over populated areas should be avoided as far as practicable.

CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° unsable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.

DAGGETT-RADIO: VOR flgt-checked on arwy radials only.

DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)

DIXON ARPT: Closed. (8-30)

**EL MONTE-L.A. ARPT: 250' (658' MSL) lgtd twr erected 4.1 n mi E (94° T) at lat 34-05-28, long. 117-56-48. (10-11)

ELSINORE ARPT: Caution - glider activity week ends. Squirrel holes S edge of lndg area.

FAIRFIELD-TRAVIS AFB-RADIO: LF rng has splits and multiples beyond 20 mi. (8-27)

FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.

**FORT BRAGG-UNION LUMBER COMPANY ARPT: Now a private arpt. (2-5)

FT. JONES-RADIO: VOR has lgt course roughness all quads. Only airway radials flight-checked. Sept. 19, VOR shut down until approx Nov. 14 - modernization. Durg this period the following airways will be unusable for IFR operns- V23 Red Bluff - Talent Int.; V23E Fort Jones - Klamath Junction Int. The Bray Int. will be unusable.

FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.

FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12

FRESNO AIR TERMINAL: Extreme caution advised in vicinity of arpt, particularly when using VOR airways. Jet aircraft climbing and descending in areas of extended centerlines rnwys 29-11 and areas N and E of arpt. Const and equip. both ends rnwy 29-11 and adj taxiways. (2-5) Jet barriers installed both ends rnwy 11-29. First 1000' rnwy 29 is behind barrier, not to be used as rnwy, overrun area only. (10-11)

**GASQUET ARPT: Caution. Road materials piles S side. (9-23)

**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)

GOFFS-RADIO: About Nov 11, VOR will be cmsnd. Freq: 108.2 mc. Ident: GFS. Lctd lat 35-08-00, long. 115-11-28. Elev: 4300' MSL. Class: VORW. (10-25)

LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)

CALIFORNIA: **LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. (10-4) VHF/DF bearings unreliable below 12, 000'MSL SW quad between 200° and 230°.** About Nov 11, ASR will be shut down until approx Dec 2 - modernization.(10-22) FLD: Several 230' MSL portable oil derricks NW, W, and S of fld. No fuel servicing avail. for civil acft 2400-0600. Neon apch lgt lane rnwy 30 discontd indefinitely. (1-1) Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 600'. (3-22) Rnwy 30 clsd all lndgs 0700-1500P wk-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail. lndgs and tk-offs. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)

LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR & LF combined. (4-26)

LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000' MSL. (10-23)

LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13, 000' MSL beyond 30 n mi. (4-19) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equip. crossing rnwy. During VFR wea conditions, civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 mc at least 10 mi out. During IFR wea, civil acft ctc Apch Ctl on 118.1 or 119.3, or listen 118.1 or 119.3 mc and trans 122.7 mc. USAF-NAVY-CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off-shore W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000' MSL, approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E-bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omi, unless cleared otherwise by ATC. Jet acft pat downwind leg is 1500' MSL. Acft not intending lndg at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34. Nov 30, transmissometer cmsnd, furnishing rnwy visibility for rnwys 25L and 25R. Visibility to be added to obwervations when prevailing visibility is less than 1-1/2 mi.(6-21) Apch lgt lane sequenced flashers avail. on test basis at pilot's request. Flashers extend from 1200' to 3000' from end rnwy 25L. (7-11

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E;elev 174'; 1 rnwy - (15-33) - 2300' x 90' (dirt & sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD - SPECIAL NOTICE: Due to hvy jet tfc, acft operg vicinity Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flgt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in operation. Hereafter ceiling observations of less than 1500' will usually pertain to the middle marker location. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flgt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flgt should not be conducted with Oakland Apch Ctl or San Francisco Apch Ctl utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flgt into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches

CALIFORNIA: and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (4-24)

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF operg test basis. Freqs: 118.1, 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc. Coverage 40 n mi at MEA xcpt 020°-050°, 8000'MSL. (10-14)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n
** mi at MEA xcpt 340°-030°, 6500'; 030°-040°, 8000'; 040°-060°, 7000' MSL. (8-6) FLD: Dredging and clam shell equip. working S of lndg area. All booms and equip lgtd and mrkd. Use extreme caution when flying over or within this area. Non-rdo acft rqrd to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd giving rnwy visibility observations rnwys 27L & R. (8-22)

OCEANSIDE-RADIO: July 10, VOR shut down. - modernization. Durg this period the following arwys will be affected: V23:LGB-SAN;V208 CAX-TRM when usable. Flgts departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN durg shutdown period. (10-16)

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13, 000';350°-360°, 35 n mi at 13, 000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and lndgs prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E & W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13) Tetrahedron replaced by lgtd wind sock. (10-8)

PALMDALE-RADIO: VOR coverage 120°-150°, 35 n mi at 10, 000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W-adj to Pomona Heliport. (9-20)

POMONA-BRACKETT FLD: Operative during reconstruction. Caution - men and equip.

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10, 000'. (6-30) Soon VOR will be shut down until approx Mar 10, 1958 - conversion to VORTAC. Durg shutdown following V arwys will be unusable IFR conditions: V23 FJS-Sutter Buttes Int., V25 Geyserville Int. - LMT, V 195 ILA-FOT. V107 UKI-RBL usable substituting RBL LF rng for VOR

RIALTO-MORROW FLD: Closed Suns due drag races. (10-8)

RIVERSIDE-MARCH AFB-RADAR APPROACH CONTROL: Radar ctl will be exercised over mil acft only until approx Nov. 30. (10-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR weather, actual apchs IFR weather. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000' 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153° 180°, 26 n mi at 7000';180°-225°, 43 n mi at 7000';225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO: VOR coverage 50 mi MEA all quads xcpt 20 mi MEA from 310° to 330°.

**SAN DIEGO-LINDBERGH FIELD: Jet barrier relocated overrun area rnwy 27. (10-4)

SAN DIEGO-MONTGOMERY FLD: Caution ngt lndg. Keep rnwy lgts in sight during apch. Fld unattended sunset to sunrise. Ditch 100' short of threshold lgts rnwy 28. (10-24)

**SAN DIEGO-PIKES ARPT: Abandoned. (10-14)

SAN FRANCISCO: See Oakland Control Zone Notam

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR apch, requested to make initial call to San Francisco Twr, freq 119.1 mc. (7-25)

SAN FRANCISCO INTNL ARPT: Const in progress continuously on various sections of fld. Caution advised. (11-4)

SAN FRANCISCO BAY-SPECIAL NOTICE: Beginning Oct. 18, a Moored Balloon (silver with black stripes) 8' x 25' will be flown 500' MSL on an irregular schedule from U.S. Naval Net Depot located on Tiburon Peninsula, daylgt hours under visual flight rule conditions. (10-14)

CALIFORNIA: SAN FRANCISCO GAP-RADIO: Homing fac unreliable in area 25° thru E to 130°.
SAN RAFAEL-SAN FRANCISCO BAY ARPT: Caution-60' crane and trucks operg daylgt hrs W end rnwy. (10-14)
SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°,35 n mi at 9000'; 80°-95°, 35 n mi at 4000';110°-260°, not checked. (10-23) LF rng has numerous multiples NW and E courses. (9-17)
**SANTA MARIA-HANCOCK FLD: Perm clsd. (10-25)
SANTA MONICA-RADIO: TVOR radials 030°,075°, 210°, 260° and 323° usable. (1-20)
SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)
SANTA PAULA ARPT: Grading & paving opern in progress all areas until approx Jan 1, 1958. Use extreme caution. (11-3) ddy. (6-8)
**SELMA ARPT: Perm clsd. (10-2)
SHOSHONE ARPT: Strip clsd for paving. (8-9)
STOCKTON ARPT: Rnwys 11L-29R, 11R-29L, and 16-34 clsd due exten const work in progress. Rnwy 4-22 only avail with temp flare pot lgtg. Tetrahedron tied down to indicate active rnwy. Pilots should observe windsock for crosswind indication. Hvy equip. crossing SW end rnwy 4-22. Flagman on duty directing gnd tfc. Extreme caution advised at all times. Intensive helicopter training conducted in vicinity of fld between 0800-1700 daily xcpt Sat and Sun. Acft utilizing SCK rdo rng for simulated range apchs should exercise extreme caution. Min alt for low apchs is 528' MSL. (8-12)
THERMAL-RADIO: VOR and DME coverage 330° thru 360° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)
THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)
UKIAH-RADIO: DME coverage 43 n mi;305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000';100°-150° at 6000'. 105° thru S and W to 305° over water not checked. (10-11)
UKIAH ARPT: Dirt strip perm clsd. Use surfaced rnwy 15-33 only. (7-8)
**UPLAND-CABLE ARPT: Name change. Formerly carried as Cable-Claremont Arpt. (5-24)
VAN NUYS ARPT: Touch-and-go lndgs prohibited on Sat and Sun after 1300. Jet acft make initial apch at 4000' MSL when lndg on rnwy 34; 2300' MSL when lndg on rnwy 16. Tfc direction indicator inop 2300-0700. (2-25)
VICTORVILLE-GEORGE AFB-RADIO: USAF VHF/DF steers unreliable 235°-325° and 360°-045° below 15,000'.
WARNER SPRINGS ARPT: Rnwy hazardous. Soft spots due rodent activity and grading.
WOODLAND-WATTS ARPT: 200' at N end N/S rnwy under const. (9-5)
YUCCA VALLEY ARPT: New arpt reported: 2 mi E;1 rnwy,3200';lgts;BL4; fuel F2. (1-3)
COLORADO: CHEYENNE WELLS ARPT: Sand drifts over 3' high - dangerous. (7-5)
COLORADO SPRINGS-PETERSON FLD: Caution-lndg acft-due to rise in terrain at apch end rnwy 21.
CRAIG ARPT: Rnwy clsd for const. Use 2500' strip immediately S rnwy. (8-27)
DENVER-STAPLETON FLD-TOWER: VHF/DF commun unreliable at 40 mi below 14,000' MSL 154° to 180° and below 16,000' MSL 181° thru 243°. VHF/DF bearings reliable in these areas. (5-8)FLD: Rnwy 8L-26R clsd to operns heavier than DC-3 acft xcpt when absolutely necessary for taxiing W of rnwy 3-21. Hvy air tfc N and E due to extensive instrument trng. During hrs of darkness flashing amber lgt in segnented circle denotes rgt hand tfc. (9-12) 200' open ditch N side W end rnwy 8R-26L flag mrkd day hrs, flashing red ngt hrs. (3-26)
EADS ARPT: Sand drifts over 3' high - dangerous. (7-5)
GRAND JUNCTION-WALKER ARPT: Rnwy 11-29 and neon apch lgts inop until about Jan 1, 1958 for reconst of rnwy and installing rnwy lgts. (8-20)
**LAMAR ARPT, 10,PUB-JCT: Const completed. New NNE/SSW paved rnwy 4800'x100' with bndry & threshold lgts and new paved taxiway from rnwy to paved apron. All paved areas open for use. Old N/S strip, W side of fld discont with p-lines across it. Old E/W and NE/SW strips discont. (10-22)
**LITTLETON-BAR NONE ARPT: Permanently clsd. (10-9)
NUCLA ARPT: Clsd. Const. (10-23)
PARSHALL-SPECIAL NOTICE: Avoid canyon flying Williams Fork Dam site 5 mi SE. Hi-tension cables across canyon 200' above floor. (4-17)
PUEBLO-SPECIAL NOTICE: Controlled Firing (demolition) Area for use of the Pueblo Ordnance Depot established within the following described area: bounded on N by lat

COLORADO: 38-22-00; E, long. 104-21-22;S, lat 38-18-00; W, long. 104-22-50. (4-30)
PUEBLO MEMORIAL ARPT: 2600' N end rnwy 17-35 clsd to hvy acft. Men & equip. on fld daylgt hrs. Ctc twr for current fld conditions. (9-4)
CONNECTICUT: NEW HAVEN ARPT: Arpt bcn not rotating. (8-24)
SALEM ARPT: Reported reactivated. 41-30N, 72-14W; lctd 2.4 mi E; elev 420'; 2 rnwys-E/W 2200', NW/SE 1950'; remarks-windsock left of end SE rnwy. (7-27)
SIMSBURY ARPT: Experimental dropping of parachutes on fld during VFR wea. days Mon thru Fri. Fld occasionally clsd by standard marker.
WILTON-RADIO: DME coverage 270°-285°, 35 n mi at 3000';230°-360°, 35 n mi at 3000'; 360°-015°,35 n mi at 2500'. (6-14) About Dec 2, VOR/DME will be shut down until approx Dec 20 - modification, and freq chg from 113.6 mc to 115.5 mc. (11-8)
DELAWARE: GEORGETOWN-SUSSEX CO. ARPT: Caution - NNE/SSW and NNW/SSE rnwys rough. Men & equip. on fld. Rnwy 16-34 W of intsxn rnwy 22 and N taxiway clsd. Center taxiway rnwy 4 to ramp clsd. (9-11)
**MIDDLETOWN-BAKER'S FLD: New arpt. Type "P"; lat 39-32, long. 75-43; lctd 6 mi N; elev 65'; 2 rnwys(sod)-lngst rnwy 3100'; 80-87 oct fuel; E & N blkd. (9-5)
NEW CASTLE-PIASECKI ARPT: Sod strips clsd-rough. Use rnwy and taxi strip only.(5-22)
WILMINGTON-NEW CASTLE CO ARPT-TOWER: About Nov 25, ILS LOM freq will be chgd from 251 kc to 248 kc. (10-8)FLD: Due to lmtd visibility, twr unable to ctl surface tfc on parking ramps. (6-9)
DIST. OF COLUMBIA: WASHINGTON-SPECIAL NOTICES: (1) See page 83, in Flight Information Manual, Vol 11, dated 8-15-57, for Washington, D.C. High Density Air Traffic Zone.(2) Caution-dynamiting daily, heavy charges, dam const along E bank of Potomac River, 3/4 mi N of Chain Bridge at Dalecaria, Md. (3) See also Quantico, Va., MCAS Special Notice. (4) About Nov 14, fixed white 60 inch searchlight of high intensity will be operd near south bank of Potomac river near Chain Bridge lat 38-55-45, long. 77-07-0?. Lgt will be operd only during hrs of darkness and when rnwy 36 departure procedures are in use at Washington National Arpt. Lgt is intended to serve as a guide to assist recognition of Potomac river departure course. Beam will be directed SE toward Key Bridge and elevated 65° above horizon. (11-7)
WASHINGTON-RADIO: LF rng SE course bends 4 to 9 n mi from stn; 17 to 22 n mi from stn, multiples 3° to 3.5° S.
WASHINGTON AIR ROUTE TRAFFIC CONTROL CENTER: Radar service will be provided UHF equip. acft on 353.9 mc, 318.2 mc and 362.3 mc only in Washington Metropolitan Area.
WASHINGTON NATIONAL ARPT-TOWER: VHF/DF coverage 55° clockwise to 250°, 1500'; 250°-345°, 3000'; 345°-55°, 2000' at 40 mi. (10-28) FLD: USAF, NAVY, CG: Clsd to all xcpt: (a) Acft carrying VIP and officers ABOVE rank of Major General or Rear Admiral. (b) Scheduled MATS. (c) Flgts rqrg customs and immigration service. (d) Navy and CG logistic support flgts. (CG logistic flgts not hangered at WNA rqr approval of arpt director, must be cleared with Comdt., CG and will be flown VFR conditions only) NO acft over 120,000 lbs without prior approval arpt director. CG and Navy acft taxi to MATS term N of admin bldg. Lmtd parking and taxiing W of taxiway #6. Taxiing E of taxiway #6 will be at discretion of ctl twr only. Until approx end of Dec, hvy const equip. will be operg 0730-1800, Mon-Sat adj to a rnwy and/or taxiway. Open ditches 1-1/2' wide, 3' deep will be adj to pavement. Ditching will be of varying length and location, and will be properly flagged and obstn lgtd. At twr discretion, rnwys and taxiways may be clsd as required to accomplish work adj to paved area. (6-10)
FLORIDA: ARCADIA ARPT: NW/SE strip mowed. Good condition. Remainder of arpt not maintained. (10-31)
**BANANA RIVER-SPECIAL NOTICE: Freq violations have been reported of Restricted Area R-162. The nature of testing in this area constitutes an extreme hazard to intruder acft. All civil acft are warned to keep clear of this area. (6-27)
BARTOW AIR BASE: AF primary Contract School clsd Sat.,Sun.,Holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Prior approval 1730 to 0700 must be obtained before 1500 on arrival day.
BUNNELL ARPT: Caution- small bushes and trees about 10' high at each end of each rnwy. Rnwy 10-28 clsd - indications of drag races. (4-29)
COCOA ARPT: N/S rnwy clsd. E/W rnwy under const. Use caution on E end. (10-14)
CRESTVIEW-RADIO: VOR radials 080° thru 110° out of tolerance acct excessive roughness and scalloping. (9-25) Due to VOR radial 087° being unusable, LF rng shall be substituted on V22 CEW-MAI. MEA for acft equipped with VOR only 5600'. (10-18)
CROSS CITY-RADIO: VOR courses 307° and 299° usable. All other courses out of tolerance acct of roughness and scalloping. (1-3)LFR may be used as substitute for VOR by ADF-equip acft while VOR unusable. (9-12)

FLORIDA: CROSS CITY ARPT, 58, MEM-TPA: Trucks and equip. crossing E end of rnwy 31 and traveling on NE/SW taxi strip daylgt hrs - caution. (5-6)

DAYTONA BEACH-RADIO: VOR restricted to use for navigational fixes in and along control 1150 at or above published minimum reception alt. Navigational feature in all other portions of the facility service area beyond tolerance. Commun. feature usable thru out entire service area. (2-13) DME operg test-basis only. (2-14)

**DE LAND ARPT: 1000'(1034'MSL) lgtd twr erected 7.8 n mi S(193°T) at lat 28-56-25, long. 81-18-33. (10-3)

FT. LAUDERDALE-WEST PROSPECT ARPT: NE/SW rnwy clsd for const. Men & equip. on fld. (3-9)

FT. MYERS-RADIO: VOR radial 131° out of tolerance - excessive scalloping and bends.

**FT. PIERCE-SUNRISE ARPT: New arpt. Type "P"; lat 27-25, long. 80-22; lctd 3 mi SW; elev 25'; 1 rnwy - 2642'x 125'; 80-91 octane fuel; P-line W; use rnwy. (8-20)

HOMESTEAD AFB-SPECIAL NOTICE: Caution - extensive practice jet penetrations and instrument approaches in progress up to 20,000'. Tfc operating in Homestead Control Zone at all times. (1-11)

JACKSONVILLE-RADIO: DME and VOR coverage 35 n mi at min en route alt. VOR out of tolerance 180°-260°, with xcptn apch course 248° usable to 9 n mi. (10-28)

JACKSONVILLE AIR ROUTE TRAFFIC CONTROL CENTER: About Nov 12, freq 263.0 mc will be decmsnd. (11-4) About Nov 13, voice communications will be inop. (11-5)

**JACKSONVILLE-IMESON ARPT: 996'(1003'MSL) lgtd twr erected 6.0 n mi S(187°T)at lat 30-19-22, long. 81-38-34. (9-23)

KEY WEST INTNL ARPT: All acft en route Intnl Arpt ctc Boca Chica Twr on 126.18 mc for tfc info when 20 mi out. If unable ctc twr, ctc Key West Rdo. Rnwy 9-27 approved for air carrier day and night operns for all acft. Wea min same as authorized for day operns. Taxi on taxiways only. Large or fast acft taking-off from rnwy 9 proceed straight out and pass S and E of Boca Chica NAS. Rnwy lgts avail. on req to Key West Rdo. (7-23)

LAKE CITY ARPT: Fuel and servs unavail. (9-23)

LONGWOOD-SLADE RANCH ARPT: 300'(318'MSL) lgtd concrete stack being erected 9 n mi N(13°T) at lat 28-50-50, long. 81-19-00. (9-11)

MARIANNA-GRAHAM AIR BASE: AF Contract Primary School clsd Sat, Sun, holidays, and other days 1730-0700 xcpt on prior approval. Prior approval for Sat and Sun must be obtained before 1500 Fri. Approval for 1730-0700 weekdays must be obtained before 1500 on arrival day. No fuel avail for civil acft. No itinerant lndgs rnwys 18R-36L and 8L-26R.

MIAMI INTNL ARPT-SPECIAL NOTICE: All flights operg within an area of 10 n mi radius at night, at alts of 3000' or below, shall establish, prior to entry into area and maintain thereafter air speeds not in excess of 180 knots. Acft types having characteristics requiring min air speeds in excess of 180 knots shall maintain the lowest possible air speed consistent with safety. Miami's operators and pilots request cooperative compliance by itinerant flights.

MIAMI AIR ROUTE TRAFFIC CONTROL CENTER: Trans & rcvrs 121.5, 243.0, 269.0 and 291.6 mc inop. (10-21)

MIAMI INTNL ARPT: Following restrictions applicable to all jet acft operg into & out of the arpt other than multi-eng transport types: when surface wind is less than 15 knots, lndgs authorized on rnwy 9 only and tk-offs authorized on rnwy 27 and 30 only. Take-offs & lndgs will be into the wind when the surface wind exceeds 15 knots. Max performance climb out to 1000' required on all tk-offs. Practice IFR apchs prohibited. Tfc pat. will be as directed by twr. Tactical apchs prohibited. (10-24) Due to non-visibility twr unable to ctl tfc on first 1200' rnwy 27R and portion of run-up pad. Adjusted threshold of rnwy 27R mrkd by red and white checked area and 2 green threshold lgts in lieu of normal 6. Unusable portion unlgtd. Effect. length of rnwy now 8200'. Lndgs & tk-offs shall be conducted W of adjusted threshold xcpt as necessary to meet gross wt restrictions. Pilots will then assume full responsibility for avoiding all surface tfc in blind area.

MIAMI-OCEAN REEF ARPT: New arpt: Type "L"; 30 mi S; lat 25-19, long. 80-15; elev 4'; 2 rnwys - lngst rnwy 2500' oiled; 80, 91/96 octane fuel. (3-28)

MIAMI-OPA LOCKA ARPT: Mil arpt only. Not open for civil use.

**MIAMI-TAMIAMI ARPT: 203'(208'MSL) lgtd twr erected 19.1 n mi S (202°T) at lat 25-27-09, long. 80-30-57. (11-5)

**OCALA-TAYLOR ARPT: 200'(285'MSL) lgtd twr erected 2.5 n mi N(11°T) at lat 29-12-00, long. 82-08-50. (10-22)

ORLANDO-RADIO: DME and VOR coverage 35 n mi at min en route alt.

ORLANDO ARPT-TOWER: Caution advised using ILS LOM acct interference from rdo bcn.

FLORIDA: About November 12, LOM freq 219 kc will be changed to 221 kc. FLD: Rnwy 28L-10R clsd for night lndgs and tk-offs to all acft. (2-12) Portions of N/S taxiway E of rnwy 18-36 and NE taxiway not visible from twr. Pilots will assume full responsibility for avoiding all surface tfc in blind areas. (6-21)

ORLANDO ARPT: 651'(749'MSL) lgtd twr being erected 6 n mi WSW(266°T) at lat 28-32-10, long. 81-27-00. (10-22)

PANAMA CITY-FANNIN FLD: Caution - soft shoulders. Men and equip adj rnwys. (10-8)

PENSACOLA ARPT: Rnwy 3-21 clsd temp for maintenance. (7-18)

**MANITOWOC-MUN ARPT: Formerly carried as Kakuk. (9-19)

MERRILL ARPT: Clsd due const. (10-3)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equipped with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and alt. (5-10) VHF/DF coverage 3500' MSL at 40 n mi all azimuths. (6-7) ILS glide slope unusable automatic apchs. FLD: Rnwy 7L-25R clsd const. Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd, inviterant military acft on unofficial business may find parking facilities unavail. Avoid confusing rnwy 1 with parallel taxiway to left. Rnwy 13-31 clsd to jet acft.

OSHKOSH-WINNEBAGO CO. ARPT: Caution - bldg const on fld - use rnwys only. Use only N/S and E/W rnwys durg winter months. (2-21)

PHILLIPS ARPT: 100' unlgtd TV twr erected 900' W of S end of N/S rnwy. (6-26)

**PORTAGE-PORTAGE-MANLEY ARPT: Longest rnwy 2000'. (9-16)

WATERTOWN ARPT: 103' (923' MSL) lgtd pole & pipe supporting an antenna being erected approx 0.8 n mi N at lat 43-10-57, long. 88-43-15. (10-23)

WYOMING: CASPER AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. About Dec 1, Apch Ctl will be cmsnd. Freqs: 348.6 mc and 121.9 mc for ctl gnd tfc. Class: AC(g). (10-25) FLD: Two 200' fences SW end of ramp not obstn lgtd. (--11-16)

GILLETTE ARPT: 50'-75' W shoulder 1500' from N end N/S strip soft. Clsd to hvy acft.

GREYBULL ARPT: Hvy const. Men and equip. on fld at all times. Rnwy lgts & bcn turned off. Use extreme caution. (8-27)

LARAMIE-RADIO: DME coverage 155°-225°, 34 n mi at 15,000'; 225°-300°, 26 n mi at 15,000'.

LUSK ARPT: E/W rnwy clsd, const. Shorter rnwy graded out in the dirt S of original rnwy for temp use. Use caution especially durg wet wea. (10-8)

NEWCASTLE-MONDELL ARPT: Caution - men and equip. working on rnwy 14-32. (8-9)

ROCK SPRINGS-RADIO: ILS glide slope has lgt to moderate roughness between OM and LFR. Sept. 30, VOR shut down until approx Jan 15, 1958 - conversion to VORTAC. Durg this period the following arwys will be affected: V6N between FBR and CKW; V4 between MLD and RKS; V4 and V4N between RKS and CKW. V6 between FBR and CKW will be usable at 11,000'. (9-26)

SARATOGA-SHIVELY ARPT: Const in progress 1500' SW end NE/SW rnwy - area mrkd by red flags. (8-16)

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

**SHERIDAN COUNTY ARPT: 135' lgtd twr erected 3.5 n mi NNW.

THERMOPOLIS ARPT: Caution - 1800' S end N/S rnwy clsd - const; only 3300' avail.

TORRINGTON ARPT: Oil well storage tanks lctd on S edge E/W rnwy 300' from W end. Oil well pumping unit lctd on E side NE/SW rnwy 300' from SW end of rnwy.

PUERTO RICO: SAN JUAN-ISLA GRANDE ARPT: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution - ngt operns observe threshold lgts. Use outside taxiway in front of large hangar near entrance. Equip. on hangar ramp. (4-12)

SAN JUAN-PUERTO RICO INTNL ARPT: Parking circles 2, 3, 4 and 5 on N departure ramp not fully visible from twr - caution. (6-7) Lgtd temp steel twr, 110' MSL, lctd approx 3500' off N boundary rnwy 7-25. (5-20)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine, More Than 65 Knots

Notices to Airmen - page 2

VOL. 12, NO. 19 **NOVEMBER 25, 1957**

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult Teletype NOTAMS.

U.S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
GENERAL SERVICES OFFICE

NOTICES TO AIRMEN

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

The Airman's Guide covers primarily two broad fields of civil airport information, namely so called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Since the aeronautical public should be immediately advised of hazardous conditions reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a Notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the General Services Office, Attention: W-120 (formerly W-52), CAA, Washington 25, D. C.)

Permanent airport data changes should be reported to the appropriate CAA Regional Office for coordination before they are included in the Airman's Guide

---

HOW TO USE THE AIRMAN'S GUIDE: The Airman's Guide is issued every two weeks. Every issue contains a Notices to Airmen section; every other issue additionally contains a Radio Facility Data section; and once each quarter the Directory of Airports appears in an issue containing both of these sections.

CONTENTS: The contents of each issue are noted on the front cover. The first page of each section carries the Legend for interpreting codified information. Material normally included in each section is as follows:

(1) Notices to Airmen: Gives current condition of facilities and any special flight regulations or restrictions; cites data changes which serve to correct less frequently issued publications or charts; included as Special Notices are amendments to restricted areas, location identifiers, minimum en route IFR altitudes, civil airways, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, etc.

(2) Radio Facility Data: Lists radar facilities, instrument landing systems, and all other aeronautical radio facilities with their transmitting and guarded frequencies, identification, station class, range courses and remarks.

(3) Directory of Airports: This codified directory covers airport type, class, elevation, runway length and number, lights, servicing, obstructions, fuel octanes, weather reports available, unicom available, and remarks.

SPECIAL NOTICES: Special Notices usually appear at the beginning of the Notices to Airmen section. Special Notices are frequently indicated on the front cover, giving the subject and page number where the information is found.

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Assistant Chief of Staff, Installations, HQ, USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or be telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communications channels. These channels should be reserved for essential in-flight communications. All pilots will benefit by following this practice.

CLOSE YOUR FLIGHT PLANS UPON ARRIVAL: Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of all flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

USE OF OMNIRANGE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. The accuracy of course alignment of the omnirange over 360° azimuth is excellent when compared to that of the L/MF range, being generally within two degrees (plus or minus). On certain stations, some sectors may contain slightly larger errors, but no course published as usable in the Airman's Guide will be displaced more than 3-1/2 degrees from its theoretical locations. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, infrequent brief flag alarm activity, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

AUTOMATIC VOICE IDENTIFICATION: Voice identification has been added to numerous air navigational facilities (omnirange stations).

Omniranges where voice identification is functioning are designated in the ANRA pages by an asterisk (*) in the "class identification" column. The transmission consists of a voice announcement alternating with the usual Morse Code identification:

e.g. Long Beach omnirange (Voice) .-.. --. -... (LGB in Code)

For omniranges, as shown above, normal voice identification consists of the name of the omni followed by the word "omni". However, if the omni is unattended, i.e. if no facility for providing air-ground communications services is associated with the omni the word "unattended" will precede the word "omni". Example: AIRVILLE UNATTENDED OMNI.

TRANSMISSION OF "V" BY VAR RANGES: The letter "V" is transmitted by all VAR ranges. It precedes the usual location identifier and is separated from it by a short space. It is intended to enable pilots to distinguish instantly between the aural directional signals of VAR ranges, and those of low or medium frequency ranges, ILS and VORs located in the same general area. It will, for example, guard against the possibility of an error occuring through accidental connection of a pilot's headset to the wrong receiver. The "V" is transmitted at an appreciable higher rate of speed than the location identifier.

INTERFERENCE ON ATCS COMMUNICATIONS CHANNELS: If excessive interference is noted on ATCS VHF or UHF simplex frequencies, pilots should request the ATCS to reply on the VOR voice channel. (Reference to the Air Navigation Radio Aids Section will indicate which VORs have a voice channel). This will often expedite the exchange of messages as the VOR has a clear channel for communications.

NEW UNICOM FREQUENCY: Frequency 123.0 mc has been designated for UNICOM by the Federal Communications Commission where an airport is served by a control tower. Where there is no control tower, 122.8 mc is the frequency designated for use. Also 122.8 mc may be used by acft in civil defense work. These frequencies shall not be used for air traffic control purposes and only one UNICOM will be authorized at each landing facility.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

RADAR TRAFFIC CONTROL - LOSS OF COMMUNICATION: On page 66 of the Flight Information Manual, Vol. II (dated August 15, 1957) after last paragraph of the left-hand column add the following:

LOSS OF COMMUNICATION - ARRIVAL AIRCRAFT UNDER RADAR CONTROL: If the pilot experiences loss of 2-way communication after leaving the outer fix under radar control, the pilot of such arriving aircraft will be expected to proceed direct to the ILS outer marker/ compass locator, or to an approach facility serving the airport, and execute an instrument approach. The required separation between such aircraft and other aircraft in the area will be provided on the basis that the aircraft which has experienced the radio failure will effect a landing as soon as possible and radar will be used to control other aircraft accordingly. If the instrument approach cannot be successfully completed for any reason (such as weather), the pilot will be expected to comply with any instructions issued previous to radio failure or execute a missed approach. Standard radio failure procedures shall apply in any case of 2-way radio communications failure other than those outlined in this paragraph.

TACAN: TACAN (Tactical Air Navigation) is a pulse type omni range system operating in the 1000 mc band, giving cockpit information and display of azimuth and distance from the facility similar to civil VOR/DME. Its use requires Tacan Airborne equipment and does not operate through the conventional VOR/DME equipment. Its coverage is similar to VOR/ DME.

VORTAC: VORTAC means the combination of VOR and TACAN. A VORTAC facility provides azimuth navigational information on VHF (108-118 mc) and azimuth plus distance navigational information on UHF (960-1215 mc). These facilities consist of a coaxially collocated VHF omni range (VOR) and a UHF TACAN (Tactical Air Navigation) transponder beacon. Aircraft having complete TACAN airborne equipment can receive both distance and azimuth information from the TACAN transponders. Aircraft equipped with VOR receivers use the azimuth information from the VOR and obtain distance information from the TACAN transponder beacon through the use of a separate airborne distance-only interrogator.

All equipment in a VORTAC facility is in duplicate and has electronic monitoring of the radiated signals with either automatic or remotely controlled transfer to standby. Automatic standby power generating equipment is also provided. The status of operation of VORTAC facilities is relayed to control stations or monitoring points either by wire line or radio link. Transmitted signals of VOR and TACAN are each identified by 3-letter code transmission and are interlocked so that pilots using VOR azimuth with TACAN distance can be assured that both signals being received are definitely from the same ground station. The code for the VOR is transmitted at the rate of six identifications per minute. Twice each minute the VOR identification is omitted to allow two identifications of the TACAN signal per minute. A supplementary automatic voice identification is being added to the VOR. The frequency channels of the VOR and the TACAN at each VORTAC facility are "paired" in accordance with a national plan to simplify airborne operation.

ATTENTION SIGNAL L/MF RANGES: Beginning 0001Z Nov 15, 1957, transmission of the attention signal preceding scheduled broadcasts on L/MF ranges will be discontinued. The attention signal will continue to be transmitted preceding special broadcasts and as deemed necessary to alert pilots using the L/MF range system that a voice transmission is about to be made.

ARMY EXERCISE, "ALL AMERICAN", (TAC-AIR 58-2): This military exercise will take place 3-18 December 1957 (with 5-9 December as the period of most intense activity) from 0600 EST through 1800 EST, at an altitude of 600' to 2000' during VFR conditions, days, within a 100 n mi radius of Fort Bragg, North Carolina. This activity will involve heavy concentrations of aircraft (maximum of 120 troop carrier and 8 jet type) in formations and streams entering and leaving the Fort Bragg Restricted Area (R-115) in support of airborne maneuvers.

GLIDE SLOPE FLARE: Modification of null reference glide slope facilities will result in glide slope flare at about thirty (30) feet above runway. Caution advised on automatic approaches continued past runway threshold.

CRUISING ALTITUDE REQUIREMENTS OUTSIDE CONTROL AREAS: Pilots are reminded to familiarize themselves with provisions contained in Civil Air Regulations, Part 60, paragraphs 60.32(b) and 60.44(b), concerning cruising altitude requirements outside control areas.

ON TOP IFR OPERATIONS: Effective September 15, 1957, the phraseology, "at least 1000 on top" is changed to "VFR conditions on top." Pilots proposing IFR operation on top in lieu of a specific altitude should specify "VFR conditions on top" in filing an IFR flight plan. Operational requirements for operating at least 1000 on top continue to apply for operations in VFR conditions on top.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual Vol. II (dated August 15, 1957), under SECTION I, left-hand column, amend paragraph 1 to read as follows:

1. WITHIN CONTROL ZONES -

A. Unless a clearance has been obtained from air tfc ctl, acft shall not be flown beneath the ceiling when the ceiling is less than 1000'; or closer than 500' vertically under 1000' vertically over, or 2000' horizontally from any cloud formation.

(1) When operg in accordance with a clearance issued by air tfc ctl, acft shall remain clear of clouds.

B. Unless a clearance has been obtained from air tfc ctl, a pilot shall not take-off or lnd an acft at an arpt within a ctl zone or enter the tfc pat of such an arpt when the gnd visibility is less than 3 mi.

(1) When operg in accordance with a clearance issued by air tfc ctl, a pilot shall not take-off or land an acft, other than a helicopter, at an arpt when the gnd visibility is less than one mile: Provided, that where a local surface restriction to visibility exists, such as smoke, dust, or blowing snow or sand, the min visibility is one-half mile, if all turns after take-off and prior to lndg and all flgt beyond 1 mi from the arpt bndry can be accomplished above or outside the area so restricted.

ATC PROCEDURES - VISUAL FLIGHT RULE PROCEDURES: On page 54 of the Flight Information Manual, Vol. II (dated August 15, 1957), under SECTION I, amend footnote 1 under the table, right hand column, to read as follows:

1. If tfc conditions permit, air tfc ctl will issue an air tfc clearance at pilot's request, when the mins are less than those specified. Such clearances do not constitute authority for the pilot to deviate from Section 60.17 or 60.30 and 60.31 as amended, or any other applicable provisions of the Civil Air Regulations.

ATC PROCEDURES - RADAR TRAFFIC CONTROL: The following indicated change does not become effective until Nov 1, 1957. On page 66 of Flight Information Manual Vol. II (dated August 15, 1957), delete the third and fourth sentences of the second paragraph and insert the following:

After release to apch ctl acft will be vectored from the outer fix to the appropriate final apch crs (ILS, VOR, ADF, etc.). Acft leaving these outer fixes under radar ctl will be considered on initial apch. Radar vectors and alt levels assigned between the outer fixes and final apch will be issued as required for spacing and separating acft. When radar is used to position acft on final apch to the ILS, or other final apch fix, the flgt will be so vectored that it is established on the final apch crs prior to reaching the apch fix. Acft will be cleared for apch at thetime the final heading for interception of the final apch crs is issued, or after the acft is established on final apch crs prior to passing the apch fix.

NOTIFICATION OF NON-COMPLIANCE BY MILITARY AIRCRAFT: The 323rd Fighter-Bomber Wing, Bunker Hill AFB, Indiana is performing low altitude navigational training flights at two hundred feet for the purpose of pilot proficiency under the authority of Section 60.1(a) of the Civil Air Regulations. Route of flight: Bunker Hill AFB, Indiana heading 261° to Loda, Illinois; 280° to Lake Bloomington, Illinois; 059° to a point at latitude 40-55, longitude 88-24; 088° to latitude 40-53, longitude 86-53 (approximately 2 nautical mi North of Monon, Indiana); 112° climbing to traffic altitude to Bunker Hill AFB, Indiana, point of beginning.

The Army Aviation Training Detachment, Edward Gary Army Air Force Base, San Marcos, Texas, is conducting aerobatic training on civil airways V222 and V198 under authority of Part 60.1(a) of the Civil Air Regulations. The training activity is being conducted below 5000 feet MSL in VFR conditions between Smithville intersection and San Antonio VOR on V222, and between Eagle Lake and San Antonio VOR's on V198. Flights operating between those points on V222 and V198 at less than 5000 feet MSL should do so with extreme caution.

1957 FLIGHT INFORMATION MANUAL NOW AVAILABLE: Flight Information Manual, Vol. II, dated August 15, 1957, is now available from the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., at 50 cents per copy.

DES MOINES, IOWA VOR SHUTDOWN: During shutdown the following MEAs can be utilized:

FROM	TO	MEA

Des Moines, Iowa LFR	Fort Dodge, Iowa VOR	5000

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several CAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York ATCS controls the transmitters at Idlewild, LaGuardia, Newark, Colts Neck, Caldwell and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Calls from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York ATCS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

LOUISVILLE, KY. VOR SHUTDOWN: During shutdown (Oct 21 through approx Nov 11) the following direct routings will be used in the Louisville area:

V-5: From CVG VOR via 224°M radial and 044°M bearing from Louisville LFR, MEA 3000. V-174 and V-1516: From Louisville LFR to York VOR via E crs LOU LFR to 172°M radial of Cincinnati VOR thence via 256°M radial of York VOR. V-4N: From LOU LFR to Lexington HW via the E crs of LOU LFR and 330°M bearing to LEX HW, MEA 3000. V-4S: From LOU LFR to LEX VOR via 134°M bearing from LOU LFR and the 270°M radial of LEX VOR, MEA 3000. V-5E: From LOU LFR to BWG VOR via 165°M bearing from LOU LFR and the 260°M radial of the BWG VOR, MEA 3000. V-51: LOU LFR direct to Highway Ky. Int MEA LOU LFR - Campbellville, Ky. 3000 - MEA Campbellville, Ky. - Highway, Ky. 6000. V-5: From LOU LFR to BWG VOR via S crs of LOU LFR and the 045°M radial of BWG VOR, MEA 3000. V-4 and V-1516: From LOU LFR to Evansville VOR via the W crs LOU LFR and 070°M radial of Evansville VOR, MEA 2500. V-227: From LOU LFR to Indianapolis VOR via the 304°M bearing from LOU LFR and the 184°M radial of IND VOR, MEA 3000. V-171 and V-174: From LOU LFR to Scotland VOR via the 304°M bearing from LOU LFR and the 123°M radial of Scotland VOR, MEA 3000. V-53: From LOU LFR to IND VOR via the N crs of LOU LFR to Nabb VOR thence via the 315°M radial of Nabb VOR and the 169°M radial of IND VOR - MEA from LOU LFR to Nabb VOR 2100 - MEA Nabb VOR to IND VOR 2600. V-47, V-51 and V-53E: From LOU LFR to Nabb VOR via the N crs of LOU LFR - MEA 2100. V-5E: LOU to Dry Ridge VHF Int unusable. V-4 and V-53: LOU to LEX VOR unusable. V-4N: From LOU to St Marks VHF Int unusable.

During the shutdown, the following non-compulsory reporting points in the Louisville area are temporarily redesignated as follows:

Georgetown, Ky. Int: the intsxn of the E crs of LOU LFR and the 172°M radial of CIN VOR, MEA 3000.
Chaplin, Ky. Int: the intsxn of the 134°M bearing from LOU LFR and the 270°M radial of LEX VOR, MEA 3000.
Campbellsville, Ky. Int: the intsxn of the 165°M bearing from LOU LFR and the 060°M radial of BWG VOR, MEA 3000.
Apalona, Ind. Int: the intsxn of the 070°M radial of Evansville VOR and the 168°M radial of Scotland VOR, MEA 2500.
Mitchell, Ind. Int: the intsxn of the 184°M radial of IND VOR and the 123°M radial of Scotland VOR, MEA 3000.

RADIO INTERFERENCE (General): "You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a CAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

IDENTIFICATION OF AIRCRAFT: Pilots are requested to exercise care that the identification of their aircraft is clearly transmitted in each contact with an ATC facility. Also, pilots should be certain that their aircraft are clearly identified in ATC transmissions before taking action on an ATC clearance. Garbled aircraft identifications in radiotelephone transmissions should never be taken for granted but should always be checked.

ALTIMETER SETTING SERVICE - AIR ROUTE TRAFFIC CONTROL CENTERS:

The following governs issuance of altimeter settings by Air Route Traffic Control Centers to aircraft operating on an IFR flight plan and in direct communication with the Center:

1. Altimeter settings will be furnished, when requested by a pilot operating on an IFR flight plan, for those weather reporting stations within the center's control area.
2. Requests for altimeter settings at weather reporting stations not within the center's control area will be referred to the appropriate Air Traffic Communications Station.
3. The time and location of the weather station reporting the altimeter setting will be specified. The following phraseology will be used: The (Time) (Station Location) Altimeter (Setting) Example: "The One Four Three Zero Columbus Altimeter Three Zero Zero Two."

OPERATING PROCEDURES FOR FLIGHT WITHIN THE CONTINENTAL CONTROL AREA: On or about December 1, 1957, all airspace at and above 24,000'MSL above the continental United States (excluding Territory of Alaska), excluding prohibited and restricted areas penetrating the 24,000' level, will be designated as control area. This airspace is to be known as the "continental control area". Certain new regulations and procedures will govern flight in this area and all pilots and other personnel concerned with opern above 24,000' should become familiar with them. Announcement of the effective date will be made by NOTAM. Following is a summary of the method by which flight operns and air tfc control are to be conducted in the continental control area.

I. VFR OPERATION:

A. Visibility and Cloud Proximity Minimums - For VFR opern within the continental control area, flgt visibility must be at least 5 mi and acft must not be flown less than 1000' vertically and 1 mi horizontally from any cloud formation.

B. Cruising Altitudes:

1. From 24,000' through 28,000' (excluding arwys). To assist pilots operg under VFR in maintaining separation, the following cruising alts should be adhered to as good operg practice from 24,000' through 28,000':

Magnetic Crs	Indicated Altitudes
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or above 29,000'. Use of the following cruising alt for VFR flgt is required by regulation everywhere at or above 29,000':

Magnetic Crs	Indicated Altitudes
0-89° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
90-179° inc.	4000' intervals beginning at 30,000' (30,000', 34,000', etc.)
180-269° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)
270-359° inc.	4000' intervals beginning at 32,000' (32,000', 36,000', etc.)

II. ON-TOP OPERATION: Flgts made under VFR conditions on top within the continental control area must observe the new visibility and cloud proximity minimums and cruising alt rules for VFR opern in the continental control area. Opern of these flgts is otherwise unchanged. (Pilots are reminded that when cleared "VFR conditions on top" by air tfc control, tfc separation is not provided by air tfc control.)

III. IFR OPERATION: All IFR operns at and above 24,000'MSL within the continental control area will receive air tfc control service.

A. At and above 27,000'MSL - To simplify high alt navigation, a limited number of VOR, TACAN, VORTAC and L/MF facilities have been designated for high alt use. These navigation aids are the only ones which may be used for IFR routing at and above 27,000' and are depicted on special high alt charts.

The high-altitude facilities have been used to delineate a system of high-altitude tracks called "Jet Routes". These routes are coded on the charts by the letter J, followed by the appriate route number, followed by the letter V, T, or L to indicate the type of navigation to be used. For example:

J22V . . . . . VOR or VORTAC Jet Route #22
J19T . . . . . TACAN Jet Route #19
J3L . . . . . L/MF Jet Route #3

Use of the designated high-altitude route structure will facilitate air tfc control, and all pilots are requested to use the designated route structure to the maximum extent possible. However, use of this route structure is not mandatory. Pilots may conduct direct flgt off the designated Jet Routes, provided the acft will be flown on a route defined by the high-altitude facilities, and provided further that the facilities selected to define the route are not more than 300 n mi apart.

Routes flown at 27,000' and above will not have a defined width as is the case on arwys at the lower levels. The track to be made good will be direct between the navigation aids or fixes defining the Jet Route, or direct between the high-altitude facilities defining the route for flgts made off the designated Jet Routes.

All high-altitude facilities and a small number of intsxns formed by these aids will be designated as compulsory reporting points. When needed for tfc control purposes, pilots may be requested to make additional position reports.

Other navigation aids (TACAN, VOR, VORTAC, AND L/MF) not designated as high-altitude facilities will be used for routing or navigating of acft to and from the high-altitude Jet Route structure which begins at the 27,000' level. This routing may be via the Victor or colored arwy systems, or direct between navigation aids.

Since most flgt activity at 27,000' and above will be by military acft, only those charts prepared by the U.S. Air Force Aeronautical Chart and Information Center will be avail on the inception date of control of all airspace at and above 24,000'. In recognition of the fact that there will be some civil need for these charts, arrangements have been made for civil distribution of the Air Force charts through the United States Coast and Geodetic Survey.

B. Below 27,000' - Although the continental control area extends from 24,000' upward, the Jet Route structure does not commence until the 27,000' level is reached. The colored and Victor arwys extend up to, but do not include the 27,000' level.

Acft operg below 27,000' within the continental control area (from 24,000' through 26,000') may operate on the colored or Victor arwys, or fly direct between any Federally operated navigation aids.

In the case of direct flgts (from 24,000' through 26,000') the aids selected to define the route must not be more than 200 n mi apart, and the track to be made good will be direct between aids. The aids selected will be compulsory reporting points, and other position reports may be requested by air tfc control when needed.

C. Cruising Altitudes - Acft operg in accordance with IFR within the continental control area must be flown at the alts assigned by air tfc control. To assist pilots in flgt planning for IFR operns, the following system of altitude selection may be used:

1. From 24,000' through 28,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	25,000', 27,000'
180-359° inc.	24,000', 26,000', 28,000'

2. At or Above 29,000'

Magnetic Crs	Indicated Altitude
0-179° inc.	4000' intervals beginning at 29,000' (29,000', 33,000', etc.)
180-359° inc.	4000' intervals beginning at 31,000' (31,000', 35,000', etc.)

While controllers will normally use the above system, other altitudes may be used in certain cases. Pilots are cautioned to fly at the alt assigned by air traffic control.

IV. AIR/GROUND COMMUNICATIONS: The CAA is currently installing a VHF and UHF air/ground communications system which will provide direct pilot-controller rdo communications throughout the continental control area. This system will be only partially installed at the time control of all airspace above 24,000' is commenced; therefore, interim communications will be conducted as follows:

Ground Facility	VHF	UHF
A. ARTC	Discrete channel as directed	301.4 or discrete channel as directed
B. ATCS	126.7/126.7, 122.1/VOR or 122.2, 135.0/135.9	255.4 or 301.4 where avail.
C. Airline company radio stations	Company frequency	none

IFR flgts should use direct ARTC controller-pilot communications, where available.

V. SPECIAL OPERATIONS: Certain mil operns cannot be conducted in accordance with the above, for example, missions involving use of radar navigation. Such cases are to be considered exceptional in nature and will be handled by special procedures.

Flgts using celestial navigation will be required to operate VFR or "VFR conditions on top" for those portions of the flgt where celestial navigation is involved. TACAN-only equipped acft will also be required to operate VFR or "VFR conditions on top" for those portions of flgts where designated high-altitude TACAN facilities are more than 200 or 300 n mi apart, as the case may be.

Questions concerning these operns or any phase of the control of all airspace above 24,000' should be referred to the appropriate CAA air route tfc control center.

RUNWAY VISUAL RANGE REPORTS AT NEWARK, N. J.: Effective March 3, 1956, measurements of runway visibility for Runway 4 at Newark, New Jersey, will be in terms of Runway Visual Range which is the distance high intensity runway lights can be seen by an observer located at the runway threshold viewing the lights in the same direction as a pilot making an approach.

The ILS and PAR instrument approach procedures for Newark have been amended to authorize 2000' of runway visual range as an additional operating minimum for straight-in approaches to Runway 4. When measurements of Runway Visual Range are being taken, the tower will give pilots intending to land straight-in on runway 4, the reported Runway Visual Range. When the meteorological ceiling and visibility (contained in "main body" of sequence report which is the average weather for the airport proper) are reported below minimums, (e.g. 200-1/2) an approach may be conducted to Runway 4 provided Runway Visual Range is reported at or above 2600'. The "remarks" portion of the hourly weather sequence for Newark will report Runway Visual Range in hundreds of feet, and runway visibility will no longer be reported in miles and fraction.

Since Runway Visual Range recognizes the additional penetration provided by high intensity runway lights and is measured in terms of what a pilot actually sees, pilots will have better assurance of finding runway conditions substantially as reported when arriving over the threshold.

The Runway Visual Range minimum of 2600' is also based on the penetration ability of the approach lighting system installed at Newark which is designed to assure earlier transition from instrument to visual flight.

✓ PART 600 REVISED: The recent amendments to Part 60 of the Civil Air Regulations adopted by the Civil Aeronautics Board on October 1, 1957, (22 F.R. 7897), authorizing the Administrator to designate a continental control area, specify that the present system of Colored and Victor airways will extend up to but not include 27,000 ft MSL. At and above 27,000 ft MSL, navigation will be conducted primarily on designated high altitude L/MF or VOR facilities which will serve to define the routes to be flown. Such routes, which will be no longer known as civil airways, will be established by the Administrator as Jet Routes and prescribed in Part 602 of this Title. In addition, in order to implement the provisions for a continental control area, the definition of a civil airway is amended to provide that a civil airway extends upwards to, but not including 27,000 ft MSL, within the continental control area.

Since Part 60 was amended some time ago by substituting the term "prohibited area" for "airspace reservation", this amendment now provides for the exclusion of prohibited areas instead of an airspace reservation from the airspace designated as a civil airway.

The explanation of terms is also amended to provide that all bearings used in this part shall be true from the point of origin. This editorial provision eliminates the necessity of repeating the word "true" after each bearing in each airway description.

Inasmuch as the adoption of the amendments to Part 60 by the Board afforded interested persons an opportunity to express their views and comments respecting the redesignation of the civil airways to conform with the amendments to Part 60, further notice and public procedure in accordance with Section 4 of the Administrative Procedure Act is unnecessary and contrary to the public interest. Therefore, the amendment as proposed will become effective on December 1, 1957.

Part 600 is amended as follows:

1. Section 600.2 is amended by adding new paragraphs (d), (e), and (f) to read as follows: 600.2 Explanation of Terms.

(d) As used in this Part all bearings shall be true from the point of origin.

(e) As used in this Part the continental United States shall mean all of the several States of the United States (including the District of Columbia) and the territorial waters and the overlying airspace thereof.

(f) As used in this Part the United States shall mean the territory comprising the several States, Territories, possessions, and the District of Columbia (including the territorial waters thereof) and the overlying airspace, but shall not include the Canal Zone.

2. Section 600.3(a) is amended to read as follows: 600.3 Extent of civil airways.

(a) Unless otherwise specified in Subparts B and C, each civil airway shall include the navigable airspace of the United States above all that area on the surface of the earth lying within 5 miles of the centerline prescribed for each such airway: Provided, That a civil airway lying within the continental United States shall not include the airspace at and above 27,000 ft MSL: Provided further, That a civil airway shall not include any of the airspace of a prohibited area as defined in Part 60 of this title.

✓ PART 601 REVISED: Pursuant to the recent amendments to Part 60 adopted by the Civil Aeronautics Board on October 1, 1957, (22 F.R. 7897), which authorizes the Administrator to designate a continental control area within the United States at and above 24,000 ft MSL, exclusive of prohibited and restricted areas, Part 601 is hereby amended to designate a continental control area. Within the area so designated, air traffic control is to be exercised and the air traffic rules of Part 60 shall apply.

Since the adoption of the amendments to Part 60 by the Board on October 1, 1957, afforded interested persons an opportunity to express their views and comments respecting the designation of this continental control area, in the interest of safety in air commerce, further notice and public procedure in accordance with the Administrative Procedure Act is unnecessary and contrary to the public interest. Therefore, the designation of the continental control area is adopted to become effective on December 1, 1957. In order to accomplish this designation, Part 601 is amended to read as follows:

1. By amending the title of Part 601 to read as follows: Part 601-Designation of the Continental Control Area, Control Areas, Control Zones, and Reporting Points.

2. By amending Sections 601.1 through 601.9 of Subpart A to read as follows:

SUBPART A—INTRODUCTION GENERAL

601.1 Basis and purpose. The basis of this part is found in sections 205 and 601 of the Civil Aeronautics Act of 1938, as amended, and Part 60 of this title. The purpose of this part is to designate the continental control area, control areas, control zones, and reporting points in order to provide for the safety of aircraft operating in interstate, overseas, and foreign air commerce.

601.2 Explanation of terms. As used in this part:

(a) "Control area" shall mean the airspace within an area designated in Subparts B and C, extending upward from an altitude of 700 ft. above the surface, but not including the airspace within that area designated as the continental control area. Within a control area air traffic control is exercised in accordance with the air traffic rules of Part 60.

(b) "Continental control area" shall mean the airspace above 24,000 ft MSL, within the continental United States as designated in Section 601.7101 of this part, within which air traffic control is exercised in accordance with the air traffic rules of Part 60.

(c) "Control zone" shall mean the airspace within an area designated in Subpart D, upward from the surface to include one or more airports and within which rules additional to those governing flight in control areas are prescribed in Part 60 of the Civil Air Regulations, for protection of air traffic.

(d) "Reporting point" shall mean a geographic location in relation to which the position of an aircraft shall be reported in accordance with the requirements of Section 60.47 of this title.

(e) "Mile" means "statute mile" unless otherwise specified in this part.

(f) All bearings shall be true from the point of origin.

CONTROL AREAS

601.9 Lateral extend of control areas. Where a point or intersection prescribed in this Part for designating a control area coincides with a point or intersection specified in designating the centerline of civil airways, the control areas shall include all of the airspace within 5 miles either side of a straight line extended through the center of the points or intersections specified in designating the civil airways and all of the airspace within a 5 mile radius of such points or intersections unless otherwise provided in Subparts B, C and F. In addition, such control areas shall include all the airspace between straight lines connecting the center of the points or intersections specified in designating the main and associated alternate VOR civil airways, unless otherwise specified.

3. A new Subpart H is added to read as follows:

SUBPART H—CONTINENTAL CONTROL AREA

601.7101 Designation of Continental Control Area. The Continental Control Area shall consist of all the airspace above the several states of the United States (including the District of Columbia), and the territorial waters thereof, at and above 24,000 ft MSL, exclusive of restricted and prohibited areas prescribed by Executive Order or in Part 608 of the Regulations of the Administrator.

✓ NEW PART 602 ISSUED: The recent amendments to Part 60 of the Civil Air Regulations, adopted by the Civil Aeronautics Board on October 1, 1957, 22 F.R. 7897, authorized the Administrator, among other things, to designate a continental control area at and above 24,000 ft MSL. Moreover, as stated in the preamble to such amendments, the present system of Colored and Victor airways will extend up to but not include 27,000 ft MSL, within the continental control area. At and above such altitude the Administrator will establish a jet route structure and establish navigational aids for the navigation of jet aircraft within the continental control area.

In view of the above, the Administrator hereby adopts a new Part 602 establishing jet routes within the continental control area. These jet routes are established as direct courses between two or more high altitude navigational facilities or the intersections of their signals and codified for convenience of the users.

In addition to the coded jet routes, this Part also establishes navigational facilities or intersections of their signals between which aircraft may also navigate outside of the coded jet route system.

The jet routes will have no defined width. In view of the operational requirements of Section 60.45(b), that aircraft be flown along the direct courses between navigational aids or fixes defining the route, air traffic control will be exercised on the assumption that aircraft are being flown in compliance with this requirement and lateral separation will be provided accordingly.

Since the adoption of the amendments to Part 60 by the Board afforded interested persons an opportunity to express their views and comments respecting the establishment of high altitude navigational routes, and the amendments have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, further notice and public procedure in accordance with Section 4 of the Administrative Procedure Act is unnecessary and contrary to public interest. Therefore, this Part is adopted to become effective December 1, 1957.

SUBPART A—INTRODUCTION

602.1 Basis and purpose. The basis of this part is found in Section 205 and Section 601 of the Civil Aeronautics Act of 1938, as amended, and in Part 60 of this title. The purpose of this part is to establish coded jet routes between navigational aids, or intersections of their signals, as well as other navigational aids and the intersections of their signals along

and between which aircraft may be operated within the continental control area at or above 27,000 ft MSL.

602.2 Explanation of terms. As used in this Part, terms shall be defined as follows:

(a) "Established Navigational Aid" shall mean navigational facilities or intersections of their signals, which may be used for the navigation of aircraft within the continental control area at and above 27,000 ft MSL.

(b) "Coded jet route" shall mean a direct course for the navigation of aircraft at and above 27,000 ft MSL, within the continental control area, between points of intersections specified for such route. Jet routes are codified as follows:

(1) L/MF jet routes: (i) even numbered routes, (ii) odd numbered routes.

(2) VOR/VORTAC jet routes: (i) even numbered routes, (ii) odd numbered routes.

(3) TACAN jet routes: (i) even numbered routes, (ii) odd numbered routes.

(c) "Mile" means "statute mile" unless otherwise specified in this part.

(d) "Continental control area" shall mean all the airspace above the several states of the United States (including the District of Columbia), and the territorial waters thereof, at and above 24,000 ft MSL, exclusive of restricted and prohibited areas prescribed by Executive Order or in Part 608 of the Regulations of the Administrator.

(e) "INT" shall mean intersection.
(f) "RBN" shall mean radio beacon.
(g) "VOR" shall mean omnirange station.
(h) "RR" shall mean LF or MF radio range station.
(i) "VORTAC" shall mean a collocated VOR and TACAN.
(j) "TACAN" shall mean a military tactical air navigational aid.
(k) "CONSOLAN" shall mean low frequency long range navigational aid.
(l) "FM" shall mean fan marker.
(m) "ILS" shall mean instrument landing system.
(n) "TVOR" shall mean terminal omnirange station.
(o) "OM" shall mean instrument landing system outer marker.
(p) "MM" shall mean instrument landing system middle marker.
(q) "LF" shall mean low frequency.
(r) "MF" shall mean medium frequency.
(s) "VHF" shall mean very high frequency.
(t) As used in this part all bearings shall be true from the point of origin.

602.3 Direction of coded jet routes.

(a) Even numbers are normally assigned to coded jet routes established in a westerly to easterly direction between the initial and final points of such routes, even though portions of such routes may deviate from the westerly to easterly direction between any two or more established intermediate points.

(b) Odd numbers are normally assigned to coded jet routes established in a southerly to northerly direction between the initial and final points of such routes, even though portions of such routes may deviate from the southerly to northerly direction between any two or more established intermediate points.

602.9 Establishment of navigational aids. The points and intersections described in subpart B are established as navigational aids.

(See Federal Register, November 27, 1957, for the listing in subpart B.)

602.10 Establishment of jet routes. In addition to the established navigational aids, the direct courses between the points or intersections described in subparts C, D and E are established as coded jet routes.

(See Federal Register, November 27, 1957, for the listing in subparts C, D and E.)

✓ NEW ATCS FREQUENCY: On January 1, 1958, 120.7 mc transmit will be cmsnd at most ATCS and complete system-wide implementation will be accomplished as rapidly as possible. 120.7 mc will gradually replace 126.7 mc as the ground-to-air reply channel for air-to-ground communications on 126.7 mc. From January 1, 1958, to July 1, 1958, ATCS will continue to use 126.7 mc ground-to-air in reply to acft calls on 126.7 mc. During this period, aircraft desiring ground-to-air reply on 120.7 mc must so state in initial call-up. After July 1, 1958, ATCS will use 120.7 mc ground-to-air in reply to aircraft call on 126.7 mc unless requested by the pilot to reply on 126.7 mc. On January 1, 1960, 126.7 mc will be decmsnd as a ground-to-air channel.

✓ USE OF VOR VOICE CHANNEL: Beginning January 1, 1958, Air Traffic Communications Stations will use the VOR voice channel in reply to air-to-ground calls on 122.1 mc unless (1) reply on 122.2 mc is requested by the pilot, or (2) VOR voice is not available, in which case 122.2 mc will be used.

✓ ATC PROCEDURES - TRAFFIC INFORMATION: On page 59, of the Flight Information Manual Vol. II (dated August 15, 1957) under Traffic Information, right-hand column, revise the first paragraph to read: "TRAFFIC INFORMATION - Essential traffic information is information on same direction IFR aircraft on the same or converging courses which are expected to be overtaken, passed or approached within a distance of less than ten minutes in actual flying time, when such aircraft are 1000 ft or less vertically above or below the aircraft being cleared."

Under Traffic Information, page 59, right-hand column, revise the second paragraph to read: "Traffic information is included in an air traffic control clearance when deemed necessary by a controller or when requested by a pilot."

✓ ATC PROCEDURES - IFR PROCEDURES: On page 60, of the Flight Information Manual, Vol. II (dated August 15, 1957) under Position Reporting, amend same to read: POSITION REPORTING - Pilots are required to maintain a continuous listening watch on communications channels appropriate to the route being flown and furnish position reports over the appropriate compulsory reporting points as shown on the Coast and Geodetic Survey Radio Facility Charts and the reporting requirements are as follows:

A. Below 27,000'

Flights Along Airways:

1. Compulsory reporting points for all altitudes: These are indicated on the charts by a solid triangle. A position report will be made by all flights over each of these points along the route of flight.

2. Compulsory reporting points below 15,200': These are indicated on the chart by a solid triangle over a horizontal line. A position report will be made by flights operating below 15,200'MSL when over each of these points along the route of flight, in addition to the compulsory reporting points for all altitudes, except those flights operating on an altitude assignment of "VFR conditions on top."

3. Compulsory reporting points for flights operating on an altitude assignment of "VFR conditions on top": Regardless of the altitude being flown, pilots shall report only over those fixes that are designated as compulsory reporting points for all altitudes. Air traffic control may specify additional reports as required.

Flights Along a Direct Route:

1. Reporting points for direct route flights: Regardless of the altitude being flown, including flights operating on an altitude assignment of "VFR conditions on top", pilots shall report over each reporting point specified in the flight plan defining the route of flight (approximately 200 miles apart). Air traffic control may specify additional reports as required.

Flights Along Airways and/or Direct Routes:

1. "On request" reporting points: These are indicated on the chart by an open triangle. Air traffic control may request a position report over these or any other points from any flight regardless of altitude. All position reports should be made as soon as possible after the aircraft has passed the reporting point.

B. At or Above 27,000'

Flights Along an Established or Direct Route:

1. Compulsory reporting points for all flights: All established high-altitude navigational aids and a small number of intsxn formed by these aids constitute compulsory reporting points. These are indicated on Aeronautical Chart and Information Center High Altitude Facility Charts. Pilots shall report over each fix along the established route, or if direct, over each fix specified in the flight plan defining the route of flight (not more than 300 n mi apart). Air traffic control may specify additional reports as required.

✓ FT WORTH ARTCC CONTROL AND FLIGHT ADVISORY BOUNDARY: Effective immediately, Ft Worth ARTC Center control and flight advisory boundary is revised as follows: FTW and OKC ARTCCs from the E edge of Blue arwy 5, 25 s mi N of the Ardmore H facility direct to a point 55 s mi SE of the OKC VOR on the OKC 110° radial. FTW and STL ARTCCs from a point 55 s mi SE of the OKC VOR on the OKC 110° radial direct to a point 20 s mi W of the MLC VOR on the MLC 257° radial thence along an arc counterclockwise 20 s mi SW of MLC VOR until intersecting MLC 180° radial thence direct to W edge of Blue arwy 13, cross Blue 13, 70 s mi S of FSM VOR. FTW and MEM ARTCCs from the E edge of Blue arwy 13, 70 s mi S FSM VOR direct to NW edge Victor arwy 54N at a point 25 s mi NE of TXK LFR.

✓ MIAMI PREFERENTIAL ROUTES: Effective December 1, 1957, preferential routes in the Miami Control Area for southbound flights landing Miami will be V35, V7, V267, V51. Preferential routes for northbound flights departing Miami will be V3, V97, V157. Pilots are requested to file flight plans accordingly.

✓ NAVIGATIONAL WARNING: USAF jet and conventional bombers will conduct daylgt VFR flights between 500 and 2000 ft above ground level along routes indicated below, climb from last point listed and fly at conventional altitudes over target listed. Flights will be within 20 n mi either side of selected route avoiding built up areas and civil airports.

Route I. 40-18N, 95-40W; 40-26N, 100-16W; 41-08N, 101-57W; 42-12N, 102-27W; 42-52N, 99-37W; 42-46N, 98-05W; target Columbus, Nebraska.

Route II. 40-18N, 95-40W; 41-56N, 94-27W; 45-04N, 95-53W; 46-08N, 93-35W; 46-26N, 89-30W; target Marquette, Mich.

Route III. 39-07N, 92-07W; 37-35N, 89-31W; 37-32N, 88-04W; 36-34N, 88-09W; 36-55N, 90-16W; 36-32N, 92-17W; target Springfield, Mo.

Route IV. 41-40N, 91-24W; 44-03N, 90-00W; 44-55N, 88-30W; 45-50N, 91-05W; 44-35N, 92-37W; 43-00N, 92-45W; target Ames, Iowa.

Route V. 43-04N, 70-48W; 42-41N, 70-47W; 43-04N, 70-41W; 43-26N, 70-26W; 44-28N, 67-35W; 45-11N, 67-41W; 45-58N, 68-09W; 44-11N, 70-54W; target Franklin, N.H.

Route VI. 40-10N, 82-00W; 40-50N, 80-06W; 41-42N, 80-00W; 42-47N, 78-35W; 43-06N, 73-45W; target Rutland, Vt.

Route VII. 39-54N, 76-35W; 38-28N, 78-00W; 37-09N, 76-43W; 36-38N, 78-24W; 36-52N, 80-07W; 37-04N, 80-07W; 37-31N, 79-20W; target Charlottesville, Va.

Route VIII. 39-18N, 97-10W, 39-58N, 99-20W; 40-08N, 101-03W; 39-38N, 102-08W, 38-20N, 102-40W; 37-47N, 100-53W; 37-29N, 98-45W; target Kanopolis Dam, Kans.

Route IX. 39-40N, 94-46W; 40-47N, 92-26W; 41-09N, 89-21W; 40-13N, 88-42W; 39-38N, 89-35W; 39-19N, 92-27W; target Chillicothe, Mo.

Route X. 38-03N, 89-57W; 38-20N, 87-50W; 38-05N, 86-26W; 36-56N, 85-00W; 36-31N, 82-45W; 38-58N, 81-02W; 39-33N, 81-51W; target Columbus, Ohio.

Route XI. 36-47N, 80-03W; 37-00N, 81-58W; 38-29N, 80-17W; 39-54N, 80-44W; 39-42N, 79-23W; 38-15-30N, 78-03-30W; target Richmond, Va.

Route XII. 41-59N, 74-19W; 41-14N, 76-18W; 41-10N, 77-28W; 41-20N, 79-24W; 42-15N, 78-15W; 42-45N, 76-16W; 42-30N, 73-16W; target Springfield, Mass.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as indicated:

(Part 608 - Restricted Area - Amendment 212)
(December 19, 1957)

(1) Section 608.18, the Jacksonville, Fla. area (R-161A formerly R-161) amended January 29, 1956 in 21 F.R. 419 is redesignated as follows: Name and Location (chart): Jacksonville, Fla. restricted area (R-161A) (Jacksonville, Orlando); Description by Geographical Coordinates: Beginning at lat 30-21-20, long. 81-55-45; thence to lat 30-16-45, long. 81-50-25; thence to lat 30-16-45, long. 81-40-00; thence clockwise along an arc of a circle of 3 mi radius centered at lat 30-14-00, long. 81-40-00; to lat 30-14-00, long. 81-37-00; thence to lat 30-14-00, long. 81-36-00; thence to lat 30-10-45, long. 81-35-00; thence to lat 29-44-30, long. 81-35-00; thence to lat 29-44-30, long. 81-42-00; thence to lat 29-50-00, long. 81-57-00; thence clockwise along the arc of a circle 5 mi in radius centered at lat 29-53-20, long. 82-00-25; to lat 29-57-30, long. 82-02-00; but excluding that area one mi on either side of a 220°T brng from and more than 2 mi from lat 29-53-20, long. 82-00-25; thence to lat 30-00-00, long. 82-02-00 thence to lat 30-00-00, long. 82-19-30; thence to lat 30-03-00, long. 82-20-00; thence to lat 30-22-00, long. 82-20-00; thence to point of beginning lat 30-21-20, long. 81-55-45; Designated Altitudes: Surface to unlimited; Time of Designation: Continuous; Controlling Agency: Comfair Jax. NAS, Jacksonville, Fla.

(2) Section 608.18, the Jacksonville, Fla. area (R-161B) is added to read: Name and Location (chart): Jacksonville, Fla. restricted area (R-161B) (Jacksonville, Orlando); Description by Geographical Coordinates: Beginning at lat 30-00-00, long. 82-02-00; thence to lat 29-57-30, long. 82-02-00; thence counterclockwise along the arc of a circle 5 mi in radius centered at lat 29-53-20, long. 82-00-25; to lat 29-53-30, long. 82-03-30; thence to lat 29-53-30, long. 82-18-00; thence to lat 30-00-00, long. 82-19-30; thence to point of beginning lat 30-00-00, long. 82-02-00; Designated Altitudes: From 5000' to unlimited; Time of Designation: Continuous; Controlling Agency: Comfair Jax. NAS Jacksonville, Fla.

(3) Section 608.18, the Jacksonville, Fla. area (R-161C) is added to read: Name and Location (chart): Jacksonville, Fla. restricted area (R-161C) (Orlando); Description by Geographical Coordinates: Beginning at lat 29-44-30, long. 81-42-00; thence to lat 29-44-30, long. 82-00-00; thence to lat 29-49-00, long. 82-00-00; thence counterclockwise along the arc of a circle 5 mi in radius centered at lat 29-53-20, long. 82-00-25; to lat 29-50-00, long. 81-57-00; thence to point of beginning lat 29-44-30, long. 81-42-00; Designated Altitudes: 8000' to unlimited; Time of Designation: Continuous; Controlling Agency: Comfair Jax. NAS Jacksonville, Fla.

(4) Section 608.18, the Jacksonville, Fla. area (R-161D) is added to read: Name and Location (chart): Jacksonville, Fla. restricted area (R-161D)(Orlando); Description by Geographical Coordinates: Beginning at lat 29-44-30, long. 81-35-00; thence to lat 29-23-00, long. 81-35-00; thence to lat 29-23-00, long. 81-40-00; thence to lat 29-21-30, long. 81-40-00; thence to lat 29-21-30, long. 82-01-30; thence to lat 29-33-00, long. 82-13-00 thence to lat 29-42-00, long. 82-14-00; thence to lat 29-53-30, long. 82-18-00; thence to lat 29-53-30, long. 82-05-30; thence counterclockwise along the arc of a circle 5 mi in radius centered at lat 29-53-20, long. 82-00-25; to lat 29-50-35, long. 82-04-30; thence to lat 29-52-50, long. 82-02-25; thence counterclockwise along the arc of a circle 2 mi in radius centered at lat 29-53-20, long. 82-00-25; to lat 29-51-35, long. 82-01-15; thence to lat 29-49-35, long. 82-03-00; thence counterclockwise along the arc of a circle 5 mi in radius centered at lat 29-53-20, long. 82-00-25; to lat 29-49-00, long. 82-00-00; thence to lat 29-44-30, long. 82-00-00; thence to point of beginning lat 29-44-30, long. 81-35-00; Designated Altitudes: 15,000' to unlimited; Time of Designation: Continuous; Controlling Agency: Comfair Jax. NAS Jacksonville, Fla.

(5) Section 608.18, the Keystone, Fla. area (R-180) amended June 5, 1957 in 22 F.R. 3922 is rescinded.

(6) Section 608.18, the Bostwick, Fla. area (R-166) amended April 9, 1955 in 20 F.R. 2301 is rescinded.

(7) Section 608.28, the Patuxent River, Md. area (R-43) amended October 31, 1951 in 16 F.R. 11066 is redesignated as follows: Beginning at the town of Federalsburg, Md lat 38-41-15, long. 75-46-00; thence southerly to Sharptown, Md. lat 38-32-30, long. 75-43-45; thence SE to Fruitland, Md lat 38-19-00, long. 75-37-00; thence southerly along the railroad to Princess Anne, Md lat 38-12-30, long. 75-41-30; thence southwesterly to lat 38-02-30, long. 75-52-30; thence S to the W bndry of Victor 1 at lat 37-55-00, long. 75-52-30; thence southwesterly to lat 37-46-39, long. 75-57-43; (which is on the eastern bndry of R-88 and which is the point of beginning of the Chesapeake Bay, Virginia Controlled Firing Area); thence following the circumference of R-88 (5 n mi radius) to lat 37-45-00, long. 76-08-51 (which point is located in the southern circumference of R-88 and on the northern bndry of R-388); thence due W to lat 37-45-00, long. 76-23-30; thence northwesterly to lat 37-50-30, long. 76-32-00; thence northerly to lat 38-05-10, long. 76-34-15; thence northeasterly to lat 38-11-10, long. 76-25-10; thence northeasterly to lat 38-30-00, long. 76-04-00; thence northeasterly to New Market, Md. lat 38-36-00, long. 75-55-30; thence northeasterly along the railroad to Federalsburg, Md lat 38-41-15, long. 75-46-00; the point of beginning. (Note: From 3500' to an unlimited altitude excluding R-39, R-418, R-88, R-41 and excluding R-71, below 5000').

(8) Section 608.54, the Chesapeake Bay, Va. area (R-388) amended October 24, 1956 in 21 F.R. 8144 is redesignated as follows: Name and Location (chart): Chesapeake Bay, Va. restricted area (R-388) (Norfolk); Description by Geographical Coordinates: Beginning at lat 37-43-33, long. 76-00-45; thence southerly to lat 37-33-00, long. 76-03-55; thence northwesterly to lat 37-33-00, long. 76-08-34; thence northerly to lat 37-45-00, long. 76-09-48; thence due E to lat 37-45-00, long. 76-08-51; thence along the circumference of the Tangier Island Restricted Area R-88, 5 n mi radius to the point of beginning at lat 37-43-33, long. 76-00-45; Designated Altitudes: Surface to 30,000'; Time of Designation: Daylgt and darkness, 7 days a week; Controlling Agency: Virginia Capes Operating Area Coordinator NOV, Norfolk, Va.

✓ FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

✓ ATC PROCEDURES - SEPARATION STANDARDS: On page 58, of the Flight Information Manual Vol. II (dated August 15, 1957) under Air Traffic Control Procedures, Separation Standards, left-hand column, amend paragraph two to read: "In addition, opposite direction aircraft operating on LF airways may be separated by instructing the pilots to fly to the right of the range course which is projected along the airway. This is normally used for altitude change only."

✓ CHART CORRECTION: Coast and Geodetic Survey RF chart revision notice dated November 6, 1957, as follows: disregard item two listed under RF 30.

AERONAUTICAL CHARTS OF THE U.S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum until new edition is printed.

Albany	Detroit	Twin Cities	WAC 77
Boston	Green Bay	Detroit Local	WAC 216
Butte	Milwaukee	San Juan Local	WAC 217

NEW EDITIONS

A new edition or new chart for the charts listed below is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

ON REQUEST REPORTING POINTS: The following on request reporting points are redesignated, or changed and shall become effective December 19, 1957:

REDESIGNATED:

(1) BROOKVILLE, IND. (VHF) INTSXN - the intsxn of the 029°M radial of the Nabb, Ind. VOR and the 321°M radial of the Cincinnati, Ohio VOR.

(2) MORRIS, IND. (VHF) INTSXN - the intsxn of the 029°M radial of the Nabb, Ind. VOR and the 306°M radial of the Cincinnati, Ohio VOR.

(3) NAVASOTA, TEX. (VHF) INTSXN - the intsxn of the 007°M radial of the Eagle Lake, Tex. VOR and the 115°M radial of the College Station, Tex. VOR.

(4) OSGOOD, IND. (VHF) INTSXN - the intsxn of the 029°M radial of the Nabb, Ind. VOR and the 290°M radial of the Cincinnati, Ohio VOR.

(5) WHITE WATER, KANS. (VHF) INTSXN - the intsxn of the 027°M radial of the Wichita, Kans. VOR and the 080°M radial of the Hutchinson, Kans. VOR.

CHANGED:

(1) HOLYOKE, COLO. (VHF) INTSXN - the intsxn of the 121°M radial of the Sidney, Nebr. VOR and the 234°M radial of the North Platte, Nebr. VOR.

(2) HOPE, IND. (VHF) INTSXN - the intsxn of the 136°M radial of the Indianapolis, Ind. VOR and the 351°M radial of the Nabb, Ind. VOR and the 171°M radial of the Shelbyville, Ind VOR.

(3) KENTLAND, IND. (VHF) INTSXN - the intsxn of the 151°M radial of the Peotone, Ill. VOR and the 311°M radial of the Lafayette, Ind. VOR and the 060°M radial of the Roberts, Ill VOR.

(4) LEBANON, IND. (VHF) INTSXN - the intsxn of the 343°M radial of the Indianapolis, Ind. VOR and the 131°M radial of the Lafayette, Ind. VOR and the 313°M radial of the Shelbyville, Ind. VOR.

(5) SUTRO, CALIF. (VHF) INTSXN - the intsxn of the 249°M radial of the Oakland, Calif. VOR and the 287°M radial of the Agnew, Calif. VOR.

(6) ZIONSVILLE, IND. (VHF) INTSXN - the intsxn of the 020°M radial of the Indianapolis, Ind. VOR and the 313°M radial of the Shelbyville, Ind. VOR.

HOLDING PATTERNS: The following holding patterns have been designated, redesignated, changed or cancelled and shall become effective December 19, 1957:

DESIGNATED:

(1) ROUND ROCK, TEX. (VHF) INTSXN - direction of holding - N on 007°M radial of the Austin, Tex. VOR; direction of turns - right; time - 2 mins; min alt 4400'.

(2) WALBURG, TEX. (VHF) INTSXN - direction of holding - N on 007°M radial of the Austin, Tex. VOR; direction of turns - right; time - 2 mins; min alt 4000'.

(3) BUTLER, TEX. (VHF) INTSXN - direction of holding - E on 100°M radial of the Austin Tex. VOR; direction of turns - right; time - 2 mins; min alt 2500'.

(4) OAK HILL, TEX. (VHF) INTSXN - direction of holding - SW on 213°M radial of the Austin, Tex. VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(5) JOHNSON CITY, TEX. (VHF) INTSXN - direction of holding - N on 353°M radial of the San Antonio, Tex. VOR; direction of turns - right; time - 2 mins; min alt 4000'.

(6) MARBLE FALLS, TEX. (VHF) INTSXN - direction of holding - NW on 284°M radial of the Austin, Tex. VOR; direction of turns - right; time - 2 mins; min alt 3500'.

REDESIGNATED:

(1) WHITE WATER, KANS. (VHF) INTSXN - direction of holding - NE on 027°M radial of the Wichita, Kans, VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(2) FLORENCE, KANS. (VHF) INTSXN - direction of holding - NE on the 027°M radial of the Wichita, Kans. VOR; direction of turns - right; time - 2 mins; min alt 3000'.

(3) MARLOW, GA. (VHF) INTSXN - direction of holding - W on 284°M radial of the Savannah, Ga. VOR; direction of turns - left; time - 1 min; min alt 2000'.

CHANGED:

(1) MAXWELL, IND. (VHF) INTSXN - direction of holding - E on 083°M radial of the Indianapolis, Ind. VOR; direction of turns - right; time - 2 mins.

CANCELLED:

(1) LOSOYA, TEX. (LF) INTSXN - direction of holding - S on S crs of the San Antonio, Tex. LFR; direction of turns - right; time - 2 mins; min alt 2200'.

WATERVILLE, OHIO VOR SHUT DOWN: During shutdown (Dec 2 through approx Dec 23) the following changes will apply to the airway structure:

V275 between VWV and CRL VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V6, V126 and 1510 between VWV and CLE VORs replaced by G3, MEA published. V30 between VWV VOR and Bellevue VHF intsxn replaced by TOL LFR 301°M brng inbnd to point of intsxn with W crs of EOW variation, MEA 2000. V92 between VWV and MFD VORs replaced by TOL LFR direct MFD VOR, MEA 2500. V45 and 1506 between VWV and APE VORs replaced by TOL LFR direct APE VOR, MEA 2500. V47 and V275 between VWV and FDY VORs replaced by FDY VOR direct CRL VOR, MEA 2500. V96 between VWV and FWA VORs replaced by TOL LFR direct FWA VOR, MEA 3000. V92, V126 and 1510S between VWV and Edgerton VHF intsxn replaced by G3, MEA published. V6 and 1510 between VWV VOR and Pioneer VHF intsxn replaced by TOL LFR 108°M inbnd to the point of intsxn with SBN VOR 092° radial, MEA 5000. V30 and 1506 between VWV and LFD VORs replaced by R57, MEA published. V47 between VWV VOR and Milan VHF intsxn replaced by B87, MEA published.

Intsxn listed below have been revised as outlined during the period of outage: (a) Carp VHF intsxn - SVM VOR 126° radial and CLE VOR 355° radial, MRA 2500'. (b) Perch VHF intsxn - SE crs RML LFR and 231°M brng inbnd from TOL LFR, MRA 2500'. (c) Ogden VHF intsxn - CRL VOR 237° radial and 135°M brng inbnd from TOL LFR, MRA 2600'. (d) McCluge VHF intsxn - FDY VOR 320° radial and the 080°M brng inbnd from TOL LFR. Holding to be accomplished on the FDY VOR 320° radial. Right turns. One min pattern. MRA 2000'

FLIGHT INFORMATION MANUAL CORRECTIONS: Correct Flight Information Manual Vol. II dated August 15, 1957, as follows:

(1) Page 21, Tampa, Fla. - change WB telephone number to REdwood 7-3617.
(2) Page 21, Springfield, Ill. - change WB telephone number to 3-5812*.
(3) Page 22, Grand Marais, Mich. - change CAA telephone number to 421.
(4) Page 22, Boston, Mass. - change WB telephone number to LO 7-4032.
(5) Page 22, Boston, Mass. - change CAA telephone number to LO 7-0015.
(6) Page 23, Oklahoma City, Okla. - change WB telephone number to MU 5-6350*.
(7) Page 23, Las Vegas, Nev. - change CAA telephone number to DU 4-2205.
(8) Page 24, Nashville, Tenn. - change CAA telephone number to AL 6-2237.
(9) Page 24, Galveston, Tex. - change WB telephone number to SO 3-2767*.
(10) Page 26, Region 1 - Air Carrier Safety - Boston, Mass. change telephone number to LO 7-1224.
(11) Page 29, Nantucket Shoals Lightship - correct position is 40-33-00N, 69-28-00W.
(12) Page 31, under Arizona, Prescott Radio Station KYCA, change transmitting freq to read: 1490 kc; change hrs of operation to read: 0600-2300.
(13) Page 34, under Ill., Aurora Radio Station WMRO, change location to read: In city; change latitude to read: 41-44-58.
(14) Page 36, under Mass., Worcester Radio Station WABB, change direction from city to read: 4 NNW.
(15) Page 75, add - Jacks Creek, Tenn. (Site 53, DAL-LOU): --267°; over beacon twr MKL; 1000'.
(16) Page 78, delete - Brunswick, Ga.
(17) Page 81, add - Rapid City, S. Dak.: 318°; lctd in front admin bldg adj to center taxi strip.
(18) Page 60, under Air Traffic Control Procedures, IFR, paragraph on "Position Reporting" is amended. See page 7 of this Airguide for new text.

REDESIGNATION OF THE DENVER-MINNEAPOLIS CENTER CONTROL AND FLIGHT ADVISORY BOUNDARY: Effective immediately, the Denver-Minneapolis Center Control and Flight Advisory Boundary is redesignated as follows: from a point 104-02W, 45-00N, eastward along the 45th parallel to a point 101-00W, 45-00N, thence southward along the 101st meridian, to a point 101-00W, 43-00N, such line crossing and forming the Denver-Minneapolis control boundaries on civil Arwys Victor 26, Victor 26N, Red 31 and Victor 1502.

AIRMAN'S GUIDE CORRECTIONS: Correct Airman's Guide, Vol. 12, No. 16, dated October 15, 1957, as follows:

(1) Page 37, item 9 Holding patterns - Marlow Int. Ga., correct direction of turns to read: "left".

DISCONTINUANCE OF AIRWAY BEACONS: Effective December 10, 1957, the following airway beacons will be discontinued: Reed Point, Mont. Site 15, 5 mi NW of Reed Point; Canyon Creek, Mont. Site 18, 9 mi NW of Laurel; Thurlow, Mont. Site 32, 6-1/2 mi W of Sheffield; Sutherland, Mont. Site 37, 2-1/2 mi W of Sutherland; Beacon Rock, Wash. Site 3A, 2 mi NE of Skamania; Espanola, Wash. Site 22, 2 mi W of Medical Lake; Wilbur, Ore. Site 41B 1/2 mi SE of Wilbur; Vader, Wash. Site 63A, 1 mi SE of Vader.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) Month and day item was reported.
** New or revised airport, caution area or miscellaneous data. Pilots should inscribe this information on charts and records.
* New or revised radio data. Pilots should inscribe this information on charts and records.
NOTE: Because of space limitations, such data usually are cited only once.

ALABAMA: ANNISTON-RADIO: VOR courses 360°-07° have bends and roughness out of tolerance. (12-1)
AUBURN-OPELIKA ARPT: Lgtg facs inop. (7-6)
**BESSEMER ARPT: Name change. Formerly carried as Durham Arpt. (12-1) Caution drag strip runs parallel to sod lndg strip with separation of 50'. Auto racing is not done on rnwy. Drag strip ends mrkd. Racing Sun only. (9-28)
BIRMINGHAM-RADIO: VOR operg test basis only, at lat 33-40-11, long. 86-53-58, about 10 n mi NW Birmingham Mun arpt. (12-14) Caution - all arwys and Ints based on Birmingham or Meridian VORs are not usable for navigational purposes until the stns are recmsnd at new lctns. (4-18) Until cmsng VOR, V7E temp designated BHM LFR to Tanner Int. via ADF track of 350° mag from BHM LFR, MEA 4500'. (8-27) Temp MEA CHA VOR to TCL VOR V115 and V18 N, 5000'. (10-21)
BIRMINGHAM ARPT-TOWER: Aug 7, ILS MM and LMM shut down - relctn. FLD: Caution tfc operg in area from 165° clockwise thru 235° not visible from twr to dist of 4 s mi. Rnwy 8-26 perm clsd to high performance single engine conventional lndg gear type acft including T-6. Rnwy 18-36 clsd between 0800-1700 daily unless otherwise advised by ctl twr. (7-9) Acft requiring after-burners prohibited use of arpt. Exten const work in progress SW end NE/SW rnwy. (4-9) ILS apch lgt lane shut down until approx thru Nov for relctn due rnwy ext. (5-1)
DOTHAN-NAPIER FLD: Caution - helicopters from Rucker Army Air Base trng.
ENTERPRISE ARPT: Const. Clsd until approx Dec 1. (10-16)
EVERGREEN-RADIO: VOR radials 320° thru 360 out of tolerance acct excessive roughness and bends. (9-23)
EVERGREEN-MIDDLETON ARPT, 20, MSY-ATL: Rnwy and threshold lgts inop. (2-6)
FAIRHOPE-KLUMPP ARPT: 999'(1201MSL) lgtd twr being erected 9 n mi N(12°T) at lat 30-40-55, long. 87-49-41. (11-13)
**FLOMATON ARPT: Now a pvt arpt. (11-56)
**GUNTERSVILLE ARPT: Caution, paved drag strip 200' E of rnwy. (9-30)
HUNTSVILLE-RADIO: VOR radials 005°-030° have roughness and bends out of tolerance.
**HUNTSVILLE ARPT: Unicom decmsnd. (9-23)
MOBILE-RADIO: June 19, VOR arwy radials flgt-checked. Radial 018°-028° out of tolerance due to severe scallcping. (6-19)
MOBILE-BATES FLD-TOWER: June 19, ILS not to be used for automatic apch below 300'. Glide slope inop - equip. and const vcnty transmitter bldg. FLD: Unlgtd trees penetrate apch zone to all rnwys. Use caution; 200' & 1/2 mi is absolute tk-off min for all acft. (4-22) Due space shortage, all transient and lcl acft not permitted parking space on admin bldg ramp xcpt enplaning and deplaning passengers. Use facs E side of fld. (11-10)
MONTGOMERY-SPECIAL NOTICE: All acft operg in the Maxwell AFB and Dannelly Fld ctl zones are cautioned to maintain cont rdo ctc with the appropriate ctl twr. Exten flying of both conventional and jet type acft in progress at both arpts. (4-19)
MONTGOMERY-DANNELLY FLD: Dips in E/W rnwy 1500' from E end. Lgtd ditch approx 200' NE of apch end of rnwy 21. Twr unable to ctl taxiing acft on E/W taxiway from a point adj to ANG hangar to W end. Use caution taxiing. (2-11)
**TALLADEGA ARPT: City name change. Formerly carried under Anniston. (7-3)
ARIZONA: AJO ARPT: Beacon and lights inoperative. (10-24)
CLEMENCEAU-COTTONWOOD-CLEMENCEAU ARPT: All servicing temp suspended. Fld open days only. Rnwy avail. ngts upon prior req. Emerg only. (4-23)
CLIFTON-GREENLEE COUNTY ARPT: Clsd until approx Dec 1, 1957. (9-17)
COCHISE-RADIO: VOR/DME coverage 015°-045°, 30 n mi; 090°-110°, 40 n mi; 190°-215°, 35 n mi; 215°-235°, 30 n mi; 235°-255°, 35 n mi at MEA. (5-8)
FT HUACHUCA-SPECIAL NOTICE: Caution - extensive artillery firing and drone flying in immediate vicinity. Two-way rdo and prior clearance from Libby AAF twr required before flgt within R-181. Libby twr gds: 121.5, 122.5, 126.3, 126.18, 243.0 mc. Rdo bcn (FHU 410 kc) and TVORW (FHU 111.6 mc) only rdo aids to air nav suitable for normal use. Other experimental rdo nav aids oper from time to time not suitable for use under any circumstances. Army Electronic Proving Ground reports that on several occasions, civil acft have been endangered by failure to observe the requirements listed. (4-19)
GILA BEND-RADIO: VOR has slow bends and scalloping starting at 17 n mi and 8000' MSL on 247° radial beyond tolerance. (10-18)
GLEN CANYON DAM SITE-SPECIAL NOTICE: Pilots should not fly below canyon rim. Cables strung across canyon. (11-1)
GRAND CANYON-SPECIAL NOTICE: Pilots should not fly below rim of canyon. Cable, not readily visible to acft, strung across canyon lctd near Quartermaster Point in Lower Granite Gorge between Pierce Ferry and Spencer Canyon. (1-2)

ARIZONA: MARANA ARPT: Reported inactive. (10-2)
PHOENIX-SKY HARBOR ARPT: Clsd to mil F-89 type acft or acft requiring use of after burners for take-off xcpt prior permission arpt manager. (12-7) Men and equip along N edge rnwy 26L from apch end to point approx 2000'W. (8-23)
PRESCOTT-RADIO: VOR coverage 185°-225°, 35 n mi at 10,000' 135°-145°, and 165°-185°, 39 n mi at 10,000'. Nov 18, VOR shut down until approx Mar 3, 1958, conversion to VORTAC. During this period, the following arwys will be unusable during IFR conditions: V12 EED-INW; V105 White Hills Int-PHX; V105E PRC-PHX. (11-18)
SAN SIMON-RADIO: VOR coverage 030°-070°, 30 n mi; 160°-260°, 30 n mi. (7-17)
SCOTTSDALE-THUNDERBIRD #2 ARPT: Clsd. (3-26)
**SEDONA-OAK CREEK CANYON ARPT: Name change. Formerly carried as Oak Creek Arpt. Longest rnwy avail 3400'. (4-16)
SPRINGERVILLE-EAGER ARPT: E/W and NW/SE strips rough. (11-19)
TUCSON ARPT-SPECIAL NOTICE: As required, target towing on a direct route off arwy to Ajo, Ariz. to be conducted week-ends - caution. (2-15)
TUCSON-RADIO: VOR/DME coverage: 360°-050°, 35 n mi 11,000'; 050°-060°, 22 n mi at 11,000'; 060°-075°, 35 n mi at 11,000'; 075°-085°, 21 n mi 11,000'; 090°-170°, 40 n mi 12,000'; 225°-230°, 40 n mi 7000'; 330°-345°, 35 n mi 11,000'; 345°-360°, 25 n mi 11,000'. (7-17) About Jan 5, VOR will be shut down until approx Feb 5, VORTAC conversion; following Victor arwys unusable during IFR conditions: V-16 Toltec Int CIE, V-66 GBN-Mescal Int, V16-S TUS-Mescal Int. (11-18)
TUCSON ARPT: Perm structures in excess of 75' high being erected, 1 on E, 1 on S perimeter of fld. Clear of apchs. Lgtd at ngt. Obstn lgts apchs to rnwy 21 inop. (11-15)
TUCSON-DAVIS MONTHAN AFB-RADIO: USAF UHF/DF steers unreliable beyond 35 n mi at or below the following alt: (a) NW quad 10,000'; (b) SW quad 10,000'; (c) SE quad 12,000'; (d) NE quad 13,000'. (6-20)
YUMA-RADIO: VOR coverage 280°-300°, 30 n mi MEA. (5-18)
YUMA-VINCENT AFB-SPECIAL NOTICE: Ngt weapons firing will be conducted for an indefinite period in R-309 by acft from Vincent AFB. The weapons fired leave a brilliant trail of lgt and some of them explode a small marker charge after a few miles travel. These weapons will be readily visible from Red 9 or Victor 66 arwys and could easily be mistaken for a burning acft, meteor, or unidentified flying object. They are in no way dangerous to acft outside of R-309. (11-4)
**YUMA-VINCENT AFB: All acft not equipped with 2-way rdo are advised to use extreme caution while operg within a 5 mi radius of arpt due to hvy jet tfc. B-57 acft towing 10,000' of cable and tow target in vcnty. All acft refrain from flying in close proximity of B-57 type acft in Yuma area. (2-11) Jet barriers installed rnwy 3-21. (9-3)
ARKANSAS: **BENTON-SALINE CO ARPT: New arpt. Type "P"; lat 34-33, long. 92-36; lctd W; hwy N; elev: 325'; 1 strip turf; 2850' x 250'; no services. (1-15)
BLYTHEVILLE-SPECIAL NOTICE: All acft operg under VFR adj to Blytheville AFB are advised to use extreme caution due to extensive IFR jet tfc. (7-18)
LITTLE ROCK-ADAMS FLD: Trenches 6" wide, 30" deep being dug and back filled approx 12' both sides rnwy 17-35. Caution advised. (11-5)
**MARIANNA ARPT: New arpt. Type "L"; lat 34-47, long. 90-48; lctd 1 mi W; RR W; elev: 181'; 1 rnwy - 2640' x 300' (sod)' minor repairs and 80 oct fuel on call; caution - ruf. (3-6)
**NORTH LITTLE ROCK MUN ARPT: New fld: Type: L. Lat 34-50, long. 92-16. Lctn: 4.5 mi N. Elev: 545. No. of rnwys: 1. Longst rnwy and facs: 32.
TEXARKANA-RADIO: DME coverage 145°-235°, 1700'MSL 30 n mi; 235°-270°, 1800'MSL 35 n mi. (5-21)
CALIFORNIA: APPLE VALLEY ARPT: Caution - const - men and equip on fld. (4-26)
ARCATA-RADIO: VHF/DF coverage 40 n mi at MEA xcpt 030°-040°, 11,000'; 040°-060°, 12,000'; 060°-090°, 13,500'. (8-9)
BASS LAKE-WISHON ARPT: Clsd to all operns until further notice. (8-23)
BLYTHE-RADIO: VOR/DME coverage 45 n mi xcpt 25 n mi 180°-200°; 30 n mi 280°-300° 20 n mi 300°-320°; 35 n mi 345°-015° at MEA. (8-20)
**BONSALL-SHEARER'S RANCH ARPT: Abandoned. (2-4)
BRIDGEPORT-BRYANT ARPT: Const on ctr 40' entire length of rnwy. Acft use area either side of const zone. (9-11)
CAMARILLO-RADIO: All courses have multiples. (6-17)
**CONCORD-BUCHANAN FLD: Effective Oct 15, right hand tfc estabd on rnwys 14 and 19. Pat. alt 800' indicated. Rnwy 6-24 to be used only for hi-velocity wind conditions. Low flgt over populated areas should be avoided as far as practicable.
CRESCENT CITY-RADIO: VOR arwy radials flgt-checked. Courses 90°-330° usable dist 22 n mi; 350°-90°, 26 n mi at 7000'; 43 n mi at 8000'.
DAGGETT-RADIO: VOR flgt-checked on arwy radials only.
DINUBA-ALTA ARPT: Arpt unlgtd. (4-22)
DIXON ARPT: Clsd. (8-30)
ELSINORE ARPT: Caution - glider activity week-ends. Squirrel holes S edge of lndg area.
FAIRFIELD-TRAVIS AFB-RADIO: LFR has splits and multiples beyond 20 mi. (8-27)
FILLMORE-RADIO: VOR coverage 320°-355°, 35 n mi at 11,000'; 280°-320°, 26 n mi at 11,000'.
**FORT BRAGG-UNION LUMBER COMPANY ARPT: Now a private arpt. (2-5)
FT JONES-RADIO: VOR has lgt crs roughness all quads. Only arwy radials flgt-checked. Sept 19, VOR shut down, modernization. During this period the following arwys will be unusable for IFR opern: V23 Red Bluff - Talent Int: V23E Fort Jones - Klamath Junction int. The Bray Int will be unusable. (11-7)
FORTUNA-RADIO: VOR has lgt to moderate scalloping beyond 26 n mi. Only arwy radials flgt-checked. (10-6) DME coverage 335°-350°, 43 n mi at 3000'; 350°-10°, 43 n mi at 8000'; 10°-30°, 43 n mi at 9000'; 30°-120°, 35 n mi at 9000'; 120°-150°, 35 n mi at 6500'; 150°-335°, over water, not checked.
FRANKLIN ARPT: Rnwy 15-33 clsd. (7-12)
**FRESNO AIR TERM: Extreme caution advised in vcnty of arpt. Jet acft climbing and descending in areas of extended centerlines rnwys 11-29 and areas N and E of arpt. Jet barriers installed both ends rnwy 11-29. First 1000' of pavement apch end rnwy 29 converted to overrun area and mrkd accordingly. This area behind barrier, not to be used as rnwy. Barrier located 150' from end of rnwy. Barrier on NW end rnwy 11-29 lctd 150' from end of rnwy in dirt overrun area. Approx 15 min required to change barrier from up/down positions. Normally barrier at end of rnwy in use will be in up position. Use caution taxiing in vcnty of apch end rnwy 25 and overrun area rnwy 11. ALS lgts loctd both sides overrun area. Longest rnwy avail 6083'. (11-8)
**GASQUET ARPT: Caution - road materials piled S side. (9-23)
**GLENDALE-GRAND CENTRAL ARPT: NW/SE taxi strips SW side of fld perm clsd. Extensive const in progress. Fld clsd to all acft at sunset. (10-5)
★GOFFS-RADIO: Nov 8, VOR cmsnd. Freq: 108.2 mc. Ident: GFS. Lctd lat 35-08-00, long. 115-11-28. Elev: 3400'MSL. Monitoring category (3). Class: VORW. Coverage 265°-310°, 25 n mi at MEA. Below 9500' this area beyond tolerance. (11-8)
LONG BEACH-RADIO: DME coverage 43 n mi as follows: 280°-305°, 5000'; 305°-340°, 7000'; 340°-040°, 12,000'; 040°-070°, 8000'; 070°-100°, 7000'; 100°-280°, 4000'. (9-13)
LONG BEACH ARPT-TOWER: ILS glide slope shut down indef. (10-4) VHF/DF bearings unreliable below 12,000'MSL. SW quad between 200°-230°. Nov 14, ASR shut down until approx Dec 5 - modernization. (11-15)
**LONG BEACH ARPT: Several 230'MSL portable oil derricks NW, W and S of fld. No fuel servicing avail for civil acft 2400-0600. Neon apch lgt lane rnwy 30 discontd indefinitely. (1-1) Caution - temp p-line with wooden poles 29' high serving const camp erected approx 315' S of and roughly parallel to apch end rnwy 30 for 800'. (3-22) Rnwy 30 clsd all lndgs 0700-1500P week-days only due 100' booms in apch area. First 800' rnwy 30 and adj taxiways clsd const; 6200' avail lndg and take-off. Rnwy 12 clsd. Until further notice, straight-in ILS lndg min rnwy 30 daylgt hrs only - 500'/1 mi. (6-25)
LOS ANGELES-RADIO-SPECIAL NOTICE: Transcribed wea bdcasts shut down - modernization. Manual bdcast continues on VOR and both VOR and LF combined. (4-26)
LOS ANGELES-RADIO: VOR coverage 275°-315°, 30 n mi at min en route alt. Light to moderate scalloping below 3000'MSL. (10-23)
LOS ANGELES INTNL ARPT-TOWER: VHF/DF unreliable 045°-060° below 13,000'MSL beyond 30 n mi. (4-19) About Dec 1, ASR will be shut down until approx Dec 22 - equip
** modification. (11-7) FLD: Use paved areas only. New lgtd rnwy 16-34 approx 4000' W of Sepulveda Blvd clsd - avail 30-min req thru twr. Equip crossing rnwy. During VFR wea conditions, civil acft ctc twr on 118.9 mc or listen 118.9 mc, trans 122.7 mc at least 10 mi out. During IFR wea, civil acft ctc Apch Ctl on 118.1 or 119.3 or listen 118.1 or 119.3 mc and trans 122.7 mc. USAF-NAVY-CG: VHF equipped acft ctc Apch Ctl on 118.1 or 119.3 mc. UHF equipped acft ctc Apch Ctl on 250.2 or 269.0 mc. Pilots are urged to use extreme caution when operg off-shore W of arpt. All jet acft departing rnwys 25L-25R climbing in VFR conditions use a 200° departure corridor which originates at a max of 3000'MSL approx intsxn of extended centerlines of above rnwys with the shoreline. Acft proceeding E-bound from Malibu or Pt. Dume intsxns in VFR conditions making a track which approx extended centerlines of above rnwys are cautioned not to descend below 4000' MSL until passing shoreline or Los Angeles Omni, unless cleared otherwise by Air Traffic Ctl.

CALIFORNIA: Jet aircraft pattern downwind leg is 1500'MSL. Acft not intending landing at arpt should avoid apch areas to W of arpt and E of arpt between Downey rbn and arpt below 3000' in VFR wea. If desiring to cross apch area below 3000' ctc Los Angeles Apch Ctl before crossing. Recommended cross tfc plan crossing crs at 3000' or above ceiling permitting, directly over arpt or between LFR and arpt. Avoid shoreline W due hi-performance jet acft. Due non-visibility twr unable ctl tfc last 2400' rnwy 34.

LUCERNE VALLEY-DOUBLE J RCH ARPT: Length of strip reported increased to 3000'.

MENDOTA ARPT: New arpt reported: Lctd 1/4 mi E; elev: 174'; 1 rnwy (15-33) 2300' x 90' (dirt and sand compact); remarks - 6' fence at each end. (7-23)

MOFFETT FIELD-SPECIAL NOTICE: Due to hvy jet tfc acft operg vcnty Moffett Fld ctl zone in VFR wea exercise extreme caution passing thru ctl zone at alts below 2000' VFR and below 4000' during stratus conditions. (6-17)

MONTEREY-PENINSULA ARPT-TOWER: ILS unsuitable for auto apchs. Unusable between LMM and apch end rnwy. (10-21)

OAKLAND-SPECIAL NOTICE: Pilots proposing transbay flgt should ascertain that VFR wea exists within both San Francisco and Oakland Control Zones, or should obtain ATC clearance for flight within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two terminals. Rotating beam ceilometer in opern. Hereafter ceiling observations of less than 1500' will usually pertain to the middle mrkr location. Tfc operg in VFR weather should avoid vcnty of Alameda NAS. Extensive tfc including jets operate in tfc pat up to 2000' within a radius of 1.7 n mi of fld. Exercise extreme caution in these areas.

OAKLAND-RADIO-SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flgt into Oakland, Alameda NAS or Hayward should contact Oakland apch control on 118.1 mc, or proposing IFR flight into San Francisco should contact San Francisco apch control on 118.5 mc. Communications during IFR flgt should not be conducted with Oakland apch control or San Francisco apch control utilizing the freq 126.18 mc unless 118.1 mc is not avail. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flight into Oakland, Alameda NAS, Hayward or San Francisco. (7-18)

OAKLAND-RADIO: VOR coverage 35 n mi N thru E at min instr alt. (1-14) DME coverage 30°-60°, 26 n mi at 5000'; 60°-80°, 35 n mi at 5000'; 280°-290°, 35 n mi at 4000'; 340°-350°, 35 n mi at 6000'; 350°-030°, 17 n mi at 4000'.

OAKLAND-AIR ROUTE TRAFFIC CONTROL CENTER-SPECIAL NOTICE: Jet approaches and lndgs at Oakland, San Francisco and Sacramento, as depicted on apch plates JAL-294-RNG, JAL-375-RNG and JAL-358-ADF, are to be used for emerg only. (4-24)

OAKLAND AIR ROUTE TRAFFIC CONTROL CENTER: VHF/DF operg test basis. Freqs: 118.1; 118.5, 118.9, 119.7, 120.3, 120.5, 120.7, 121.5, 122.1, 124.3, 124.9, 126.18 mc. Coverage 40 n mi at MEA xcpt 020°-050°, 8000'MSL. (10-14)

OAKLAND-METROPOLITAN-OAKLAND INTNL ARPT-TOWER: VHF/DF coverage 40 n mi
** at MEA xcpt 340°-030°, 6500'; 030°-040°, 8000'; 040°-060°, 7000'MSL. (8-6) FLD: Dredging and clam shell equipment working S of lndg area. All booms and equip lgtd and marked. Use extreme caution when flying over or within this area. Non-radio acft required to req permission from twr for clearance; make left hand pat before lndg. (10-30) Transmissometer cmsnd. (8-22)

OCEANSIDE-RADIO: July 10, VOR shut down until approx Dec 18, modernization. During this period the following arwys will be affected: V23 LGB-SAN; V208 CAX-TRM when usable. Flgts departing LAX via V208 will be cleared from intsxn LAX VOR radial 170 and LGB VOR radial 205 direct to Avalon LF Int. R65 to OCN during shutdown period.

ONTARIO-RADIO: VOR/DME coverage 135°-150°, 26 n mi at 7000'; 150°-200°, 17 n mi at 7000'; 200°-280°, 35 n mi at 7000'; 330°-350°, 26 n mi at 13,000'; 350°-360°, 35 n mi at 13,000'. (7-30)

ONTARIO INTNL ARPT: Make turns on or off taxiway S side rnwy 7-25 at intsxns only. Eng run-ups in take-off position rnwy 7-25 prohibited less than 200' from ends of rnwy as marked by yellow paint lines either side. Formation take-offs and landings prohibited xcpt ANG 196th Fighter Interceptor acft. Due to non-visibility twr unable to ctl tfc on ANG ramp and taxiway leading to ANG hangar area. (7-16) Acft not lndg at arpt should avoid apch and departure areas E and W below 3000' MSL in VFR wea. Twr tfc operg in E quad should exercise caution acct exten simulated IFR apchs including jets VFR wea and actual apchs IFR wea. (3-13) Tetrahedron replaced by lgtd wind sock. (10-8)

PALMDALE-EADIO: VOR coverage 120°-150°, 35 n mi at 10,000'; 150°-180°, 35 n mi at 9000'. (3-14)

PASO-ROBLES-RADIO: DME coverage 220°-235°, 35 n mi at 6000'; 235°-245°, 26 n mi at

CALIFORNIA: 6000'; 245°-270°, 35 n mi at 6000'. (7-5)

POMONA-SPECIAL NOTICE: Intermittently during daylgt hrs captive test balloons 5' in diameter moored 300' above terrain will be flown over Convair Plant 2 mi W adjacent to Pomona Heliport. (9-20)

POMONA-BRACKETT FLD: Operative during reconstruction. Caution - men and equipment. (8-14)

RED BLUFF-RADIO: DME coverage 225°-245°, 35 n mi at 10,000'. (6-30) About Nov 20, VOR will be shut down until approx Mar 5, 1958 - conversion to VORTAC. During shutdown following V arwys will be unusable IFR conditions: V23 FJS- Sutter Buttes Int, V25 Geyserville Int - LMT, V195 ILA-FOT. V107 UKI-RBL usable substituting RBL LFR for VOR. (11-13)

RIALTO-MORROW FLD: Clsd Sun due drag races. (10-8)

RIVERSIDE-MARCH AFB-RADAR APPROACH CONTROL: Radar ctl will be exercised over mil acft only until approx Nov 30. (10-30)

SACRAMENTO ARPT: Twr tfc operg in SW quad should exercise caution acct extensive simulated instr apchs including jets VFR wea, actual apchs IFR wea. (4-2)

SALINAS-RADIO: VOR coverage 20°-95° and 135°-295°, 35 n mi at min instr alt. DME coverage 20°-44°, 26 n mi at 7000'; 44°-49°, 17 n mi at 7000'; 49°-90°, 26 n mi at 7000'; 90°-130°, 43 n mi at 7000'; 130°-145°, 26 n mi at 7000'; 145°-153°, 17 n mi at 7000'; 153°-180°, 26 n mi at 7000'; 180°-225°, 43 n mi at 7000'; 225°-300°, 43 n mi at 5000'; 300°-20°, 43 n mi at 7000'.

SAN DIEGO-RADIO; VOR coverage 50 n mi MEA all quads except 20 mi MEA from 310° to 330°. (9-17)

**SAN DIEGO-LINDBERGH FIELD: Jet barrier relctd overrun area rnwy 27. (10-4)

SAN DIEGO-MONTGOMERY FLD: Caution ngt lndg. Keep rnwy lgts in sight during apch. Field unattended sunset to sunrise. Ditch 100 ft short of threshold lights rnwy 28. (10-24)

**SAN DIEGO-PILES ARPT: Abandoned. (10-14)

SAN FRANCISCO: See Oakland Control Zone Notam.

SAN FRANCISCO-RADIO-SPECIAL NOTICE: Acft not on IFR flgt plan and not desiring IFR approach, requested to make initial call to San Francisco Tower, freq 119.1 mc. (7-25)

SAN FRANCISCO-RADIO: About Jan 16, 1958, LFR will be perm discontd. (11-19)

SAN FRANCISCO INTNL ARPT: Const in progress continuously on various sections of fld. Caution advised. (11-4)

SAN FRANCISCO BAY-SPECIAL NOTICE: A moored Balloon (silver with black stripes) 8' x 25' is flown 500'MSL on an irregular schedule from U.S. Naval Net Depot located on Tiburon Peninsula, daylgt hrs under VFR conditions. (10-14)

SAN FRANCISCO GAP RADIO: Homing fac unreliable in area 25° thru E to 130°. (11-15)

SAN JOSE-RADIO: TVOR has scalloping beyond tolerance, 230°-240°. (11-12)

SAN JOSE ARPT-TOWER: About Dec 1, CAA ctl twr will be cmsnd. Freq: 287 kc; 119.9, 121.5, 257.8, 243.0 mc. Rcvs: 3023.5 kc; 122.5, 119.9, 121.5, 257.8, 243.0 mc. Trans and rcvs 121.7 mc for ctl mobile gnd tfc. Class: C (g.7). Voice call "San Jose Twr." (11-15)

SAN RAFAEL-SAN FRANCISCO BAY ARPT: Caution - 60' crane and trucks operg daylgt hrs W end rnwy. (10-14)

SANTA BARBARA-RADIO: DME coverage 325°-30°, 26 n mi at 9000'; 30°-45°, 35 n mi at 9000'; 80°-95°, 35 n mi at 4000'; 110°-260°, not checked. (10-23) LFR has numerous multiples NW and E courses. (9-17)

**SANTA MARIA-HANCOCK FLD: Perm clsd. (10-25)

SANTA MONICA-RADIO: TVOR radials 030°, 075°, 210°, 260° and 323° usable. (1-20)

SANTA MONICA ARPT: Service avail only between 0700-2100 daily. Extreme caution advised during ngt use of fld due to unlgtd open storm drain ditch 175' from S edge of main rnwy. An unlgtd unmrkd difference in elev variable to as much as 25' exists between the open storm drain ditch and taxiway. All taxiways unlgtd. (1-20)

SANTA PAULA ARPT: Granding and paving opern in progress all areas until approx Jan 1, 1958. Use extreme caution. (11-3)

**SELMA ARPT: Perm clsd. (10-2)

SHOSHONE ARPT: Strip clsd for paving. (8-9)

STOCKTON ARPT: Rnwys 11L-29R, 11R-29L and 16-34 clsd due exten const work in progress. Rnwy 4-22 only avail with temp flare pot lgtg. Tetrahedron tied down to indicate active rnwy. Pilots should observe windsock for crosswind indication. Hvy equip crossing SW end rnwy 4-22. Flagman on duty directing ground tfc. Extreme caution advised at all times. Intensive helicopter training conducted in vcnty of fld between 0800-1700 daily xcpt Sat and Sun. Acft utilizing SCK rdo rng for simulated rng apchs should exercise extreme caution. Min alt for low apchs is 528'MSL. (8-12)

CALIFORNIA: THERMAL-RADIO: VOR and DME coverage 330° to 060°, 20 n mi; 060°-085°, 40 n mi; 145°-175°, 40 n mi; 175° thru 180° to 250°, 20 n mi; 250°-280°, 40 n mi at min en route alt. (3-14)
THERMAL ARPT: Use rnwys and taxiways only. Blacktop shoulder areas soft. (2-28)
UKIAH-RADIO: DME coverage 43 n mi; 305°-355° at 6500' MSL; 355°-60° at 9000'; 60°-100° at 7000'; 100°-150° at 6000'. 105°thru S and W to 305°over water not checked. (10-11)

CHARLESTON-KANAWHA COUNTY ARPT-TOWER: ILS glide slope 335 mc operg on test

** basis. (10-29) FLD: Acft fuel and servg avail. 0600-2400E daily. Other hrs by prior arrangement. (2-19)

ELKINS-RADIO: LF rng has multiples and fades all courses. (5-13) DME coverage 35°-95°, 43 n mi at 6000';95°-120°, 35 n mi at 6800';120°-165°, 26 n mi at 6800'; 165°-195°, 35 n mi at 6800';195°-220°, 43 n mi at 6800';220°-35°, 43 n mi at 5000'. (7-1)

ELKINS MUN ARPT: Rnwy lgts 4-22 inop. (11-1)

HUNTINGTON-TRISTATE ARPT: Men, equip. S side rnwy day and ngt; N side daylgt hrs only. Ditches along N side rnwy. Use rnwy only. (9-1)

MARTINSBURG-RADIO: DME coverage 50°-95°, 35 n mi at 2500';95°-150°, 35 n mi at 2000'.

MORGANTOWN-RADIO: LF rng has multiples and fades all courses.

**WHITE SULPHUR SPRINGS-GREENBRIER ARPT: 5000' strip avail. 1500' sod extension W end rnwy 27 usable. Caution advised during thawing wea. Contact Greenbrier unicom for info. (11-15)

**WINFIELD-CLARK ARPT: To be perm closed November 30. (11-13)

WISCONSIN: **DEPERE-NICOLET ARPT: City name change. Formerly carried under Green Bay. (5-7)

EAU CLAIRE ARPT: 265'(1191'MSL) lgtd twr being erected 7.1 n mi NE(46°T) at lat 44-56-54, long. 91-22-55. (10-21)

**FOND DU LAC ARPT: Rnwy lgts perm discontd. (10-17) Arpt clsd. No services. (10-29)

GREEN BAY-RADIO: Oct 22, VOR shut down until approx Dec 12-conversion to VORTAC. Durg this period, the following MEAs can be utilized: V26, V55, V1500-AUW VOR to Int. R103 AUW VOR and R001 MKE VOR, 9000'; Int R103 AUW VOR and R001 MKE VOR, via R300 HIC VOR to Pentwater, Mich. Int., 9000'. V7- MKE VOR to Int. R001 MKE VOR and R103 AUW VOR, 9000'. Direct Routes (authorized for NCA only) AUW VOR to NOR H fac, 2400'; NOR H fac to HIC VOR, 4000'; NOR H fac to MKE VOR, 2600'. (10-22)

LA CROSSE-RADIO: VOR radials 320°-335° have course roughness beyond tolerance but flyable. (8-13) Oct 28, DME shut down until approx Jan 27, 1958-relctn. Soon, TVOR will

WISCONSIN: be cmsnd. Freq: 108.4 mc. Ident: LSE. Lctd lat 43-52-34, long. 91-15-23.

**LAKE TOMAHAWK-DOLHUNS ARPT: Effect. Dec 1 bcn & rnwy lgts will be operg on req only.

LODI LAKELAND ARPT: New arpt reported: Lat 43-19-40, long. 89-30-55; lctd 0.5 mi NE of Lodi; 1 strip-(E/W) 2640' x 200'; 87 oct gas; remarks-unattended. (1-14)

MACISON-TRUAX FLD: Caution crossing hwy lndg rnwys 22, 26, 31. E taxiway N of admin bldg perm clsd to all acft over 10,000 lbs. Sod unsafe. 59'(916'MSL) lgtd radar twr being erected atop terminal bldg. (10-11)

**MANITOWOC-MUNICIPAL ARPT: Formerly carried as Kakuk. (9-19)

MERRILL ARPT: Closed due construction. (10-3)

MILWAUKEE-GENERAL MITCHELL FLD-TOWER: All acft apchg Milwaukee with intentions to land will, durg VFR conditions and if equipped with multiple rdo freq, make the first contact with Milwaukee apch ctl on 124.9 mc. This contact should be made at or before reaching a point 15 mi from the arpt giving position and alt. (5-10) VHF/DF coverage 3500' MSL at 40 n mi all azimuths. ILS glide slope unusable from MM to touchdown. No automatic approaches. (11-18) FLD: Obstn lgts on apch end of rnwy 13 are obscured by trees. Parking facilities lmtd itinerant military acft on unofficial business may find parking facilities unavailable. Avoid confusing rnwy 1 with parallel taxiway to left, (8-15) Rnwy 13-31 clsd to jet acft. (8-21) 4350' rnwy 7L-25R open to daylgt opern only. 630' not usable marked with yellow line and yellow cone. (11-20)

OSKKOSH-WINNEBAGO CO. ARPT: Caution-bldg const on fld-use rnwys only. Use only N/S and E/W rnwys during winter months. (2-21)

PHILLIPS ARPT: 100' unlgtd TV twr erected 900' W of S end of N/S rnwy. (6-26)

**PORTAGE-PORTAGE-MANLEY ARPT: Longest rnwy 2000'. (9-16)

WATERTOWN ARPT: 103'(923'MSL) lgtd pole & pipe supporting an antenna being erected approx. 0.8 n mi N at lat 43-10-57, long. 88-43-15. (10-23)

✱WOODRUFF-ARBOR VITAE-RADIO: Privately owned H fac operg on 206 kc oper on req.

WOODRUFF-ARBOR VITAE ARPT: Attended part time until May 1, 1958. Fone Minoqua 367 for serv. (11-12)

WYOMING: CASPER AIR TERMINAL-TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 n mi. Not to be used for auto pilot apchs. About Dec 1, Apch Ctl will be cmsnd. Freqs:348.6 mc & 121.9 mc for ctl gnd tfc. Class:

** AC(g). (10-25) FLD: Two 200' fences SW end of ramp not obstn lgts. (11-16) Unicom freq changed from 122.8 to 123.0 mc. (11-19)

**GILLETTE ARPT: Rnwys open & usable as follows: S 3400' of N/S, 2300' of NW/SE, 3000' E/W, 3000' NE/SW. N 2000' of N/S rnwy soft & rough. Not maintained. Emerg or overrun only. Soft when wet. Use rnwys only. (11-5)

**GREYBULL ARPT: E/W rnwy clsd. Const equip. stored E of N/S rnwy. N/S rnwy now open. (11-12)

KEMMERER ARPT: Clsd. unsafe for acft. Use only in extreme emerg. All lgts turned off.

LARAMIE-RADIO: DME coverage 155°-225°, 34 n mi at 15,000';225°-300°, 26 n mi at 15,000'.

LUSK ARPT: E/W rnwy clsd, const. Shorter rnwy graded out in the dirt S of original rnwy for temp use. Use caution especially during wet weather. (10-8)

NEWCASTLE-MONDELL ARPT: Caution-men and equip. working on rnwy 14-32. (8-9)

ROCK FPRINGS-RARIO: ILS glide slope has lgt to moderate roughness between OM and LFR. Sept. 30, VOR shut down until approx Jan 15, 1958-conversion to a VORTAC. Durg this period the following arwys will be affected: V6N between FBR and CKW; V4 between MLD and RKS; V4 and V4N between RKS and CKW. V6 between FBR and CKW will be usable at 11,000'. (9-26)

SARATOGA-SHIVELY ARPT: Const in progress 1500' SW end NE/SW rnwy-area mrkd.

SHERIDAN-RADIO: VOR coverage lmtd to approx 35 n mi between 150° and 280°. Moderate course roughness exists in mountainous area.

THERMOPOLIS ARPT: Caution 1800' S end N/S rnwy clsd-const; only 3300' avail.

TORRINGTON ARPT: Oil well storage tanks lctd on S edge E/W rnwy 300' from W end. Oil well pumping unit lctd on E side NE/SW rnwy 300' from SW end of rnwy. New arpt & rnwy under const 1 mi E of town. Clsd to all tfc until completion approx. March 1958.

Puerto Rico: SAN JUAN-ISLA GRANDE TOWER: Clsd-rnwy lgts avail by contacting San Juan overseas rdo, San Juan twr or Coast Guard Air Detachment. (11-22) FLD: First 500' W end rnwy 9R-27L unusable. Daylgt operns proceed with caution. Use outside taxiway in front of large hangar near entrance. Equipment on hangar ramp. (4-12)

SAN JUAN-PUERTO RICO INTERNATIONAL ARPT: Parking circles, 2, 3, 4 and 5 on N departure ramp not fully visible from tower-caution. (6-7) Lighted temporary steel tower, 110' MSL, located approximately 3500' off north boundary of rnwy 7-25. (5-20)

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

·Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS

WATERLOO, IOWA-MUNICIPAL ARPT, TVOR-30, Original, Effect. 21 Dec. 57:
Change minimum altitude over facility to read "1500 feet" in lieu of "1400 feet".

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized for such airport by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

AIR NAVIGATION RADIO AIDS

ALWAYS CHECK NOTICES TO AIRMEN SECTION

ATCS = Air Traffic Communications Station (CAA)

VHF OMNI-RANGE: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated ATCS. (C) The station identification is monitored continuously by the communicator at the associated ATCS. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated ATCS. Category I VOR = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored soley through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an ATCS, and located too distant from ATCS to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range courses are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two courses is a yellow N quadrant. The letter immediately following a range course indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N" aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility. (S) = State facility.
(g) = Twr equipped with 121.9 mc or (g.7)= Twr equipped with 121.7 mc for ctl of gnd traffic.
(0700-2300) = Hours of operation local time.
(3) = Monitoring category
(B) = Blue Hemisphere. (Y) = Yellow Hemisphere
→ New or revised data
• = Automatic voice identification
■ Information deleted.
✓ New facility has been added to tabulation and listed on page 31 until placed in proper sequence.

RADIO CLASS DESIGNATIONS

AC. . . . . Approach Control Tower, CAA (transmits on voice channel of associated ranges and ILS in addition to frequencies listed)
ARSR . . . . Air Route Surveillance Radar
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, CAA
CI . . . . . Control Tower, (City, County, Private, etc.)
CM. . . . . Control Tower, (Military, listing only civil frequencies available)
D . . . . . Distantly controlled
DME. . . . Distance Measuring Equipment
FM. . . . VHF fan marker (100 watts)
GCA. . . Ground Controlled approach system
H. . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . . . Instrument Landing System (voice on localizer channel)
J. . . . . L MF (200-415 kc) voice facility on other than range frequency
LFM. . . VHF fan marker, low powered (5 watts)
LMM. . . . Compass locator station when installed at middle marker site
LOM. . . Compass locator when installed at outer marker site
LVOR. . . Low power VOR (with standby equipment)
MA. . . . . Range (adcock, vertical radiators), power less than 50 watts
MH. . . . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . . . Range (loop radiators), power less than 50 watts
MM. . . . VHF middle marker
MRA. . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . . . Range (loop radiators), power 50 or more, but less than 150 watts
OM . . . . VHF outer marker
P. . . . . Point-to-Point radio
RA. . . . Range (adcock, vertical radiators), power 150 watts or more
RAPCON Radar Approach Control
RL. . . . . Range (loop radiators), power 150 watts or more
S. . . . . Simultaneous range, homing signals and voice.
T. . . . . Teletype

TVOR. . . . Low power VOR (no standby equipment) located on airport
TX . . . . . Principal teletype
V. . . . . Additional VHF voice feature on other than range frequency
VAR. . . Visual-aural VHF range
VOR. . . . VHF omni-directional range (omni-range)
W. . . . . Without voice facilities on range frequency
Z. . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All CAA MH facilities operate continuously unless cited as follows: (on req)
3. All CAA ranges operate continuously. Those which are not manned continuously are cited in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF and LF/LMF ranges listed with the same identifier are controlled by the same ATCS. Due to space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget, April 23, 1956

For sale by Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. - Prices: annual subscription $2.25, domestic; $1.00 additional for foreign mailing; individual copies vary; this issue 50 cents.

RADAR AVAILABLE: How and Where

(10 December 1957)

PAR = Precision Approach Radar. **ASR** = Airport Surveillance Radar. GCA = Ground Controlled Approach (Military Equivalent of Combined ASR and PAR Equipment) **ARSR** = Air Route Surveillance Radar. **RAPCON** = Radar Approach Control.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with Ground Controlled Approach (GCA) which is an instrument approach aid.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control. Weather minimums, associated runways and GCA procedures are listed in the Airman's Guide.

RAPCON - At certain locations, the surveillance portion of Military RAPCONS is operated by the CAA and service is available to all aircraft. These are listed below.

RADAR BEACONS - Military type radar beacon ground equipment of the IFF Mark X type is being made available for operation at all CAA operated RAPCON facilities and some air route surveillance radar facilities. This system is available only for operation with military aircraft and should not be confused with the air traffic control radar beacon system (ATCRBS) now under development. See "Remarks" column of Radar Approach Control (RAPCON), page 4. For ATCRBS see note page 4.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C. O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions for aircraft to make 360 degree turns for identification. In either case, instructions will be followed at the pilot's discretion. After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible. Civil Minimums at military installations established by the CAA are 400' ceiling and 1 statute mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums. Navy units are prepared to transmit on HF from 2,000 to 18,000 kc and receive any frequency from 1,500 to 9,050 kc to aid any plane in emergency.

RADAR WEATHER ADVISORY SERVICE: See page 17, Flight Information Manual, Vol. II, dated August 15, 1957.

CAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 118 mc are not guarded. Other transmitting frequencies listed are guarded plus 3023.5kc; 122.5 mc, unless 122.7 mc is shown under Remarks. Transmit and guard 121.5 mc all locations.

RADAR BEACONS - (continued from page 3)

ATCRBS - Air traffic control radar beacon transponders (ATC transponders) are being installed in some civil aircraft to participate in the forth-coming in-service evaluation of this beacon system. Since the ATC transponder can be used with Mode 3 of the IFF Mark X system, the following will govern the operation of the ATC transponder in order to reduce interference and clutter on IFF Mark X radar displays.

1. Within the environment test area designated within a 200-mile radius of the following locations, the ATC transponder will be operated in accordance with the request of air traffic control. Ground equipment installations will start approximately October 1, 1957, at the following locations: New York center; Idlewild, La Guardia and Newark towers. Installation at the Washington center and tower, the Chicago center and O'Hare tower and the Norfolk center will follow as soon as equipment becomes available. Notification of the start of the actual evaluation will be made at a later date.

2. Air traffic control transponders will be adjusted to Code 00 and turned on only in aircraft operating on an IFR flight plan unless otherwise requested by any ground station.

3. When filing a domestic IFR flight plan for an aircraft equipped with a functioning ATC transponder, this shall be made known by adding the word "transponder" immediately following the aircraft identification. Example: "Braniff six transponder".

4. Aircraft using the "Stargazer" service offered by the Air Defense Command will advise the radar operator of the status of the ATC transponder and will operate it in accordance with the operator's request regardless of the type of flight being conducted.

5. Aircraft operating from the domestic area will comply with (3) above. Aircraft entering the domestic control area will only advise oceanic air traffic control of the status of the Air Traffic Control transponder when making the first radio report to the United States oceanic air traffic control center.

DIRECTORY OF AIRPORTS – LEGEND

CITY AND AIRPORT NAME

(AF) City and Airport Name (with L or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of above citation of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

NOTES:

1. Where lights are owned or maintained by CAA the site number and airway abbreviation are included in the city and airport name column ie: Chadron, 15, CYS-HON.
2. USAF aircraft are permitted to use only those fields prefixed with an AF, A, N, NG, CG, P, PC.
3. When city and airport names are identical, the airport name is omitted to conserve space.
4. When city is part of airport name, a dash will appear between city and airport, such as Venice-State.

TYPE

P - Public Use L - Limited

NOTES

PUBLIC USE - Intended for general use by the public at large, this category consists of:

(1) Operationally active airports (those attended during normal working hours of each day, and provide, as a minimum of service, aircraft fuel for sale at the airport).
(2) All airports serving scheduled and large irregular air carriers as regular, alternate and provisional stops.
(3) All CAA intermediate landing fields.
(4) All airports having a true light certificate to indicate a lighted airport.
(5) All airports with CAA facilities.
(6) All airports on which Federal funds have been expended under the FAAP and the Development of Landing Areas - National Defense.

Data on these airports are obtained from physical inspections made by CAA personnel.

LIMITED - All airports not qualifying as "Public Use" (See definition above)

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is from the center of referenced city to airport and carried in statute miles.

ALWAYS CHECK NOTICES TO AIRMEN SECTION

LOCATION (Continued)

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Elevation is given in feet above mean sea level and is based on highest usable portion of landing area.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY AND FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, weather reports, and unicom available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet, using 70 as division point. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h -runway is paved (concrete, asphalt or similar type of paving)
aw -allway field
(26) -runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is either not available or not operating standard hours (sunset-sunrise)

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach
7a, 7b, 7c - High intensity instrument approach, U. S. National Standard configuration A, B, or C. See page 71 for diagrams.

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor airframe repairs
S3: Storage, minor airframe & minor powerplant repairs
S4: Storage, major airframe & minor powerplant repairs
S5: Storage, major airframe & major powerplant repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or CAA communications station on field.

UNICOM

Unicom (Aeronautical Advisory Station transmitting and receiving, during the airport hours only, as follows):
U - 122.8 mc (for airports without a control tower); and
X - 123.0 mc (for airports with a control tower).

FUEL OCTANE

F1: 80 oct., at least
F2: 80/87 oct., and lower
F3: 91/96 oct., and lower
F4: 100/130 oct., and lower
F5: 115/145 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.
(b) "CLOSED" indicates closed to all traffic except in emergency.
(c) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.
(d) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.
(e) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.
(f) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
(g) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP: Airport names are capitalized.
3. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
4. NEW AIRPORTS: At the end of each state, under this listing will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.
